there is nothing outside of 'normal' channels. and about all you are going to get for posting those comments in here are 2 things... more 'amen' messages from arm chair complainers like you, or 'get bent' messages from others. like it or not the arrl is as close are you are going to get to a nationwide organization that could do anything about what you are complaining about. if your sec can't do the job, then find their boss and convince them that you can do a better job... don't think their boss works, then try to take their job. you obviously have the experience, so get in there and do it.

>
>
> Isn't this a poor way of responding to a post? Thanks Dave for your

>
which other response would you like... a hollow 'amen' that does nothing, or a nasty 'get bent' that just stirs the pot with the same result?

>transceiver by taking advantage of Field Day (simulated emergency test) in
>June.

Problem #1. The event in June (Field Day) is not a simutlated
emergency test. It is an emergency preparedness exercise. I believe
there are a couple of SETs (actual title) during the year, and at
least one is in the winter, if I recall.

>Operating on the 'National Simplex Calling Frequency' 146.52 MHz

Problem #2. I didn't check the FD rules specifically, but the rules
for ARRL contests generally (and don't think that FD isn't a contest)
prohibit contacts on the calling frequencies.

>From my numerous calls I was able to contact NO ONE! Not one person
>responded to my Field Day calls throughout the day and I heard NO ONE
>calling Field Day! Not one Ham could I find operating Field Day on the two
>meter National Simplex Calling Frequency!

Based on my previous paragraph, I'm not at all surprised by that.

>Yet to my surprise, I was able to consistently 'key-up' repeaters from
>Jacksonville to Palm Bay---approximately 2/3's the length of the state of
>Florida.

Problem #3. Did you ID every time you kerchunked those repeaters?

>And to consider, this is an amateur service simulated emergency
>test in Florida occurring only 10 months after the destruction of Charley,
>Frances, and Jeanne.

Problem #1A. Field Day still isn't a simulated emergency test.

>It made me wonder just how interested Hams are in emergency communications.

Problem #4. I wonder how interested you are in emergency
communications. Why didn't you get together with any local groups and
participate in their Field Day operation? After all, if it was a
simulated emergency test, as you insist on calling it, and you are all
in a lather about hams' interest in emergency communications why

weren't you actively involved in it instead of kerchunking 2M
repeaters?

>I did have a nice conversation with a fellow 100 miles away via his repeater.

Instead of participating in the emergency preparedness exercise? Why
didn't you get on HF and work some of the tens of thousands of FD
staions that are on from Saturday through Sunday? If you think wide
area disasters such as hurricanes are going to be well served by 2M FM
communications through repeaters you are as naive as those who think
cell phones are going to be their salvation in the same event.

>Ideally, the 60 meter amateur band might become an important part of an
>emergency response provided by the amateur service. But, I just don't
>see any interest by the ARRL and those frequencies, every time I check
>them, remain unused.

What does the allocation say? I haven't looked at it, but when we got
the 10 MHz allocation several years ago it was on a secondary basis
with a fairly serious proscription regarding interference. That and
the narrow bandwidth of the allocation is why 10 MHz is excluded from
both contests and operating awards. Any chance 60M is similar? It
would seem so based on the FD rules segment you quoted: "2. Object: To
work as many stations as possible on any and all amateur bands
(excluding the 60, 30, 17, and 12-meter bands)..."

>After nearly forty years as an amateur radio operator, these are some of the
>issues that make me reconsider the utility of the amateur service as an
>emergency communications provider .

After more than forty years as an amateur radio operator, I see the
emphasis on emergency communications the one consistent thread from
the League all these years. In the local club I was involved with in
Illiniois for several years and the one local club here in Florida it
actually got tiresome as more and more of the 2M ops were more
interested in shiny badges and flashing lights than actual
communications preparedness.

>Although the amateur service has played a significant role in handling
>emergency communications in the past, the changing face of technology
>has relegated the amateur service to a position of little consequence---
>possibility, with better leadership, the amateur service can regain its former
>stature.

Leadership begins from within. Instead of kerchunking repeaters and
trying to make "contest" contacts on the calling frequency, you should
be participating in FD--if not with an organized group, then by
yourself, on HF, not whining on usenet three months after the event.

>I sincerely think, that with the devastation of Charley, Frances and Jeanne
>last year, and Katrina this year, the ARRL really needs to get off their ass
>and come up with a serious emergency communications plan. I suspect that
>the ARRL is a 'has been' organization and a new vision for amateur radio

>(emergency communications) needs to take their place.

You said, "based upon my adventures last year in Florida when we got pounded by three hurricanes..." Did you get off your ass and provide any emergency communications assistance? Or did you spend your time kerchunking repeaters in 2/3 of the state?

Gee TOM....do you think you had problem on the "National Simplex Frequency"
of 146.52 because you are NOT SUPPOSED TO USE IT for contesting?

Just a thought.

Read the ARRL Field Day Rules at URL:
http://www.arrl.org/contests/rules/2005/rules-fd-2005.html

SEZ "9.3. Remember that the national simplex FM calling frequency of 146.52 MHz should not be used for making Field Day contacts."

We made lots of contacts on 2M SSB often 144.200 MHz

--
CL -- I doubt, therefore I might be !

Since Field Day partakes of many elements of a contest, you aren't supposed to use the National Simplex Calling Frequency for Field Day activities. Our group had a VHF station set up for Field Day and we contacted people from New York to Florida to Texas, etc (we are in Michigan). We used SSB and CW and both 6 meters and 2 meters. For extended distances, SSB and CW are better choices than FM. If you had tried the SSB calling frequency, you might have had better luck.

FM is not good for long distance or weak signal work most of the time. SSB
and CW beat it hands down.

not entirely accurate given the properties of it isn't very prodcutive
however at any great range

but using them and the number of FM units out there

they should be tried more than they are, if Field Day is realy any
kind of emergancy drill, indeed the club here I was the first person in
years to 6m SSB let alone any FM work

I'll assume that's true in your area. In this area it's not true -- here (Minnesota) 2M is far and away the most popular band in use on an everyday basis.

First, likely I missed in in the original post, but I don't recall him mentioning the use of FM modulation. In every field day and emergency preparedness I have ever participated in, a.m was the accepted standard.

Second, the use of a 75-watt transmitter with a collinear raised 30-feet above the ground on field day? Evidently TOM doesn't grasp the spirit of the event which combines with the fact that he isn't a very experienced ham operator. Then too, the ham community has eroded considerably since these exercises were devised. In fact, a competent ham should have been nearly able to work multiple states with the rig he has described.

Anybody left alive here that remembers the 2M Gooney Box, the rig that was the standard for ham emergency communication for more years than I personally care to remember? Its final was a 2E26; Its antenna was typically a quarter-wave stub (a piece of stiff wire poked into the UHF connector on the top of its box or an antenna consisting of a half-wave piece of tv twin line. Its output was anywhere from 5-watts to 10-watts run into that improvised antenna. When battery powered on field day, the output of the rig was arguably between 3 and 5-watts.

Still on field day exercises conducted in preparation for an emergency, even the low power rigs with a minimal antenna could garnish at least 50 contact on field day, but this was during the 1970s. Ham radio has seriously declined since that time. This is why I ceased to renew my K2JEZ General Class license around 1982.

Read into my above comments what ever you want.

ROFL Mike, great follow-up.

What he likely did was to transmit a series of CQs on an emergency distress frequency.

Damn, this guy posts that he has a 75-watt transmitter and a high gain antenna 30-ft above the ground and he is clueless as to why he made few QSOs. As clueless as this dork must be, maybe it's time to toughen up the licensing requirement to what they were around1959!!!!!

He should be operating on CB and not ham radio channels!

He talked about 146.52 simplex which might as well be mentioning FM.

>In every field day and emergency preparedness I have ever participated
>in, a.m was the accepted standard.

It's been decades since you've participated, then, because FM pretty much took over the 2M band in the '70s. There's still a lot of weak signal work--SSB and CW, but AM? It can hardly be found. And it hasn't been the accepted standard since the '60s, maybe.

>Second, the use of a 75-watt transmitter with a collinear raised
>30-feet above the ground on field day?

What are you talking about? Neither of those parameters sound at all out of line at FD. For VHF you definitely want the antenna as high as possible. The only thing wrong with the 75 watts is the power required to make it run. 25 watts would be more than enough.

>Evidently TOM doesn't grasp the spirit of the event which combines

Apparently neither are you.

I rest my case. With no enhancement, there are a lot of places where you'd be hard pressed to work out of state with the setup you think is too much. South Florida would certainly be one of them.

>Anybody left alive here that remembers the 2M Gooney Box, the rig that

K2, huh? New York City? That explains why you were able to work "multiple states." You have, what, six of them within 100 miles? Try that in any state west of the Appalachins.

>Read into my above comments what ever you want.

Whiny old timer, out of touch with reality, loss of memory of old time ham radio, pissed because of Incentive Licensing, lets other people determine his enjoyment of a hobby, still hanging around the amateur radio newsgroups despite being unlicensed for nearly a quarter century.

Yeah, what a credible story.

I think the following pretty well indicates that the hams do a very good
job of providing communications in times of emergency, with or without
the ARRL. Hardly regulated to a position of little consequence,
especially when ham radio is sometimes the only means of communications
that is working, as was in some cases with Katrina.

****
As usual, ham radio operators help sustain wide-ranging relief efforts
By Andrea Kelly
ARIZONA DAILY STAR

When all else fails, it's ham radio to the rescue. Across Arizona, ham
radio operators are helping sustain Hurricane Katrina relief efforts by
helping storm-torn communities communicate with rescue workers and
family across the country.

This is not a first. Ham radio operators come out of the woodwork during
disasters around the world, even transmitting in Morse code if language
barriers pop up, said Mike Swiader, president of the amateur
Superstition Radio Club in Mesa.

Ham radio operators have contributed to emergency communication efforts
since World War II, Swiader said, and were crucial in post-9/11
emergency communications, as well as during the Asian tsunami last
holiday season.

Ham radios work when other communication systems are down because they're powered by solar energy, batteries or generators rather than the usual power sources.

The messages are passed from radio to radio until they get to the one they are directed to, so radios don't need to be near each other to receive signals, like regular AM/FM radio signals.

"We've been involved in passing traffic to and from the Louisiana and Mississippi area," said Tom Fagan, a leader of the Arizona ham radio operators organization. "Whatever needs to come in and go out, we're doing."

When Arizona's ham operators - there are about 16,000 of them - get messages from the hurricane area, they send them along to agencies like the American Red Cross and the Salvation Army in the Southeastern region of the country.

"We're the link," Fagan said.

Because communications within a disaster area are often jumbled, Swiader said, it's frequently easier for someone there to contact an operator in someplace like Arizona, who can then relay the message back to a recipient in the disaster area.

"Sometimes it's easier to be heard that way," he said.

More than 30 ham radio operators from Arizona have already headed toward the disaster area, hoping to assist relief efforts and give emergency workers a way to communicate with each other, as well as assisting searches for missing persons.

"They're moving in when they're allowed by American Red Cross and Salvation Army," said Ned Stearns, a Phoenix ham operator and vice director of the American Radio Relay League, the national organization for ham operators.

In fact, the ham operators plan to compile a list of people they can determine as missing, deceased, alive or unknown, based on information transmitted over the ham signals.

To find out about people in the area, visit www.satern.org and fill out the health and welfare information request for the person you are trying to find. This information will be sent through the Salvation Army emergency radio network.

Ham radio operators are helping from afar
Sunday, September 11, 2005
By DONNA FORK
For the Times dfork@knology.net

But sometimes, even the airwaves can be shut down

They also serve who listen and wait.

Huntsville amateur radio operator Douglas Hilton and other "hams" in North Alabama are helping victims of Hurricane Katrina by relaying messages between families, officials and each other.

Lately, Hilton's been spending most of his spare time in his "ham shack" listening to calls for assistance. The systems analyst for Intergraph Corp. is one of thousands of amateur radio operators who help people during emergencies.

Hilton is unusual in the ham radio world because he wears three hats: He is an amateur operator; a member of the Alabama State Defense Force, heading the Communications Platoon for North Alabama; and he's also a military communicator authorized to use the Military Affiliate Radio System.

His connection to the military (although he is a civilian) gives him access to additional radio frequencies most amateurs can't access. He has been a ham radio operator for 42 years; his father had him build a crystal radio when he was 7 years old, and he got his ham license as a teenager. But he wasn't all that active until after the terrorist attacks of Sept. 11, 2001.

"That hit me right between the eyes," he recalled, and he began to get back into "hamming."

Now Hilton averages about 100 hours a month on the airwaves and takes countless courses and certifications. He noted that amateur radio operators are "amateurs only in that we're not paid." In return for service "the government gives us frequencies."

Hilton said the North Alabama ham community is large.

"The astronauts are all ham radio operators," he said, noting that astronaut Owen Garriott "was the first ham in space."

Hilton''s "ham shack" is not really a shack at all. It is located in a formal dining room - complete with crystal chandelier. It includes six radios and two computers.

"You don't need six, but don't tell my wife, please," Hilton said as his wife, Diane, laughed. She recently obtained her "technician class" license, which is the entry-level license for ham radio operators. The next is "general class." The highest, which Hilton has, is "amateur extra." Anyone can be an amateur radio operator, Hilton said. There is no age limit: Hilton knows a local ham who is 18 and another who is 89.

It doesn't cost much to be an operator either, he said. A beginner could purchase enough equipment to get started for about $300. Courses are free through one of the local ham radio clubs, of which there are several, including the Huntsville Amateur Radio Club (the Web address is www.harc.net).

In addition to six radios, Hilton has two computers: a laptop and a desktop. "The radios are hooked into the computer." With his setup, the Hiltons can talk to other hams as far away as Japan.

But for the past two weeks there hasn't been time to chat about matters such as which antennas they like the best. There are emergency frequencies to monitor. At the moment, a critical one is the Salvation Army's emergency frequency, Hilton said.

Hilton never knows if it will be a busy night or a quiet one. Recent solar flares have added to the uncertainty because they disrupt communications. Friday, during the late afternoon and early evening, it was unusually quiet.

"I'm a little surprised," he said Friday. "I can't believe how dead these bands are."

Solar flare

It could be a solar flare, or could be something else. "That's the problem, you never know," he said. The waiting, the listening, "it wears you out." But it's worth it when you hear a voice and "you might be the only person who can hear this guy."

On Thursday night, when Hilton was expecting problems, reception was fine. He was able to contact two operators in Louisiana. He also heard one Mississippi ham talking to another ham "so at least one is working there."

ecause of the Hurricane Katrina disaster, there are thousands of messages piling up, waiting to be delivered by ham radio operators: What will happen when all their radios start working again?

People like Hilton will be extremely busy. There are thousands of ham radio operators in Louisiana and Mississippi. When they all get back to the airwaves, it will be quite a challenge to sort out all the messages.

But meanwhile, as they waited for the deluge of messages, on Thursday night the Huntsvillians received a call for help from New Mexico.

Maura Campbell Kingston of Clovis, N.M., was trying to reach her aunt, 76-year-old Sister Joan Campbell, a nun, of Harvey, La. Kingston called the Salvation Army, which contacted a ham radio operator, who called Hilton.

Hilton tried Thursday to reach a radio operator in Louisiana to check on Campbell, but almost all of them were off the air. Finally on Friday night Hilton got through to "KG5YK," who is Robert A. Turner of Elm Grove, La.

When Turner's message came through, hams from all over the United States could be heard, eager to talk with him.

Helping 'ham brother'

The outpouring of sympathy could not be contained: Radio operators from Texas, Indiana and elsewhere all expressed their support for their "ham brother" in Louisiana.

"I hope this never happens again," said Turner of the Katrina disaster. "It's been a tough time. ... I'm looking for the right words." He

thanked the other hams for their all their help.

"You'd do the same for us," the ham from Texas said. Others echoed his sentiments.

Turner gave Hilton information about when to call with his "health and welfare message" about Kingston's aunt. Hilton vowed to keep trying to deliver the message "for as long as it takes."

But that proved to be unnecessary.

Friday night, after calling her aunt repeatedly, Kingston finally reached her by phone. She was still at her home in Harvey.

"She was OK," Kingston said in a telephone interview Saturday. "Harvey stayed dry." But the area was without power and Campbell "was sitting in the dark with her flashlight."

Later, Kingston called Hilton to thank him. She said he told her: "I'm just doing it because I want to help."

Kingston was impressed.

"I believe that thing about Southern hospitality."

Ham radio proves to be more than a hobby
By Jeannetta Edwards

Daily Times Leader

When Hurricane Katrina hit, telephone and cell phone communication hit an impasse because of downed lines and towers. But, amateur radio operators did not miss a beat or a transmission.

"Before and after the hurricane, this has proven to be the most reliable form of communication," said Randall O'Brien, a retired highway patrolman who has been involved with ham radio operation for 35 years.

"People thought when they got cell phones, they didn't need us anymore," said O'Brien, an advanced licensed operator, who often talks to missionaries in South and Central America.

According to Denver Baker, Clay County has more than 30 amateur radio operators, but only a small fraction are active.

"It's a wonderful hobby," said Baker, whose wife recently received her technician license.

The multi-faceted operation includes digital and satellite communication and is enjoyed by all age levels.

"This is a good hobby for seniors or for young people," said Baker.

By becoming a ham radio operator, which requires taking a test to obtain a license, people can communicate with others anywhere in the world.

"The classes for the test are free," said Baker, "and we help you with everything you need to know."

According to Baker, who has been enjoying this hobby for the last 10 years, the only investment required is the fee for the test and the purchase of equipment. A handheld transmitter cost around $100.

The self-policing group ensures that everyone adheres to the rules and regulations.

"We're called amateur radio operators, but there's nothing amateur about it," said O'Brien, who first became interested in electronic at age 13.

The group, which also belongs to the American Radio Relay League, meets monthly in West Point.

"We have a good bunch of hams in this area," said Baker. "We bring food at our meetings and have a good time."

"It's nice, especially for seniors," said Baker.

For information on getting involved in ham radio operation, call O'Brien at 494-2898 or Baker at 494-9096.

Ham Radio Operators Offer Help

By Beth Hahn
Mountain View Telegraph
Since Hurricane Katrina hit New Orleans last week, several ears in the East Mountains and Estancia Valley have been tuned to amateur short-wave radios.
McIntosh resident Ed Brooks said local Ham radio operators are willing to relay messages from the Gulf Coast if needed.
"We guys here in the Estancia Valley are just listening," he said. "We haven't had any need for what we can offer."
Although they may not be needed yet, Brooks said local Ham radio operators are still listening in to conversations taking place in Louisiana, Mississippi and Alabama.
During the interview with Brooks, his Ham radio was tuned to a conversation involving a Coast Guard helicopter that was rescuing a family from a rooftop in New Orleans with direction from another Ham radio operator.
Brooks said similar situations have been broadcast hundreds of times during the past week.
"It's been really spotty, but what we've been (hearing) is that it was good fortune that somebody down there had Ham equipment," he said.
Daryl Clutter, an Edgewood Ham operator and member of the Salvation Army's shortwave network, said he relayed a message from Ontario to U.S. Coast Guard officials in Washington, D.C., that originated in Louisiana.
"It was just the word 'help' spelled out two times," he said.

Like Brooks, Clutter said he has stayed close to his Ham radio since Aug. 29.
"There's been so much going on," he said. "Every day, something happens."
Clutter, a former truck driver who often delivered frozen food to the Gulf Coast, said radio traffic has slowed since the hurricane devastated the region.
"You just wonder who all you know, that used to be your customers down there, that are still alive or had the good sense to get out," he said.
As amateur radio operators, Clutter said, Ham enthusiasts practice for disasters "every day."
"There's only so many cell phone frequencies," he explained. "If the phone system goes down, there's no way ... (one company) could handle all the 60,000 or 70,000 phone calls."
Mountainair resident and Ham operator Bob Scupp said the Salvation Army network alone has handled more than 128,000 messages since Aug. 29.
Brooks said Ham operators have been relaying messages from residents to volunteers or emergency personnel. Since a large number of National Guard and military personnel have arrived in the area, Brooks said the messages have changed from pleas for help to questions about well-being.
Shelters for evacuees are beginning to utilize Ham radios to communicate with other shelters to help families find missing relatives, Brooks said.
Rescues are still going on.
"There's been instances where they're still finding people, trapped in houses, trapped in buildings or running out of oxygen," said Clutter. "It's just terrible what's going on down there."
Clutter and Brooks said they will not offer assistance unless someone requests contact in the Albuquerque area.
"We don't want to tie up the frequencies," Brooks said.
Clutter and Brooks said they will continue to listen to their Ham radios for messages or relay requests until communications are restored in the Gulf Coast.
"We live and breathe this," Clutter said.

Amateur radio operators provide vital communications support
By Teresa Atkerson
MCALESTER NEWS-CAPITAL (MCALESTER, Okla.)
MCALESTER, Okla. -

With more than 10,000 requests for help in finding loved ones, the amateur radio operators in Louisiana are extremely busy.

In fact, they are so busy, they have asked people to wait with their requests unless there is an extreme emergency.

Ralph Suter, with the Pittsburg County Amateur Radio Club, said they had about a half dozen requests for assistance in locating loved ones in the area devastated by Hurricane Katrina. ï¿½The Red Cross funneled the

requests for health and welfare,ï¿½ he explained. Now, the national traffic system is backed up with the requests, he said, because there were so many.

There are extreme problems with communications in New Orleans at the present time. Suter explained VHF radio has to have line of sight while amateur radio operators can use lower frequencies that can bounce off or curve to get the message through. ï¿½A benefit of amateur radio is you can throw a piece of wire in a tree or up a flagpole. With 12 volts of power, you can operate on a local or even worldwide basis,ï¿½ he explained.

As an example, Suter said recently an amateur radio operator in Louisiana had some kind of problem that he couldnï¿½t get help with after the hurricane. He put out the message, it went through Washington state to Texas and then into Louisiana where the right people were found to help him.

Amateur radio operators can also communicate via Morse Code, upload through television or computer or radio to satellite, Suter said. That gives them even more advantages in communication.

Jim Russell, president of the PCARC, said amateur radio has been around as long as there has been radio. Even in World War I, amateur radio operators helped with messages in Morse Code, which is something operators today still must learn as part of their licensing process.

ï¿½We look at it as a hobby,ï¿½ Suter said. ï¿½Itï¿½s a resource of individuals because they have an interest to develop the skills to operate radios in various modes.

ï¿½Itï¿½s a resource for trained communicators.ï¿½

There are forms that must be used when transmitting messages. ï¿½When it goes into the system at one point and comes out at the destination, it is exactly the same information, even with the misspelled words,ï¿½ Suter said. ï¿½Itï¿½s our responsibility when handling traffic that it comes out exactly as it comes in.ï¿½

Suter said many of the operators use their radios on a daily basis while others check weekly. When it comes to disasters, there is the Amateur Radio Emergency Service. ï¿½Itï¿½s not really an organization but it is organized on a national basis for community programs.

John Wright, another PCARC member, checks with the Oklahoma Sooner Net and with the Salvation Armyï¿½s network, SATERN.

After the Oklahoma City bombing in 1995 and 9/11, Russell said amateur radio was used extensively. It is also used during and after tornadoes and other natural disasters. Now, the group can work with the Automatic Position Reporting System to help more accurately report severe weather.

The group has an annual field day, which is a combination of a exercise and a contest. ï¿½We go out and set up radios under adverse conditions to simulate disaster response,ï¿½ Suter said. ï¿½In the past, weï¿½ve started

with solar power, using a battery in a car or even a portable generator.

ï¿½The last time I kept count, we were able to make contacts in 47 states, the Philippines, some in South America and Puerto Rico in a 24-hour period.ï¿½

Suter pointed out that the word ï¿½amateurï¿½ is not what people interpret it as. ï¿½People interpret it to be an unprofessional group. But while itï¿½s made up of a lot of people for a hobby, itï¿½s not unorganized or unprofessional when dealing with disaster. We have capabilities that public agencies just donï¿½t have,ï¿½ he said.

Members also have to be licensed. The license testing can be done in McAlester now so those wishing to be licensed donï¿½t have to go to Dallas or Oklahoma City as in the past.

Teresa Atkerson writes for the McAlester (Okla.) News-Capital.

Old Technology Still Needed
(Page 1 of 2)

Sept. 8, 2005

Overwhelming Charity

Joe Carcia, station manager of the American Radio Relay League in Newington, Conn. helps with the disaster relief effort for Hurricane Katrina's victims along the Gulf Coast. (AP)

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

(CBS) There is a store in London dedicated to "appropriate technology." It mostly carries products designed to be used in developing countries where there is a weak communications infrastructure.

Sadly, thatï¿½s now the case for a large swath of the United States where Hurricane Katrina and its flood waters have wiped out cell phone towers, telephone switching stations, Internet routers and other ground-based communications systems. Even wireless Internet depends on nearby transmitters and receivers on the ground.

But amateur radio is working and, according to Allen Pitts of the Amateur Radio Relay League (ARRL), "ham" radio operators from throughout the country are answering the call to provide vital communications links. Satellite phones, a much newer technology, are also coming to the rescue.

Pitts acknowledges that cell phones and other technologies "work wonderfully when everything is going right," but "they are very vulnerable when everything is going wrong."

Just as with past hurricanes, earthquakes and on September 11th, the ground-based infrastructure, in many cases failed because vital parts of the system were damaged or overwhelmed during the emergency.

In other words, when you need them most, those cell phones are of no value.

Amateur radio, says Pitts, is not vulnerable to these problems "because each of the radio operators is a complete transmit and reception center unto themselves able to continue going and continue with nothing more than an electrical source, such as a battery or a generator, a radio and piece of wire for an antenna."

Listen to audio of Larry Magid's interview with ARRL's Allen Pitts.

While base-station radios are larger and require an electrical power source, there are also portable ham radios slightly larger than a pack of cigarettes with a range of about 20 miles, according to Pitts. Pitts says that the next sized radio, about the size of a paperback book, can communicate up to about 50 miles without a repeater while larger systems, "about the size of a desktop computer" can communicate globally.

Amateur radio operators are in demand. When I checked the ARRLï¿½s Web site there was a call from the Salvation Army for "10, two-operator Amateur Radio teams for deployment in the U.S. Gulf Coast. Operators must hold at least a General class license. Teams should be fully self sufficient in terms of food, water and lodging and plan to remain in the disaster area for from one to two weeks."

Pitts said there was a "lady in Connecticut," who was listening on her amateur radio and happened to hear that there was a woman "who was trapped for four days without food and water." She was able to relay that message, by ham radio, into an operations center that dispatched the fire department. A day later she got a call from the trapped womanï¿½s mother, thanking her for her role in the rescue.

Ironically, this comes at a time when amateur radio is struggling for respect and, to some extent, survival. What was once a popular hobby has fallen into somewhat hard times for a variety of reasons, including the fact that the Internet, cheap long distance calling, cell phones and other technologies make the ability to use these two-way radios not quite as compelling as it once was.

Also, there is a bit of a rift between some members of the amateur radio community and some parts of the Internet industry over the use of power lines to transmit Internet signals. This technology, which could put power companies into competition with cable and phone companies for broadband service, has been criticized by some ham operators because of possible interference problems.

Despite the fact that their origins go back to the early 20th century, hams are hardly low-tech. There are now bridges between ham operators and other technologies including the Internet, cellular phone systems and Internet phones. In fact, long before the Internet became popular, ham operators were using their radio gear to transmit data along with voice and morse code.

Also coming to the rescue are satellite phones. These phones - which are much more expensive to buy and use than cell phones - rely on satellites

rather than ground equipment to communicate with the phone network.

Because satellites are in space, theyï¿½re not vulnerable to conditions here on earth. Also, as long as you have a view of the sky, youï¿½re able to communicate. Iridium, which operates "66 low-earth orbiting (LEO), cross-linked satellites and 11 in-orbit spares," says it provides "complete coverage of the earth (including oceans, airways and Polar Regions)."

I carried an Iridium phone with me when I traveled to Peru a few years ago. It worked great when I was in the clear such as on a boat in the middle of the Amazon River but, because it requires a line of site view of the sky, it had problems in dense jungle and in cities with tall buildings.

Iridium spokesperson Liz DeCastro estimates that there are currently about 10,000 of Iridium's phones being used in the region with orders for about 6,000 more. The company sells through resellers so it doesnï¿½t have exact numbers. DeCastro says that "traffic in the region increased by 3,000 percent" since the storm hit and that the number of subscribers increased by 500 percent.

Satellite phones are a lot cheaper to use then when I went to Peru, but they still cost between $1 and $1.25 per minute to use, according to DeCastro. Thatï¿½s a lot more than domestic cell use, though often cheaper than using U.S. phones when roaming overseas. The phones themselves cost between $1,000 and $1,500 she says.

In addition to handling voice calls, satellite phones can also be used for messaging or data, albeit at modem rather than broadband speed.

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

Thatï¿½s why some news organizations keep manual typewriters around. You never know when that old technology may suddenly become the "appropriate technology."

NYNewsday.com
Amateur radio operators head to Gulf Coast

September 6, 2005, 1:00 AM EDT

NEWINGTON, Conn. -- Oscar Fuller only became an amateur radio operator about a year ago, but he knows how valuable his equipment can be in an emergency.

So even though he has never responded to a crisis, the American Relay Radio League member is planning to head to the hurricane-ravaged Gulf Coast and see if he can help establish an emergency communication network.

"This is a tragic set of circumstances," said Fuller, who recently retired from IBM. "If I can lend a hand, I want to."

Fuller and about 14 other members of the Newington-based amateur radio operator network have signed up to join the relief efforts for Hurricane Katrina. The amateur operators _ known as hams _ can often use their equipment to communicate in difficult circumstances.

Because the radio equipment operates on many frequencies, is self-contained and portable, it can often work when other communication networks, such as telephones, aren't working. It can never be blocked, which is why operators say it is good in disasters.

"When all else fails, ham radios work," said Betsy Doane of Shelton, who oversees the 2,500 members of the league in Connecticut.

David Patton, an official with the radio group, said as many as 750 volunteers may be needed. The Connecticut volunteers are going to help provide communication support for more than 200 American Red Cross Shelters in Mississippi, Alabama and the Florida panhandle.

"There are limited resources to an overwhelming disaster," said Allen Pitts, public relations manager for the radio league. "So there is not a ham on every corner. The hams are put where they are needed most of all, in emergency traffic or for saving lives."

Dennis Motschenbacher of Colchester was among the first volunteers to say he would go. He spent Sunday shopping for supplies and getting ready for the 18-hour, 1,100 mile drive to Montgomery, Ala., where he will be dispatched to a shelter.

"Everything I need, I'm bringing," he said. "There won't be any Radio Shack to go to."

The 57-year-old has been a ham for more than 40 years. He has operated his radio from places as far as East Timor and the Balkans.

The hardest part will be "seeing people in this troubled state _ smelly, sick, depressed, angry. And no matter what any of us do, it won't be enough for all of them."

Ham Radio Operators Pitch In To Hurricane Katrina Relief Effort General Interest
09/07/2005
With communications out all over New Orleans and the Gulf Coast, the professionals are turning to amateurs to be their ears to what's going on in the areas devastated by Hurricane Katrina.

Local operators say they've been in touch with people in and around New Orleans since the beginning of the ordeal.

Ed McLaughlin, of Kennewick, says in the days that followed the disaster, he was able to help a family in Medford, Ore., get an update on how their relatives were. He's provided similar contact for a family in Chicago.

The reason-- ham radio, which is able to get in places that have no other means for communication when land-based infrastructure fails.

Ham radio has been such a success during these recent days that FEMA and the Red Cross are now using it as their primary mode for communication until other modes of communication are restored.

News-Leader.com Springfield Mo.
Ham radio helps close communication gap

Nixa man relayed message from president to New Orleans' mayor.

Joe Hargis works on his amateur radio in his home in Nixa. Hargis helped rescue an elderly woman by notifying someone who could contact rescue workers via radio.

By Sarah Overstreet
News-Leader

If you've been unsuccessfully trying to get information about someone living in Hurricane Katrina's region of havoc, here's an avenue you may not have considered: local ham radio operators.

While cell phones rely on towers and traditional telephones rely on intact land lines, ham radios transmit from radio to radio, bouncing waves off the ionosphere in the upper atmosphere far above the Earth's tantrums. They can run off batteries, generators and sometimes even the sun.

Two Ozarks amateur ham radio groups - the Nixa Amateur Radio Club and the Christian County ARES (Amateur Radio Emergency Services) - have been relaying messages from people all over the world to those whose communication has been cut off by Katrina.

David Beckler, a ham radio operator from Nixa, even relayed a message Tuesday from the director of the Federal Emergency Management Agency in Texas to New Orleans Mayor Ray Nagin.

"He had a message from President Bush to the mayor of the city of New Orleans," says Beckler, a New Orleans native who moved to Nixa six years ago.

Since the message was an emergency communication, the dispatch needed to go through the net control station on an emergency frequency, Beckler said. He knew it was important, because the ham operator had said, "break, break, break," which requires all other communications to yield and give that one priority.

"The net control station or other stations on this frequency could not hear this message," Beckler says. Beckler contacted the net control station, and people there asked him to contact the sending ham operator and relay the message back to that operator. "That's when he told me it was from President Bush."

Joe Hargis, another Nixa ham club member, also helped with an urgent message. "I was monitoring the SATERN network (Salvation Army Team

Emergency Radio Network)," said Hargis, a retired elementary schoolteacher.

"A person called in with a piece of emergency traffic and the (receiving) person could not hear him. He said, 'Is there anyone on the frequency who can copy this?' I broke in and told him I could hear it fine."

Hargis relayed the message back to SATERN, and the operator there could hear Hargis well. "It was a 90-year-old woman and her elderly neighbors. They were afraid to leave their home because of the unrest in the neighborhood, things that were going on, and they needed assistance to be evacuated. They were running low on medicine, and one was running out of her oxygen supply."

Nixa ham club member Rod Kittleman says their members helped save the lives of a couple in New Orleans.

"A weak, disabled elderly couple were trapped in their attic. Their phone worked, but they couldn't get through to local authorities," the KADI radio program manager explains.

Too weak to break through their roof so emergency personnel could find them, the couple called their daughter in this area. She contacted the Nixa club, which relayed the message to a local ham operator who is licensed to operate on emergency frequencies.

"He got through to authorities in New Orleans over the radio, and they were rescued. (The ham operator) relayed the message back to their daughter.

Thanks Dan... I was wrong it appears... I checked the FD rules and found
this item at the end of the list:

[snip]
9. Miscellaneous:

9.3. Remember that the national simplex FM calling frequency of 146.52 MHz
should not be used for making Field Day contacts.
[snip]

It does raise an interesting question... there was nobody to hear my FD
calls on 52? It appears that the National Simplex Calling Frequency wasn't
monitored that day through a large portion of state. There was nobody to
say, "Hey fellow, no FD on 52!" Perhaps my FD calls on 52 really did reveal
an inadequacy of amateur emergency communications---at least in this state.

Agreed.

They should take their knee-jerk Larouche whacko BS to:

http://www.assaultweb.net/cgi-bin/ultimatebb.cgi?ubb=forum;f=42

...where they would have a captivated audience. Still it was fun
listening to 3.931 last night. They had a few 'detractors' in there
and the fur started to fly on several occasions.

Was funny as if some fool put Baby Ruth candybars floating in a punchbowl
at a kosher wedding. :)

Has it occurred to you that he just might be out of town?? I recently
"won" two eBay auctions, except I got called out of town to handle a
series of family crisis's (two family members in the hospital, actually
in surgery on the same day). Fortunately the seller had more patience
then you appear to have

Depends on the definition of "many". Is 25 "many"? If it is, then I'm sure
that "many" don't.

Or does "many" mean "most"? If so, then "many" haven't.

of course not, everyone was busy on real fd stuff. and there is no
requirement that anyone monitor that frequency any time anyway... i have it
in my scan sequence and it rarely gets a hit.

Brad posted:

"Wow, that's a really long way. How cents per minute would that cost?
huh
Mister?"

Brad, relize that if he is forwarding voice communications through his computer to Japan, he is likely using the Internet which is cost free.

Then too, this neat ability would be worthless in an emergency preparedness exercise where the assumption is made that all power and telephone lines are down, and the service that Hams perform is largely communicating across their own towns or to to closely adjacient communities.

Under these circumstances, the more simplistic your rig is, the better. The lower its power consumption, the longer your batteries will last and if you are operating from generator power, the lower your consumption of almost unobtainable fuel will be. This is precisely why CD provided many hams with the low powered Gonset Communicators (Gooney Boxes) in bright yellow painted cases.

CD had a pretty good handle on what is needed of hams during an emergency situation, but stupidly CD was eliminated at the end of the cold war and was replaced by FEMA. Sadly, FEMA has demonstrated its failure to meet the needs of an emergency situation, and so hopefully will be restructed into a modernized version of the original CD organization. Then too, the entire Homeland Security organization has proven itself to be nothing but a cruel joke!

A bit off topic I know, but realize that at the end of the cold war as CD was dismantled, all of their Gooney Boxes, Geiger Counters and other vital items were collected and sold off at government auctions. Years later we now face the terrorism threat of nuclear devices and "dirty bombs", with local communities having neither the instrumentation available to either detect the radiation hazard or to communicate if and when a disaster takes place as it eventually will. Dhuh!

Today's yuppies sit in front of their off-the-shelf commercially produced rigs chatting with each other about meaningless subjects while, for the most part, lacking the technical ability to either construct their own rigs or even knowing how to repair them when the have a problem. Essentially, many are simply displaced CB operators who happened to cram through an exam as the result of memorizing some Q&A book. It is a serious mistake to confuse such people with real hams who

have the ability to improvise a simple transmitter when needed. That's why, when an actual emergency does occur, the retirement of us "old farts" is interrupted to come to the assistance of the community. We still have the needed vacuum tube receivers (plus spare parts) and transmitters that will measure up to the needs of the occasion. Many of us old hams who remember the cold war also have the radiation detection gear needed to monitor a potential radiation hazard to our local community (thanks to the auction of CD assets).

Curmudgeonly yours, Harry C.

p.s., I just watched a documentary about how Cuba prepares for a hurrican emergency. Not suprisingly they still employ something equivalent to our now dismantled CD organization, which obviously works very well for them. Cuba calls to mind that old saying: "If it ain't broke, don't fix it". Sadly, here in the US we forget that other good saying: "Better is the enemy of good."

Yes indeed....I cut my "phone" teeth with the Gonset II. I used a 10
element antenna, built up a balun for the antenna and fed it with 300 ohm

twin. Made another balun and stuck it into the coax connector. I learned how to do that from my ARRL Handbook, circa 1961.

Put it outside my bedroom window and regularly worked stations in New York, most of Pennsylvania, West Virginia, etc. This from North East Ohio. Armstrong rotar of course.

Activity is a MAJOR factor. Hams now think 2m FM is all there is on VHF. What a pity.

Could be TOM. I get similar results here on 2 meters. We have THREE MAJOR
repeators (As in high up). With hardly any activity on them. Forget
simplex.

Their still around Dan. (ain't that amazing?) KJI can still be heard
occasionally in the daytime usually weekdays on 14.313 although
he's not as active as he used to be allegedly due to health reasons.
On Sat nights ole 'Sid the Lid' K5BLB and his crew out west hold fort on
3.947.5 each and every Saturday night to obstensivly bloc Vic from
running the Lib Net starting on that freq, or just below their old home of
3.950 which is now occupied nightly by a group in the Southeast.

It's an ongoing soap opera Dan. One of the last few on 75 Meters in fact!
My guess is it will keep going on until all the protagionists on both
sides are either 6' under the earth, or dottering in pajamas in a nursing
home
someplace talking to itheir maginary pets and pink elephants on the
wallpaper.....

(good glub aye LOVE ham radio, it's so f-n predictable even though
it's on it's last gasps of technological and usefull life)

My point is it just *might* be a good way to post some jobs. Even if
off-topic ;)

My error. I forgot to mention that I used to sort mosquitoes under a
microscope to genus and species. I never was good at knot-typing though,
despite being in the Navy. Sigh.

Then again, perhaps we should limit ourselves to the usual arguing .... :)

Source record: 49213

Can anyone recommend a CW reader?

I'd be especially interested in a software one that ran on Linux, and it would be wonderful if the source was available. I have the MFJ device but it broke, and I'd prefer a software one, anyway (I like to tweak sometimes).

Just in case someone wants to warn me against such devices: I read CW by ear at about 15 wpm, but I'd like to improve my fist and I have heard that the readers are good for that, as they only read well-formed code.

Tnx, Jim KE1AZ

1460. Emergency Messaging And AM

rec.radio.amateur.antenna,rec.radio.amateur.misc,rec,radio.amateur.equipment

Novitiate here:

I am learning AM broadcast basics in particular the issues regarding the geo-targeted broadcasting of alert messages from moving vehicles. Would most appreciate any assistance.

Due to Katrina/Rita, the company I work for has been given the opportunity to demonstrate a messaging system that would reach out approximately 1 mile +/- in transmission deliverance. This would be an "overbroadcast" (my term) in that it would override local AM radio broadcasting to reach into cars, trucks etc. In particular, we are working with a stationary site (a chemical spill for instance) and an emergency vehicle that would move back and forth at and through the site, at up to 70 mph, broadcasting an alert, voice and tone message.

Reading about LPAM, this looks technically possible but one concern I have is antennae size. A fire truck, for instance, could have an antenna mounted on its front, and up to 4 feet over the top of its roof, so we might look at as much as 20 feet of length. I realize this places us over the 3 meter max so one of the ???? is whether LFAM is realistic.

Am I way off base here, can any antennae, fractal or other, or any AM antennae technology, be utilized to design an antenna and propagate this type of signal?

All comments appreciated.

Yeah your probably right. Look at the Abernathy Radio group that used to
dominate 3894.5. They are history. Well I don't have the time to go
through all of them...hi.

KJI and BLB are real world class retards in my book. But they found a good
audience on 14.313. After all where could you get Donnie Dumbass and his
crowd with the KJI/BLB show and not be in a bobby bin?

It is so bad with that bunch on 313 that they even run the Texas Twit off.

The things that pop into my mind are why AM rather than FM, which tends to
be more local, and do you intend to 'over-broadcast' only the local channels
(how many?) - I assume you intend to make the channel(s) selectable - or the
entire band to ensure you get everyone? Assuming that there is a commercial
AM broadcast station in the vicinity (what, 10 miles? 20 miles?) you are
probably going to be flat out getting a mobile rig to ride over it. How do
you intend to do this?

Cheers.

Ken

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 25th/September, through Sunday, 2nd/October there were 218 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 3X, 4J, 4L, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5U, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A6, A7, A9, AP, BV, BY, C2, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E4, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HC8, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J6, J7, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PY0F, PY0S, PZ, S0, S2, S5, S7, S9, SM, SP, ST, SU, SV, SV5, SV9, T30, T7, T8, T9, TA, TF, TG, TI, TK, TN, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V5, V7, V8, VE, VK, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4S, SRI LANKA (IOTA Op). Joel, F5PAC, will be active as 4S7PAG between November 28th and December 16th from the Sri Lanka (main island - AS-003). During his stay he will take a short trip to Barberyn Island (AS-171) between December 9-11th. QSL via F5PAC, direct or by the bureau. Visit the following Web page at: http://www.qsl.net/f5pac/4s

5H, TANZANIA. Hans/DL6JGN and Jan/DJ8NK will be active as 5H1GHW and 5H1JCH, respectively, from October 13-20th (possibly with 5 addional days). There will also be an operation from Zanzibar Island. Activity will be on 160-10 meters CW, SSB, RTTY and PSK31. QSL via their home callsigns.

5Z4, KENYA (African Tour/IOTA Op). Vladimir, UA4WHX, is now active as 5Z4/UA4WHX from Nairobi. Activity will be on 80-10 meters CW/SSB. He was heard this past weekend on 80/30/20/17 meters CW and 15 meters CW/SSB. Unfortunately, his rig was badly damaged while in Ethiopia. However, Enrico, 5Z4ES, was able to provide a spare radio which he cannibalized from other radios, but it still does not work correctly.�Vladimir is using borrowed equipment for the time being. If he can resolve his equipment problem in time, he intends to operate from Lamu Island (IOTA AF-040). After Kenya he is planning to visit Uganda (5X), Tanzania (5H), Rwanda (9X) and Burundi (9U). QSL via his home callsign.

9M6, EAST MALAYSIA (Contest/IOTA Op). Saty, JE1JKL, will be active as 9M6NA in the 2005 CQWW DX CW Contest (November 26-27th) from Labuan Island (OC-133) as a Single-Op/Single-Band (20m) entry. QSL via JE1JKL (E-mail request for Bureau cards are welcome via 9m6na@jsfc.org). Visit the Web site at: http://jsfc.org/je1jkl/9m6na.html

9V, SINGAPORE. The Singapore Amateur Radio Transmitting Society (SARTS) is pleased to announce that as of September 29, 2005, the Infocomm Development Authority of Singapore (iDA) approved the allocation of the 7.1-7.2 MHz band for Singapore amateurs with immediate effect on a secondary use basis. This supplements their existing allocation 7.0-7.1 MHz.

CT3, MADEIRA ISLAND. Jose, CT1BOH, is expected to be active during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/All-Band/High-Power entry. The contest callsign and QSL route will be announced later. Visit Jose's Web page at: http://www.qsl.net/ct1boh/cq9k.htm

FS, SAINT MARTIN (IOTA Op). Pierre, F5AHO, will be active as FS/F5AHO from Saint Martin (the main island - IOTA NA-105 and DIFO FS-001) between November 9-18th. Activity will be mainly on 20/17 meters SSB. Look for him to be on Tintamarre Island (NA-199 and DIFO FS-002) from November 11-13th, between 1400-2000z. QSL via F5AHO, direct or by the bureau.

HB0, LIECHTENSTEIN (Topband Op). Topbanders should mark their calendar for this one. Operators T93M, T93Y, T94DX/DJ2MX and T94JJ/OE1EMS are expected to be active as HB0/T94DX during the next CQ 160 Meters Contest (January 28-29th, 2006).

IOTA NEWS.....
AS-041. Kenji, JA4GXS, will be active as JA4GXS/4 from Nishino Island (JIIA AS-041-010 and JA4 - Oki Islands Shimane Prefecture), October 8th. Activity will be on the IOTA frequencies 40-15 meters CW. QSL via his home callsign, by the JARL Bureau or direct to: Kenji Sasaki, 2-15 Ishikannon-cyo, Yamaguchi-City, 753-0038 JAPAN. Visit the JIIA Award Web page at: http://www3.ocn.ne.jp/~iota/newpage61.htm

AS-100. Jan, 4X1VF informs OPDX that they finally received approval to operate 30 hours from Akhziv Island. They will operate next week on Friday and Saturday, starting at 0500z on October 14th until 1400z, October 15th. There will be a new team consisting of 4Z4KX, 4Z5LA, 4X6HP, 4Z5FI, 4Z4BS and 4X1VF. There will be 3 complete stations active on 40-10 meters CW/SSB with power amplifiers. QSL via Ros, 4Z5LA.

AS-117. Operators JE4YAR, JE4NKF/4 and JL4GEL/4 will be active from from Miya Island (JIIA AS-117-021), Honshu's Coastal Islands, Hiroshima Prefecture), October 15-16th. QSL via their home callsigns, direct or through the JARL Bureau.

EU-042. Georg, DK7LX, will be active as DK7LX/p from Foehr Island (GIA/DID N-17), October 6-12th. Activity will be mainly CW, with a multiband vertical antenna. QSL via his home callsign.

EU-129. Jens, DD0VD, will be active as DD0VD/p from Usedom Island (GIA/DID O-13 for the German Islands Award) now through October 7th. This will be a holiday style activity, with participation in the Scandinavia VHF Activity Contest. QSL to his home callsign via the bureau.

SA-NEW. (Update) A group of several operators from Argentina will activate Isla Escondida in the Chubut Province North Group. The callsign L95WI has been issued. They will leave October 20th, and hope to be ON THE AIR starting the 22nd, operating 24 hours a day with 4 stations until October 24th. Activity will be on 80-10 meters, CW, SSB and Digimodes. QSL via Dany, LU3CT, to the following address (donations are welcome to help with expenses): Sr. DANIEL CARLOS FAIGUENBLAT, TRES ARROYOS 768, C1416DCF, BUENOS AIRES, ARGENTINA. Sponsor is: Strange Radio Team and World Wide Antarctic Program. For more information, visit: http://www.ddxc.net/l95wi/

IOTA CORRECTION: Last week we listed under "OC-119" that Wayne, K9YNF, would be active as K9YNF/KH6 from Kauai Island. The IOTA number was incorrect. The reference number for Kauai is OC-019.

IS0, SARDINIA. Operators DF1JM, DF1LON, DF4UM, DH4JQ, DJ8VC, DK2CRN, DL1ECG, DL1EK, DL3EW and DL7AOS will be active as IS0/DL3EW during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Multi entry. QSL via the Bureau.

J3, GRENADA. Bill, VE3EBN, will be active as J37LR between October 18th and November 16th. Activity will be on 40-6 meters CW/SSB/PSK31. QSL via VE3EBN.

K7C KURE ISLAND DXPEDITION. As this was being typed Sunday morning, the DXA Web reports that the DXpeditions QSOs count is over 37000. Operations will last through October 6th with tear down on October 7th. News from their Web page (as of October 1st) reports: "K7C has focused much of their attention on making European contacts over the past 24 hours. Judging by a sharp rise in emails thanking the operators for their efforts, many more contacts there are being made. Solar conditions for the weekend appear

stable, but weak with the SFI at 72, but no storms predicted. Weather conditions on Kure are very very hot. The operating tents have been described as ovens during the middle of the day as the blazing hot sands reflect a lot of heat. Preventing dehydration is a primary concern for KK6EK who imposed a mandatory break yesterday due to extreme conditions." Visit the K7C Web page for more details and pictures at: http://www.cordell.org/htdocs/KURE/

KH0, MARIANA ISLANDS. Ten operators from the Mitsubishi Electric Tokyo ARC (JM1YGG) will be active as KH0/JM1YGG and KH0/homecall from Rota Island, Northern Mariana Islands (OC-086), October 9-12th. Operators are JA1DFS, JA1IWP, JA1RNO, JA1RTG, JI1EOP, JJ1EWN, JN2AMD, JA3RAF, JF3IPR and JL3IJK. Activity will be on 160-6 meters CW, SSB. They also hope to be active on the digital modes. QSL via JM1YGG, direct (QRZ.com) or the JARL Bureau.

MD4, ISLE OF MAN. Operators G1GEY, G3NKC, G4MJS, G4XUM, M0BEW and M0RHI will be active as MD4K during the CQ WW DX SSB Contest (October 29-30th) as a Multi-?? entry. QSL via G3NKC. They are looking for extra operators. Anyone interested, please E-mail: md4k@md4k.com

MJ, JERSEY. Members of the International Police Association Radio Club (ON4IPA) will will be active as MJ/ON4IPA, October 5-10th. Operators will be ON4PO/Martin, ON6OM/Rene, ON7EG/Martin and ON6ZV/Eddy. Activity will be on 160-2 meters (6/2m depends on conditions and their equipment) on CW/SSB/RTTY/PSK. QSL via the Bureau to ON4IPA or ON6ZV. QSL direct to: IPA Radio Club, p/a Eddy West, Kweepeerstraat 16, B-9940 Evergem, Belgium. A special "Hercule Poirot Award" is available during the activation of MJ/ON4IPA. The rules are:
2 contacts / 2 bands - same mode (like: 20m SSB and 15m SSB)
-or-
2 contacts / 2 modes (same or different bands like: 2Om RTTY and 20m SSB or 15m SSB and 15m PSK)
Visit the IPA Web page at: http://users.pandora.be/on4ipa-on6zv

PZ5, SURINAM. Members of the "Low Land DXpedition Team" will be active from Paramaribo, Surinam, from November 23rd to December 14th (Some days they will be QRT for a trip to the inlands). Operators Ronald/PA3EWP and Rob/PA2R will have two stations with amplifiers on the air. Activity will be on 160-10 meters on the modes CW, SSB and RTTY. They will also be active in the CQWW CW and ARRL 10 Meter Contests. The callsigns are PZ5WP (Ronald), PZ5PA (Rob) and PZ5C for the two contests. The QSL Manager for all three callsigns will be PA7FM: Dennis Robbemond, Loggerhof 11, 3181 NS Rozenburg, The Netherlands. More details and online logs will become available on the LLDXT Web site in the coming months at: http://www.lldxt.nl

QSL INFO AND NEWS.....
Jean-Michel, F6GBQ (ex-FT8WA/FT0WA) still has his the logs from his Crozet activity in 1987. Unfortunatly, he doesn't have any more QSLs. However, the Les Nouvelles DX (LNDX) has printed a small batch of cards and he can now answer any card not received in the past. QSL via: GABOURIAUD JEAN-MICHEL, 138 CHEMIN DES COURREGES LES MATELLES, 34270 ST MATHIEU DE TREVIERS, FRANCE.

QSL HV5PUL via: LUCA DELLA GIOVAMPAOLA,
P.ZZA S.GIOVANNI IN LATERANO, 4
00120 CITTA' DEL VATICANO, VATICAN CITY

The Mississippi Valley DX and Contest Club (MVDXCC) of St. Louis, MO, is now the new home of the W0 (WZero) incoming QSL bureau. Their Web site is available at: http://www.zeroburo.com/

ED, PS7DX, reports that it is "OK" now to QSL via his Bureau now.

SU, EGYPT. Herve, F5RMY, will be active as SU/F5RMY, October 22-29th. His activity will be on all bands. He also plans to participate in the CQ WW DX SSB Contest (October 29-30th). QSL via his home callsign.

SV9, CRETE (Update). Ron, WB2GAI, is now active as SV9/WB2GAI/p until November 10th. Activity will be on 80-10 meters CW using a Force 12 vertical dipoles. Over the past week he was heard on 30/20/17 meters running 5 watts QRP. Please QSL via the bureau.

TY0, BENIN. Operator Pasquale, I8QSL, will be active as TY0T during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (20m) entry.

V2, ANTIGUA. Team Antigua is please to announce their 12th year of operating from the beautiful Island paradise of Antigua (NA-100 and FK-97). They will be active in the CQWW SSB Contest this upcoming October 29-30th, as V26B once again. They will be active on all bands. As operators arrive on the island, they will be operating on all bands and modes before the contest using their own calls listed below. Their operators will also be on after the contest too! Please QSL the operators via the following routes:
V26B via KA2AEV V26KEN via N2KEN
V26EM via W2SN V26OC via N3OC
V26J via WX0B V26R via KA2AEV

Mike, KA2AEV, reports that Team Antigua is proud to welcome back WX0B as well as W2BZR and WX3B".

VP2, ANGUILLA. Three members of the Florida DXpedition Group, Inc., will be on Anguilla between October 25th and November 1st. Participating members are: Bill/W4WX (VP2EWX), Cory/N1WON (VP2ECM) and Clarence/W9AAZ (VP2EAZ). Each operator will operate a different band during the CQ WW DX SSB Contest as a Single-Band entry. Look for them on all modes on 160-6 meters before and after the contest. QSL direct to their home callsigns.

A disadvantage I see is that a waiver is going to be required in order not to violate FCC rules. In fact, in the state of Florida, interfering with broadcast stations is against state law, so another hurdle to be overcome. That being said, for this system to work, you have to blanket the entire AM and FM broadcast bands. Even doing so will leave out the motorists who use XM or Sirius, the Ipod listeners and those who are driving with their cellphones plugged into their ears.

Hi Ari

I always wonder whether broadcast at the most common IF frequencies would be a viable alternative? (eg 455khz for AM) Legality issues aside of course... This would make frequency selection a little easier to engineer. You wouldnt have to divide your power budget into many operating frequencies as well. Problem is that you'd need a lot higher ERP especially since car mounted radios tend to be better shielded than portables. (You'll need to experiment some)

Since part of your engineering exercise will be to determine what ERP you want from the system you are proposing, the size of the antenna only needs to be considered in line with the transmitter output power. Obviously there will be a useful compromise somewhere that is cost effective. You might for example want a 100 watt TX for each frequency with a fairly lossy/terminated and loaded antenna. Your first port of call will be to determine what the likely highest strength of an AM/FM broadcast signal you will need to override, add maybe 20dB to that and work out your needed ERP. You will find lots of texts about the inefficiencies of MF antennas mounted on motor vehicles so that will give you some numbers to work with. Remember that making the antenna wideband will also introduce substantial loss. Note that you cant design the system to always work as you'll have situations where the radio stations transmitting antenna is right next to then freeqy where the event occurred! Decide on some statistical coverage percentage thing etc etc...

I worked for a concern in Sydney Australia that put in tunnel rebroadcast systems in the major underground roadworks in Sydney, Melbourne and Perth. Being in a tunnel of course there werent really any licensing issues. The system consisted of not only broadcast band (AM & FM) receivers but spot VHF/UHF FM receivers and transmitters for police, fire etc vehicles. Each broadcast frequency had its own transmitter. It was thought to be a better idea than using a wide band TX covering all frequencies. AM broadcast was coupled to a very long wire and the rest used a terminated leaky coax run.

Cheers Bob W5/VK2YQA

I agree Bob. "Tunnel Radio" systems have been around for over 20 years, and AFAIK all broadcast on dual IF frequencies covering both am and fm car radios. Here in Boston this type of system is in use in all our tunnels.

Harry C.

The switch is located next to the "PO ADJ" pot. You must remove the bottom cover, and you will find a small white switch with the label "S02", and clear "ON", "OFF" markings. The directions to remove the bottom cover are on page 12 of the FT-767GX manual, step 4 only: "Place the transceiver upside down, and remove the four screws from the bottom corners and two on each side (including the carrying handle screws, see Figure 3). The remove the handle and the bottom cover." Locate the

switch near the "PO ADJ" pot in the back, and move it into the ON position. The "TX GND" should work now.

"K2, huh? New York City? That explains why you were able to work
"multiple states." You have, what, six of them within 100 miles? Try
that in any state west of the Appalachins."

No, central New Jersey. Dhuh!

"Whiny old timer, out of touch with reality, loss of memory of old time

ham radio, pissed because of Incentive Licensing, lets other people
determine his enjoyment of a hobby, still hanging around the amateur
radio newsgroups despite being unlicensed for nearly a quarter
century."

No Mr. Dork, I simply lost interest in ham radio when it became
infested with clueless CB types who only hold ham tickets because they
crammed their way through the licensing exams. When store purchased
commercial rigs appeared, the ham bands became cluttered with these
types to the extent that one QSO after another led to nothing but
uninformed, mindless blathering as it remains today.

However, I am forever grateful to my ham radio experience because it
led the way for me to obtain my First Class Commercial ticket, my job
as chief engineer of a Trenton, NJ radio station, and ultimately paid
for my BS level college education at Drexel University. The knowledge
acquired though my ham activities also qualified me for a coop job as a
transmitter designer at Barker & Williamson (the B&W 5100 xmtr was one
of my projects and later the Army's T368 transmitter.) My ham radio
and educational background ultimately led me to a 15+ year career with
Raytheon developing military electronics.

When active as a ham, the majority of my time was spent developing and
perfecting ham TV rigs and TTY systems that represented the cutting
edge technology of that time when the joy of building and operating a
conventional CW, AM, or SSB rig became old hat.

What saddens me most is the degree to which ham radio has become
emasculated and rendered devoid of almost all technical value. Bitter,
no. Saddened, yes!

Well, Ari, I can tell you this. People used to mock the fact that I had 7 antennas on my 1957 station wagon almost 50 years ago, but these days, the airwaves are so bereft of anything worth listening to, I never turn on a radio in the car. So, I will never hear your message no matter what you try.

Now, having said that, here is how the system design needs to be:
Since the frequency to which a target radio is tuned is an unknown, and since the input contains a good trap for the IF frequency, your transmitter needs to radiate about 2 KW ERP at each of three frequencies in the broadcast band separated by 262 kHz and 455 kHz. This will mix in the front end and produce a useful IF. Same technique on FM using two frequencies 10.7 MHz apart.

Good luck on the AM. With expected antenna efficiencies at that wavelength of about 3%, you are going to need over 100 kW of RF and antenna components with equivalent power ratings.

Let us know how it works out. The place I used to work no bid this about 20 years ago due to these problems, and that was not the first time this crazy idea surfaced.

Hi Jim

Tomi Manninen's gMFSK 0.7pre1 has CW included I think at an experimental stage. I have only brielfy tried it and it seems to decode okay. (I am a "non" CW operator - limited call in VK)

"Demorse" by Neoklis Kyriazis is also a possible contender but I havent been able to make that work. (CLI only)

RSCW is another one;
http://radio.linux.org.au/pkgdetail.phtml?sectpat=morse&ordpat=title&descpat=&pkgid=288

The above URL (shortened) is also an interesting place to find Linux based amateur radio s/w in general.

I run gMFSK under Suse 9.1 prof. Needs a few libraries etc to get it to compile. I also have some issues with the help system. I think it is because I am using KDE and it doesnt have all the hooks in it for Gnome environment. Hasnt been an issue because I can look at the XML help file directly.

Cheers Bob W5/VK2YQA East Texas

The issue of selective vs full range broadcasting is a matter that has not
been decided either by client, company or possibility. There are plusses
and minus' to each.

Selective would entail less power but we are being told power of the fire
engine is not an issue.

Yes, the budget is rich with expected legal expenses. Since DHS has become a player in this, we are hopeful that we can get the necessary punch to overcome FCC and statutory issues.

>That being said, for this system to work, you have to blanket
> the entire AM and FM broadcast bands. Even doing so will leave out the

Do we have to blanket or only blanket each locale, that is, the broadcasting stations of each locale?

Not only will we miss those no AM/FM listeners, we will miss those that don't have their radios on. An aggressive, road sign campaign is planned something like " Turn On Your Radio, It Could Save Your Life" type of thing near each incident site.

Very nice, congrats on that. Was it Yagi technology or fractal?

Do you think it is crazy from the standpoint of legal or technical. The
system itself would appear to be much needed.

In that case, simply modify the sign to "Tune to 560, it could save your life" and use a discrete frequency low power transmitter.

there is no requirement that anyone listen to any broadcast radio. with the rapid growth of satellite radio there are even less people listening to either am of fm broadcast radio. add those who listen to cd's or dvd's and you get even less.

There are systems that are used for local road emergency notification, the 560khz one comes to mind, something along those lines would be the best bet, and add in signs on the backs of vehicles. i guess the real question is, what are you trying to do by overriding local broadcast stations? and over what size area?

And a whole lot more, I bet.

The trouble is that skills aren't as valued as they once were.
Particularly if they aren't "state of the art", whatever that means.
Whether it be
Morse Code or how to put up an antenna in a less-than-perfect location,
or even make your own bread, many people look down upon "basic" or
"old" skills as a sort of poor relation to "high tech". As in "not
worth their time or effort".

> (LOL)

It took a bit of doing for me to learn Morse Code. First I acquired a straight key and built an oscillator so I could practice sending. But they also tested receiving back in 1967, so I had to build a receiver, find the 80 meter ham band, find some hams sending fairly slowly, and then figure out what they were sending. I guess being 12-13 years old and not having anybody tell me I was too young helped...

You may enjoy this article, too: I sure did.

Hi Ari

>>I always wonder whether broadcast at the most common IF frequencies
>>would be a viable alternative? (eg 455khz for AM) Legality issues aside
>>of course...
>
>
> I'm missing your point. Please explain.

I apologise if you already know the following! Its pretty basic radio..

Almost every radio receiver on the market works off the "superhetrodyne" principal where the incoming signal is mixed with a local oscillator down to an intermediate frequency. This makes receiver design a little cheaper as you can then put your expensive filtering at one frequency rather than have something that has to track the actual transmitted frequency.

For example a station on the AM band at 870khz is mixed with a local oscillator of 1325 khz (in the receiver) to get a difference of 455khz. If the station frequency is changed then one only needs to modify the local oscillator frequency. This is what the knob on the radio does!

The most common IF frequency for an AM radio happens to be 455khz so transmitting on that will mean you will be heard on all AM radios in close proximity. I dont off hand know the most common broadcast FM IF (maybe 10.7MHz or 7.8Mhz) but that should be easy to find. It is important to make sure that the IF of the fire trucks FM two-way radio isnt the same or you'll never be able to hear it inside the truck!

To "broadcast over" you would need to amplitude modulate the AM band 455khz TX and frequency modulate the FM broadcast IF frequency.

> Good advice here, will 20db do it?

FM is easier to do than AM. I'd factor in maybe 6dB for FM. You might be able to get by with 12dB for AM but the original station will make some small amount of noise under it. The important thing is that the person listening wil be able to understand the content.

Note that this is of course only relevent when transmitting on the actual station frequency.

> Yes, we are shooting for max overbroadcasting but the reality is it is a
> hit and miss proposition. Even the scenario of geo related
obstructions is

> a possibility.

Well it shouldnt be that hard to model. Do a AM and FM band coverage prediction over the freeways etc you are doing the experiment on to discover what the receive strength will be in dBm. (It doesnt matter what "gain" you make the RX antenna because it will be the same figure that is used for your overbroadcast) For every say 200 yard square take the mean signal of each, then take the 80th percentile as the signal you have to beat. If that was (say) -80dBm you want -74dBm (for FM) at the maximum operating distance (was it a mile each way?) You then reverse model that to determine what the TX EIRP of the thing on the truck has to be.

There are bound to be contract houses that will do this prediction for you. I use to work for one that had the software and I have some GPL versions myself. I cant do MF (ie AM broadcast) though.

> Being in a tunnel of course there werent really any
>>licensing issues.

> Is that peculiar to Aus?

The licensing issue or the tunnel? Tunnel rebroadcast is pretty common around the world. The company I worked for also did one in Indonesia. Its also used in underground mines.

> Very nice, congrats on that. Was it Yagi technology or fractal?

Err, the leaky coax was just a 2km run of an Andrews product that has leaky holes in the shield. It was fed in the middle with a wide band splitter and terminated with 50 ohmss at each end. Its quite a common thing to do in underground environments. (Buildings too) Handy for two way radio as well as cell phones.

The AM thing was just a very long terminated (600r) wire.

None of the above are yagi or fractal

Cheers Bob

Hi Ari,

As you have described it, and have seen the discussion in regard to
the need for ERP - you are so deep in the debit column with AM power
EQUAL to a local broadcaster, that to climb out of that hole would be
prohibitive. READ: no fire truck has a power plant sufficient to
cover both the antenna system losses AND "overbroadcast" as you
desire. And this is for ONE station only. Imagine your broader
mandate to "overbroadcast" all local stations and that hole just gets
deeper.

>Am I way off base here, can any antennae, fractal or other, or any AM

Hi Ari,

The various pieces of this jigsaw puzzle is beginning to reveal a picture here. With the introduction of two governmental organizations, and their regulations, your "plan" has all the appearances of being suitably crafted to work on paper. It responds to the individual issues that any squinty-eyed bureaucrat would demand be satisfied for his postage sized turf, but in the overall it would fail miserably, or drive costs so high as to be tainted with the plea that "aren't people's lives worth the price?"

Let's see, the original spec calls for a disaster situation that is confined to within 1 mile; that demands the local population be informed; that over-rides their usual paths of communication; that reaches them even when they are not engaged in listening.

As already pointed out, big sound trucks do wonders, and have worked well since the beginning of the last century for this purpose. That kids inside their home can hear the ice-cream truck a mile away is a testimony to this simplicity.

Knocking on the door of the local broadcasters and commandeering their air-time has a time honored tradition of working quite well too. This involves no more time than getting that expensive mobile power plant rigged with wide band transmitters working into hugely lossy antenna systems into the same danger area. After-all, you could as easily call the first most obvious radio station as them, and you could be calling the others before they even got on the road.

The solution demanded is that all radio stations respond to a disaster network alert and citizens tune to the Civil Defense frequency when so warned by them. Is this another administration cut-back that was shelved as one of those unnecessary "entitlements?" Have they clipped all the wires to those old Air Raid sirens? When did the lights go out in FEMA?

My experience with AM (on the aircraft band) is that two transmitters
at the same time yields a horrible squeal and nothing else. The louder
station (usually on the ground with hundreds of watts) has no particular
advantage over the other station (usually in the air with 5-10 watts).
In other words, there is no effect like FM capture.

I assume you mean to take up an unused local channel? Or to bargain for
time on a used one?

Both ideas make sense.

> 560khz one comes to mind, something along those lines would be the best bet,
> and add in signs on the backs of vehicles. i guess the real question is,
> what are you trying to do by overriding local broadcast stations?

1) to grab those that are listening to AM/FM, it is still a hyooge market,
2) client request, 3) DHS preference 4) the number of people alerted by a
sign/sticker and independent warning channel is much less than both that
and AM/FM, 5) the possibility that once the AM/FM FCC/NAB bond is broken, a
precedent could be set for cell, sat, threading messaging, etc 6) spinoff
tech for local/reg/national emergencies.

> and over
> what size area?

1 mile radius max from point of incident, less most probably.

The problem with most CW readers I've tried, or heard of is
1. The received code has to be with proper spacing and character and element durations
2. A fairly strong signal, otherwise the reader gets confused

They work well on strong signals with good or machine sent code

IMHO The best code reader is between one's ears

No one, in the end, will care about that, Richard, it's buzz words. The
economic hooks are in lessened liabilities and coordinating better
emergency evac and site control plans. Money talks here.

That piece is a given, no argument there, the AM/FM piece is just one more
way to insure commo.

Yes, but as we recently saw, things left to the "if come" often don't "come" ask FEMA. The plan needs to be in place and the control out of the hands of anyone except local/reg/national authority.

> The solution demanded is that all radio stations respond to a disaster

Nothing wrong with that if you know where to tune. I don't, come to think of it.

MOF, it's an idea that came up over dinner during FEMA/NOLA, don't know about the sirens, all I do know is once FEMA got there, they shutdown most commo inc police in some cases. They want total control so this p[iece has more play at the immediate response (local/state) levels.

One signal is the Beat Frequency Oscillator. I am amazed
that no one has thought of this perfect solution before.

If Morse code were required for all driver's licenses, then
all you have to do is furnish a CW carrier wave. The two
signals would mix and the squeal would be Morse code which
would carry the emergency information.

DHS has proposed a change in scenario. They want an on locomotive alerting system that could be commandeered and driven at, near or about a disaster site. Everything else stays more or less the same, overbroadcasting on local AM/FM, power off the locomotive, selective or full frequency broadcasting, train (s) to be in motion at all times. 20-30 second messages that would also combine a message to be aware that a locomotive (at speed) will be flying by the at grade crossings.

Comments?

if this is for real time notification you don't have time to bargain or to
find an unused channel... and who would listen to you anyway if it was
unused? how often do you turn the knob on your car radio??

what about the emergency broadcast system? that would seem to be the
'proper' method of emergency notification, its already set up for all sorts
of local, regional, and national notifications.

There are a couple of frequiencies for unlicensed low power am stations. You can see them in use by real estate folks selling houses. There are no commercial stations on the frequency.

Impractical, for the same reasons cited earlier. What's wrong with
electronic message boards on trailers fitted with sirens and, if deemed
necessarily, a very large guy with a gun to maintain interest.

You may find that sci.electronic.misc or sci.electronic.design may be more
relevant, since it's commercial/military and not amateur. Mind you, they may
also be less polite.....

Ken

The martial music came from Walter. Perfect clean audio with great music.
Unfortunatly a no-no on ham radio.

Can't argue with that. But you know there is still a lot of interest going on. Satellites are one. The new digital modes are quite interesting.

I still enjoy a good CW contact. And I operate a fair amount of SSB. And your right, real hams are few and far between.

If you want to find out what is happening now in ham radio....THIS IS NOT THE PLACE TO DO IT.

Again, you show the world *you* indeed *do* have your head up your ass.
When somebody tells you to pull your head out of your ass, it isn't
obsessing with somebody's ass, no matter how much you a homosexual with
AIDS like you hopes for a new love affair. It isn't a compliment,
stupid.

realy I thought that was Stevie's job and you claim anyone that
disagrees with you knows nothing

BTW I don't argue with everyone, let alone about everything

You OTOH say you will agree to discuss something only after everyone
agrees to agree with you, in advance

Tracks across Lake Ponchartrain fell in.

Granted they were put back in service faster than anything the
government had connection to.

A couple of threads aside, this is a pretty good group. So are the others I
mentioned, but they don't tolerate the sort of technical vagueness that's
being displayed in this thread.

Cheers.

Why a loco anyway? It would appear to be the mistaken assumption that anything that big must have power to burn on anything plugged in by a user. Not the case - the power from a loco is, not surprisingly, applied to the tracks. The electric generators used for powering gear other than the train's vitals are not high power.

Well, he's not a troll in that he's making it up as he goes - it appears he
really is hoping to do for his company what he says (source: Google).

However it's a job which really equates to:
<Government fleeces tax-payers>
<Bureaucrat gets hold of budget allocation>
<Bureaucrat needs to succeed - ie. unload allocation>
<Ari and co. want to be under the hopper when the jackpot payout commences>

A valid way of doing business, but still a crock.

Ken

Yep Uncle Walter had a fine collection of march music and a very hi-fi transmitter. Sounded great. Not Walter, the music.

There was the night I was driving the width of Tennessee on I-40 listening to 3950 on the FT-900. Walter ranted till dawn (literally) in one of his drunken rampages.

Sir Sidney was the one who played Anchors Aweigh and the theme to Hogan's Heroes.

Dag-nabbit somebody bring back the good old days.

Yew peeple make me siiiiiccccckkkkk

And his Cronies forget to trot out their amateur vs military vs
commercial arguments when it suits them.

Funny that word "Croney." NPR has been getting a lot of play out of it
recently. They say it as if it's a bad thing.

Below is one of the stupidest nonsensical posts ever to grace rrap, and we are all dumber for having read it.

"an_old_friend" <konstans@hotmail.com> wrote

yes

and using the hurricane to acheive this result is well... not nice either

this not a help wanted venure

nor do you even bother to deny

telephones skills are related to radio policy, as you (should) know
Hans

You posted the material expecting the reuslt you got, and then had the ill grace to complain about it

then you folow with a hack job on a post

the original post never realy belonged here at least the religous thread under Katrina response evolved from a legit topic

That would be much easier, simply sweep a modulated oscillator across the band. With a couple of adjustments it would be easy to emulate a train whistle, a somewhat universal warning.

Wonder no longer, because broadcasing at IF frequencies has been for year the standard in the US. In spite of some rather silly speculative posts, this mechanism has proved itself for more than 10-years here.

In a confined space such as a tunnel, a transmitter of 10-watts more than sufficint to get the job done, and using nothing more sophisticated than a simple wire radiator running the length of the tunnel.

In Boston, we also retransmit commercial radio broadcasts into our tunnels, but that requires equipment dedicated to each radio channel that we re-broadcast, and that becomes very costly after 10 stations or so, hence there is a limit.

The real challenge is in maintaining emergency communications to the outside from within our tunnels. All are serviced by the traditional leaky coax that runs along the top of the tunnel, but considering that all of these emergency services operate on their own indepdendent frequency bands, so servicing them simulteously becomes somwhat problematic. particularly when hand-held, low power devices enter the big picture.

All agreed, but that is in a tunnel, which has the advantage of not having
to overcome the still-received commercial stations. The OP wants to do this
out in the open, anywhere, any time. He also wanted to do it while driving
at high speed for some reason, but I think he's quietly shelved that part of
the idea.

Cheers.

Ken

> agrees to agree with you, in advance

I've never seen or heard Dan say any such thing.

Like I've said before, an_old_fiend is apparently in the same camp as Todd
(same mindset).
Also since an_old_fiend doesn't have a call sign his opinion in
radio.amateur groups doen't mean much.

Ahhh, that old nonsense never made sense anyway, since almost all the troublemakers have always been, for the most part, higher level, coded licensees. I think the code cracks some of them up. I know it annoyed the crap out of me 32 years ago.

All I know is that *you* are the one that keeps making the remarks
about sexual orientation, obsessing about what's in someone's ass, and
derogatory remarks about homosexuals. This is a clear sign of someone
who isn't comfortable with their own sexuality, but I wouldn't worry
about it if I were you. Given your behavior here, you don't have
anything to worry about from any homosexual that might approach you.

Actually, it's not.

What made you bring up tracks anyway -- my reference to the
tracks on the lake falling in? My point was that the locomotive is
going nowhere there aren't usable tracks.

On a diesel-electric locomotive, the generator's output is
applied, not to the tracks as you seem to think, but rather through
control circuitry to the stator around the axle. It's rather amusing
to see a repair yard worker with a set of wheels-and-axle (they're all
one single piece, in case you didn't know) clamp a stator around the
axle, connect a battery with a pair of short jumper cables and walk
the whole arrangement across a concrete floor as though he were
walking the family dog.

BTW, at 4,000+ horsepower, you could plug in nearly anything a
user might want, given proper appliances and the right plug. :-)

Contained on the head of a pin. You are rather obtuse, like Marky. Only thing is, no matter how hopeful you'd thought you'd find a new love affair, queer boy, you're barking up the wrong tree. Now go slurp Marky's rear end some more. He's into that sort of thing, like you.

1565. HAM For emergency help

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-04 12:56:20 UTC
From: Matt <matth@nowhere.com>
Message-ID: <dhtu5k0c0l@enews1.newsguy.com>
Source record: 49069

While I know that a license is required for correct transmissions on an amateur radio, is there anything that would make it illegal for a non-licensed individual to use a ham radio to call for help in an emergency situation? I see over and over the FCC emphasizes that if you hear a call for help outside your licensed band, you may respond, also that if you need help you can use any frequency on which you can get help... What are thoughts on this?

And what are these messages suppose to convey?

The target audience already knows it's screwed.

We all (outside the screwed zone) saw the blizzard of useless
"messages" the government(s) issued during and after Katrina.

Just what I need to hear from a locomotive blowing by at 50 mph:

"Hi! We're the government and we are here to help you."

The best that came out of post-Katrina was from self-help and
assistance from non-government organizations. And, the
government even thwarted some of that.

The inmates are running the asylum:

http://www.iht.com/articles/2005/10/02/news/storm.php

Ninety-one thousand tons of ice melting in idling 14-wheelers.

That includes ANY frequency in or out of the amateur bands. However, one must be careful with this. Sometimes, things we view as an emergency is not seen as such by the FCC. "Emergency" usually implies immediate danger to life, limb, or property.

Like I said in another thread, "Emergency" implies IMMEDIATE (not planned) danger to life, limb, or property. It seems that, in your proposal, you are PLANNING to use these frequencies instead of more appropriate ones. I would think that you need to create (and supply) a system that is isolated from broadcast frequencies.

Ok.. so we've established that... now here's an interesting twist...
what if I as an unlicensed user am just listening to the ham bands, and
HEAR a request for help? Am I allowed to respond back to the person?

Suggestion: Why don't you also broadcast such "emergency" information over the entire spectrum of wireless network frequencies? That way, you could post the information into every Usenet group on the globe. Just like you have done with these postings.

There is an element of both I agree and the locomotive environment, except in the newer ones, can be a bit hairy. Whether or not the concept is valid, that's for DHS to decide and they already have.

The driving force behind this, imo, is that during NOLA no effort was made to use the RR as a means of evac. Several of the lines offered but FEMA refused. Instead, Carnival made off like a bandit with 1/3 full ships but 3/3 full government pay.

In order to evac, the RR would need to run flat out and with an evac traffic surge, crossings become more critical.

Hi Ari

I always wonder whether broadcast at the most common IF frequencies
would be a viable alternative? (eg 455khz for AM) Legality issues aside
of course... This would make frequency selection a little easier to
engineer. You wouldnt have to divide your power budget into many
operating frequencies as well. Problem is that you'd need a lot higher
ERP especially since car mounted radios tend to be better shielded than
portables. (You'll need to experiment some)

On 3 Oct 2005 18:52:41 -0700, hhc314@yahoo.com wrote:

Usenet being a place that only a few people access, aside from that, it's
not a bad idea, actually.

Absolutely! A analogy would be this. A person (who has no driver's license) hears an elderly person yelling "help!" from their car. It turns out that this elderly person is having a heart attack. The unlicensed person may drive the elderly person to the hospital ER without fear of any consequences.

1594. IZ4GQA Activation schedule - Italian Red Cross first ham radio station

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-04 17:03:58 UTC
From: Mattia IW4EKY <iw4eky@REMOVEthisWORDSlibero.it>
Message-ID: <2Cy0f.399$Ik7.6988@twister2.libero.it>
Source record: 48998

Dear friends,
IZ4GQA the first ham radio station of the Italian Red Cross, will be active for the first time on October 16, 23 and 30 2005.

More informations on frequencies, operating modes and timetables are available on our website (currently both in English and Italian, but more languages are coming soon): http://radio.cribo.it

For further informations you can reach us through our website's "Contact us" section (e-mail, phone, fax, Skype). There is also a "Question & Answers" page about IZ4GQA.

A special thank to all of you, who kindly shared this news inside your websites, newsletters and forums. Many visitors came to our site wishing to work our station: the credit is yours alone!!!

Thanks for you reading, best DXes and 73!

Italian Red Cross
Radiocommunications Technical Office for Emilia Romagna region

meaning you agree that Dan mispoke I should think when he claimed, "He
argues with everyone about everything." the rest is simply a matter of
opinion, and point of view
>
> >
> > You OTOH say you will agree to discuss something only after everyone
> > agrees to agree with you, in advance
>
> I've never seen or heard Dan say any such thing.

then you have not been paying attenion. he claims that he will only
discuss emergency comms when I agree with his disriction of the nature
and importance of the beliefs he holds

in the "hams to resure" thread somwhere before the religionous
discusion, the reference was that I must accept that coms I thinks are
merely important are vital to safety and recovery of the region.
Indeed, like Stevie is pissed that I see ARES type comms, by and large,
as merely preforming the important job of keeping a lot of the small
stuff off the plate of the first responders, as opposed to stuff

affecting the real size and scope of the disaster.

The latter type certainly did not occour during Katrina, at least in
part becuase for Hams to delver such messages there would have had to
have been somebody to to compose the message and give to us and
Somebody to delviver it to, both ends broke down in Katrina, terribly
limiting our poetencail usefullness as Hams
>

I just choose not to sign it,

unlike some of you I have a life outside Ham radio, I dislike the
common custom of reduceing a person to a callsign

When was the last time you listened to one of those frequencies? It won't
get the message out where it's needed.

He wasn't referring to your finance budget, but your energy budget. I
hesitate to say it can't be done in any practical sense, but that's my
thought. The idea of one poster to transmit on the IF's is a good one but I
didn't suggest that because you'll also kill your emergency services comm's.

Incidentally, do you plan to have every loco in the US fitted out or are you
going to fly the loco's to the incident site to do their stuff?

Cheers.

4,000hp is a lot but not enough to swamp all the broadcast radios, which is
what the OP wants.

Incidentally my reference to tracks was just that the loco is made to move,
not power a boom-box. Like your anecdote though. :-)

Cheers.

No, but forewarned is fore armed. :-) Your spec's are a bit nebulous, to say

the least. I'm not accusing you of having no clue, but I'm damn glad DHS doesn't use tax-payer funds from this part of the world. This is an exercise in getting rid of funds grabbed during a crisis, when the opportunity arose to expand the empire. Standard bureaucratic function.

Cheers.

I'm really not criticizing you, per se, but I don't think the concept is
well thought out.

You refer elsewhere to this being an auxiliary warning system on a loco -
level crossing lights/bells/boom gates not enough? They usually are, so why
the worry now? (Okay, we know it's the moolah....).

You also refer to 1,000W being available - it's just not enough for what you
want to do. Period.

Good luck with them getting their act (I would have said something else!)
together, but don't bet the bank on it. I'm actually an ex-bureaucrat myself
and to call me cynical of governmental abilities would be an understatement.
But if you do come up with something useful (I bet it ends up being a

spin-off rather than the initial concept seen here), I hope you get something out of it.

Cheers.

Hi Ken,

His terse reply refers to the public coffers - troughs - open for this fabulous pork barrel feast. You know, crack dealer capitalism.

Nothing has to actually work, or be useful, or even be used. It just has to generate paper in one direction, and cash in the other. Ari is mining us as a dry run for all the terms, shortfalls, and fits to the jigsaw to rummage up into a proposal.

It can be found under the section that allows a transmitter as long as it is
less than some number of milliwatts per meter.

If you really need the exact section, I will drag out the regs and get it
for you.

That is part 15 and it isn't just a couple of frequencies, it is any frequency in the AM broadcast band (and the FM broadcast band, for that matter).

Specifically, 15.219 allows operation on any frequency in the band so long as (a) the input power to the final stage is less than 100 mW and (b) the antenna "system" (radiating element, coax, and ground lead) is less than 3 meters long.

15.221 also allows operation with an unspecified power level into leaky coax with a field strength limitation.

Power is not milliwatts per meter. Power is milliwatts. Field strength (also an allowed measurement) is in volts per meter.

The OP said that there were a "couple of frequiencies(sic)for unlicensed low power am(sic) stations." That implied that there were a couple of frequencies that were unused in the AM band by commercial stations, and I just wanted to have a reference to WHAT they were and WHERE in the regs they were delineated.

In this case the milliwatts per meter refers to frequencies stated in meters.

Volts per meter only applies to the E component, the magnetic component is always stated in amps per meter.

I will get back to you on the specifics. I am pretty sure that my brain is not suffering from a senior moment as to my recollection of the regs.

Hi Fred,

Is this to suggest that for 300MHz it is 1mW total input power as say
compared to 1MHz allowing 300mW?

This would be uncharacteristically generous of the FCC whose
regulations would ban emissions from dummy loads.

Seems it would hardly serve Ari's search for pork, but I suppose
grantsmanship would jump at sending a marathon of runners through the
spill area - each carrying sub-Watt handi-talkies to provide the
aggregate power, and spectrum, and lung volume necessary to "get the
warning out."

Richard the value changes per band and is stated in part 15. For example in the broadcast band the formula is 24000 /F for microvolts at 1000 feet.

There are certain bands that no emissions are allowed from a low powered device. For example setting up your neighborhood micro Rap Station on 121.5 MHz (aircraft emergency) would probably bring a swift shut down.

I am still searching for the reg that allows fixed information stations. IIRC they can be run on 530 and 1750 KHz. I know in the past I had looked at the regs and the particular station I was researching was indeed legal.

In the low freqs (140 KHz area) you can run up to 1 watt CW with out a license.

Not quite. That is the limit in 15.209, with the following caveat
"...except as provided elsewhere in this subpart..."

Elsewhere in the subpart (15.219 and 15.221) we have the limit for the band
525-1705 kHz. (AM broadcast band) the 100 mW and 3 meter antenna restriction
OR a 15 uV/m restriction at a distance of (47.715/(frequency in kHz.))
meters (which is also lambda/(2 * pi)) from leaky coax.

BTW, it is 24000/F uV/m at 30 meters from 490 to 1705 kHz., which is more
like 100 feet, not 1000 feet (15.209).

The problem is that anything that is speced at this point is bound to be
changed by FEMA, DHS, FCC, and God knows who else. The idea is to start
somewhere and march forward beginning with the writing of a "white paper"
that can be shot full of holes.

Considering that we have many technologies in use, mof, all technologies
that are not in development are in use, this is a load of horseshit. If we
build it to spec, whatever that spec is, it will be proprietary and how and
when they use it is not in our hands.

Sounds good, but somehow I have a feeling that calling for help, no matter how bad things were, on a Secret Service, or military Strategic Command and Control channel might not be a particularly good idea.

What you do not seem to realize is that young folks actually learned
stuff, too. You just fail to appreciate their knowledge, and see them
as thoughtless.

> > These are usually folks that have a genuine interest in how things work, not
> > how to turn a knob or push a button or keys.

Indeed. Often those people are young in years.

> > This isn't to say that folks
> > that simply wish to talk are not welcome; they certainly are.

Then you may begin acting as if they were.

Mutual admiration society?

> The trouble is that skills aren't as valued as they once were.

The -right- skills are always valued.

> Particularly if they aren't "state of the art", whatever that means.

It can mean "useful in the modern world."

> Whether it be
> Morse Code or how to put up an antenna in a less-than-perfect location,
> or even make your own bread, many people look down upon "basic" or
> "old" skills as a sort of poor relation to "high tech". As in "not
> worth their time or effort".

McDonalds wouldn't be serving up very many "basic" cheeseburgers if
they served them up with sarcasm and redicule. Which is how your
cronies serve up "basic" information.

> > The nice thing about amateur radio is that it encompasses a whole spectrum

Amateur radio is not a trade.

To me, advertising in an

> > are trying to locate a number of different skills (rather than a number of
> > ads in different magazines or newspapers).
>
> Agree 100%. There's a long history of such ads, too.

Especially since I'll not renew my membership in the ARRL nor receive
QST due to the mishandling of Carl's run for ARRL office. I never did
think that the ARRL had my interests at heart, and that was the final
straw.

> > As to Morse, it can be fun. If we had difficulty with it back when (for me,

> > 1967 had perfect copy at 40 words per minute in the U.S. Navy.

I'm always amazed at how people who earned three hots, a cot, and a
paycheck for learning Morse Code demand that the rest of us donate our
time and money to do the same. I think it's some kind of entitlement
mentality. The government is supposed to keep a steady stream of Morse
Coders in front of you so you'll have someone to communicate with.

More than
> > 40? I don't know; that was the fastest test they had back then. I would
> > have had difficulty much beyond that as we were banging away with manual

I enjoy all sorts of things. Morse Code is not among them. Sarcasm
and redicule served with "basic" information is not my favorite thing,
either.

1654. Ameritron AL-811 ALC Question

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-05 02:46:41 UTC
From: radio-operator@telus.net
Message-ID: <1128480401.762037.56670@z14g2000cwz.googlegroups.com>
Source record: 48958

I have a question for anyone who owns an Ameritron AL-811 amplifier.

I have connected the Relay and ALC connections to my rig and the amplifer works great except for the ALC protection. I have confirmed for 100% certain the radio is connected correctly.

When attempting to adjust the ALC limit on the rear of the amplifier as suggested in the manual I am not noticing any effect on the rig. I have driven the amplifier up to to 85W, and still do not notice and reduction of power on the radio as indicated in the manual.

Perhaps I am missing something, but my understanding was when the power into the Amp was over 70W and the rear ALC control was adjusted the voltage from the Amp should kick in and power down the radio to avoid distortion.

Any assistance would be greatly appreciated. Even if someone knows which is MAX and MIN on the back panel ALC adj., that would be helpful (i.e. clockwise or counter clockwise).

Thank-you...

Lloyd

The "equality of all" is a naive myth which serves mainly to perpetuate mediocrity in the human race. "....that all men are created equal" makes a nice sound-bite but even the most casual examination of any random sample of humankind disproves it beyond any doubt.

It always baffles me that free people buy into the notion of "democratic equality", because in fact the notions of "freedom" and "all are equal" are almost diametrically opposed. If I accept that I am your equal (and that you are mine) then I give up all freedom to be different from you, better than you, or worse than you. I simply WILL NOT give up that freedom, and therefore I reject the notion of "human equality".

If you want to explore the results of real human equality, read Kurt Vonnegut's short story "Harrison Bergeron" at http://instruct.westvalley.edu/lafave/hb.html

Maybe a problem for you, but it's not a problem for me! I don't call Len down for being OT.

> Are those radio-telephone crafts?

Yes, as a matter of fact a large part of the recovery work involves restoring microwave and cellular radio infrastructure. If you have skills in those areas, you might investigate the opportunity.

I think you may be a bit confused about ALC, or I don't understand your terminology.
In my world, "power down the radio" means it would be turned off.

ALC, when properly adjusted, is a control voltage that should limit the power output of the transceiver to prevent overdriving and damaging the amplifier. For Amplifiers that have relatively low drive needs for full output, it can be helpful in extending the life of the tubes, as compared to the reduced life effect of driving them beyond their dissipation rating.

I used to have an ameritron 811H (four tube version) and no longer have the manual, but if I remember correctly, the setting method was to transmit a known signal level into the amplifier and adjust the ALC control on the amp until the power output of the amplifier dropped (just barely), thus setting the level for protection. After it was properly set, cranking up the power output on the transceiver had little effect when the amplifier was not in standby mode.

A caveat though: Even though implementing ALC is a relatively good idea, it is generally better to have really good operating habits and watch the levels, rather than relying on the Amp to protect itself. I know there is always the possibility of making a bonehead move (I'm sure we've all made one now and then) but good operating habits first are the best defense against overdriving an amplifier.

Thanks

Hello Rick,

Your assessment matches the manual, however if you have any specifics on the adjustment that would be helpful. (When I said power down the radio I did mean decrease the output power on the radio).

Do you need to drive the amplifer with 70W+ or will the ALC control work with 30W drive from the radio?

I followed that same process, however did not notice the "drop" in power on the amp or tranceiver when adjusting the ALC adjustment on the back of the AL-811.

Thank-you
Lloyd

AB8MQ is hardly "light years" above anybody. He can barely see the light of
day from his psych ward.

1667. International Space Station School Contacts on Oct 5th, 6th 7th

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-05 06:45:29 UTC
From: g3zhi@hotmail.com
Message-ID: <43447646.1563500@news.talktalk.net>
Source record: 48971

International Space Station School Contacts on Oct 5th, 6th 7th

Ham radio ISS school contacts
ARISS Contacts on October 5th, 6th and 7th
Listen to the contacts 'live' on Echolink join the Amsat
conference room number 101377
The International Space Station's Expedition 11 crew may be
winding down. However, their ARISS school contacts will
be very active this week with 3 scheduled sessions.

Each session will be a telebridge conducted in English.
Sessions will be held on:

5 October 16:59 UTC -- Princeton High School, Princeton,
New Jersey
6 October 15:07 UTC -- Ft Hamilton High School, Brooklyn,
NY
7 October 13:33 UTC -- Ridgefield Park High School,
Ridgefield Park, NJ

Princeton High School, Princeton, New Jersey

Station NN1SS in Greenbelt, MD will call NA1SS at
approximately 16:59 UTC.

"Princeton High School is a nationally recognized high
school listed frequently in various publications denoting
outstanding academic achievement. Princeton High School
students excel in the humanities, the fine arts, and the
sciences with students performing in Smetana Hall in
Prague and competing with the US Physics Olympic Team in
Seoul, South Korea. The student body is a diverse group
representing a wide range of interests and backgrounds
within a school community in which 17% of our students
claim one of 38 languages other than English as their
first language."

Students will ask as many of the following questions as
time allows:

1. Are the shapes of the continents as defined as they
appear on maps and globes?
2. How much less time will pass in the ISS than on Earth,
due to relativity?
3. If it weren't for family and friends, would you want to
return to Earth?
4. What are the day-to-day jobs of the space station?

5. How do you sleep?
6. What is the worst situation you've encountered in
space?
7. What luxury do you miss the most?
8. How fast did you travel to exit the earth's atmosphere?
9. How would you describe space when you look outward? If
you space walked, what went through your mind the first
time the airlock opened and you saw space?
10. What does weather look like from space? For instance,
could Hurricane Katrina be seen moving?
11. Can you really see landmarks such as the Great Wall of
China from space?
12. How often do people get space sickness in the ISS?
13. When you come back, what will you miss most?
14. How much of the day is left to yourself and for
sleeping?
15. How much bone and muscle mass will you have lost
through out your trip? How would it be if you went to Mars
for 3 months?
16. What is good or the best on the menu?
17. When were you first interested in space travel?
18. What about space intrigues you and that you do not
understand? What have you been able to learn in your
travels as of yet?
19. My brother wants to be an astronaut. What advise can
you give him?
20. How does your body feel in low gravity? Can you feel
the effect? Is it like floating?

Ft Hamilton High School, Brooklyn, NY

Station VK5ZAI in Kingston SE, South Australia will call
NA1SS at approximately 15:07 UTC.

"Fort Hamilton High School is large urban public school of
5000 students in a suburban setting of Bay Ridge,
Brooklyn. Our school reflects the ethnic diversity of New
York City. We have strong academic programs geared towards college
preparation, with
advanced placement and honors classes in all disciplines. Our
communication with will
benefit our student population, especially the astronomy classes."

Students will ask as many of the following questions as
time allows:

1. What motivated you to go into space?
2. Did your journey so far fulfill your expectations? Why
or why not?
3. How long did you have to train to prepare for your
space flight? What was the most difficult part of your
training?

4. How is the training you received actually different
than traveling into space?
5. How long will you stay at ISS? What type of work will
you be involved with?
6. If you could change one thing about your space mission,
what would it be?
7. Besides your family and home, what do you miss the most
about Earth?
8. How do you spend your free time at the ISS?
9. Do astronauts have to do daily exercises and what type?
10. How long does it take to reach the ISS? How fast is
the shuttle moving after you leave the atmosphere?
11. How are basic life functions like sleeping and
digestion affected by the zero-gravity environment at ISS?
12. How are medical problems such as illness or breaking a
bone dealt with in space?
13. How would you fight a fire in a zero gravity
environment?
14. Are there any plants or animals on the ISS being
experimented on? What type of experiments?
15. Is the supply of oxygen on the ISS constantly being
supplied or is there a machine that produces it?
16. How do you prepare for a space walk? and what special
precautions have to be taken?
17. Does cosmic radiation affect you during your time in
space?
18. Do you believe in the existence of other intelligent
life forms in the universe?
19. What do you eat at the ISS? and How?
20. How many astronauts fit in the ISS?

Ridgefield Park High School, Ridgefield Park, NJ

Station ZS6BTD in Parklands, South Africa will call NA1SS
at approximately 13:33 UTC.

"Ridgefield Park Junior-Senior High School is a 7-12
school of approximately 1,100 students located in
Southeast of Bergen County. The school is a receiving
district for 9-12 grade students from Little Ferry, a
community that borders south west of Ridgefield Park, just
across the Hackensack River."

"The school has a proud history that includes some rather
famous graduates. Among them Ozzie Nelson of Ozzie &
Harriet fame and Bud Lewis, the copilot of the Anola Gay
which dropped the atomic bomb on Hiroshima, which
signaled the end of World War II. It is also the proud alma
mater of Greg Olsen."

Students will ask as many of the following questions as
time allows:

1. I have read that you plan to use your company's miniaturized infrared imager to observe Earth's atmosphere and agricultural crops on this trip. What do you plan to do with this information and how do you foresee it will help us in the future?
2. Why are you turning the infrared camera toward space, and what do you hope to accomplish?
3. What new products do you foresee as the result of the experiments conducted on this mission?
4. Sapna and I won a national chemistry competition based on our ideas for the development of a transdermal nutrient patch. Is anything like this currently being used in the space program or do you foresee its use in the future?
5. I understand that there are three biological experiments for the European Space Agency. Could you please briefly describe them?
6. Can you explain the scientific significance of the experiment on crystal growth in space?
7. Could you explain the significance of the experiments that will test small free-flying satellites, as part of a project called SPHERES?
8. Why is space such a good place to conduct experiments in cell research?
9. Which of the jobs that you performed on board did you like the most and why?
10. Please describe any geographical or man-made features on the Earth that you can see from space.
11. Have you seen any storms like hurricanes or tornadoes from space? What do they look like?
12. What type of problems have you encountered in the space station and how have you solved them?
13. What is the role of Expedition 12?
14. Dr. Olsen, why would a very successful business man and entrepreneur like you want to travel into space?
15. How will this opportunity to experiment in space benefit others (adults, children)?
16. How different do such celestial bodies as the sun, the moon, and any of the planets look from space as compared to how they look from Earth?
17. What would have happened if anyone had gotten seriously sick during the trip?
18. Was all your training in English or did you have to learn Russian to be involved in the program?
19. Do you see yourself as being involved in the U.S.A. space program someday?
20.What are your plans when you return from this Russian mission?

As always, the ISS will be audible to anyone listening in on the 145.80 MHz downlink. Please note, since these are telebridges the ground stations will NOT be near the

school that is contacting the ISS.

Please note, the amateur equipment on the ISS will be
turned off prior to the beginning of the contact. It will
be returned to service as quickly as possible.

Upcoming ARISS events can be found at
http://www.amsat.org/amsat/ariss/news/arissnews.txt
The next scheduled event is with students at Princeton High
School, Princeton, New Jersey on Wednesday, 5 October 2005 at 16:58
UTC.

ARISS is an international educational outreach program partnering the
participating
space agencies, NASA, Russian Space Agency, ESA, CNES, JAXA, and CSA,
with the AMSAT and
IARU organizations from participating countries.
ARISS offers an opportunity for students to experience the excitement
of Amateur Radio
by talking directly with crewmembers on-board the International Space
Station.

Teachers, parents and communities see, first hand, how Amateur Radio
and crewmembers on
ISS can energize youngsters' interest in science, technology, and
learning.

Further information on the ARISS programme is available on the website

http://www.rac.ca/ariss (graciously hosted by the Radio Amateurs of
Canada). Information
about the next
scheduled ARISS contact can be found at
http://www.rac.ca/ariss/upcoming.htm#NextContact.

So...

Work keeps me out of RRAP for a couple of weeks and I "return" only
to find those who accuse me of certain things being waist-deep in it
themselves.

Why am I not surprised.

BTW, Mark, He DID clearly "respect" your right to "disagree" with
you...He just called your posts for what they (usually)
are..."ignroant, stupid, or just plain wrong" and YOU were the one with
the "disagreement" issues...Again.

His "point" was that he clearly shares the same opinion as other
educated and informed men about YOUR "points".

As for "talking the talk but not walking the walk", when are we
gonna see you in "uniform", "Colonel"...?!?!

At least the countless spelling lessons I gave you appear to have
paid off.

There's nothing "elitist" about is.

It's a fact of common sociology.

> > It always baffles me that free people buy into the notion of "democratic

Spelling's better, but your grammatical structure still needs
work.

> freedom and equality are not in consistant

Sure they are.

There are hundreds of millions of people all over the world who
share the same basic "freedom" that I do, but are NOT my "equal" on
many, many levels.

You're proof of that, Mark.

> > If you want to explore the results of real human equality, read Kurt Vonnegut's

>

> why since the line of "Reasoning" is GIGO

You're kinda stuck on that "GIGO" acronym, aren't you, Mark?

It's no longer generally applicable for many reasons. On more
than one example I can put "garbage in" and get something useful out on
the other side.

> and importance of the beliefs he holds

"disriction"...?!?!

You can't "discuss" something unless you are utilizing the same
language, the same grammar, and the same meaning of words.

> in the "hams to resure" thread somwhere before the religionous...(SNIP)

Here, for example... "hams to the resure"? "religionous"?

> discusion, the reference was that I must accept that coms I thinks are
> merely important are vital to safety and recovery of the region.
> Indeed, like Stevie is pissed that I see ARES type comms, by and large,
> as merely preforming the important job of keeping a lot of the small
> stuff off the plate of the first responders, as opposed to stuff
> affecting the real size and scope of the disaster.

One cannot carry out a meaningful discourse unless there are
certain basic understandings from which to frame that conversation.

So far, you've not demonstrated that you have a real-time frame of
reference on "emergency comms" from which to make an informed opinion.

> The latter type certainly did not occour during Katrina, at least in
> part becuase for Hams to delver such messages there would have had to
> have been somebody to to compose the message and give to us and
> Somebody to delviver it to, both ends broke down in Katrina, terribly
> limiting our poetencail usefullness as Hams

Your complete ignorance of what has transpired in THIS region,
from your perch on Michigan's Upper Penninsula, is obvious.

FYI, not ALL "emergency comms" are formal written traffic. And
not all "emergency comms" involve "Hi Mom, I'm safe And Will Call
Later" traffic.
> > Like I've said before, an_old_fiend is apparently in the same camp as Todd

>
> I just choose not to sign it,
>
> unlike some of you I have a life outside Ham radio, I dislike the
> common custom of reduceing a person to a callsign

Mark's callsign is K B 9 R Q Z. He is an NCT. He's spent
countless months telling us of his "disability" and intent to use the
American's with Disabilites Act to "sue" anyone/everyone associated
with his failure to get a coded license.

BTW, Mark, WHAT "life" outside of Amateur Radio?

You've now created at least three screen names that I count as
"active" in order to get around Google's "daily posting limit" so you
can keep the list loaded with your rhetoric.

Doesn't sound like much of a life to me..

I think you will find that the FCC has the FINAL call on frequency band usage. I can't see them authorizing such intrusive use of the normal broadcast bands, especially after the broadcast industry gets wind of your proposal.

From a technical standpoint, broadband transmission of a signal is not hard. A simple VFO sweep of all the normal broadcast bands is all that is required. Obviously, the appropriate modulation techniques would have to be used for each band.

Another approach would be the use of a local (LOW power) sweeping UP/DOWN converter. In this method, you could transmit a specific (authorized) signal from the site. This signal would be received and detected by a local receiver. This information would be used to modulate and rebroadcast the signal within the vehicle. However, this would require onboard equipment.

I still think that your biggest hurdle will a legal one.

What transceiver are you using? Is the polarity of the ALC voltage
compatible with your transceiver?

I use an AL-80B. It has an ALC range of 0 to -10 vdc. My ICOM has a max
ALC of -4 vdc. I set the AL-80B for -4 vdc at max setting. Then I
adjusted the ALC SET on the front panel to activate at approximately 70
watts of drive.

The point I'm making is that two adjustments were required. First set
MAX ALC voltage, followed by setting ALC SET threshold.

Is there a webpage someplace where you can see upcoming contacts like
this? I work for a small school and we don't have the equipment to
track the space station and talk to them, but I think it would be great
if the kids could listen in on a chat with another school.

Most of the "crying" about "calling" Lennie for being "off topic"
usually follows one of HIS diatribes wherein HE expends a lot of hot
air and mularkey about what constitutes a propper topic for the
newsgroup.

The same sort of spin he generates about others pretending to be
"moderator" immediately followed by his pontifications about what HE
perceives as being "appropriate" for discussion.

> > > Are those radio-telephone crafts?
> >
> > Yes, as a matter of fact a large part of the recovery work involves restoring

> I think Len does. Probably what's keeping him off rrap.

Leonard H Anderson has no interest whatsoever in being part and
parcel of ANY kind of "public service" work. Lennie's absence is no
doubt due to yet another of his "trips".

Besides...What is needed at present are not "design engineers"
(which is what Lennie CLAIMS to be)...but installers and technicians
(jist as the thread title suggests) to get the new sites up and
running. The technology has already been "set", and each site, other
than local terrain, is exactly the same as the one next to it. Just
add water and shake.

Of course too we presently have reams and reams of "front page"
media singing the praises of the Amateur Radio service being able to
"get through" when nothing else can, completely contrary to Lennie's
rhetoric of the past 8 years...

Must be awfully embarrassing for him. But it's not the first
itme.

You are obviously obsessed with your stupidity and trying to recruit
newbies in your perverse homosexual lifestyle. Look elsewhere.

you are just plain wrong on that

guess you don't follow the public debate on much of ANY political issue
in the nation
>
> So far, you've not demonstrated that you have a real-time frame of
> reference on "emergency comms" from which to make an informed opinion.

not needed at all, indeed if I had than I would likely be unable to
discuss the issue with any impartiality, which would seem to be Dan's
(and your's) problem. You all can't what you are talking about becuase
your own egos are involved

I have taken accepting as fact the claimed message traffic and comented
on its importance in the over all scheme of thing
>
> > The latter type certainly did not occour during Katrina, at least in

> from your perch on Michigan's Upper Penninsula, is obvious.

I know what is going on there

you are not in that region either strictly speaking

you over look the fact that the onlooker sees most of the game, and the
players don't

>
> FYI, not ALL "emergency comms" are formal written traffic. And
> not all "emergency comms" involve "Hi Mom, I'm safe And Will Call

Guess you weren't paying attention to references, were you, Mark?

And I can see your English >>comprehension<< skills have not
improved.

QUOTE: "Why am I not surprised.Work keeps me out of RRAP for a
couple of weeks and I "return" only to find those who accuse me of
certain things being waist-deep in it themselves". UNQUOTE

What part of the concept of "work" do you not understand?

> > BTW, Mark, He DID clearly "respect" your right to "disagree" with

And you're any different?

You're showing exactly NO difference, Mark...

> Both of you confuse disagreement with stupidity, meaning neither of you
> repsect the rights of other to disagree

"respect"

Sure I do. That you're alive despite several years of whining
about death threats is proof positive that I "respect disagreement".

> > His "point" was that he clearly shares the same opinion as other
> > educated and informed men about YOUR "points".
>
> gee where are these men and only men you say

Certainly not in Michigan.

> > As for "talking the talk but not walking the walk", when are we
> > gonna see you in "uniform", "Colonel"...?!?!
>
> more nonsense Stevie

Not at all.

You claim to be a veteran AND an Officer to boot.

Obviously NONE of it true, ergo you're talking the talk, but can't
walk the walk.

> but you can't deal with issues that alwasy your problem

"always"

Sure I can.

> > At least the countless spelling lessons I gave you appear to have
> > paid off.
>
> bull#####

Nope. I only had to correct you twice in this post, none in the
previous. Obviously it's worn off.

Steve, K4YZ

"existance"

You obviously don't understand the definition of "charges".

> is your problem with Len realy just that he is rather verbose in style?

He's not "verbose".

He's a documented, pathological liar. He typically "takes a dump"
whenever some instance in Amateur Radio occurs that proves him wrong.
Like the current events in the Gulf States.

> How petty

Nope.

> > The same sort of spin he generates about others pretending to be
> > "moderator" immediately followed by his pontifications about what HE

> > "get through" when nothing else can, completely contrary to Lennie's
> > rhetoric of the past 8 years...
>
> again with your pettiness, and showing you have a small mind

Nope.

Lennie's repeatedly made the suggestion that Amateur Radio serves
no great purpose, and this it serves no "greater need" of the Republic.

Current events and news items in all public media disprove that,
Mark.

> reams and reams bull####, but that is the normal content of your posts

That's just you trying to undermine what I just said.

It still doesn't work.

It still doesn't mitigate that the "major media" has made several
very positive and very "page one" references to Amateur Radio and it's
functionality in the devastated areas. Amateur Radio has been on the
"front page" of Radio, TV, printed and virtual news sources.

> > Must be awfully embarrassing for him. But it's not the first

Congratulations! You've just showed the entire world your ignorance of
computer and internet lore.
Yes, Toady, you are PWNED! I assure that the spelling of that word,
although incorrect, is quite intentional. Google it (if you know how)
...and once you have done so, you will find that the word fits you
perfectly, as you seem to think that all posters are Lloyd Davies.

Of course, this won't matter to you in the least. You'll simply reply
with your usual, pathetic attempt at some sexual insult because it
makes you feel empowered. No matter. You've showed the world what a
dumb ass you really are.

This is one of the questions in the Technician question pool:

Q:If you let an unlicensed third party use your amateur station, what must you do at your station's control point?

A: You must continuously monitor and supervise the third-party's participation

How exactly does that work? How do you identify the person on the air, etc?

Reinserting Mark's censorship in order to maintain context:

> then you have not been paying attenion. he claims that he will only
> discuss emergency comms when I agree with his disriction of the nature
> and importance of the beliefs he holds

QUOTE:

"disriction"...?!?!

You can't "discuss" something unless you are utilizing the same
language, the same grammar, and the same meaning of words.

UNQUOTE

> > > in the "hams to resure" thread somwhere before the religionous...(SNIP)
> > cuting the english cop crap

Reinserting Mark's censorship to maintain context:

QUOTE:

> in the "hams to resure" thread somwhere before the religionous...(SNIP)

Here, for example... "hams to the resure"? "religionous"?

UNQUOTE

You continue to "dismiss" as "speling cop crap" efforts to get you
to use the same words in the same context as others so that we may all
understand each other.

Your "cut" and "speling cop crap" are nothing but censorship.

And you DO remember who was famous for censorship, don't you,
Mark?

> > > discusion, the reference was that I must accept that coms I thinks are

> (and your's) problem. You all can't what you are talking about becuase
> your own egos are involved

It's got nothing to do with ego.

It has to do with disparate parties discussing a common subject
from a common understanding.

"Communication" does NOT occur unless both parties have SOME
common frame of reference from which to understand each otehr.

> I have taken accepting as fact the claimed message traffic and comented

> my word 2 true statements in a row I may die of the shock

Don't tease me.

> but as I said I have a callsign just chose not to sign to ervything

"everything"...

No...You claimed that you didn't sign your Amateur Radio callsign
to Amateur Radio related posts because "...unlike some of you I have a
life outside Ham radio, I dislike the common custom of reduceing (sic)
a person to a callsign."

(A) Your callsign has EVERYthing to do with "Ham" radio, and (B)
attaching your Amateur Radio callsign no more "reduces" you in an
Amateur Radio forum than using your ISP screen name "reduces" you on
the Internet.

> > He's spent
> > countless months telling us of his "disability" and intent to use the

See what I mean about this 'twit' called "an old friend" ?

He interjects into any and all topics. Then gets it all turned way off the original topic, and brings the discussion to 'him', his 'views', his 'rights', his 'wants', his 'needs'.....Then acts insulted when someone has the audacity to actually challenge him.

A world class moron in my book.

Dan/W4NTI

"an_old_friend" <konstans@hotmail.com>

> simple Bullshit Hans equality in rights does not mean
> one gives up the right to the be different

You have that part right --- equality in rights is a fine thing, and we all agree with it.

But I wasn't talking about "rights". I was talking about the flawed notion that "all men are CREATED equal". We all have different physical attributes, different levels of intelligence, different native skills and abilities, etc., etc., etc. Clearly we are NOT created equal. As an example, you may have a great sense of pitch and rythm along with a good voice, so might become a famous singer. I on the other hand, can't carry a tune in a tow sack. Clear to all but deaf observers, we are NOT equal. The same analogy can be applied to any human attribute you wish to examine, yet politicians (even though they don't practice it themselves) still feed the masses this "created equal" myth, and the masses still buy into it.

>> If you want to explore the results of real human equality,
>> read Kurt Vonnegut's short story "Harrison Bergeron"
>> at http://instruct.westvalley.edu/lafave/hb.html

> why since the line of "Reasoning" is GIGO

I recommended it because KV does a much better job than I in illustrating the issue.

Anyone that needs to use several screen names is obviously very insecure. You may indeed have a point here Steve. He is a momma's boy, still living at home at a point in his life that he should be saving for his retirement for a career, which he obviously does not have.

He is a pathetic excuse for a ham, let alone for a human being. He is ashamed of his life, and over compensates by literally begging for attention here on USENET. That is like jumping into a pond full of Alligators and wondering why they are chewing you to death. He feels

inferior in life as well as in ham radio. As stated.....A pathetic excuse.....etc.

Dan/W4NTI

Goes like this

CQ CQ CQ Queens New York K6XYZ calling CQ for Queens NY and listening

K6XYZ this is W1XYZ - Frank in Queens

Fine Business Frank handle here is Dusty in San Dimas. CA My girl friend
wants to talk to you third party about Queens

Very good Dusty Put her on

Hi Frank -- name here is Desiree -- I grew up on in Queens -- is Joe's Dew
Drop Inn still on main street ?

Sure is Desiree and Joe is still flipping burgers

Oh wow he is my Uncle haven't been back in a coons age

Back and forth yak yak until 10 minutes expire at which time - both Dusty
and Frank must identify with their callsigns

Dusty would be advised to ID as K6XYZ with third party traffic

All the time Dusty is monitoring for proper operation. It is OK for Desiree
to push the PTT after being instructed as to its use. If Desiree is
timid --- Dusty can do the PTTing

Desiree thought this was so cool -- she studied and got her own license --
now KI6FOX (;-)

Be aware that the USA only has third party agreements with certain
countries -- see URL:
http://www.arrl.org/FandES/field/regulations/io/3rdparty.html
--
CL -- I doubt, therefore I might be !

Most people, anyway. Recall that it wasn't until many years after the
USA was founded that it became illegal for some people to own other
people as property, and even more years until both genders had the
right to vote.
>
> But I wasn't talking about "rights". I was talking about the flawed notion
> that "all men are CREATED equal".

And there's the problem.

The phrase "all men are created equal" is too often taken as a
stand-alone, without the context of the rest of the document and the
times when it was written. The equality that was meant in the original
document was equality of rights - and rights only! It was meant to
dispel once and for all any claim to inherited privilege, nobility,
title, or monarchy. No more and no less. This was a truly radical
concept at the time, when almost all of western civilization had
"nobles" and monarchs, and the average person had few if any rights
that were guaranteed simply by being a human. The "endowed by their
Creator" part is meant as a direct contradiction to the idea that some
monarchs were given their authority by one divinity or another.

(for a truly brilliant deconstruction of the concept of monarchy, see
"Monty Python and the Holy Grail", and the scene where Arthur
encounters Dennis.)

> We all have different physical attributes,
> different levels of intelligence, different native skills and abilities, etc.,
> etc., etc. Clearly we are NOT created equal.

Not that way, anyhow. And even if we *were*, we all don't develop the
same way. The differences observable in identical twins are proof of
that.

> As an example, you may have a
> great sense of pitch and rythm along with a good voice, so might become a famous

> human attribute you wish to examine, yet politicians (even though they don't
> practice it themselves) still feed the masses this "created equal" myth, and the
> masses still buy into it.

What they do is to substitute equality of *outcome* for equality of
rights.

Or to put it another way, what was meant by "created equal" was that
there should be equality of *opportunity*, but not necessarily equality
of *results*.

> >> If you want to explore the results of real human equality,
> >> read Kurt Vonnegut's short story "Harrison Bergeron"
> >> at http://instruct.westvalley.edu/lafave/hb.html

It's a great story, showing the enforcement of mandatory equality of
results.

There are many road races where anyone who can pay the fee and who will
sign the waiver can enter, start at the same starting line and starting
signal, and run/walk/jog the course.

That's equality of opportunity.

What Harrison Bergeron describes so well is a society where everyone
has to *finish* together, regardless of their actual ability.

Thank-you Amos,

I was able to confirm the polarity and connection are correct and the voltage ranges are compatable between the rig and amp (AL-811).

The manual for the AL-811 is very unclear as to exactly what the process is to set the ALC control on the back of the Amp:

- What mode should be used on the rig?

- What power level is required on the rig to slightly overdrive the Amp enough and obtain a neg voltage on the ALC output on the Amp.

- When looking at the back of the AL-811 and the ALC control knob, which is MIN and which is MAX sensitivity?

My appologies for all the questions. My hopes are to find someone with an 811 who can describe the process they used.

They got wind. Intrusive? Matter of subjectivity. A 30 sec message that
envelopes a 3500 sided square?

obvioulsy not Hans or I guess you haven't been reading Dan lately, he
has been dening I have the same rights as Him. In addition Steve, Dee,
Dave Heil, even most recently some one neamed "ace" and others making
claims based on various nonsense that I don't have the same rights as
they do

another lie on your part. You aretying to define the debate by your own
spin, I refuse to allow that
>
> Your "cut" and "speling cop crap" are nothing but censorship.

Not at all

You can and certainly will choose to keep typing your crap, I am making
no effort to stop it. I just choose not to have it count on my tab of
Bandwidth

what is censorhsip when you alter my posts and respond to the sentence
as if it was the way I wrote it after all to paraphrase you they can
alway go back and see what I choose to cut out
>
> And you DO remember who was famous for censorship, don't you,

sure does
>
> It has to do with disparate parties discussing a common subject
> from a common understanding.

nope it is about the effort of some to limit debate to those that agree
with them in advance very much a page from Yesir Imarat's (mispeeling
for effect) playbook
>
> "Communication" does NOT occur unless both parties have SOME
> common frame of reference from which to understand each otehr.

it also does not occour whn one or more parties decide they are not
interested in any view but their own, as is the case here all so often
>

> life outside Ham radio, I dislike the common custom of reduceing (sic)
> a person to a callsign."

that is why I make the choice I do the one statement is just an
elaboration of the other, both are true

cuting the raving
> > > He's spent
> > > countless months telling us of his "disability" and intent to use the
> > > American's with Disabilites Act to "sue" anyone/everyone associated
> > > with his failure to get a coded license.
> >
> > but you saved by lying again
>
> Nope.

yes you are lying when you make the statement "He's spent countless
months telling us of his "disability" and intent to use the American's
with Disabilites Act to "sue" anyone/everyone associated with his
failure to get a coded license."

plain and simple

I have discused the the legalities of the ADA and Code testing but made
no threat to sue anyone at all, and since you add anyone assocated with
I mentioned I never threatened to sue you on that basis either
>
> > > BTW, Mark, WHAT "life" outside of Amateur Radio?

>
> You have no life outside Amateur Radio, Mark.

I certainly

> As a matter of
> fact, you have little life that moves you beyond the four walls of your
> house.

closer than you normaly get, since I do work from my home. I don't have
a lot that moves to travel beyond my home, but that is how I like it.

If you said I had nothing that got me much off MY land you'd be even
closer.

I enjoy the freedom to work when I choose and only as much as I choose.
I can hunt and fish, build stuff, Most of the world beyond comes to ME
when I need it. I am living the life I dreamed of as a kid

no he did get that one right

He does care and cares a great deal

Oh, I don't think it's a matter of being "insecure", Dave...It's
just that Mark is all about being all the things he accuses others

of...

As I specified, Mark has accused me of being
"obsessive-compulsive" and "ready to pounce on my every word" in RRAP
replies...

However HE is the one who needs multiple screen names to defeat
Google's posting limits in order to get his multiple-multiple responses
in in one day.

> He is a pathetic excuse for a ham, let alone for a human being.

No doubt. I never see "KB9RQZ" in any of the activity reports in
any of the magazines. He alleges to have been a second operator at a
couple of Field Day activities, and I have no doubt that that pretty
much summates his "operating experience".

> He is ashamed of his life, and over compensates by literally begging for
> attention here on USENET.

He should be ashamed. He'a a pitiful liar. I say pitiful since
he can't even lie effectively, then admits to being a liar on top of
it. His "I am a Colonel" story was classic, but then his insistence
that he's not a mental health patient followed-up by his admissions of
having been in the system are a hoot.

He's blatantly stated he'd teach his children to lie. That in and
of itself qualifies him for a castration before he can procreate any
further. I say "further" because he has, in the past, made allusion to
an ex-wife who was "stalking" him for child support...No doubt another
of his failures. I am divorced but no one ever had to "stalk" me to
make good on my obligations to my daughter and son.

> That is like jumping into a pond full of

I understood it perfectly.

He said you shouldn't be such a parasite.

> I use one screen name an Old friend I use several emails accounts far
> more than 3 BTW
>
> I am retired or at least semi reitred

Nope. You're "retarded"

> > He is a pathetic excuse for a ham, let alone for a human being.
>
> you have no reffernece for either of those statements Dan

I do. A couple e-mails exchanged with the radio club in Illinois.

No wonder you moved.

> > He is
> > ashamed of his life,
>

> Where do you get this #####?

From you.

> > and over compensates by literally begging for

> having a bad day, I can look at the crap folks like you spew out

Mark's getting twisted again, Dan...Notice he can't even spell the
same word correctly within five words?

Yes..."inferior" is a good word. Hence his need to be a
"colonel", etc etc etc...

"denying" "named"

No...

Most of us said you're NOT our EQUAL.

There's a difference.

There's only one thing I KNOW you do better than me, and a second
I am willing to give you the benefit of the doubt on...

The first is lying.

The second one is physically gratifying the male of the species...

> > But I wasn't talking about "rights". I was talking about the flawed notion

Markie,
All I said was "LOL"
I have a sense of humor.

BTW my respect has to be earned, as far as I can tell you have done
absolutely nothing to merit my respect.
Contempt on the other hand is another story.
Also I am guessing "an old friend" must be your CB handle.
Still LOL .

No, they are not.

The above quoted paragraph is evidence thereof.

> cuting the rep

You mean conducting censorship.

> > What part of the concept of "work" do you not understand?
>
> work wasn't the subject but then you can't read

Sure I can read.

I said: "Work keeps me out of RRAP for a couple of weeks and I
"return" only to find those who accuse me of certain things being
waist-deep in it themselves."

You said: "what are you talking about? another hurricane relief
mission Stevie"

Therefore you've opened your mouth, allowed the REAL "bs" of this
NG to spew forth again, and then rused to get your shoes off so you
could dance barefoot in it for a while.

No, I was not talking about hurricaine releif, although we are
seeing plenty of dislocated folks in my ER in the last 3 weeks.

I'm not diverting anything.

> > You're showing exactly NO difference, Mark...
>
> again go read some of stuff first

I did. Lot's of it.

And what I see is that YOU are perpetrating the exact same deceit,
misconduct and verbal trashing of the NG you accuse others of.

> > > Both of you confuse disagreement with stupidity, meaning neither of you
> > > repsect the rights of other to disagree
> >

Sure I do. I've provided lots of it.

And everytime I DO, someone such as yourself wants something ELSE
as "proof".

If you and spineless creeps like Frankie of Silliland want to play
on that merry-

Nope. I believe you are suffering from the "anger" aspect of
newsgroup psoting that Lennie refers to. Obviously, in your case, it

works.

And you were doing soooooooooooooooo good.

> and back to disrespecting intelectual porperty again

If you're going to refer to intellectual ANYthing, please spell it
correctly.

"intellectual" "property"

There's nothing of YOURS that even remotely approaches
"intellectual property", Mark.

Just to expand a bit on that, the control operator must be where he/she can immediately take action if any problems arise. Basically standing/sitting right there to grab the mike or hit the off switch or whatever if need be. Say the radio goes bad and is stuck in transmit, the control operator needs to be where he/she can correct it.

obvioulsy not Hans or I guess you haven't been reading Dan lately, he
has been dening I have the same rights as Him. In addition Steve, Dee,
Dave Heil, even most recently some one neamed "ace" and others making
claims based on various nonsense that I don't have the same rights as
they do

I have never stated you do not have the same rights as any other human
being.

If ANY such is to be performed, for railroad equipment, it must be well thought out, and, further, must face multiple Federal Agencies, and at least one private one (A.A.R., The American Association of Railroads) The additional federal agencies are: Federal Railroad Administration, O.S.H.A., and others-- One must also be aware of the facts that MANY frequencies would have to be involved, because of safety concerns (much like airlines), against interference. (No, it is NOT just about Train to train/work crew, and Dispatcher communications that is involved. Other equipment that railroads use are: 1) Track Carriers, for Crossing grade signals, dragging equipment, high-wide load, hot box detectors, Broken Rail detection, not to mention some telephony communications, 2) Remote controlled helper engines (unmanned engines on the end of trains to push-assist, and brake), 3) "FREDS" ("Friggin Rear End Devices"), some of which provide telemetry to the engineer of brake pressure, status of tail light, ect.- the new generation is conversant -2 way, also capable of dumping the brake pressure (emergency brake application, via remote control) and, other options (control of Railroad Central Traffic Control, or CTC. Also, on ALL track circuits, in signaled territory, the use of Insulated Joints is mandated, by the Federal Railroad Administration and can cause derailments, and other problems if NOT adheared to!and, 4) G.P.S. equipment
As to the Engines, tho, they have considerable power, they supply unorthodox voltages (a typical engine uses 600 volt, circuits, and the electronics used on them is in the 68-72 volt range- further, the newer engines are A.C. , the older diesels were D.C.
In sum total, then, this isn't a job for sidewalk superintendents! ONE item the railroads is STILL looking for is a concensus, for a Run-Away vehicle (by their work crews), that would alert a track gang of that runaway comming at them, causing considerable injury! They are STILL looking for such a foolproof device! Translation: DON'T hold your breath, or you will get awful blue!! Jim NN7K
Retired Communication Tech, Southern Pacific, and Union Pacific for over 30 years!!

You ahve stated that I don't have to right to post peacefully without
explaining myself to you

you have also claimed I and the rest of the techs don't have the
priviledge to decide for yourself how to operate (within) the rules
without agreeing to acccept the hectoring of personas like yourself

Indeed you have calimed I am under some obligation to give Bill Gates
even more of Money than everyone else

BTW gues you were not being truthfull when you claimed you did not read
my posts or that you could not read em

You ahve stated that I don't have to right to post peacefully without
explaining myself to you
>Unquote

This is incorrect. I have never said any such thing. I have said that if
people can't understand you, why do you bother to post and why should we
bother to read them. You have the right to post and we have the right not
to pay any attention.

>Quote
you have also claimed I and the rest of the techs don't have the
priviledge to decide for yourself how to operate (within) the rules
without agreeing to acccept the hectoring of personas like yourself
>Unquote

I have not hectored you nor do I approve of anyone hectoring people. If you have misconstrued my statements, that's your problem not mine.

>Quote
Indeed you have calimed I am under some obligation to give Bill Gates
even more of Money than everyone else
>Unquote

Never said any such thing. I have stated that there are means for people with difficulties to compensate for those difficulties. If they choose not to take advantage of such tools, don't blame others for their opinions of your work. That you do not want to invest in appropriate tools is again your problem not mine. It's like anything else in life. I'm too short to reach the top of the cupboards so I purchased a step stool. It would be foolish to complain that the top shelf is too high.

>Quote
BTW gues you were not being truthfull when you claimed you did not read
my posts or that you could not read em
>Unquote

Incorrect. I stated that I could not read SOME of your posts. If a post is not clear, I don't finish reading it and I don't respond to it. That is my right. Others are quite legible. If I find them interesting, I respond. That is also my right.

I also stated that I would not bother with your posts until you had regained some of your equilibrium. Sufficient time has passed that it has been worth checking. I also do a search so as to be able to choose whether I want to respond if someone should post false statements about me as you have done in this and the preceding posts.

I suspect for this purpose, they are all equally good as they will be reading the sidetone off your radio and not have to deal with the static, QSB, QRM, etc of an over the air signal.

no you spend days harassing me for it and you continue off and on since
then that is dening the right peacefully without explaining myself

you choose to deny me that right bymeans of harrasment

>

bullshit

you insult other operators based on class
Indeed you claim that You have the right to determine if other are
insulted despite the a fact it is by law the receiveing that makes that
judgment

>
> >Quote

no false statement you seek to deny the rights of others

simple fact

ypou claim you have rights that you deny to others like msyelf
>
> Dee D. Flint, N8UZE

For someone who is so concerned about Baxter's good name and potential slander thereof, you seem totally unconcerned about applying your own double standard and slandering anyone who does not bow down to your mistaken interpretations of other's posts.

However, you seem to have gone off the deep end again so I see no point in conversing with you at this time.

Dee D. Flint, N8UZE

Wrong, stupid, if you used "couldn't care less" it would be a double
negative, sort of like your I.Q.
0000000000000000000000000000000000000000000000000

Wrong, Roger. "couldn't care less" is NOT a double negative. Sound it out,
stupid.

I "couldn't" as in "I could NOT care less." Got it? Most ignoramus's such as
yourself say instead, "I could care less.", which is not correct.
Ain't they lurned you nuthin' at Devry????

...and don't bother responding. I couldn't care less about what you think.

Ah, yes. Lennie "asks for it." Typical stuff from abusers.

> The same sort of spin he generates about others pretending to be
> "moderator" immediately followed by his pontifications about what HE
> perceives as being "appropriate" for discussion.

Strange. I most often read about him being off-topic.

> > > > Are those radio-telephone crafts?

> add water and shake.

Strange. I recall Len saying that he had been trained by the US Army in microwave communications. Except for perhaps West Point, Army training is technical in nature; training personnel in the installation, operation, and maintenance of equipment.

His design experience came later, so Len is actually qualified to do both.

That bad, bad Len being qualified to do both! Gosh, he must have decided early in life to lay the foundation to bust all of your rants. Very inciteful, that Len. ;^(

> Of course too we presently have reams and reams of "front page"

It's such a shame that our professionals waste millions and millions of dollars each year installing, maintaining, and upgrading emergency comms when a couple of overweight, senior cit hams can lay them all to waste. Why do they even bother?

> Must be awfully embarrassing for him. But it's not the first
> itme.

Such a big ego must cause you some embarassment from itme to itme, tooey.

Don't bother. Everyone who has ever disagreed with him or pointed out his errors or used normal English words such as "class" in exactly the same manner as the FCC uses it is automatically denying him his rights and/or denigrating him. Only his definitions can be considered correct or he is being denied his rights.

Not so, the phrase, "I could care less" means one must care some so you could care less. "I could not care less" isn't a double negative, it simply means one does not care at all, not in the least, not even a little bit, nada, zip, so one "could not care any less because I don't care at all". Nice try stupid.

Now time you got back to cleaning out those porta-potties.

Not crystal, but clear nonetheless. I can communicate far more
information to a Russian, say, in Morse Code than I could in a "chat
room" where there was NO framework for understanding.

Unless you can show differently?

"cut" = censorship

Why does a guy who whines about "Freedom of Speech" constantly
censor others?

> > Oh, I don't think it's a matter of being "insecure", Dave...It's

Keep repeating that to yourself over and over, Mark.

It will make you warm and fuzzy to say it, but it won't be any
more "true".

> > As I specified, Mark has accused me of being

It's all about you allegedly being a ham, Mark.

You claim you are a partticipant, and indeed you have a license,
but you've haven't done a single thing worthwhile in Amatuer Radio.

"teach"

Teaching children to lie is not "different views".

It's child abuse.

> you also show yourself to be of the same ilk as the Nazi's

Nope.

YOU do.

They (the Nazis) made a whole "society" based upon lies. You and
your "kids" would have been right at home in the NSDAP. Especially
with your already prevelent use of censorship. Pure lies and
cowardice.

Jim,

I don't recognize the name, but did you ever work out of the
SF GOB? I spent 30 years there myself.

FWIW, I also hear from Brijet occasionally. You probably know
her (wherever you worked) as she was in charge of CDC for some years.
I spent a decent amount of time down there troubleshooting problems on
the remote lines to the zone offices.

> in microwave communications.

You need to re-orient yourself, Brian...

That was "microwave communications" in the FIFTIES, which bore
absolutely NO resemblence with current "microwave communications".

> Except for perhaps West Point, Army
> training is technical in nature; training personnel in the
> installation, operation, and maintenance of equipment.

Uh huh...And the "equipment" Lennie was "trained" on required a
walk-in closet to facilitate.

> His design experience came later, so Len is actually qualified to do
> both.

He's designed nothing. Not one thing. He's BOASTED of being a
"design engineer" for years, and frequently drops the names of projects
whose names appeared in Aviation Week and Space Technology.

His only "radio" reference, other than being a radio mechanic at
ADA, is the SINCGARS program...A program absolutely irrelevent to
Amateur Radio, but he sure does make sure we hear about it.

> That bad, bad Len being qualified to do both! Gosh, he must have
> decided early in life to lay the foundation to bust all of your rants.
> Very inciteful, that Len.

That he managed to do enough to get paid and not so mcuh as to
muck up what ever program he was working on at the time are his ONLY
"contributions" to "radio"

> > Of course too we presently have reams and reams of "front page"

Why do you say that?

Here's a "heads up" for you, Ken. There are over ten FedGov agencies,
several legal teams and the rail lines that are working with diligence on
this, and similar, projects with the full intent of attempting to pull this
off.

While you sit on the sidelines and nay-say.

If I had a dime for cheap comments like yours, I could fund this project
out of petty cash. So goes the nature of those who do and those who comment
about the doers.

Never down in Oakland/the CITY, worked in K.Falls for years,
started in Eugene, in '68. Finally moved here to Sparks, about
12 years ago. Yeh, remember Brigit- bet she doing better than
most - had Dave Stubbles in Roseville, until they laid him off
about 7 years ago then he went to makeing big $$$!!-- and the
two Mikes-- Rosemond - he back in Eugene, and Barnecascle- he
in Elko, NV- got a year until retirement! Guess Bob Hall
still retired in K.Falls, and Jim Haas also there (he took my
job when came to Sparks). All retired (except for the two mikes).
Think you Kaiser D ?? have fun-- Jim (A.J. Foster) NN7K

Ari- The power of a locomotive can be converted but, there are
certain problems, like going downhill, not only are brakes applied
to the cars, but the diesels go into "Dynamic Breaking", a complicated
way to say "Let the driver wheels run the motor (as a generator), and
them dump their output to banks of RESISTORS!! Provides great breaking,
but lousey voltage regulation! The radios on these units are powered
by (as stated,) 72 Volts, tho the radios also work on 12 volts (which
was the standard in Cabooses). The main point tho, remains that there
are considerable electronics (the new G.E. A.C.engines , from what
I have been told, are computer operated)! and that anything that
interfers with other items causes considerable greif to the operation
of a railroad- even turning a relay upside down can cause a derailment!

>>They are STILL looking for such a foolproof device!
>
>
> What's the issue, this appears not to be a huge deal?

Well, Ari-- the big deal is (Primarily in mountainous country- even
a grade of .5 degree, is considered quite steep). Now, suppose a
Maintainence of Way employees (push car, Motor Car, Hi-Railer (a
pickup equipped for rail travel) accidentally get loose- these can
be doing considerable speed- several MILES later-- worse, these
dont trip the signals, and further, the work crews have the track
from the dispatcher, so these can sneak up on workers with fatal
consequences. A similar thing happened on the old Siskiyou line,
when the powers that be were testing one of the old style of
remote controlled helpers-, going down-hill, on 5 Mile /Hour track
they called the remote to go to dynamic brakeing- but it went to
8-throttle instead (full throttle)! When they got it to control,
that train was doing 20 MPH! Had a bunch of scared people on it!
as you can see, it is not for the faint of heart! I sure wouldn't have
wanted to be anywhere near that track-- would you ??
I know it looks simple, and most times it is, but it doesn't take
much for things to get out of control! Have fun -- Jim

For starters, "broadcasting" as defined by the amateur rules is not allowed
even by the amateur.

As previously discussed, a non-licensed person can transmit if and only if a
properly licensed person is physically present where they can insure the
proper operation of the station.

I wish that were completely true, Dee. There is a special exception which allows organizations such as the ARRL to broadcast, and has opened the door nut-so operators such as Glenn Baxter to abuse the exception. In any case, there must always be a licensed control operator present and monitoring when an amateur station is transmitting - and a Radio Shack timer does not meet that requirement! OM

I meant it seemed not to be, on first look, a difficult technology to
implement. For example, why not a sped sensitive device that set off an
alarm (vocal, radio, other) that could be preset "on" in situations where
these runaways are not manned?

I don't mean to downplay the potential complications but, technically,
getting an appropriate alarm system on a runaway doesn't sound like high
end technology.

Wrong Lardass, if you'd have actually completed high school instead of
getting that G.E.D. several years later you'd know it was correct.
Now, tell us why your mommy wanted to smother you after she shit you
out and the OB-GYN stopped her...
.

This is a vain attempt to correct a commonly mis-spoken phrase.

Alrighty, for those of you out there who like to use the phrase I could care
less, it's supposed to be I couldn't care less. "I could care less" means
that you actually do care, and the phrase itself holds very little meaning
because you can care less about anything you do already care about. It's
very ambiguous, and doesn't convey how much or how little you care about
something. Still following me? "I couldn't care less" means that you care so
little about something, it's impossible to care even less about it. 99% of
the time, "I couldn't care less" is the phrase that's supposed to be used.
Get me? Good :)

"It's "complaintant," you sniveling weasel." (Roger Wiseman on spelling
complainant.)

No one said "just the ARRL." However, Baxter's repeated and re-repeated "bulletins" are what is called "disruptive jamming" and not "amateur radio related informational" transmissions. And a Radio Shack timer is NOT a "control operator." Un-monitored and uncontrolled transmissions ARE illegal. So are the advertisements that are NOT "information bulletins." The FCC needs to be decisive with this nutcase. OM

Of, course it is, you're incapable of little else.

--
Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

1827. Re: What's the problem?

Actually it's:

The American Heritage® Book of English Usage.
A Practical and Authoritative Guide to Contemporary English. 1996.

3. Word Choice: New Uses, Common Confusion, and Constraints

§ 78. could care less / couldn't care less

I could care less! you might say sometime in disgust. You might just as easily have said I couldn't care less and meant the same thing! How can this be? When taken literally, the phrase I could care less means "I care more than I might," rather than "I don't care at all." But the beauty of sarcasm is that it can turn meanings on their head, thus allowing could care less to work as an equivalent for couldn't care less. Because of its sarcasm, could care less is more informal than its negative counterpart and may be open to misinterpretation when used in writing. 1
The phrases cannot but and can but present a similar case of a positive and a negative meaning the same thing. For more on this, see cannot under Grammar.

Source: http://www.bartleby.com/64/C003/078.html

Again, out of many times, sarcasm swoops over the malformed bald head of Lloyd Davies. Taken literally, if one could care less, then one must care at least a little, which is obviously the opposite of what is meant. It is so clearly logical nonsense that to condemn it for being so (as some commentators have done) misses the point. The intent is obviously sarcastic-the speaker is really saying, "As if there was something in the world that I care less about".

Yes I am aware of the special definitions for bulletins and code practice
(and the abuse thereof) but I was keeping it basic to address the particular
case presented.

Mr. Glenn A. Baxter
RR1 Box 779
Belgrade Lakes, ME 04918
Re: Amateur Radio license K1MAN

Dear Mr. Baxter:

On May 14, 1999, after numerous complaints about your Amateur station regarding broadcasting, deliberate interference, failure to identify, poor signal quality and erratic starting and stopping times, personnel from the Boston office of the Commission monitored your station and attempted to inspect it. There was no one present at your station while it was transmitting on Amateur Service frequencies. The transmissions continued while Commission personnel went to your residence at 1 Long Point Road, but there was no one present there either. Again on May 15 while your station was transmitting, Commission personnel attempted an inspection but there was no one present.

Since the Amateur Radio Service rules require that Amateur stations be under the control of a control operator, and that the control operator must ensure the immediate proper operation of the station, we requested by letter dated June 25, 1999, that you provide information to the Commission, pursuant to Section 308(b) of the Communications Act of 1934, as amended, regarding the operation of your Amateur station. You responded by letter dated July 25, 1999, but your response failed to provide the information we requested. We notified you of that fact by letter dated August 4, 1999, and detailed the inadequacies of your response.

Specifically, you did not provide the name, address or phone number of the control operator for any of the "broadcasts" or "bulletins" such as prerecorded interviews, transmissions of answering machine responses, live interviews, or live, pre-recorded or automated station identifications transmitted by your station. Among other deficiencies of the response, you did not provide dates and times Amateur station K1MAN transmitted without a control operator.

You also stated in your July 25, 1999 reply that you had not received our June 25 letter by certified mail and that our letter had "misrepresented itself as Certified Mail". We reminded you that you had signed the certified receipt for that letter, and we provided you with a copy of that certified receipt.

You responded to our August 4 letter by letter dated August 24, 1999. During our review of the information you provided, your Amateur station ceased operation. As a result, we held our inquiry in abeyance. The U.S. District Court in Maine subsequently dismissed your lawsuit against the Commission, and dismissed your petition for reconsideration of that dismissal as well.

You recently resumed operation of Amateur station K1MAN. In view of that resumption and the resulting complaints we are receiving about deliberate interference, threats against those who do not relinquish frequencies for your use or who would complain, or who have complained, erratic operation, broadcasting, unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control, we have resumed our inquiry into the operation of K1MAN.
In reviewing your letter dated August 24, 1999, referenced above, and your actions subsequent to coming back on Amateur frequencies, it appears that your understanding of certain Amateur Radio Service rules may be incorrect.

We will outline the apparent misunderstandings below.

Amateur Station Control
With regard to control of an Amateur station, your letter of August 24 indicated that the control device for your station was a "Radio Shack timer", and that the control points for the station were "the main power switch at the transmitter site" and at the location of the control operator, wherever that may be". You further stated that on the dates in question, May 14 and 15, 1999, you were the control operator and were in "both Belgrade Lakes and Augusta in either mobile or portable modes".

Section 97.7 of the Commission's rules states that "when transmitting, each Amateur station must have a control operator". Section 97.105 states that "the control operator must ensure the immediate proper operation of the station, regardless of the type of control (emphasis added). Section 97.109 states that "each Amateur station must have at least one control point", and that the control operator must be at the control point when the station is locally controlled or remotely controlled.

Section 97.7 further states that a control operator need not be at the control point if a station is automatically controlled. However, as Section 97.109 also explains, only stations specifically designated in Part 97, such as a space, repeater, beacon or auxiliary station, may be controlled automatically. There is no provision in Part 97 that allows an Amateur station transmitting information bulletins to be automatically controlled.

In summary, your control of the station by a "Radio Shack timer" while you are absent from your Amateur station is a violation of the Commission's Rules. You were not in control of your station on May 14 and 15, 1999 while you were in "both Belgrade Lakes and Augusta in either mobile or portable

modes". Your statement in your response that "K1MAN has never transmitted during the current license term without a control operator acting in full compliance with rules 97.105 and 97.109 as well as all other applicable FCC rules" is untrue.

Simply put, to comply with Commission rules, you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting, when your station is locally or remotely controlled. If the station is controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments).

Publishing a Transmitting Schedule & Interference
It appears that you may be under the misconception that by publishing a transmitting schedule of K1MAN, you have certain rights under Commission rules regarding the control operator and frequency sharing requirements that you would not otherwise have.

With regard to the requirement for a control operator, publishing a schedule does not relieve you of that requirement in any way whatsoever. Section 97.113(d) of the Amateur Radio rules states that by publishing a schedule of transmissions at least 30 days in advance, a control operator of a club station may accept compensation for the periods of time when the station is transmitting...information bulletins, providing certain additional conditions are met. Publishing a schedule of proposed transmissions, therefore, relates only to a club station control operator accepting compensation. We note that this is irrelevant to the operation of K1MAN because K1MAN is not a club station.

Simply put, to the extent that you start your transmissions on top of ongoing communications of other amateur service stations, you will be engaging in deliberate interference, in violation of Section 97.101 of the Commission's rules. No amateur service frequency is assigned for the exclusive use of any station. Your publishing an intended transmission schedule does not exempt you from that rule.

Threats to Complainants and Other Users
Your sending "Felony Complaint Affidavits" to other Amateur Service licensees who complain or intend to complain of your operation, or who do not relinquish frequencies to you, was the subject of a Warning letter to you dated December 11, 2001. You have also been warned about such "Felony Complaint Affidavits" by the United States Attorney in Maine.

The Commission will view any threats made by telephone, through the U.S. Mail or on radio frequencies to Amateur Radio licensees who file complaints with the Commission, or who do not relinquish frequencies for your use, as very serious.

Broadcasting
We also note that on your web site and in your radio transmissions, you

refer to your transmissions variously as "broadcasts, programs, talk shows, bulletins, pre-recorded interviews" and so forth. We have received complaints that you have broadcast comedy shows and commercial messages. We caution you that Section 97.113(b) of the Amateur service rules prohibits amateur station from engaging in any form of broadcasting. Certain one-way transmissions, such as information bulletins, are allowed as specified in the rules.

Tape Recording and Broadcasting Telephone Conversations
We have received and have under review complaints that you have tape-recorded telephone conversations without the consent of the recorded party and that you have broadcast such tape recordings. We caution you that such recording without consent may be in violation of state or federal law. We will contact you under separate cover regarding those complaints.

In summary, it is very important for you to understand that we will review all valid complaints concerning the operation of your Amateur station, and that Commission personnel will again inspect your station. The rules of the Amateur Service are straightforward and easy to understand. To the extent that you do not comply with Commission rules regarding the Amateur Radio Service, then to that extent enforcement action will be taken against your licenses. That enforcement action may include revocation of your station license, suspension of your operator license, a modification proceeding to restrict your operating privileges, or monetary forfeiture.

It is also important for you to understand that if these matters are not resolved, your operator/primary station licenses will not be routinely renewed; but instead will be designated for hearing before an Administrative Law Judge. In such a proceeding, you would have the burden of proof to show that your licenses should be renewed.

January 29, 2002

Mr. Glenn A. Baxter
RR1 Box 779
Belgrade Lakes, ME 04918
Re: Amateur Radio license K1MAN

Dear Mr. Baxter:

On May 14, 1999, after numerous complaints about your Amateur station regarding broadcasting, deliberate interference, failure to identify, poor signal quality and erratic starting and stopping times, personnel from the Boston office of the Commission monitored your station and attempted to inspect it. There was no one present at your station while it was transmitting on Amateur Service frequencies. The transmissions continued while Commission personnel went to your residence at 1 Long Point Road, but there was no one present there either. Again on May 15 while your station was transmitting, Commission personnel attempted an inspection but there was no one present.

Since the Amateur Radio Service rules require that Amateur stations be under the control of a control operator, and that the control operator must ensure the immediate proper operation of the station, we requested by letter dated June 25, 1999, that you provide information to the Commission, pursuant to Section 308(b) of the Communications Act of 1934, as amended, regarding the operation of your Amateur station. You responded by letter dated July 25, 1999, but your response failed to provide the information we requested. We notified you of that fact by letter dated August 4, 1999, and detailed the inadequacies of your response.

Specifically, you did not provide the name, address or phone number of the control operator for any of the "broadcasts" or "bulletins" such as prerecorded interviews, transmissions of answering machine responses, live interviews, or live, pre-recorded or automated station identifications transmitted by your station. Among other deficiencies of the response, you did not provide dates and times Amateur station K1MAN transmitted without a control operator.

You also stated in your July 25, 1999 reply that you had not received our June 25 letter by certified mail and that our letter had "misrepresented itself as Certified Mail". We reminded you that you had signed the certified receipt for that letter, and we provided you with a copy of that certified receipt.

You responded to our August 4 letter by letter dated August 24, 1999. During our review of the information you provided, your Amateur station ceased operation. As a result, we held our inquiry in abeyance. The U.S. District Court in Maine subsequently dismissed your lawsuit against the Commission, and dismissed your petition for reconsideration of that dismissal as well.

You recently resumed operation of Amateur station K1MAN. In view of that resumption and the resulting complaints we are receiving about deliberate interference, threats against those who do not relinquish frequencies for your use or who would complain, or who have complained, erratic operation, broadcasting, unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control, we have resumed our inquiry into the operation of K1MAN.
In reviewing your letter dated August 24, 1999, referenced above, and your actions subsequent to coming back on Amateur frequencies, it appears that your understanding of certain Amateur Radio Service rules may be incorrect.

We will outline the apparent misunderstandings below.

Amateur Station Control
With regard to control of an Amateur station, your letter of August 24 indicated that the control device for your station was a "Radio Shack timer", and that the control points for the station were "the main power switch at the transmitter site" and at the location of the control operator, wherever that may be". You further stated that on the dates in question, May 14 and 15, 1999, you were the control operator and were in "both Belgrade Lakes and Augusta in either mobile or portable modes".

Section 97.7 of the Commission's rules states that "when transmitting, each Amateur station must have a control operator". Section 97.105 states that "the control operator must ensure the immediate proper operation of the station, regardless of the type of control (emphasis added). Section 97.109 states that "each Amateur station must have at least one control point", and that the control operator must be at the control point when the station is locally controlled or remotely controlled.

Section 97.7 further states that a control operator need not be at the control point if a station is automatically controlled. However, as Section 97.109 also explains, only stations specifically designated in Part 97, such as a space, repeater, beacon or auxiliary station, may be controlled automatically. There is no provision in Part 97 that allows an Amateur station transmitting information bulletins to be automatically controlled.

In summary, your control of the station by a "Radio Shack timer" while you are absent from your Amateur station is a violation of the Commission's Rules. You were not in control of your station on May 14 and 15, 1999 while you were in "both Belgrade Lakes and Augusta in either mobile or portable

modes". Your statement in your response that "K1MAN has never transmitted during the current license term without a control operator acting in full compliance with rules 97.105 and 97.109 as well as all other applicable FCC rules" is untrue.

Simply put, to comply with Commission rules, you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting, when your station is locally or remotely controlled. If the station is controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments).

Publishing a Transmitting Schedule & Interference
It appears that you may be under the misconception that by publishing a transmitting schedule of K1MAN, you have certain rights under Commission rules regarding the control operator and frequency sharing requirements that you would not otherwise have.

With regard to the requirement for a control operator, publishing a schedule does not relieve you of that requirement in any way whatsoever. Section 97.113(d) of the Amateur Radio rules states that by publishing a schedule of transmissions at least 30 days in advance, a control operator of a club station may accept compensation for the periods of time when the station is transmitting...information bulletins, providing certain additional conditions are met. Publishing a schedule of proposed transmissions, therefore, relates only to a club station control operator accepting compensation. We note that this is irrelevant to the operation of K1MAN because K1MAN is not a club station.

Simply put, to the extent that you start your transmissions on top of ongoing communications of other amateur service stations, you will be engaging in deliberate interference, in violation of Section 97.101 of the Commission's rules. No amateur service frequency is assigned for the exclusive use of any station. Your publishing an intended transmission schedule does not exempt you from that rule.

Threats to Complainants and Other Users
Your sending "Felony Complaint Affidavits" to other Amateur Service licensees who complain or intend to complain of your operation, or who do not relinquish frequencies to you, was the subject of a Warning letter to you dated December 11, 2001. You have also been warned about such "Felony Complaint Affidavits" by the United States Attorney in Maine.

The Commission will view any threats made by telephone, through the U.S. Mail or on radio frequencies to Amateur Radio licensees who file complaints with the Commission, or who do not relinquish frequencies for your use, as very serious.

Broadcasting
We also note that on your web site and in your radio transmissions, you

refer to your transmissions variously as "broadcasts, programs, talk shows, bulletins, pre-recorded interviews" and so forth. We have received complaints that you have broadcast comedy shows and commercial messages. We caution you that Section 97.113(b) of the Amateur service rules prohibits amateur station from engaging in any form of broadcasting. Certain one-way transmissions, such as information bulletins, are allowed as specified in the rules.

Tape Recording and Broadcasting Telephone Conversations
We have received and have under review complaints that you have tape-recorded telephone conversations without the consent of the recorded party and that you have broadcast such tape recordings. We caution you that such recording without consent may be in violation of state or federal law. We will contact you under separate cover regarding those complaints.

In summary, it is very important for you to understand that we will review all valid complaints concerning the operation of your Amateur station, and that Commission personnel will again inspect your station. The rules of the Amateur Service are straightforward and easy to understand. To the extent that you do not comply with Commission rules regarding the Amateur Radio Service, then to that extent enforcement action will be taken against your licenses. That enforcement action may include revocation of your station license, suspension of your operator license, a modification proceeding to restrict your operating privileges, or monetary forfeiture.

It is also important for you to understand that if these matters are not resolved, your operator/primary station licenses will not be routinely renewed; but instead will be designated for hearing before an Administrative Law Judge. In such a proceeding, you would have the burden of proof to show that your licenses should be renewed.

Mr. Glenn A. Baxter
RR1 Box 779
Belgrade Lakes, ME 04918
Re: Amateur Radio license K1MAN

Dear Mr. Baxter:

On May 14, 1999, after numerous complaints about your Amateur station regarding broadcasting, deliberate interference, failure to identify, poor signal quality and erratic starting and stopping times, personnel from the Boston office of the Commission monitored your station and attempted to inspect it. There was no one present at your station while it was transmitting on Amateur Service frequencies. The transmissions continued while Commission personnel went to your residence at 1 Long Point Road, but there was no one present there either. Again on May 15 while your station was transmitting, Commission personnel attempted an inspection but there was no one present.

Since the Amateur Radio Service rules require that Amateur stations be under the control of a control operator, and that the control operator must ensure the immediate proper operation of the station, we requested by letter dated June 25, 1999, that you provide information to the Commission, pursuant to Section 308(b) of the Communications Act of 1934, as amended, regarding the operation of your Amateur station. You responded by letter dated July 25, 1999, but your response failed to provide the information we requested. We notified you of that fact by letter dated August 4, 1999, and detailed the inadequacies of your response.

Specifically, you did not provide the name, address or phone number of the control operator for any of the "broadcasts" or "bulletins" such as prerecorded interviews, transmissions of answering machine responses, live interviews, or live, pre-recorded or automated station identifications transmitted by your station. Among other deficiencies of the response, you did not provide dates and times Amateur station K1MAN transmitted without a control operator.

You also stated in your July 25, 1999 reply that you had not received our June 25 letter by certified mail and that our letter had "misrepresented itself as Certified Mail". We reminded you that you had signed the certified receipt for that letter, and we provided you with a copy of that certified receipt.

You responded to our August 4 letter by letter dated August 24, 1999. During our review of the information you provided, your Amateur station ceased operation. As a result, we held our inquiry in abeyance. The U.S. District Court in Maine subsequently dismissed your lawsuit against the Commission, and dismissed your petition for reconsideration of that dismissal as well.

You recently resumed operation of Amateur station K1MAN. In view of that resumption and the resulting complaints we are receiving about deliberate interference, threats against those who do not relinquish frequencies for your use or who would complain, or who have complained, erratic operation, broadcasting, unauthorized tape recording and broadcast of telephone conversations, business use of an Amateur station and lack of station control, we have resumed our inquiry into the operation of K1MAN.
In reviewing your letter dated August 24, 1999, referenced above, and your actions subsequent to coming back on Amateur frequencies, it appears that your understanding of certain Amateur Radio Service rules may be incorrect.

We will outline the apparent misunderstandings below.

Amateur Station Control
With regard to control of an Amateur station, your letter of August 24 indicated that the control device for your station was a "Radio Shack timer", and that the control points for the station were "the main power switch at the transmitter site" and at the location of the control operator, wherever that may be". You further stated that on the dates in question, May 14 and 15, 1999, you were the control operator and were in "both Belgrade Lakes and Augusta in either mobile or portable modes".

Section 97.7 of the Commission's rules states that "when transmitting, each Amateur station must have a control operator". Section 97.105 states that "the control operator must ensure the immediate proper operation of the station, regardless of the type of control (emphasis added). Section 97.109 states that "each Amateur station must have at least one control point", and that the control operator must be at the control point when the station is locally controlled or remotely controlled.

Section 97.7 further states that a control operator need not be at the control point if a station is automatically controlled. However, as Section 97.109 also explains, only stations specifically designated in Part 97, such as a space, repeater, beacon or auxiliary station, may be controlled automatically. There is no provision in Part 97 that allows an Amateur station transmitting information bulletins to be automatically controlled.

In summary, your control of the station by a "Radio Shack timer" while you are absent from your Amateur station is a violation of the Commission's Rules. You were not in control of your station on May 14 and 15, 1999 while you were in "both Belgrade Lakes and Augusta in either mobile or portable

modes". Your statement in your response that "K1MAN has never transmitted during the current license term without a control operator acting in full compliance with rules 97.105 and 97.109 as well as all other applicable FCC rules" is untrue.

Simply put, to comply with Commission rules, you must be at the transmitter, or at the transmitter control point, every moment your station is transmitting, when your station is locally or remotely controlled. If the station is controlled by telecommand from the control point using a radio link, the frequencies used for telecommand must comply with the Section 97.201 requirements for an auxiliary station (may transmit only on the 1.25 m and shorter wavelength bands, except 219-220, 222-222.150, 431-433 and 435-438 MHz segments).

Publishing a Transmitting Schedule & Interference
It appears that you may be under the misconception that by publishing a transmitting schedule of K1MAN, you have certain rights under Commission rules regarding the control operator and frequency sharing requirements that you would not otherwise have.

With regard to the requirement for a control operator, publishing a schedule does not relieve you of that requirement in any way whatsoever. Section 97.113(d) of the Amateur Radio rules states that by publishing a schedule of transmissions at least 30 days in advance, a control operator of a club station may accept compensation for the periods of time when the station is transmitting...information bulletins, providing certain additional conditions are met. Publishing a schedule of proposed transmissions, therefore, relates only to a club station control operator accepting compensation. We note that this is irrelevant to the operation of K1MAN because K1MAN is not a club station.

Simply put, to the extent that you start your transmissions on top of ongoing communications of other amateur service stations, you will be engaging in deliberate interference, in violation of Section 97.101 of the Commission's rules. No amateur service frequency is assigned for the exclusive use of any station. Your publishing an intended transmission schedule does not exempt you from that rule.

Threats to Complainants and Other Users
Your sending "Felony Complaint Affidavits" to other Amateur Service licensees who complain or intend to complain of your operation, or who do not relinquish frequencies to you, was the subject of a Warning letter to you dated December 11, 2001. You have also been warned about such "Felony Complaint Affidavits" by the United States Attorney in Maine.

The Commission will view any threats made by telephone, through the U.S. Mail or on radio frequencies to Amateur Radio licensees who file complaints with the Commission, or who do not relinquish frequencies for your use, as very serious.

Broadcasting
We also note that on your web site and in your radio transmissions, you

refer to your transmissions variously as "broadcasts, programs, talk shows, bulletins, pre-recorded interviews" and so forth. We have received complaints that you have broadcast comedy shows and commercial messages. We caution you that Section 97.113(b) of the Amateur service rules prohibits amateur station from engaging in any form of broadcasting. Certain one-way transmissions, such as information bulletins, are allowed as specified in the rules.

Tape Recording and Broadcasting Telephone Conversations
We have received and have under review complaints that you have tape-recorded telephone conversations without the consent of the recorded party and that you have broadcast such tape recordings. We caution you that such recording without consent may be in violation of state or federal law. We will contact you under separate cover regarding those complaints.

In summary, it is very important for you to understand that we will review all valid complaints concerning the operation of your Amateur station, and that Commission personnel will again inspect your station. The rules of the Amateur Service are straightforward and easy to understand. To the extent that you do not comply with Commission rules regarding the Amateur Radio Service, then to that extent enforcement action will be taken against your licenses. That enforcement action may include revocation of your station license, suspension of your operator license, a modification proceeding to restrict your operating privileges, or monetary forfeiture.

It is also important for you to understand that if these matters are not resolved, your operator/primary station licenses will not be routinely renewed; but instead will be designated for hearing before an Administrative Law Judge. In such a proceeding, you would have the burden of proof to show that your licenses should be renewed.

The problem with the 2002 letter is it was later overturned in part by
the 2004 letter in regards to his one-way transmissions.

You might find some of the systems that I worked on in the Bulletin of
the American Meteorological Societs (BAMS). Have you never worked on
anything worth appearing in a professional publication?

> His only "radio" reference, other than being a radio mechanic at
> ADA, is the SINCGARS program...A program absolutely irrelevent to

> Amateur Radio, but he sure does make sure we hear about it.

And you can't remember the common or technical nomeclature of teh radio systems that you claim to have used in the USMC. How is it that you can remember the name of a system that Len worked on? I guess the purpose of repititious postings has finally had an effect.

> > That bad, bad Len being qualified to do both! Gosh, he must have
> > decided early in life to lay the foundation to bust all of your rants.
> > Very inciteful, that Len.
>

> "contributions" to "radio"

You don't even know the radio systems that you claim to have used, yet you know that Len has mucked up every program that he has worked on?

Something is really, really wrong with your claims, Steve.

> > > Of course too we presently have reams and reams of "front page"

don'y you know that somehow for daring to oppose Stevie you sudden
became homosexual

HMM maybe Stevie is right about that perhaps I am bisexual because it
became certain somehow I would oppose Stevie and therefore I suddenly
became interested in Men

Stevie it is all your fault

"There is a special exception which allows organizations such as the
ARRL to broadcast, and has opened the door nut-so operators such as
Glenn Baxter to abuse the exception."

There is no "special exception" anyone operate a information bulletin.

"Baxter's repeated and re-repeated "bulletins" are what is called
"disruptive jamming" and not "amateur radio related informational"
transmissions."

I'm not going argue if he had jammed or not, but in regards to his
transmission the rules state that they only have to be of interest to
amateur radio, not "amateur radio information"

We agree....Gee...put THIS day on tha calender!

BTW, Brian, Lennie has publically stated that his last "public
service" effort had to do with the filling of sandbags in
1970-something...His words...Not mine.

> > > > Besides...What is needed at present are not "design engineers"

Do some research on the state of "technology" in 1953 as compared
to today, Brian, to include what was considered "microwave" then as
opposed to today.

> > > Except for perhaps West Point, Army

I can do with the stuff on my desktop most of what Lennie claims
he could do in 1953. I'd say that's a bit of a change.

> > > His design experience came later, so Len is actually qualified to do

Yep.

But we weren't talking about you, me or meteorological systems,
now were we?

> > His only "radio" reference, other than being a radio mechanic at

No...I don't DISCUSS military radios here, Brian. I have NEVER,
not ONCE said "I don't remember"...

That's a LennieSpin. And when repeated by him or you, is a lie.

> How is it that you
> can remember the name of a system that Len worked on? I guess the
> purpose of repititious postings has finally had an effect.

To the point of nausea.

However SINCGARS was NEVER an Avionics system. Nor was it
intended to be.

Who SAID I don't now them?

> Something is really, really wrong with your claims, Steve.

No, Brian, something is very, VERY wrong with your's and Lennie's
stories about them.

> > > > Of course too we presently have reams and reams of "front page"

Somebody has to keep you fed, since you can't feed yourself. No,
stupid, I don't clean out "port-a-potties", now post that proof you
have a "pilot's license."

Of course it is, just like that private pilot's test you couldn't pass.
There is no body of information that could possibly undo the severe
educational deprivation you underwent in your childhood. Go back to
school. You don't even know the most basic knowledge that most
Americans of the educated classes take for granted.
You can't make up shit to substitute for facts or reality or the truth.
You're a fucking joke.

Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

Lloyd-

You would do well to contact Ameritron.

You say you have driven the amplifier up to 85W. Obviously that should be
85 watts drive to the amplifier's input.

Have you measured the ALC voltage? You should easily be able to figure
out the control's min and max, and see if the voltage increases as you
increase drive to the amplifier.

If the voltage increases and is adjustable to the maximum voltage for your
transceiver, the transceiver's output should reach a limit that can be
adjusted with the ALC control. If the transceiver doesn't react to ALC
voltage, then it has a problem, not the amplifier.

How is your transceiver set to drive the amplifier? Using CW? I would
expect that to work, but some transceivers may depend on your setting of a
power level control rather than using ALC. Injecting a tone into the
microphone circuit (or whistling?) on SSB, may be necessary for ALC power
limiting to occur.

The good thing for you is that you couldn't locate "Dixie" on a map if
you had to (or any other location). You can't even write a complete
sentence. How you manage to find your way back to your cardboard box on
a daily basis is a miracle in itself. Or do you even venture outside?

Of course not. You leave the heavy lifting to Brian Kelly/W3RV and Jim
Miccolis/N2EY, neither of whom has any military experience. I
especially like Jim's admiration of the amateur radio service during
WWII. Hi!

> I have NEVER,

Pls dont LOL at the Roger. He has a correspondence Masters
Degree from DeVry and is currently doing his doctoral dissertation
on RMS voltage & negative SWR. DeVry says they dont award
graduate degrees earned via correspondence, but Roger insists they
do. You be the judge.

/,,.///,,./

Oh, Yeah? Roger sez they do.
Besides, he could care less.

I have an external power meter between my rig and the Ameritron Amplifer
and have noticed the power output of the rig is less with the amp on.
If I follow the normal tune up procedure using about five watts of drive
then increase in increments, I can get the max output at about 45 to 50
watts. I cannot get the rig output more than 55 to 60 watts with the
amp ON. Is this normal?

Either your ALC is working or the VSWR is too high! If VSWR is too high
someone may have 'fiddled' with the input tuning to the amplifier.

Try it on several bands. It may be the ALC is set a tad too high and it is limiting the transceivers output just as it should. In which case readjust the ALC. It may also be bad tuned input tanks and/or a bad tube(s).

My AL-80B had high vswr on 15/17M tuned input b ut the problem was a soft 3-500Z. Fortunately it was covered under warranty. I made a night light out of the old tube. See here...

1924. Licenses for Internet Broadcasts

Newsgroup: rec.radio.amateur.misc

Hello everyone!
I'm the technician for WRMC, Moravian's intranet-only (only on campus) streaming broadcast radio station. We'd like to go Internet-wide, but the FCC site is quite confusing. Anyone have experience with the licensing involved in the change? The technology end is ready, but I wouldn't want to unleash us against the law, you know? We don't have any other licenses that I know of at this time. Thank you for your input!

- Jen Grier
WRMC Technician

Aw, gee. Give it a break already!
You guys are responding to Roger Wiseman, AB8MQ, a malcontent with a limited
mental capacity.

This guy is what? Fifty years old and still acting like a twelve year old?
Look at his responses. Do you see any intelligence therein?
The guy is a mental midget with a limited vocabulary and, even at that, he
has difficulty spelling correctly.

AB8MQ does his best to be as verbally offensive as possible and he does this
with hopes of initiating a "thread" to which he can respond and spew more
filth.
Ignore the old dude. At Fifty Years of age you'd think that Roger would have
grown up. Apparently he is still struggling with adolescence.

I agree it would seem that K1MAN has choosen an odd undertaking in
choosing to fight the FCC as he seems to be bent on, but such things
are still the lawfull choice of american's

Intelignece is only useful in making decision when it is allowed to
make them. K1MAN has made an emotional one to stand against the ARRL
and FCC, that he has seemly had some success over the argues that he
can't totaly lack intelgence

How do you know what size his penis is or isn't? FAGGOT Holsten, always
worrying about another man's penis.!

> find it's way through
> all that flab?

That's one of Lloyd's ex girlfriend wannabees. He always asks one out
then when he moons and acts stupid around the unsuspecting girl he asks
her to marry him on or before the first date. Usually, the first date
is cut short as the girl asks Lardass or some other guy to take her
home, and Lardass is left at the bar, drunk alone and still a faggot
because that is the only reason he is a 32 year old virgin.

It may be a fine project which will produce the goods, but let's look at the way you've brought it here:
- you wanted help to get up a truck-mounted transmitted to over-ride all AM/FM communications in an area. You wanted to drive the truck at up to 70mph through a disaster/emergency area, for no adequately explained reason (the RF is going for a mile or two outside the area, so why drive the truck?). You got told why it's impractical as described.
- you suddenly changed it to a loco mounted project. You struck gold on this one as there are people here who clearly have industry experience. You're not poo-poo'ing their skepticism, but certainly not fazed (may not be a bad thing....). Why not pour the funds into controlling all these uncontrolled level crossings instead of producing a 'box' to go on every loco that may drive through the US?
- you are trying to get commercial advice in a Ham group - is this the right venue?? I'd have thought not, though it's certainly cheap.

- having ten agencies etc etc on your side may get the project through, but is it the right solution to whichever problem it's attacking?
- 'nay-sayers' are a pain-in-the-arse, agreed - no-one likes them! - but sometimes you need to hear the other side.

Cheers.

Ken

Forgive me, if I'm one of a hundred replies here...

You don't need a license to stream on the Internet. The FCC does not
regulate streaming audio.

What you WILL need is clearance from various rights groups, such as
the recording industry licensers (BMI, ASCAP, SESAC). That'll likely
cost the college money, for any copyrighted music that your station
streams.

You may also need to talk to these folks:

http://www.soundexchange.com/faq.html

The following PDF file would seem to explain it...check near the
bottom of page four for your situation:

http://www.kurthanson.com/internet-radio-handout5-1.pdf

But I'd definitely go through your college's faculty advisor, and
through any NCE/college radio organization to which your over-air
station belongs...

license? license?! we don't need no stinking license!

the only license you need for internet broadcasting is the permission to use the content that you are streaming. if this is music it means you need to pay the appropriate per song royalties to the proper organization, which i understand can be quite expensive. if its locally generated content you should be good to go.

1960. Re: Licenses for Internet Broadcasts

If you're not going to emit any RF into the air, the FCC is not gonna care. The RIAA, ASCAP and BMI may shake you down for fees to play music on the Internet, though...

I don't think you need to worry about the FCC, but you may have some
music licensing to deal with. ASCAP, BMI etc.

You don't need an FCC license. You DO need licenses from the copyright
holders, but that is true of your current setup as well as a net-wide setup.

Just saw this post, Clarence, and jumped to it since you discovered a misstatement. At all times, I want to be as accurate and authoritative as possible. When it turns out wrong, the mistake needs to be ballyhooed.

First, naturally I spelled what I wanted to say wrong. Suedo is, of course, spelled correctly, pseudo. It is in Black's, meaning "false." So far, so good, but here's where I get into trouble. Podia is apparently a biological term meaning feet. My notion that podia meant position is wrong. If it means feet, then my usage needs a further explanation lest anyone think I'm phony.

Much of my legal education came from my Father, born in 1898, deceased in 1988. He grew up on Latin and the common law. Psuedo podia is a term he used and I imitated, assuming its meaning as false position.

I find it nowhere current in relation to the law. But it isn't unusual that Dad used terms grounded in an earlier era that are no longer used. Yet no longer in Black's is hard to fathom. Another word he taught was demurrer, a legal term no longer used but very much in Black's.

And so, I misused a term, and this reply is to set the record straight. Clarence, thanks for your astute follow-up.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 2nd/October, through Sunday, 9th/October there were 205 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C2, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J6, JA, JT, JW, JX, JY, K, KH0, KH2, KH6, KH7K, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S0, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, V8, VE, VK, VK9N, VP2V, VP5, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZD7, ZK1/s,ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3B8, MAURITIUS. Five JA2 stations (JA2AAU, JA2AIC, JA2ATE, JR2FOR and JJ2KTY) are currently active as 3B8/homecall between now and October 13th. They will operate from different QTHs, so they may operate two stations on same band/mode at the same time. Activity will be on 80-10 meters, SSB, CW, RTTY and PSK31. QSL via their home callsign.

4X, ISRAEL. Operators Burt/W3GG, Mark/WD3I and Dov/4Z4DX will be active as 4X0G during the CQ WW DX CW Contest (November 26-27th) as a Mutli-Single entry. QSL via W3GG.

5R, MADAGASCAR (IOTA Op). Giovanni, I5JHW, will be active from Nosy Be Island (AF-057) now through October 19th, as 5R8HH. Activity will be on 40-10 meters SSB/RTTY. Over the past weekend he was very active on 15/10 meters SSB. Watch 21260 and 28495 kHz between 1100-1700z. QSL via his home callsign.

6Y & ZF, JAMAICA AND CAYMAN ISLAND. Kan, AB2RF, will be active from two Caribbean Islands this winter. Activity will be focused on the low bands and the digital modes. Look for him to be active as ZF2CJ from December 28th to January 1st and from Jamaica as 6Y5/AB2RF, January 2-4th. QSL both operations via AB2RF. Visit his Web for details at: http://www.qsl.net/ab2rf/ZF&6Y.html

9M2, WEST MALAYSIA (Update). Champ, E21EIC, will be active as 9M2/E21EIC for the CQ WW DX CW Contest (November 26-27th) on all bands. He informs OPDX that he will be there for one week, and his activity outside of the contest (before and after) will also be on the WARC bands. QSL via E21EIC.

ANTARCTICA NEWS.....
3rd Antarctic Activity Week (AAW). The "Worldwide Antarctic Program" (WAP) has announced that the 3rd AAW will be held February 20-26th, 2006. The AAW is a way to highlight worldwide interest in the Antarctica as a land of study, research and peace, with its main objective as knowing more about the icy Continent, as well as to share and promote initiatives among Hams, Antarctic hunters, World-Wide Antarctic enthusiasts and supporters. Visit the WAP Web page at: http:// www.ddxc.net/wap

Bhagwati, VU3BPZ, continues to be very active from the Indian Maitri Base (WAP IND-03), Antarctica, for the XXIV IAE (Indian Antarctic Expedition). He is generally around (+/- QRM) 21275 kHz after 1400z and 14280 kHz between 1700-2000z. Bhagwati is the Communication Officer at the Base and is there during their winter with a team of 25 people. They will stay at Maitri until the end of March 2006. QSL manager is VU3MKE. Please notice that the address on QRZ.com is incorrect. The new address is: Mr. Manoj Kumar Dhaka, Trupati Valley No 7, D-Lane, Kewal Vihar, DEHRADUN, Uttaranchal-24001, INDIA. His E-mail address is: manojdhaka@yahoo.com

Personal and researchers are ready to leave October 19th to participate in the XXI Italian Antarctic Expedition. They will be heading to the Italian base "Mario Zucchelli Station" (MZS) at Terra Nova Bay (near the U.S. McMurdo Base) in the Antarctica. Activity is expected again to begin in November and last through February 2006. The scheduled frequency is 14280 kHz (+/- QRM). More information is to follow and will be available on the WAP Web site listed above.

D4, CAPE VERDE. Alberto, IV3TAN, will be active as D44TD during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band entry.

His band entry will be decided the day before the contest (possbily
15 or 20 meters). QSL via CT1EKF.

EX, KYRGYSTAN. Operators Jaak/ES1FB and Oleg/ES1RA will be active from
Bishkek and Maili Suu, starting November 1st for 2 weeks. They will sign
EX/homecall. QSL via their home callsign. Look for EX/ES1FB to be on LoTW.

HI, DOMINICAN REPUBLIC. Hiro, JA6WFM/HI8, continues to be active but will
go QRT October 26th and return home. Watch 40/20 meters CW/RTTY. QSL via
JA6VU.

IOTA NEWS.....
EU-114. Remember to look for five members of the Purple Mug Team DX
Group (PMTDXG) to activate the Island of Alderney, the most
northernly island of the Channel Islands group, between
Wednesday, October 12th, to Wednesday, October 19th. Activity
will be on all HF bands, 6 meters, VHF APRS, VHF/UHF, SSB, and
hopefully, some satellite activity. The team Members announced
are: Carol/2E1DQZ, Russell/G5XW, Tim/M3SDE, Dave/G1OCN and
Anthony/MW0JZE. Callsigns and QSL route(s) are: GU5XW via G5XW,
GU1OCN via G5XW, MW0JZE via G5XW and MU3SDE via M3SDE. For more
information, see individual callsigns on QRZ.com. Also, visit
the PMTDXG Web page at: http://www.pmtdxgroup.co.uk

NA-058. (Update) Tad, WF4W, informs OPDX that "all systems are go" for
the trip to Jekyll Island at the end of the month. He will be
there from October 26th through November 2nd. He states, "I
should be set up and running on Wednesday, October 26th, by
7 or 8 p.m. I'd say tentatively, to look for me that evening
from around 8 p.m. on 14.260, 18.128 and/or 7.230 (that is high
enough that Generals can work me)." Tad plans to be fairly
active on those frequencies (as well as the other IOTA SSB and
CW frequencies) on Wednesday night, Thursday on and off all
day/evening and Friday leading up to the CQWW SSB Contest.
During the contest Tad states that he will probably be doing
a mixture of calling CQ and hunting/pouncing. After the contest
ends Sunday evening, Tad states that he will probably crash but
will get back on the air on the same frequencies Monday and
Tuesday. He will tear down Wednesday, November 2nd and head
back home. Also, if anyone wants to set up a sked with him,
outside of the contest, he suggests to E-mail him ahead of time
at the following addresses:
WF4W@earthlink.net -or- ironbutttad@yahoo.com
Tad will do what he can to accommodate any requests. QSL via
his home callsign, direct or via the Bureau.

SA-NEW. (Update) A group operators from Argentina who were expected to
activate Isla Escondida in the Chubut Province North Group, has
reportedly decided to postpone the DXpedition date because
written official permission did not arrive. They didn't want
to operate without this paper in their hands. They are still
hoping that the Marine Authority will give them permission.

Stay tuned for updates and watch: http://www.ddxc.net/l95wi/

J48/SV8, GREECE (IOTA Op). A Hungarian team will be active using J48 and SV8/homecall callsigns from Astris (KN20in), Thassos Island (EU-174), between October 28th and November 8th. They will operate on 80-10 meters, CW, SSB, BPSK31 and RTTY, using monoband dipoles, ground planes and a 3 element tribander Yagi. The callsigns to be used are:
J48RT - November 1-7th, 80m CW only in the HA-QRP Contest. QSL via HA6KNX.
J48NL - October 29-30th in the CQ-WW-DX SSB Contest. QSL via HA6NL.
J48PL - October 29-30th in the CQ-WW-DX SSB Contest. QSL via HA7PL.
J48JJ - November 5-6th in the Ukrainian DX Contest. QSL via HA7JJS.
J48PS - November 5-6th in the Ukrainian DX Contest. QSL via HA6PS.
They will also try to do something on 2 meters with 100W and an 11 element Flexa Yagi, and will take part in VHF (144MHz CW Marconi) Contest during November 5-6th. Outside of contest, operators will use their SV8/homecall callsigns. QSL via the HA QSL Bureau or direct to the operator's own address (via QRZ.com).

K7C QRT (KURE DXPEDITION). The K7C DXpedition went QRT around at 1000z on October 5th. They made 52,113 QSOs with activity on 160-10 meters. QSOs per mode: CW - 27917, SSB -22334 and RTTY 1862. A preliminary summary is now available online at:
http://www.cordell.org/htdocs/KURE/KURE_pages/KURE_Preliminary_Summary.html

KG4, GUANTANAMO BAY. Noll, W9RN, will be active as KG4RN between October 24-31st. His activity will include the CQWW DX SSB Contest as a Single-OP/ Single-Band (40m) entry. Outside of the contest he will be active on 160-6 meters, including the WARC bands, on CW/SSB. QSL via his home callsign.

KG4, GUANTANAMO BAY (Cancellation/Rescheduled). Operator Jose, N4BAA/KG4SB, reports that his trip to KG4 land for this month has been cancelled. Navy duties have him deploying to other parts of the world for the same period. He will, however, be active from Gitmo Cuba in January 2006 on all bands and modes.

KH2, GUAM. Look for two members of the Himeji DX Club from Japan to be active November 25-28th. Operators Tada/JA3PPH and Yoshi/JA3EGZ will sign KH2/JA3PPH and KH2/JA3EGZ, and they plan to make over 3000 QSOs. Activity will be mainly on 40-15 meters SSB, but they will also be on 160 meters with a 500W amplifier for the low band DXers. Also, KH2/JA3EGZ will be in the CQWW DX CW Contest as a Single-Op/All-Band Oceania entry, and he hopes to win. QSL both callsigns via JA3EGZ: Yoshikazu Mega, P.O. Box 6, Himeji, 670-8691 JAPAN.

KH6 BEACON UPGRADED. On Friday, October 7th, at approximately 2100z, the KH6WO Beacon located at BYU Laie, Oahu, Hawaii, was upgraded adding the WARC frequencies 18.110 and 24.930 MHz to its transmitting beacon. The KH6WO trustee, John Peters, K1ER/KH6, KH6BZF and K7IHI assisted in re-programming the Northern California DX Foundation controller, driving a TS-50 transmitter adding these WARC frequencies to the existing beacon frequencies of 14.110, 21.150 and 28.200 MHz in Federal Communications

Commission (FCC) compliance. Both Senator Daniel K. Inouye (D) Hawaii and Mr. Bill Cross, FCC Staffer at Washington, DC, were helpful in obtaining this FCC waiver to accomplish this upgrade. The Honolulu Amateur Radio Club (Oldest Amateur Radio Club in the islands) is the owner of KH6WO and maintains this beacon. Reception reports are encouraged and may be sent to trustee John Peters, K1ER/KH6. These WARC frequencies will assist other Amateurs world wide as to when these bands are open to Hawaii.

PJ4, NETHERLANDS ANTILLES. Operators OE2VEL, OE2GEN, OE9MON and DK1MM will be active from Bonaire Island between October 25th and November 1st. The Austrian and German team will be active in the CQWW SSB DX Contest as PJ4W and as a Multi-Single entry. QSL via DK1MM (direct or by the bureau). Outside the contest they will be active as PJ4/homecall. QSL via their home callsigns.

QSL INFO AND NEWS.....
ATTENTION FUTURE QSL MANAGERS! Paolo, IK3QAR, informs OPDX that he has created on his Web site a new section called "Manager Offered - Where DX meet Managers" in which any individual who wishes to become a QSL Manager or is willing to take more QSL duties for a DX station in need, can leave a message where to be contacted through the Web site. The Web page is at: http://www.ik3qar.it/manager/mgroffer/

TOP 5 QSL MANAGER SURVEY (Next Month). John, K1XN, has sent out an early reminder to get you thinking about his annual "Top 5 QSL Manager Survey" that he conducts. This survey will start in the month of November and end in January of 2006. Results will be published in February of 2006. John states, "Again this year we will award the TOP 5 Managers from all the nominees a wall plaque or a date plate to previous winners. These plaques were really appreciated by those who received them last year. Donations from all DXers in any amount will be accepted to offset the cost of these plaque awards. PayPal will be the method of choice, but more info on that in the November news release. Please be thinking of the 5 managers that gave you outstanding service this year (2005). Remember, this is not a popularity survey but a performance survey." Last year's winners are still posted on the Golist Web site at: http://golist.net/

A4/G0RTN QSL STATUS. Gerry, G0RTN, expects to have all direct QSLs in the mail this week. As for bureau QSLs, Gerry states that he hasn't had a bureau delivery for over a year, and he is starting to get worried ... but he should be able to turn them around pretty quickly when they finally arrive.

CY9SS QSL STATUS. Robby, VY2SS, states (as of Sunday, October 9th): "The CY9SS QSL cards have not arrived yet from the European printer. They should be here shortly."

Toni, EA5RM, informs OPDX that the CW5R (SA-039) 2005 log has been uploaded to the LoTW.

GB0SM ONLINE LOG AVAILABLE. Tom, G0PSE, informs OPDX that thanks to the kind efforts of Doug/N6RT, the online log for GB0SM (IOTA EU-011) has been updated to include the 2005 DXpedition and is now available for checking at; http://www.qsl.net/gb0sm
Please note that E-mail requests for a bureau QSL goes to: g0pse@qsl.net

Albert, K8SIX, President SEMDXA, reports, "If you worked S79RRC/A or S79RRC/F and are in the U.S. or Canada hold off on QSLing direct as Eugene asked me today if we can do the same arrangement as R0K. This is not cast in stone yet so please be patient. As soon as he returns we will discuss this further, but it appears as though myself, K8SIX, and Russ, VE6VK will be a drop point. We will collect the SASEs and any donations and forward the donations to him along with the list of those requesting a QSL. Once he sends a package of cards we will in turn forward them to you. So please hang tight, and Russ or I will make the announcement soon."

Darrell, AB2E, reports that all 18000 QSOs for V26E (1993-1999), and 4000 QSOs for EI/AB2E (2004-2005) have been uploaded to LoTW. All bureau and direct cards via AB2E will still be answered.

QSL ZS6CCY via OK1DOT: Petr Gustab, P.O. Box 52, CESKY BROD, 282 01, Czech Republic. QSL cards received by bureau are answered via bureau. Cards received direct with a SAE and 1 USD/IRC will be answered directly (do not send old IRCs please).

RMA AWARD. The Russian Mountains Award (RMA) Web page is now available in English at: http://www.mountain.ru/radio/rma/engl.shtml

SPECIAL EVENT. The official opening of the "South African Large Telescope", situated near Sutherland, will take place on November 10th. The Boland Amateur Radio Club will run a special event station with the callsign ZS1SALT from the SALT site. For security reasons, the station can only be operated on the time slot October 21-23rd. Activity will be on all HF bands. QSL cards can be sent direct, with the necessary return postage, to: ZS1SALT, PO Box 273, Strand, 7139, Republic of South Africa. Only direct QSLs with the required return postage will be answered. South African amateurs can make use of the electronic QSL service of the SARL to confirm contacts with ZS1SALT. For more information about the South African Large Telescope, visit the following Web page at: http://www.salt.ac.za

SPECIAL EVENTS (Japan).....
Look for special event station 8J6KNM to be active commemorating the "Kyushu National Museum" between now and November 27th. QSL via the JARL Bureau. KYM Web site is: http:/www.kyuhaku.com/pr

Look for special event station 8N1C50A to be active to commemorate the 50th Anniversary of Chofu City between now and November 30th. QSL via the JARL Bureau. The Chofu City Web site is: http://www.city.chofu.tokyo.jp/English/English.html

Look for special event station 8N5ICT to be active during the Regional Information and Communication Technology (ICT) Futurity Festa in Kagawa,

Japan, now through Octboer 23rd. QSL via the JARL Bureau.

Look for special event station 8N380N to be active until March 31st (2006), to celebrate the 80th anniversary of Nishinomiya City. QSL via the JARL Bureau.

Look for special event station 8J8K to be active to celebrate the birth of the new Kushiro City between October 11-17th. QSL via the JARL Bureau. The Kushiro City Web is:
http://www.city.kushiro.hokkaido.jp/english

SX5, DODECANESE. Operators SV5FRD, SV5AZP, SV5FRB and SV5DDP will be active as SX5R in the CQ WW DX SSB Contest (October 29-30th) as a Multi-2 entry. QSL via SV5FRD.

V6, MICRONESIA. Shoji, JA7HMZ (V63DX), will once again visit Pohnpei and be active as V6A between November 14-19th. Activity will be on all bands and modes. However, he plans to focus on 160m and RTTY this time. QSL via JA7AO.

XX9, MACAO. Misao/JJ1DWB and Hide/JM1LJS will be active during a short trip here starting around 0400z on November 4th until 1900z on November 5th. Operators will use a TS-570SG (100W output)and a non radial vertical antenna on 80-6 meters. Callsigns have not been issued yet, but operators will have their own callsign. QSL direct only via their home callsign. Watch for further updates on: http://radio-dream.com/macau/

This has to be the most imbecilic exchange of "opinion" I have ever
followed. If I ever question my level of intelligence, then I just tune into
rec.radio.amateur... and follow one of the "Lardass Lloyd Davies" threads.

Once I've followed the er-a progression of thought (or abscence thereof), I
fully appreciate my ability to think and reason.

Dear Bob,

You only misspelled a term that is not in our usual vocabulary. Don't sweat it!

Whereas "pseudopodia" is technically a biological term, I would assume that it could be used figuratively to describe something whose meaning does not have a solid foundation or footing.

Thanks for the clarification of your thoughts.

Regards,
Wayne-
(KC8UIO)

No No Markie.....only against YOU. You need your attitude
adjustment......anyone disagree? Of course they don't. You see Markie you
are a piece of garbage that needs flushed.

Not just an opinion.....a pure and simple fact.

realy delusional Dan

> Don't you see how idiotic you sound Markie?

gee asserting that one has equal rights in amercia make someone an
idiot in your eyes

shows you do not adhere to pricinples of the US Consitituion, or to the
rule of law

those deny right to other tendto lose them themselves

you sound like a bigot and ahte monger a real asset to the ARS

Has Homer Simpson taken up ham radio as a hobby? The description you give yourself sounds a lot like Homer.

As far as do-it-yourself brain surgery, I think you should consult with K1DUDE. He has given himself a frontal lobotomy. Maybe he will donate his brain. He claims that his is superior to everyone else's and I can attest that it has been LIGHTLY used.

Good Luck, Homer!

I think basic rights should be denied to moronic retards. They need to be
institutionalized.

Sounds like a good law. Why should Ham VHF handheld gear be any
different than cell phone stuff. Same thing distracting the driver. I
guess the big difference is that the newer cell phones are years more
advanced than the Ham stuff.

Very eloquently put! Your use of the word "stuff" indicates your mastery of the English language. What the Hell does advancement of equipment have to do with distracted driving laws anyway?

Ya'...cell phones are so advanced so Sally can call Bambie and tell her about the new shoes she just bought at 50% off. All this while zooming along at 65 mph. Let the cell tower go out and see if she can complete her conversation about the matching handbag. I suppose that she could take a picture of herself to see if her makeup is smudged, while the cell tower is off-line (and stuff).

<davies.lloyd@NOSPAMmcleodusa.net> writes:

Hello,
I am going to our club's Novice/Tech class, in which they said they
will
emphizse more on CW this time around. I would like to upgrade my
liecense
soon, at lease 5wpm or 13wpm. My probelm is that I tried for 6 years
now,
but can't seem to get past a certain point in the code, say up to a
certain
letter, then get stuck and get confused.
I have the ARRL tapes, Gorden West tapes and several CW programs
including
Super morse. I know of several programs like Code Quick, but not
really
willing to spend the money on them. I you have a used copy to sell me,
I'd
consider it.

Thanks for reading this, Any help is welcome.

"Locomotive Breath"

In the shuffling madness
Of the locomotive breath,
Runs the all-time loser,
Headlong to his death.
He feels the piston scraping --
Steam breaking on his brow --
Old Charlie stole the handle and
The train won't stop going --
No way to slow down.
He sees his children jumping off
At the stations -- one by one.
His woman and his best friend --
In bed and having fun.
He's crawling down the corridor
On his hands and knees --
Old Charlie stole the handle and
The train won't stop going --
No way to slow down.
He hears the silence howling --
Catches angels as they fall.
And the all-time winner
Has got him by the balls.
He picks up Gideon's Bible --
Open at page one --
God stole the handle and
The train won't stop going --
No way to slow down.

Obviously you don't watch The Simpsons, because then you'd know that Homer
is not a Ham. But you'd also have seen an episode where one of Marge's
sisters does mention amateur radio, which is one of her hobbies.

And that sort of placement is what the hobby needs.

Michael

> Did your Mother actually raise YOU?

yes of course, and she rased to tell Ladies that don't act like ladies
should not be treated as ladies

If a "lady" wants to come out and throws insults arround it is just
fine to throw insults back at her. Indeed Dee to here credit on this
point doesn't seem to have a problem with that

> Or are you just a product of someones
> imagination?

well a lot of what get posted about me is the product of various people
imgination, But I am real.

> I really can't believe you are this screwed up.

I am not responible for what you beleive or don't believe.

Nor do I have any obligation to live according to your statndards,
your aren't belief I must is yet another sign you don't respect the
constitution and laws of the US

> Are you for
> real Markie? If so...please do us all a favor.....pull the damn trigger.

what trigger? pointed at what

always resorting to the advocation of violence

Violence is is said to be the last resort of the limited mind. I don't
quite agree with that but the exception are not relavant to newgruop
discourse so here it work

I believe what many novices fail to realize, copying 5-wpm code is far more difficult to read than is 30-wpm code.

As your experience with CW increases, you'll suddenly realize that one day you no longer hear the individual dots and dashes, but recognize the code stream as characters and numbers immediately. I suppose it's recognition of the morse rythm as individual characters.

For example, you never hear 'a' as discrete dots and dashes, but as a composite sound, not dit-dah. For some strange reason, the ARRL code practices transmissions fail to emphasize this very important part in developing code skill, whereas Navy radio operator training courses do.

The W1AW code practice transmissions would benefit greatly if they transmitted all morse characters at a 20-wpm rate and adjusted the spacing between characters to a much lower rate, just as the Navy does.

On the other hand, it is difficult for an experienced CW operator to identify the characters of code transmitted at a uniform 5 or 10 wpm rate, because the individual dots and dashes are being tranmitted at such a slow rate that you cannot identify the unique sound of any individual character.

And no, I wasn't in the Navy but as a child was taught code by an older railway signalman using the traditional telegraph clicker. After that, the transition to listening to audio tone sequence or morse code was a piece of cake.

I've been told that at even higher rates you learn to hear words, not individual characters, but I'm not yet that good.

Hope this helps. Harry C.

Mr. Roger L. Wiseman

610 Glen Haven Avenue

Glendale, WV 26038-1302

SUBJECT: Amateur Radio license KC8JBO

Dear Mr. Wiseman:

Pursuant to Section 97.519(d)(2) of the Commission's Rules, 47 C.F.R. Section 97.519(d)(2), the Commission has the authority to re-administer any examination element previously administered by Volunteer Examiners (VE's). The Commission may either administer the examination itself, or under the supervision of a Volunteer Examiner Coordinator (VEC) or VE designated by the Commission.

Accordingly, we are requiring you to re-take the General Class Amateur Examination, (Elements 2, 3(A) and 3(B)) under the supervision of an American Radio Relay League Volunteer Examiner Coordinator. This examination must be completed on or before September 11, 2000. The required code speed that you must demonstrate is 5 words per minute.

Please be prepared to verify your current address and to present a photo identification. Pursuant to Commission rules, your license will be cancelled if you do not appear for re-examination. You will be granted an Amateur Radio license consistent with the elements you pass upon re-examination.

Sincerely,

W. Riley Hollingsworth

Special Counsel, Amateur Radio

This is nothing new, except for extending existing laws to apply to cell phone.

Any older, experienced ham can tell you that it has long been illegal to communicate using your mobile rig while your car is in motion.

We've always been excluded for conducting a QSO while driving on public roadways, so it makes sense to me that cell phone use should be equally prohibited. The law makes sense.

I can't even count the number of times that I've had to take evasive action to avoid collision with a clueless man/woman who is so distracted by their cell phone conversation that they totally lose sight of everything around them.

Hello, I have had this transceiver sitting in my home for a while now.
I don't have a power supply, but would like info on locating one or
building one that would work.
General Electric model TBX-2 s/n 1210
RCV 2000 to 8800 KCs XMT 2000 to 4525 Kcs.
Any info on powering this old guy up would be appreciated very much!
Thanks, Steve KA0OJS

Very good, Harry.

> >
> Mr.

Roger still passed his 13 word per minute code exam for his General,
fatty. It was a breeze passing the mere 5 wpm when he had to retest.
That restest wasn't much of a "punishment", since he passed it and
still upgraded to Extra. And he did it in a much shorter time than

you've been a ham. You've
been a ham over 10 years and you still can't pass either the theory or
the code.

LARDASS Davies admits he's mentally challenged
in
http://www.network54.com/Hide/Forum/message?forumid=243612&messageid=1073965472
"I have no problems with learning code. I get stuck after I work on
about 5-10 letters.
I cannot go any further. I'm stuck. I get a mental block."

Can you say contradiction?

You are such a weenie Markie. You have NO IDEA who your coming up against, not just me BTW. You are LUCKY we ALL consider you a little baby in a grown mans body. Or I assure you that your attitude would change on a one and one encounter.

The ONLY reason you are ACTING the tough guy, and I do mean ACTING, is you think you are out of reach. Well your not.

Take that any way you want wannabe tough guy. You don't worry me one little bit. You are nothing but a big mouth, morally corrupt child trying to act like a grown up in the real world. You are not even close. Stay home with your parents. If you ever come out and play you will get your arse kicked just for breathing.

No Markie...just YOU. You can't even write a sentence that makes sense.
Thus you are impossible to argue with.....because...???.....That's right
Markie because you can't be understood.

But I'll keep trying...I like watching you jump up and down like a Mexican
jumping bean... No rime, no reason...just jumping.

> shows you do not adhere to pricinples of the US Consitituion, or to the
> rule of law
>
I fought for Constitution of this country. I fought for your RIGHT to show
your IGNORANCE on a daily basis.

What did you put your life on the line for Markey? Don't bother...I already
know.

> those deny right to other tendto lose them themselves
>

Boy are you out of touch...No surprise there, eh folks? Our so called
rights have been going away for a long time now.

But that's another subject which I dang sure don't want to get involved in
with you. Your already too confused about a simple thing as your toe being
on fire.

> you sound like a bigot and ahte monger a real asset to the ARS
>

And what have YOU done for Amateur Radio Markie? Just a short list please,
because we all know that is all you got.....Oh let me save you the trouble.

1. You passed the simplest test in Amateur Radio, The Technician NO CODE.

2. You refuse to learn Morse Code to upgrade.

3. You have decided to spend most of your time on this group blaming everyone for your inadequencies.

That about covers the basics.

Dan/W4NTI

Anyone notice how he keeps ranting about alleged threats of violence? My
opinion of him being a child needs modified.

He is a MAMA's BOY. A wimp, A loser, a drop out of life BEFORE he even
played the game.

Maybe we should leave him alone. He might slap himself with a fly swatter
or something.

Perhaps it would be better if you actually had read the Constitution. It is available on line.

Then go read the First ten Ammendments, usually refered to as the "Bill of Rights".

After that you can come back and ammend your statement of what you understand.

This could get interesting folks.

I know I am out the reach of anything you bring to bear, unless you
choose to break the law, in which case I am prepared for you in the
unlikely effect you are serious

The only reason you dare to (try) such bulling is that you know you are
basicaly out of My reach

>
> Take that any way you want wannabe tough guy. You don't worry me one little

Too bad '73' isn't on CD like 'Ham Radio' and 'QST'. I suggested it to that old fart Wayne Green a couple of years ago. He said it sounded like a good idea but at his age he probably forgot the comment as soon as he blinked his eye.

Oh you can be sure he heard and evaluated your suggestion.
Telling you it is a good idea is smart business practice, make
the person feel good. Then, anywhere from one second to
much later, he simply evaluated the idea, then farted you off.

73 & good luck in the contest,

Dr Ham

Oh B.S. go back to law school. A person can advocate
whatever he wants, its what you "do" about it that counts. If advocating
violence against someone was a criminal act 40% of this country
would be locked up.
```

not at all

the legal system has so broken down that the law is hardly enforced
doesn't change the law
```

You're both wrong; shame on you. It's the Declaration of Independence, and it's predicated on the belief that government serves only to secure the rights that we're all born with.

To whit:

"We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable Rights, that among these are Life, Liberty and the pursuit of Happiness. That to secure these rights, Governments are instituted among Men, deriving their just Powers from the consent of the governed, -- "

Of course, that document was written by slaveholders...so much for -that-, eh?

no it wasn't but slaveholders were included in the Contienal Congress
It was written a by a Slave holder who did include an anti slavery
clause, stricken at the last minute at the insistance of Mr Rutlegde of
SC

2062. Need 73's article

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-11 04:35:40 UTC
From: Jim <jbasi@cfw.com>
Message-ID: <37c54$434aa559$d80c3c80$24123@NAXS.COM>
Source record: 48626

I need to get 'hold of a copy of an article from the November 1998 issue of 73's magazine.

The article is entitled "Build the Fox TTL Foxhunt transmitter".
I thought I might be able to find it in a library somewhere, but no luck there. It appears libraries generally don't keep these back issues very long.

Does someone have a copy I could get photo copied or scanned and emailed?

Thanks
Jim

The Roger Wiseman Dictionary

"Illarate" West BY GOD Virginny!

"Reveresed" Must be one of those off-brand keyboards.

"Soem".as in Some? What a losser.

"VIRIN".What Wogie was before he met the Lavender Lads.

"Minisule".he mussa meant miniscule. Like his IQ.

"Champoin".Whassup, Wiseman? No dictionaries in the mental ward?

"Anoinymous"...a cross between anonymous and annoying?

"Acident" Roger's mom got preggers by accident.

"Alreaedy" Alright, already!

"Amouints" Roger amounts to nothing.

"Aposterphe" This guy is a hoot, ain't he?

"Basios"...word Woger uses when he gets neeeerrrrvous.
"Behing"...a cross between being and behind?

"Coiward" As in peeking from behind his mommy's curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know Roger.

"Ghet" Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took over again.
"Methjadone"...a West Virginia substitute for Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his fingers were numb.
"Beraking"...no definition. Could mean 'beraking' the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate" from his mommie!
"Sisnce" He meant Since, but his pudgy little fingers slipped off the
keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)
"Schol" (school?)
"strill" (still?)
"shoitgun" 12 ga or 20 ga?
"Snoip" (How they spell "snip" in Glen Dale)
"Maturbater". Wiseman does it all the time, he just can't spell
it.(leaves a
sticky residue on his right hand)
"Coskscuking". It's a Roger thing, as in Lavender Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second retest.

" Stgop" Roger's version of Stop.

"Fahter's" He meant Father's Day.

"fserting"..would that be festering?

"poists". Roger meant "posts".

"snadwich" As in peanut butter and jelly?

"regualr" Glen Dale rendition of "regular".

"aftrer" After? Aftrer what?

"soory". Sorry Roger fucks up again.

"didnb't" He didn't?

"whoile". He ate the whoile thing?

"Woamn" He's hooked on West Virginia phonics, all right.

"prrof" And he kin prove it, too.

"beforfe" Was that before he lurned to spell?

"yoiuy" Roger's version of "y'all".

"illerate" Only illiterate Roger can spell like this.

"haeart" Aw, how heartless of me to laugh!

"valule" Roger has no values. No wonder he can't spell it.

"proch" Doesn't everyone have one on their house?

"inmstitution" Where Roger's mom put him in June 1999.

"timne" It's Howdy Doody time?

"whgo" What? Who dat?

"gnetically" Only Roger knows what this one means.

"crfy" Like, cry, Roger, cry.

"stutrtering" Some stutter, Wiseman stutrters.

"Whjere" Where is Curtain Boy?

"Webiste" That's Website to the rest of us.

"Youire" Your? You're? Who knows.

"fiored" As in fired?

"Parety" Roger gave a party once. Nobody came.

"Bouynce" Bounce?

"Varification" Verifiable mental case.

"Probelms" Poor Rogie.has many problems of the mental sort.

"Partricipate" Oh, DUH!!!!

"Cryed" Gee, Wogie..cry me a river.you dolt!

"Stoick" What a dork. His old 386 has no spell check program.

"Partiall" More WV Phonics, I see.

"Obsucred" Either obscured or Rogie has "sucre" on his mind.

"Infinate" Stupid. Think finite, Rogie.

"Sustinance" As in Sustenance?

"Juvinile". This is the way Roger likes his boys.

"Piut" Put it where, Rogie?

"Toyus". "Toyus R Us?

"Diminuative". Roger's height.

"Percriptions" Say what?

"Credibiliy" More Glen Dale intellect.

"Thsoe" Yet another Glen Dale gaffe.

Wrong, stupid Marky, Thomas Jefferson, one of the principal authors of
the Declaration of Independence, WAS a slave-owner. As were many
others. It wasn't just written by one person, either, Marky. Rutledge
needed the clause to be stricken for economic reasons. The agrarian
economy at the time in the South depended upon slaves as a workforce.

Inded he was as I said without naming him but of course he was ONE
person not "slaveholders" pural

you realy should try learning english

> As were many
> others. It wasn't just written by one person, either, Marky.

the other authors (whose roles were minor) Adams, Franklin, Livingston,
and Sherman were not slave holders

> Rutledge
> needed the clause to be stricken for economic reasons. The agrarian
> economy at the time in the South depended upon slaves as a workforce

yes of that was the reason advanced, beat then you are into beating
dead horses

I decided to make a contribution to the continued use of Morse code, and have created a computer program that makes it easy to learn the code. The program can be downloaded from http://justlearnmorsecode.com

If you like the program, please make the URL known to the members of your club and anybody else that might be interested.

Also, comments and suggestions are very welcome.

You are the one that said to this statement:
> Of course, that document was written by slaveholders...so much for -that-,
> eh?

You replied:

"no it wasn't but slaveholders were included in the Contienal Congress
It was written a by a Slave holder who did include an anti slavery
clause, stricken at the last minute at the insistance of Mr Rutlegde of

SC"

YOU are the one who said the document wasn't written by slaveholders,
when anybody with a modicum of education knows differently, Marky.

You are the one in desperate need of learning English, child abuser.

> > As were many
> > others. It wasn't just written by one person, either, Marky.
>
> the other authors (whose roles were minor) Adams, Franklin, Livingston,
> and Sherman were not slave holders

You are even more stupid then you show on here, Marky, if you think
that... Adams and Franklin were not minor roleplayers, either, stupid.

> > Rutledge
> > needed the clause to be stricken for economic reasons. The agrarian
> > economy at the time in the South depended upon slaves as a workforce
>

anyone one with a real education knows that it was written by A slave
Holder, not by a group of them, but I guess that lets you out

>

Minor in American indenpendance no in the writing of the document yes,
at Adams is a minor player in that drama according to Adams, Franklin
according to Adams and Jefferson, one the few things Adamas and
jefferson agred on in later year

and none of the other persona mention (Adams, Franklin, Livingston,
and Sherman) were slave holders at all

therefore again the document was not written by slaveholders in the
pural

shocking the lack of education displayed

>From QRZ.COM:

Topic: Countdown to B-Day, Days Until K1MAN License Expiration

With mere days to go until Glenn Baxter's license expires, one wonders if the FCC will act to deny the K1MAN renewal application. Considering the numerous allegations regarding rules violations and character issues surrounding Baxter over the last ten years, it seems likely the FCC will affirm the $21,000 NAL and designate the renewal for a hearing in front of an administrative law judge.

If the renewal is designated for hearing, the judge could order Baxter off the air during any possible appeal process. If Baxter fails to pay an affirmed NAL, he could run afoul of the FCC's "red light rule" which would prohibit him from obtaining any benefit from the FCC until his debt was paid.

Baxter's "bulletin" has been notably absent from 75 and 20 meters since early summer. This is reminiscent of 1999 when the FCC was taking an active interest in Baxter's activities. Baxter disappeared for a period of two years, and later resumed his activities after the FCC turned its attention elsewhere. Baxter has claimed he was teaching high school, and he actually sued the FCC, allegedly for suggesting they had something to do with taking him off the air. Baxter lost the suit.

An interesting website documenting Baxter's career in amateur radio can be found here:

http://home.ripway.com/2005-7/357648/

You dont seem to get it Markie.....Im not saying you have no rights because
the Constitution says so (you claim). Actually it is the Bill of Rights. I
object to you being equal in that you "claim" to be a man.

Based on you actions here I despute you are indeed a man.

The premise is stated in the DoI, not the Constitution. But I can see all
too clearly that this cause is lost.

> no it wasn't but slaveholders were included in the Contienal Congress

Ya'...cell phones are so advanced so Sally can call Bambie and tell her
about the new shoes she just bought at 50% off. All this while zooming
along
at 65 mph. Let the cell tower go out and see if she can complete her
conversation about the matching handbag. I suppose that she could take
a
picture of herself to see if her makeup is smudged, while the cell
tower is
off-line (and stuff).

Just about like ole Rufus and lil Skippy yakking about the weather or
how Rufus ole lady has a hang nail.
Oh ya, my mastery of english was learned on the ham bands.

Double BS,, cite me "one" case where someone "threatened'
to do something and got charged. The legal system hasnt gone to
hell,,,, there never has been a law against making threats. I could threaten
people all day long and I "might" get a visit by the cops asking me what
my problem is, but thats about all thats going to happen. You are getting
confused with people who may raise a fist or other object and threatening
to hit them, that, technically is assault. But just making a statement of
threat dont mean squat and never has.

Most of us couldn't give a loud low-freq resonant broccoli fart in church
during easter sunday mass about K1MAN or the rented
horse he rode in upon. Just as long as the ego-centric likely (?)
paranoid broadcasting wanabe, with his pathetic excuse
for a radio bulletin service, is off the air from 75 Meters
then we will be more than happy and satisfied with whatever
course of events that the FCC may choose to follow.

Lord, I just can't help myself.

http://www.firstamendmentcenter.org/news.aspx?id=3461

Personally speaking, I think you ought to be able to say what that guy did
and get away with it. But that's just me, and I wasn't on the jury. As for
making a statement of threat, you guys need to research the phrase "true
threat".

Therein lie your answers. ;)

do so in the future do remind me and I promise to apologize sir
>
> http://www.splcenter.org/intel/intelreport/article.jsp?aid=556
form the above link quote

On appeal, the defendants argued that the content of the posters and
Web site were protected speech under the First Amendment. But the full
Ninth Circuit Court of Appeals upheld ACLA's liability, finding that
the content on the posters and Web site constituted an unprotected true
threat.

The court defined a true threat as a statement made when a "reasonable
person would foresee that the statement would be interpreted by those
to whom the maker communicates the statement as a serious expression of
intent to harm." [See Planned Parenthood, 290 f.3d at 1074, 1088.] The
test is an objective one; the defendant does not have to actually
intend to, or be able to, carry out the threat. [Id. at 1076.] In the
Planned Parenthood case, the Ninth Circuit found that it was reasonable
for ACLA members to foresee that the named abortion providers would
interpret the posters and Web site postings as a serious expression of
ACLA members' intent to harm them.

Hi I have for sale two Comet/NCG Meters :

1) NCG-3000 118 mHz-530 MHz SWR / Wattmeter 5-20-200 Watts
Bought New in Box for $ 110.00...Item is in mint condition.
Make offer

1) Comet CMX-3 140 mHz - 525 MHz SWR / Wattmeter 20-50-200 watt
Is remotable...Paid $ 170.00 New In Box Item is in Mint condition.
Make offer...

Thanks

Congrats for offering another way for folks to learn CW.
Thing is, there is no Easy way. Learning the code takes practice, time, but most importantly--desire.
The time seems to be coming when learning even 5WPM will not be an issue to get a ham license, and more than a few are waiting on that. And I won't say if that's a good or bad thing, but from my experience learing CW is far easier that what you need to know than what's required for an Extra license.
But again, wanting to learn makes all the difference. And if someone comes up with an easier way to absorb that knowledge, more power to them, and to you.

-Has

Thank you.

> Thing is, there is no Easy way.

Yes there is. That is what I was posting about.

> Learning the code takes practice,
> time, but most importantly--desire.

Sure. But using the above mentioned software makes it take less practice,
less time, and even less desire.

> But again, wanting to learn makes all the difference.

Wanting to learn is important, but having good tools for learning also makes
a big difference.

> And if someone comes up with an easier way to absorb
> that knowledge, more power to them, and to you.

Actually, Koch and Farnsworth did just that, a LONG time ago. And the
http://justlearnmorsecode.com web site includes descriptions of both these
methods.

My son just took the General and followed it up a short time later with his
Extra and in both cases as I recall it took about a week.

K1MAN EDITORIAL - ED051010A - AMERICAN AMATEUR RADIO ASSOCIATION

ARRL MEMBERSHIP IS IN FREE FALL AS AARA NIPS AT THEIR HEELS

"The League has mismanaged emergency funds in my opinion," says AARA Executive Director, Glenn Baxter, K1MAN. "If ARRL spent as much effort on emergency communications as they do lobbying against K1MAN's FCC license in Washington, they might have much greater success competing with IARN on the disaster communications front," according to Mr. Baxter. "Their focus seems to be on their dwindling membership," says the leader of the American Amateur Radio Association and arch rival of Newington. www.K1MAN.com

See the attached League articles. (While not yet a radio amateur!)

NEWINGTON, CT, Oct 6, 2005--Sarah Dorsey, a native of West Hartford, Connecticut, is the ARRL's new--and first--Membership Manager. She officially assumed her duties at ARRL Headquarters October 5. Her primary focus will be on developing membership recruitment and retention strategies to increase membership growth. She'll also support member and customer service. WHILE NOT YET A RADIO AMATEUR, Dorsey says she's "absolutely" looking forward to the challenge of her new responsibilities, and a ham radio licensing class is on her short list.

"I enjoy work that is personally meaningful," she said. "I've been fascinated with learning about ham radio operators and the crucial role they played and continue to perform in the rescue and recovery efforts for Katrina and Rita. I look forward to the day when I'll also be able to work side by side with our members."

Dorsey attended Green Mountain College in Vermont and is a graduate of Charter Oak College in Connecticut. Prior to coming to the League, she served as recruitment marketing manager for a non-profit health care services organization in Philadelphia, Pennsylvania, where she managed recruitment and retention initiatives.

Her professional background also includes management, marketing and recruitment positions in various disciplines of the healthcare and human services markets. Dorsey says she's now ready for a new challenge that requires essentially the same skill set.

ARRL COO Harold Kramer, WJ1B, anticipates that Dorsey's past experience will fold right into the League's goal of boosting membership and retaining current members. "More important, we look forward to her

providing even more value and benefits to being an ARRL member," Kramer said. "Sarah will become a very visible part of the ARRL team at hamfests and conventions, and she is looking forward to meeting many of our members and prospective members."

ARRL Sales and Marketing Manager Dennis Motschenbacher, K7BV, earlier this year announced the search for a Membership Manager to target membership recruitment and retention. He says having Dorsey on board in that role is part of an overall strategy to "look beyond many of the League's current organizational paradigms regarding membership."

Dorsey recalled occasionally driving past the Maxim Memorial Station W1AW building while growing up in the Greater Hartford area. "That little brick building is definitely a landmark," she remarked, adding that she never anticipated one day working on behalf of Amateur Radio at ARRL Headquarters. "Now everywhere I go, I'm starting to notice antennas!"

.....yeah right !

Let's all go to Southeast Asia to play radio cop with
Blowhard Baxter and risk contracting BIRD FLU

FOAD

2103. Re: Licenses for Internet Broadcasts

Newsgroup: rec.radio.amateur.misc

Rather than be the umpteenth person to tell you that you don't need an FCC license for internet broadcasting... ;-)

....I'll tell you a quick and easy way to get around the *other* licensing issue.

You could simply go to Live 365 (live365.com) and sign up there. You will be given a blanket license that should keep you covered legally.

Also, you *might* be think about having a link that only connects for people "on campus" (using your servers, etc.) that might allow you to broadcast on your INTRAnet (as opposed to the whole internet). That might keep you in the clear.

You might also have to watch out for any prerecorded spots that have agency or union talent on them. (Although, sine you are a non-comm, this is practically a non-issue.) If you have PSA's from the ad-council, they should be covered by the ad-council.

2104. Re: GE TBX-2 Navy Dept. Bureau of ships transceiver info wanted...

IIRC that old manpack was powered by a hand cranked generator (maybe
there was also a gas-powered one). Don't recall if it was DC (most
likely) or 400Hz 28VDC.

Maybe a check at rec.radio.amateur.boatanchors is in order too.

Good luck!

Threats made by a "group" that has a long history of violence
against others isnt the same as some john doe citizen making a threat
against another.

Podcasting is the best way for a college radio station to increase it's
listenership. There, you face only two hurdles:

1. Permission from the bands and labels
2. ASCAP and BMI fees

Tables Turned is helping college radio stations with both problems by
hosting a music clearance license for any band that wants to give you
permission and waive public performance fees.

We're currently circulating a college radio petition to increase
awareness of podcasting from within the indie record industry. Please
have a look, and spread the word:

http://tablesturned.com/pages/collegeradiopetition

In solidarity,
Marcus Estes
Tables Turned

Baxter *owns* all you fruits. Thousands of kilohertz to play
in, and yet you fruits insist on jumping into Baxter's sandbox.
There are no "Baxters" on CB, because they are ignored. You
weak minded hams actually make Baxter what he is.

2121. OT:Is anyone on group at Chinese Grand Prix NOW? Help get a message to my wife?

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-14 22:00:22 UTC
From: "G1LVN (for it is he)" <gareth.paley@gmail.com>
Message-ID: <dip9pm$5k6$1@nwrdmz02.dmz.ncs.ea.ibs-infra.bt.com>
Source record: 48525

My wife is in Shanghai, China right now. It's her 40th Birthday on Sunday and as she was already going to a conference in Beijing next week, I've bought her tickets to go to the Grand Prix. It's such a shame that I now cannot be with her (due to work commitments).

Sorry I know it's off-topic but can anyone let me know when the qualifying is on (local time) so I can txt her? She's having a bit of trouble finding this out locally.

Also, [a long shot I know] does anyone know how I would go about arranging for a "Happy 40th Birthday Lynne from Xavi, Monty and Gareth XXX" message on the track scoreboard on Sunday? It would make her day.

Regards
Gareth

actually, it was him who decided to play in OUR sandbox.

his claims to ownership of specified ham radio frequencies for the purposes
of his "bulletins" are without merit.

OTOH, W1AW is a historic station (one of the first on the air), has been
doing the same thing for nearly a century and predates most of the modern
rules (thus it is grandfathered). However, they had no pecuniary interest,
often promoted ham radio and provided a means for "over the air training".
I do not see K1 MAN doing any such thing.

In fact, U have heard 'MAN on the air a few times over the last decade or so
and I was always left with a bad feeling in my ears and a question: why is
this idiot even on the sir?".

so, there you have it. enough of your whining, complaining and crying. he is
done. he is gone. now live with it and move on.

Follow your *own* advice, clueless fruit ham. You have been whining,
complaining, and crying about Baxter for years, in order to fill the
voidless nothing in your worthless life.

TURN THE LARGE CENTER DIAL ON YOUR FUCKING
RADIO next time you hear Baxter.

YOU FUCKING MORON!

SWEET and XP Likes it.
Very professionally done.
I used to have cassettes each with one method, one ARRL and
one from, I think CQ magazine. long gone.
I've been on 10 metres so long I can't recognise my own callsign
your software will help change that.
Thank you so very much

By which I mean the tirades of personal insults
and intolerance that emanate within these NG?

Wha happened to the international traditions
of gentlemanliness?

Ham Radio is a technical pursuit for those suitably
motivated. Let us remember that in our dealings
within these NG.

This newsgroup in particular appears to attract the dregs of society unlike some of the other ham oriented newsgroups. Why this is I have no idea, but it certainly doesn't promote a very good public image of amateur radio.

If you buggered off, the 'gentlemanly quotient' on this newsgroup would
immediately increase by 84.3%.

The signal to noise ratio would also improve by a similar percentage.

As far as the USA goes, what you see here and hear on
ham radio is the culmination of 40 years of deliberate
intentional dumbing down of ham radio, by the ARRL and
the culture of corruption in the government regulatory
agency (FCC).

>
> Wha happened to the international traditions

Lost forever and last seen in American ham radio of the

> within these NG.

Not possible when all a mentally ill person has to do is
memorize 20 questions and buy a radio which requires him
to simply plug in the power cord and begin spewing his
insanity to a worldwide audience.

2140. K1MAN vs. FCC: The Real Deal

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-15 21:11:41 UTC
From: "Bob Sherin, W4ASX" <Sherins@bellsouth.net>
Message-ID: <1129410701.815579.138430@g14g2000cwa.googlegroups.com>
Source record: 48444

Like a theologian, Glenn Baxter cites chapter and verse of the U.S. Constitution. Trouble is, he hasn't the least idea how it works. Despite his strident claims of being denied due process, nothing of the kind has occurred. In fact, he's received more due process than any ten hams: If we did a fraction of what he's done in the face of FCC citations, we'd have gotten the boot long ago.

His nonsensical invocation of the Constitution has neither rhyme nor reason. He would urge upon us an interpretation that does not take into account the huge body of case law coming down from the federal courts, which interpret the slim provisions of our great instrument.

A quick analogy spotlights the point: In 1868 the Fourteenth Amendment was ratified giving all citizens of these United States due process and equal protection of law. For African-Americans at the start of the 20th Century, however, equal protection meant separate but equal, only to change midway with Brown vs. Board of Education to be truly equal. This, of course, gave rise to affirmative action and busing. So, for the real deal on our Constitution, we must look to the courts, a direction to which Baxter appears blind.

>From reading him, you'd think that we not only should dispense with the FCC's interpretation of Part 97 but the Supreme Court's intrepretation of agency power as well.

The FCC does indeed have the power of taking draconian measures to enforce. And this includes withholding license renewal pending future hearing while requiring the licensee to stay off the air in the meantime. If an agency didn't have such power, it stands to reason that we'd be subjected to anarchy of the airwaves, the very thing the FCC is empowered to prevent.

Must the FCC take a ham off the air before his administrative hearing? No. Case in point: Herb Schoenbohm, KV4FZ. Even after he was convicted on three felony counts (2 of which were later reversed with one remaining that should have been reversed, in this commentators view), the FCC allowed him to operate. He was on the air all the way up to the adverse decision in his administrative case -- at which time the FCC granted him a grace period before he was removed. (He's since gotten his license back.)

Riley Hollingsworth is uniquely suited for his enforcement role with the Commission because he tempers enforcement with humanism. He sees his job as one in which, by gaining the cooperation of the regulated, he obtains volutary compliance. There are many hams, including this writer, who have been regulated thusly by Riley and who stand with him.

A large slice of the discontented do not realize how much this one regulator has accomplished without incurring the back breaking expense of litigation.

His domain is one area of the U.S. government that works with efficient precision, fixing an astonishing array problems with few resources.

Contrary to popular belief, the FCC, loath to judge First Amendment subject-matter, doesn't object to information bulletins per se. In reasonably formal language, the agency has equated Baxter's to ARRL bulletins. There are, however, aspects of his operation that Hollingsworth has questioned. In response, Baxter, expressly spoiling for a fight, replaces the FCC's interpretation of Part 97 with his own, owning a unique position in the panthion of justice of advocate, regulator,agency, judge, court and jury.

Whatever arguable equities he brings to his cause, like replicating ARRL's practice of starting on a published schedule, he cannot flout FCC authority and expect to stay on the air until his administrative hearing. And when that takes place, there is nothing that vitiates his declaration that he will continue operating without FCC authority.

This declaration is utterly at cross purposes with staying on the air, because no government agency can bend to express non-compliance to such important action and hope to be an effective regulator. Not only that, but how can an express law breaker incapable of regulation claim to be rehabilitated later? (Perhaps a mental defense.) Likely he has sealed his fate forever as not possessing the integrity to be a ham.

During KV4FZ's long odyssey, he conducted himself with respect toward the Commission, and it reacted favorably by affording him lattitude. Because K1MAN is conducting himself in opposition, he is and will be treated accordingly.

There's an appropriate, hackneyed expression: You can win more friends with honey than vinegar! Aging fast, Baxter's shelf life is short.

I don't need to learn Morse, but I decided to look it over, I am quite
impressed. Nice program to practice with also.

Wish it had some more speed though.

Any possibility of cranking it up a bit?

Thank you.

> Wish it had some more speed though.
> Any possibility of cranking it up a bit?

I'm assuming that you're not asking for more than 100 WPM ?

The easiest way to change the speed is to change the two numbers next to the label "Speed" on the line below the menu.

You might also change the speed by selecting /Tools/Options (select Options in the Tools menu) and then change the two numbers next to "Speed" in there. There is also a Help button in that screen.

/Help/Contents is another good place to start.

I don't know your reasoning for making a statement like that, but no matter what it is it applies to ham radio in general. What do you need ham radio for in the first place ? A cell phone is all you need to talk to anybody, anywhere, anytime.

So what are you doing here on the ham radio newsgroups in the first place ?

To "clarifuse" a bit - if you want to set the speed to 25 WPM and use standard timing, you have to change both numbers to 25.

The first number is the word speed, or overall transmit speed. The second number is the character speed. If the numbers are equal, you're using standard timing. If the first number is less than the second number, you're using Farnsworth timing, which means characters are transmitted at the higher speed with extra spacing inserted between characters and words to slow the transmission down to match the lower number.

Oh, and you can change settings during a session (while Morse code is being sent).

Hello to you all,

After browsing the net i am still stuck with my problem, maybe
some one here can help me out.

I have a 2x pk-232 (rom version 30 dec 1988).

One of the units is working perfect, so that is ok.
The second unit works fine in terminal mode (hyper terminal)
But, when i swich it over to host or kiss mode al communication
stops. I do not get anything back from the unit.

I have tried resseting the unit, but this make no difference.
There are no strange led signals or anything other that looks
strange.. just no communication after the kiss of host command.

Any one has an idea ?

Regards Michiel

antiquated. It was developed during a time when it was considered a miracle that we could string wire sets for thousands of miles and (slowly) communicate with a series of "clicks." Then the miracle of spark generators were invented and we were really advanced because we could lose the wire sets and communicate across the big pond.

I tend to be practical when it comes to technology. I realize the importance of amateur radio or else I would not be spending my time in here. However, if I need to order a pizza on my way home from work, I don't pull out my HT and patch into the local pizzeria. I use my cell phone of course.

But, during a time of power failure or disastrous periods, obviously, the cell will not function. So then, I would use a portable method of communication. This does not mean I would automatically pull out my key and start sending Morse. Most likely, I would attempt verbal contact via an HF mode. If bandwidth is limited, I'm sure I could find other modes to use that are almost as efficient as Morse. If all else fails, I could hook up my lap-top, and let it do all the work--sending and receiving Morse. If on the off chance my lap-top is dead, I could resort to manual Morse at 5 wpm. In which case, I still don't need the stupid Morse learning software to get me to 20, 40, 60 wpm.

I have much more important things to do with my time than practice this dead language.

Wayne, I'm sorry to be the one to tell you this, but you really are an idiot.

Now go order yourself a pizza with your HF voice rig or something. You're clearly a very efficient guy, so why waste your time arguing about a technology that you don't want to spend any time on ?

I live in Spring Hill, FL, and accidentally have to listen to these idiots on this repeater now and then when scanning - the poster, the repeater regulars, and the owner are all immature juvenile idiots who all sound like total imbeciles on the air. I think his post speaks volumes for him and attests to his intellect. The 146.64 machine and most of the people who frequent it are a disgrace to amateur radio and an embarrassment to the ham radio hobby. I hope this is the last of the thread...hate to have to put up with them on the newsgroup as well.

I won't deny it!

Now, if you want my honest assessment, I find the whole thing fraught with ethical questions.

What if someone isn't listening to the radio when the message is broadcast? What about the people who don't live near railroad tracks?

If this thing is to *actually* work, it would have to be space based. Work with a database of the frequencies in use in the affected areas. broadcast on them as the need arises. FM will be easy. AM will be some more work. Of course you'll still have to deal with the people who aren't listening at the moment!

Of course if it just a research project to burn up some money, then *that* is a different subject altogether!

This Sunday.... The seasons last...

+++ Now even more Buyers Parking !!!
Thanks to TKT we have use of their new parking lot
across Albany St from the SWAPFEST !!!

!! ** More Buyers PARKING is available ** for details see
http://web.mit.edu/w1gsl/Public/flyer

*** !!!! In our Traditional GARAGE and the adjacent lot !!!! ****
so come rain or shine or super heat the Flea is on !!!

********* $1 buyers discount with hardcopy of this notice ********

COMPUTERS - ELECTRONICS - HAM RADIO - COMPUTERS - ELECTRONICS - HAM RADIO

FLEA all SUMMER at MIT
Sunday October 16th 2005
9AM-2PM

Come to the city for a great flea - plenty of free parking.

MIT's electronics and ham radio flea will take
place on the third Sunday of each month this summer,
April thru October.

There is tailgate space for over 600 sellers and
free, off-street parking for >2000 cars!

Buyers admission is $5 (you get $1 off if
you're lucky enough to have a copy of our ad)
and sellers spaces are $20 for the first and
$15 for each additional at the gate.

The flea will be held at the corner of Albany and
Main streets in Cambridge; right in the Kendall
Square area from 9AM to 2PM, with sellers set-up
time starting at 7AM.

SEASON PASS + Advance Seller Discount

A sellers discount season pass is available which
offers a 30% discount. By prepaying you get a
discount and earlier admission. See the registration form.

*** Attention Sellers ***
Prepaid vendors.. Season Pass or monthly,

will be admitted FIRST.
Separate lines will form prior to gate opening
for prepaid and nonprepaid vendors

!! RAIN or SHINE !! Have no fear of rain, a covered
well illuminated tailgate area is available for all
sellers (6'8" clearance).

Talk-in: 145.23- (PL 88.5) W1BOS/R and
W1XM/R-449.725/444.725 (PL 114.8/2A).

Wrong tense. WAS a technical pursuit . . .

Ham radio and the ideals you mention is dead. Killed by
the RSCB in favour of the new hobby radio, now
designated "Multiband CB"

With the average age of an M3 being about 12 - and with an
IQ to match - any notions about hobby radio being a "technical
pursuit" are simply silly.

Welcome to the brave new world, courtesy of the Potty Bar
book club . . .

For that matter, when did "young Nick" ever post a technical topic on here?

I don't recall any, even Gareth has managed the odd one.

...for calling me an idiot and then wishing me 73. Somehow, I doubt your sincerity.

Don't worry...I have not wasted any time on code. The only time I spent on code was the two weeks I needed to get to 5 wpm. This was to pass the code element in the States.

My sincere thanks to Samuel and Guglielmo for their contributions to communication technology. Thank God that their pioneering efforts have lead the way to much more! Goodbye clicks, dots, and dashes. Hello ones and zeros.

...amateur radio has been given over to the masses. The technical part of
ham radio has never really been that complicated. The segregator was the
code requirement.

Personally, I am glad to see a trend toward opening up the hobby. This
implies that more X'mitters will be around during the time of an emergency.

You do realize of course that, since you do not intend to do anything further with the morse code skill, learning it to only 5wpm is not sufficient to retain the knowledge and it will not be available to you should you ever need.

You do realize of course that the ones and zeros modes become unuseable when there are auroras, thunderstorms, geomagnetic disturbances, etc.

Actually, I didn't really mean that you're an idiot so you're right about
that. Me calling you an idiot was a response to you referring to my work as
"stupid morse learning software".

Of course you are entitled to think whatever you want about anything.
Still, it seems selfish at best to be that condescending about other peoples
interests and hard work just because it doesn't fit YOUR abilities to learn
and become interested.

Well, this is a hobby project and I have to select how I want to spend the little time I have for hobbies. Currently, I choose to add more features to Just Learn Morse Code and later I might want to spend some time on regular ham activities rather than just extending my working hours without being paid...

One user reported that the executable runs just fine on Linux under the WINE emulator, tho.

Hi Michiel

Since nobody has answered you yet...

You have already tried the obvious, resetting the unit to factory
defaults (ie not just a restart)

I havent ever had a PK232 but I remember my old Shep TNC220 had a few
issues with KISS comms. There is a manual escape sequence (that eludes
me at the moment) to put the unit into KISS mode that you should try
also (via terminal).

You have probably already seen something like this;

http://www.rainbowcountry.bc.ca/vapo/seminar/Tnc_Modes.htm

I cant see any hardware issues off the top of my head that would cause a
failure in KISS mode. I guess you have tried swapping the EPROM chips?
Very rare but one bit could have been flipped....!

Sorry for not being much help

There are lots of nice code programs for MacOS.

Just go to www.google.com/mac and type morse code software in the search string.

Sorry, can't help you on Linux, but I'm sure they're out there also.

As to the bashing of morse code, if a group of people wanted to play with communication via smoke signals or tin cans connected with yarn, it's difficult to understand the mindset of another group who chooses to flame them for it. Peculiar thinking indeed. Why not flame those microwave guys who drive around from mountain top to mountain top with their feed horns and tripods? Perhaps it's because if they enjoy doing it then all the power to them! It's all about what you enjoy in the hobby, and if some like morse and others like microwave and yet others enjoy APRS... hurrah for all of them. Have fun and let others have their fun too.

Sigurd,

I've been following this for awhile and I find it ironic that someone
takes the time to create a piece of software and then offer it free to
anyone who would like to use it only to have a bunch of complainers
giving you flak that they don't like it or aren't getting there monies
worth.

Thank you for your efforts and providing it free in the best of
amateur radio traditions.

Very 73,
Danny, K6MHE

If that was all I got I would have given up. But fortunately, I get positive feedback, too. A lot of people send me encouraging emails, a few people (like yourself) make positive comments on newsgroups and there has even been a few donations.

(It's not like I'm going to get anything substantial out of this in terms of money, but the very idea that somebody is willing to part with money when they don't have to is a very strong indication that what I have created is perceived as valuable to others.)

Also, checking the download counter has been very encouraging. Approaching 2000 downloads after just a couple of weeks of "air time" is WAY beyond what I expected for a Morse code learning program.

What's up with the insincere usage of 73 in these newsgroups. One guy calls me "stupid" and another calls me a clown. In closing their views, they sign it "73's."

Since when is stating my opinion "trolling." I believe that opening up the bands will have some very positive results. For one, it could help stimulate the economy if more people are buying amateur equipment.

Apparently, others feel as I do or else the amateur licensing requirements would not be restructured to eliminate high-speed Morse.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th/October, through Sunday, 16th/October there were 215 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P4, PA, PJ2, PJ7, PY, PZ, S0, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, T8, T9, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V5, V7, VE, VK, VK9N, VP2M, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XT, XX9, YA, YB, YI, YJ, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZK1/s, ZK2, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

AH2, GUAM. Members of the Guam Contest Club will be on the air as AH2R during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Op/Single-TX entry. QSL via JH7QXJ, direct (see QRZ.com) or the JA bureau ("NOT" the KH2 bureau). The team states that they have set a target as the Oceanic leader in Multi-OP sigle-TX category and World Top 5. Also, they are trying to build an Oceanic record in this category. They will operate on 40 meters

on 7075-7100kHz because of the band plan limitation. Please listen carefully on these frequencies. Their Sunrise/Sunset are: 2014/0755z. Operators mentioned are: Aki/JI3ERV/NH2C, Kou/JH7QXJ, Masaki/JO1DFG/KH2XC, and Nozomu/JE8KKX/AH2K.

ANTARCTIC NEWS.....
The XXI Italian Antarctic Scientific Expedition is ready to start this week. The Italians will began the Antarctic 2005-2006 season on October 18th. This is when the first group of Specialists and Logistics will leave to Terra Nova Bay, Antartica, to open the Italian "Mario Zucchelli Station" (MZS). The Communication Officer at MZS is Carlo, IK5DHM, Chief of Firemen for the entire period from October 22nd to the end of February 2006. He has received a brand new callsign, II0AMZS (Italy Italy Zero Antarctic Mario Zucchelli Station). He will operate from the Italian Base (WAP ITA-01) using this callsign and will also alternate using the IK5DHM/ANT callsign. QSL Manager is Paolo, I5GWO. During his stay, Carlo will try to activate a couple of remote camps such as "Mid Point" and "Tolos Dome" which will have WAP references after they are activated (dates are not set). Carlo will also try to operate for a couple of days from Concordia Dome C (WAP MNB-03). For more information and updates, visit the on WAP Web site at: http://www.ddxc.net/wap

AROUND THE WORLD TOUR. Two guys around their 60's plan to take about a 60 days trip around the world and operate. Look for operators Seppo/OH1VR and Juhani/OH3SR to activate the following locations during their "World Tour" (Schedule is as follows):
CU2 - Azores Islands, October 24-31st. Look for Seppo to be active in the CQWW DX SSB Contest as CU2/OH1VR (Single-Band (15m)/Low-Power entry. Juhani will be active as CU2/OH3SR on RTTY and SSB.
ZS - South Africa, Novenber 3-8th. Callsigns ZS/OH1VR and ZS/OH3SR.
9V - Singapore, November 9-10th. Activity for a few hours from 9V1PC.
HS0 - Thailand, November 10-13th. Activity from club station HS0AC.
JA - Tokyo, Japan, November 13-15th. Activity possibly as JA***.
KH6 - Honolulu, Hawaii, November 15-19th. Activity as AE6PP/KH6 and KH6/OH3SR.
W6 - San Francisco, CA, November 19-25th. Activity as AE6PP and W6/OH3SR.
P4 & PJ2/PJ4 - Aruba and Netherland Antillies, between November 28th and December 13th. Callsigns: from Aruba P4/OH1VR, from Curacao PJ2/OH1VR and PJ2/OH3SR, and from Bonaire PJ4/OH1VR and PJ4/OH3SR. Look for updates, online logs and photos on: http://www.oh1vr.net

BV0, TAIWAN. Look for a BV-JA team to use the special callsign BV0J during the CQ WW DX SSB Contest (October 29-30th) as a Multi/2 entry. QSL via BW0IR: Kenichi Hoshino, P.O. Box 282, Nan-Kang, Taipei 115, TAIWAN.

EA4, SPAIN. Javi/EC4DX and Oscar/EA4TD will be active as EA4TD in the CQ WW DX SSB Contest (October 29-30th) as a Multi-2 entry. QSL via EA4TD, direct (with SASE/SAE + postage) or by the bureau.

EA6, BALEARIC ISLAND. Look for the EA6IB Team to participate in the next CQWW DX CW Contest (November 26-27th) as a Multi-2 entry. QSL via CBA.

EA8, CANARY ISLANDS. Edu, EC8AUA, will activate the U.R.E. Secci&#65533;n Las Palmas club station's callsign, EA8URL, on Gran Canaria (AF-004), during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (15m)/High-Power entry. QSL via the bureau.

FM, MARTINIQUE. Gil, FM5FJ, will be active in the CQWW DX SSB Contest as a Single-Op/Single-Band (20m) entry. QSL via KU9C.

FP, ST. PIERRE AND MIQUELON. Ian, K8MM, will be going on a DXpedition to the Island of Miquelon with a large group of W8s to be active in the CQWW DX CW Contest (as FP/K8DD) from November 20-30th (See OPDX.726). He will be active outside of the contest as FP/K8MM. However, he wants to see how much interest there would be if takes his IC-910 and gets on FO-29, VO-52 and maybe even the FM satellites (if people can behave themselves). He will take his gear if he can get enough responses to make the extra weight and work of setting up a station worth while. Let Ian know by sending him an E-mail at: ihk8mm@chartermi.net

HC & HC8, ECUADOR AND GALAPAGOS ISLANDS (Lighthouse Activity). Look for Tono, EA9CP, to activate several lighthouses on Galapagos and the Esmeraldas Islands. Activity will be on 20/15/10 meters. QSL via his home callsign, direct or by the Bureau. His schedule is as follows:
HC8/EA9CP - On San Cristobal Island (SA-004), Galapagos Islands. Activity on the even days, starting October 26th through November 8th, will be from the Patricio Hill Lighthouse (Gal-006). Activity on the odd days, starting October 27th finishing November 7th, will be from the Puerto Baquerizo Lighthouse (Gal-007).

HC4/EA9CP - On Wednesday, November 9th, activity from the Punta Sua Lighthouse (ECU-037) in the Esmeralda Province, Ecuador.
On Thursday, November 10th, activity from the Esmeraldas F-3 Lighthouse (ECU-026).
On Friday, November 11th, activity from the Punta Galera Lighthouse (ECU-012).
On Saturday, November 12th, activity from the Esmeraldas F-2 Lighthouse (ECU-030).
On Sunday, November 13th, activity from the Esmeraldas E-1 Lighthouse (ECU-028).
On Monday, November 14th, activity from the Cabo San Francisco Lighthouse (ECU-016)
On Tuesday, November 15th, activity from the Esmeraldas F-1 Lighthouse (ECU-027).
LAST MINUTE ADDITION: We were informed that operator Fernando, EA1BT, will be joining Tono. It wasn't clear whether Fernando will be active with Tono on his lighthouse tour, but here is EA1BT schedule:
HC8/EA1BT - October 26th to November 8th, from San Cristobal Island (SA-004, GALAPAGOS).
HC4/EA1BT - November 9-15th, from Cojimies Islands (SA-056).
Activity from both locations will be on 20/15/10 meters. QSL via EA1BT (bureau or direct).

HS0, THAILAND. Champ, E21EIC, informs OPDX that the Siam DX Group received the contest callsign HS0AR from the NTC this past week. They expect to operate every contest from E21YDP's host station now until December 31st. Look for HS0AR to be active in the CQWW DX SSB Contest as a Multi/2 entry and the CQ WW DX CW Contest (November 26-27, 2005) as a Multi-Single entry. Operators will include HS0EHF, HS0XNO, HS1JNB, E21EIC, E21YDP, E20NMK, E20PFE, HS6MYW and HS8KGG. QSL Manager is E21YDP.

HS0, THAILAND. Charly, K4VUD, will be active as HS0ZCW in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (20m)/Low-Power entry. He will also be active (using the same callsign) in the CQ WW DX CW Contest (November 26-27th). However, his activity will be low power, and in the search and pounce mode only. QSL via K4VUD (QRZ.com).

HS, THAILAND. The club station of the "Asian Institute of Technology", (HS0AC) is allowed to use the special callsign HS0T on the WARC bands until December 31st. QSL via HS6NDK.

IOTA NEWS.....
EU-125. Tom, DL4VM, plans to be active as OZ/DL4VM from Fanoe Island (DIA NS-002 for the Danish Islands Award) until October 31st. Activity will be on 40/20/15 meters QRP CW only. QSL via his home callsign, direct or by the bureau.

EU-174. Hellmuth, DF7XE, will be active as SV8/DF7XE/p from Thasos Island (MIA MG-124) until October 23rd. Activity will be on 80-10 meters SSB, PSK31 and RTTY. If propagation is bad, look for Hellmuth to try CW (However, Hellmuth states that he is a poor CW operator). Hellmuth will be using a Kenwood TS-480HX into a one element Quad antenna mounted at a low height. QSL via his home callsign, direct or by the bureau.

NA-034. Mike/N4MAA and Jim/N4AAC will be active as W4Z from Cunningham Key (USI FL-284S, Pinellas County, Florida) now through October 23rd. Activity will mainly be on 20 meter CW, SSB, PSK31, SSTV, and some QRP. There will be possible activity on other bands when they are open. QSL direct with SASE, or SAE and 1 USA, to N4MAA: Mike Anderson, 452 43rd Ave. N. E., Saint Petersburg, FL 33703. More information can be found at: http://n4maa.us/

J5, GUINEA-BISSAU. Ranko, YT6A, will be active as J5T during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via YT6A.

KP2/WP2, U.S. VIRGIN ISLANDS. Operators John/K3TEJ and John/K3CT will be active as WP2Z during the CQ WW DX CW Contest (November 26-27th) as a Multi-2 entry. QSL via KU9C. Activity before and after the contest will be on 160m and the WARC bands by KP2/K3TEJ and KP2/K3CT. QSL to their home callsigns.

NEW ZEALAND TO EUROPE (Maritime Mobile Trip). Chris, ZL1CT (GM3WOJ), informs OPDX that he will be active as ZL1CT/MM from October 26th until early December, enroute from New Zealand to Europe. He will be travelling via the Indian Ocean, and should be off the coast of Egypt for the CQ WW CW Contest event. The rest of the time he will be at sea. Chris hopes to

take part in both CQ WW Contests and should be in Zone 34 for the CW event. Operation will be on 40 and 20 meters CW/SSB only. Please QSL via N3SL.

P4, ARUBA. Andrew, AE6Y, will be active as P49Y in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band/High-Power entry. QSL via AE6Y.

PJ4, NETHERLAND ANTILLIES. You still have a few more days to work Andy, W9NJY, as PJ4/W9NJY from the Island of Bonaire (IOTA SA-006). He will go QRT on October 19th. Activity will be on 40-10 meters CW, RTTY and SSB. QSL via WD9DZV (QRZ.com).

QSL INFO AND NEWS.....
Gerry, VE6LB/VA6XDX, informs OPDX that Vitaly, VE6JO, has asked him to take over as QSL Manager for his 3C2MV operation. Most direct cards are up-to-date but no bureau cards have yet been processed. The plan is to keep all direct cards current and print a new run of QSLs for the bureau cards in the coming months. Bureau cards will be answered in time, so try to be patient, please don't re-submit. If you need a card quickly, please consider a direct request.

QSL S21SHQ via S21D: Aminul Kawser Khan, Deputy National Commissioner, Bangladesh Scouts, P.O. Box 5130, 1205 Dhaka, Bangladesh. Activity was during this past weekend's Jamboree-on-the Air (JOTA). This special event station was active from the hill top of "CHANDRANATH" at Shitakundo, Chittagong. The QTH is 800 meters above sea level. About 150 Scouts were expected to join this event. Operators mentioned were: S21AM, S21L, S21S, S21RC and S21D.

UPDATE. Al, K6SIX, announced that he received an E-mail from Eugene, RZ3EC, and it is now official that Al/K8SIX and Russ/VE6VK will be drop points for the S79EC, S79RRC/A, S79RRC/C and S79RRC/F DXpedition in North America and HA1AG will be the Europe drop. QSLs will be handled the same as for the R0K DXpedition for those of you who worked that one. All three IOTAs can go in one envelope if so desired. PLEASE make sure you include a SASE so they can send the card to you once Eugene sends them a package. Any donations will be forwarded to Eugene as they were for R0K operation which worked out very well. South America can also go via K8SIX if so desired. NO bureau cards please.

R1, MALYJ VYSOTSKIJ ISLAND (MVI). Reports indicate that Vlad, UA2FF, is currently preparing for his next MVI DXpedition to take place November 17-28th. This activity will include operations during the Leonids meteor shower and the CQWW DX CW Contest. R1MVI is expected to be looking particularly for North America and Japan on 80 and 160m. This will be a very large operation with about 25 operators including some very well-known Topband operators. They are preparing big vertical TX antennas including Beverages for both short and long paths to North America (and other areas). Because of the rarity of MVI on the low bands and that the MVI team is mainly focusing their operations on the low bands, the NCDXF has approved a 1000 USD contribution for this expedition.

SPECIAL EVENT. Look for special event station TM4ORA to be active from October 20th to November 20th. Activity is to commemorates the 40th anniversary of the foundation of the French Blind Ham National Society, the "Union Nationale des Aveugles Radioamateurs de FRANCE" (UNARAF). Activity will be on HF/VHF and CW/SSB. Each QSO is also valid towards the "Louis Braille Award". QSL via the Bureau or direct to: Monsieur Guy Couteau, 96 Rue du 19 Mars 1962, F- 93220 GAGNY, France.

TF, ICELAND. Siggi, TF3CW, will be active in the CQ WW DX SSB Contest (October 29-30th) as Single-Op/Single-Band (20m)/High-Power entry. QSL via LX1NO.

TI, COSTA RICA. A large stateside team will be active from the QTH of TI5KD between October 27-31st. Their goal is to be active in the CQ WW DX SSB Contest (October 29-30th) as TI5N as a Multi-Multi entry. QSL via N8JE. Operators mentioned are: N6JRL, N8JE, N0ZUQ, KI0DN, KF0FWC, KD4YHY, KC8WTG, KA8LGS and W8ILC.

V4, NEVIS. Andrei, EW1AR (NC2N), will be active from here October 23-31st. He is expected to use both V44/EW1AR and V44/NC2N callsigns before the CQWW DX SSB Contest weekend. During the Contest, look for Andrei to use the contest callsign V49A and be active as a Single-Op/Single-Band (80m) entry. Activity outside of the contest (before) will be mostly RTTY on all bands with some CW/SSB. QSL via W3HNK.

V4, NEVIS. Boris, UU5SY (KC2FVN), will be active as V44/KC2FVN from October 23-31st. Activity will be on all HF bands and will include participation in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (10m) entry. Look for CW/SSB activity before the contest. QSL via KC2FVN.

V4, NEVIS. Doc, W9NY, will be here between October 27-31st and plans to be active as V47NS during the CQ WW DX SSB Contest as a Single-Op/Single-Band (20m) entry. QSL via W9NY. ADDED NOTE FROM W9NY: "Some mix-up in prior QSLs as our QSL manager was tragically killed in an experimental aircraft crash and many QSL cards remain in limbo at his former home. Anyone not receiving response to QSLs sent previously should resubmit them as we have ALWAYS QSLed 100% on received cards."

VK9X, CHRISTMAS ISLAND. Just a reminder that David/VK2CZ and Charlie/W0YG will be active next weekend as VK9XD (QSL via VK6NE) and VK9XG (QSL via W0YG, direct), respectively, from here between October 23rd and November 6th. Look for VK9XD to be active in the CQWW DX SSB Contest. Also remember, Charlie will go to Cocos-Keeling (as VK9CG) after his operation on VK9X between November 8-21st. QSL VK9CG direct to W0YG.

VP9, BERMUDA. Paul, K1XM, will be active as VP9I during the CQ WW DX SSB Contest (October 29-30th) and the CQ WW DX CW Contest (November 26-27th) as Single-Op/Low-Power entry. QSL via KQ1F.

XU, CAMBODIA. Rich/DK8YY (XU7AYY), Ingolf/DL4JS (XU7AJS), Detlef/DL3ALI (XU7ALI) and Kuni/DL3JVN (XU7AVN) will operate from Cambodia now through October 28th. Activity will be on SSB, CW and Digimode. QSLs for XU7AYY, XU7AJS, XU7ALI and XU7AVN are via DH7WW: Ulrich Moeckel, Muldenstr. 1, 08304 Schoenheide, Germany. Bureau QSL are "OK".

ZK1, SOUTH COOK ISLANDS. Opeators Ben/SM7EQL, Jan-Olof/SM7ETW and Rikard/ SM1CQA will be active as ZK1EQL, ZK1ETW and ZK1CQA, respectively, from Rarotonga (OC-013), October 19-20th. They also plan to be active from Mangaia Island (OC-159), October 21-31st. Activity from both islands will be on 80-20 meters CW, SSB and some digital modes. For more information and updates, visit their Web site at:
http://www.sm7eql.se/travel/zk1eql2005/zk12005main.html

Space-based wouldn't work. You can't get a spot footprint small enough on
the earth's surface to make this do-able. Iridium comes about the closest,
but would you put up a constellation to provide the footprints and not use
it 99.999999999% of the time? :-)

Cheers.

Ken

very true. the only time you would NEED code would be in EXTREMELY bad situations -- ie, the world as we know it is gone gone gone. Otherwise it's truly an anachronism. I suppose it's good to have folks who know it just in case of some major MAJOR catastrophe; and there are some people who enjoy learning Latin too, a fairly useless language. So good-on-em if that's their thing.

what authors? the Congress adopted the declaration they did not write
the thing
The declaration was written basicaly by Tom Jerfferson with a bit of
input from Adams and Franklin

the Congress asked for and received a bunch of revisions all approved
by Tom, that is editing not writing

cut

2203. Free Competition - Win an Icom IC-V82

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-16 22:16:44 UTC
From: Richard g4tut <g4tut@southgatearc.org>
Message-ID: <99k5l1580rgirlm5l7rlm54qth3vrhtq76@4ax.com>
Source record: 48405

There is a free competition running on the Southgate Amateur Radio
Club's website.

The prize is a brand-new Icom IC-V82 high-power handheld transceiver,
kindly donated by Icom-UK Ltd

To enter the competition, you just need to answer a simple question.
The competition page can be found at:
http://www.southgatearc.org/competitions/ic-v82.htm

The competition closes on the 4th January, so there's plenty of time
to get your entries in. You can make one entry per day.

Good Luck!

Daily Amateur Radio News Service

Of course.

There are those however who find using the code to be an enjoyable way of
communicating, for any number of reasons.

Thanks to LB3KB for offering another good way to learn for those folks who
choose to do so.

Better yet, crawl to the pizza shop and order it in person.
It'll keep you off usenet for a couple of hours.

Studying Latin has done more for my English composition than
any English class I ever took. Your characterization is baseless.

Free men are not equal, and equal men are not free. Those who believe in an artificially enforced equality, therefore, hate the freedom which naturally proves them to be silly and ignorant, brainwashed little sheep.
Ace - WH2T

But, it [Morse Code] is a great way to work those DX-peditions with only
100 watts and a dipole.

"Basically", you are an idiot who doesn't know what the hell you are
talking about. Oh, and his name was Thomas "Jefferson", stupid.

> the Congress asked for and received a bunch of revisions all approved
> by Tom, that is editing not writing

You wouldn't know the difference anyways, stupid.

> cut

Run away, Marky, run away.

The Roger Wiseman Dictionary

"Illarate" West BY GOD Virginny!

"Reveresed" Must be one of those off-brand
keyboards.

"Soem".as in Some? What a losser.

"VIRIN".What Wogie was before he met the Lavender
Lads.

"Minisule".he mussa meant miniscule. Like his IQ.

"Champoin".Whassup, Wiseman? No dictionaries in
the mental ward?

"Anoinymous"...a cross between anonymous and
annoying?

"Acident" Roger's mom got preggers by accident.

"Alreaedy" Alright, already!

"Amouints" Roger amounts to nothing.

"Aposterphe" This guy is a hoot, ain't he?

"Basios"...word Woger uses when he gets
neeeerrrrvous.
"Behing"...a cross between being and behind?

"Coiward" As in peeking from behind his mommy's
curtains.
"Feamle"...I think he meant female.
"Losser"...only loser Roger can do it better.
"Ignroant"...typical, considering the source.
"Sluprs"...only Rogie knows what this means.
"Travelled"...a Rogerism, replete with ignorance.
"Postss"...pssst...Roger..that should be Posts.
"Defgenerate"...well, it's Roger's word...
"Faity"...he meant to say Fairy, but you know
Roger.

"Ghet" Get a load of Curtain Boy!
"Distribiution"...Roger likes using phonics.
"Biotch"...he meant Bitch, but his phonics took
over again.
"Methjadone"...a West Virginia substitute for
Heroin.
"Sumbliminal"...one of Roger's favorites.
"Recepticle"...either of Roger's moist cavaties.
"Cociane"...a West Virginia drug of choice?
"Tiome"...Roger meant to say Time...but his
fingers were numb.
"Beraking"...no definition. Could mean 'beraking'
the leaves,
"Amny"...he meant 'any',
"Nlay"...a town in Maylaysia? Vermont?
"Al;ong"...only Wussman knows what this means.
"Becasu"...well, becasu Roger is not the brightest
bulb on the tree.
"Seperation". Why? Because Roger cannot "seperate"
from his mommie!
"Sisnce" He meant Since, but his pudgy little
fingers slipped off the
keys.
"gnetically" What?
"provce" (prove?)
"Piuzza" (West Virginia Pizza)

"Schol" (school?)
"strill" (still?)
"shoitgun" 12 ga or 20 ga?
"Snoip" (How they spell "snip" in Glen Dale)
"Maturbater". Wiseman does it all the time, he
just can't spell
it.(leaves a
sticky residue on his right hand)
"Coskscuking". It's a Roger thing, as in Lavender
Lads.
"Waddleing". Only in Glen Dale, eh?
"Spaeaking". Curtain Boy did this after his second
retest.

" Stgop" Roger's version of Stop.

"Fahter's" He meant Father's Day.

"fserting"..would that be festering?

"poists". Roger meant "posts".

"snadwich" As in peanut butter and jelly?

"regualr" Glen Dale rendition of "regular".

"aftrer" After? Aftrer what?

"soory". Sorry Roger fucks up again.

"didnb't" He didn't?

"whoile". He ate the whoile thing?

"Woamn" He's hooked on West Virginia phonics, all
right.

"prrof" And he kin prove it, too.

"beforfe" Was that before he lurned to spell?

"yoiuy" Roger's version of "y'all".

"illerate" Only illiterate Roger can spell like
this.

"haeart" Aw, how heartless of me to laugh!

"valule" Roger has no values. No wonder he can't
spell it.

"proch" Doesn't everyone have one on their house?

"inmstitution" Where Roger's mom put him in June
1999.

"timne" It's Howdy Doody time?

"whgo" What? Who dat?

"gnetically" Only Roger knows what this one means.

"crfy" Like, cry, Roger, cry.

"stutrtering" Some stutter, Wiseman stutrters.

"Whjere" Where is Curtain Boy?

"Webiste" That's Website to the rest of us.

"Youire" Your? You're? Who knows.

"fiored" As in fired?

"Parety" Roger gave a party once. Nobody came.

"Bouynce" Bounce?

"Varification" Verifiable mental case.

"Probelms" Poor Rogie.has many problems of the mental sort.

"Partricipate" Oh, DUH!!!!

"Cryed" Gee, Wogie..cry me a river.you dolt!

"Stoick" What a dork. His old 386 has no spell check program.

"Partiall" More WV Phonics, I see.

"Obsucred" Either obscured or Rogie has "sucre" on his mind.

"Infinate" Stupid. Think finite, Rogie.

"Sustinance" As in Sustenance?

"Juvinile". This is the way Roger likes his boys.

"Piut" Put it where, Rogie?

"Toyus". "Toyus R Us?

"Diminuative". Roger's height.

"Percriptions" Say what?

"Credibiliy" More Glen Dale intellect.

"Thsoe" Yet another Glen Dale gaffe.

Lloyd Davies whined:
><nothing important>

Lardass forgets his fuckups:

"breaddead" - LLoyd hasn't got anything upstairs in the oven
"defenseive" - Lardass is "defensive" of his ignorance
"counter-offenseive" - When LARDASS LLoyds attack
"nights" - Athens ASSHOLE was referring to last "night's" masturbation session
"I forget to set the playlist in Winamp to repeat!" - Mongolloyd also "forgets" the use of past tense, maybe he forgot!
"Techincal" - Lloyd just hates those "technical" things
"Dalkes" - Lloyd's granddad remembers when movies became "talkies" too bad LARDASS learned to Dalk <sic>
"That it!" - When Mongolloyds get real mad, they talk like Tor Johnson
"Woger" - LARDASS closely identifies with Elmer Fudd with his lack of hair and all
"decide on weather or not" - It's always "stormy weather" with Lloyd deciding "whether" or not to use correct English
"can not" - Mongolloyd is wondering how he "cannot" seem to get ahead in life
"is'nt" - "Isn't" LARDASS cute when he is mad?
"PAINFULL" - How LARDASS' bathroom scale feels when he steps on it in the morning, real "painful"
"I wish for Roger Wisemand" - Lloyd liked thosed thingd ford Rogerd
"alot" - Davies dreams he can communicate in English a lot
"thier" - Lavender Lloyd sure does lisp after a night behind the dumpster
"dont" - Lloyd says "dont", the rest of the world says "don't"
"Isreal" - Is FATASS Lloyd's retardation for real, or can he blame Israel?
"juist jelous" "extermenate" - A three for one post Athens Asshole axiom
"footting" - What LARDASS doesn't have, an equal "footing" anywhere
"Cant" - Emmanuel?
"th" - When Lloyd gets nervous, he stutte, er stutters
"enfighting" - Lloyd's two brain cells are infighting for control of his stupidity
"YOU STUPID JEW!" - Wasn't Jesus Jewish, so called Christian LLoyd?
"Tonite" - There's nothing in Lloyd's brain "tonight" or any night
"segmant" - What Lloyd's communications are, only sentence "segments"
"I just listening" - Too bad he doesn't listen to his poor English
"buffon" - The Athens, Alabama "buffoon" strikes again!

"museium" - Where LARDASS LLoyd keeps his "muse"
"nastey" - How everybody describes LARDASS' body stench, especially in the ghetto
"loose" - Lloyd's description of his spinchter muscles...
"wont" - Lloyd refuses to learn English, it's Lloyd's "wont"
"awhile" - It will be "a while" before Davies gets a clue
"freinds" - Lloyd's conglomeration of "friends" and "fiends"
"thier" - "There" just isn't any hope for LARDASS Lloyd "ill-educated" Davies
"backstabers" - Lloyd's version of the OJays' hit
"becuase" - Home of the "Deliverance Extras" spelling by LARDASS Lloyd
"obselete" - What LARDASS thinking is to him, others see it as 'obsolete'.....
"belive" - What fools like LARDASS Lloyd "believes"
"thier" - Ill-educated Xtian LARDASS Lloyd shows off his language skills!
"marshalls" - Mongolloyd spell "marshals" real good!
Wisemand - LARDASSd fucksd upd againd
"compay" - Mongolloyd never gets any female "compay," while others do get "company"
" But when we are winning," DUMBFUCK, YOU have NEVER WON anything in your miserable life!
"and do the nasty!" You don't really know what that means, do you, 30 year old VIRGIN?
"It's does" - Mongolloyd use good English
"momnet" - LARDASS Lloyd Davies misses his dead "momnet" for a "moment"
"seriuosly" - Lavender Lad President Mongolloyd wants to be taken "seriously" instead of "seriuosly"
"annouced" - Mongolloyd "announces" his stupidity again
"tonite" - Davies never lets his lack of education stop him from announcing to the world he's a fucking imbecile!
"nite" - When LARDASS Lloyd molests those kids he makes them say "nite, nite" at "night"
"weldare" - Calling Dr. Weldare, LARDASS needs his head out of his FATASS....put it on his welfare bill
"so fuck of" - When Mongolloyds who have man tits talk tough......
"fukcing funney" - Alabama deliverance extra Davies speak
"pictrue" - "Picture" yourself as a Davies Mongolloyd
"isseus" - Davies has "issues" too many to list here
"resortjng" - Is Lloyd from Finland?
"attsxks" - When LARDASS Davies "attacks" he uses illiteracy
"basturds"- What mental illness patient LARDASS Lloyd calls his nurses
"shkt" - Mongolloyd Davies' "Skittles", he likes that "Hershey rainbow"
"law suit" - LARDASS never leaves his HUD apartment with out his law suit
"opinionn" - When LARDASSn postsn whiln drunkn
"intrenet harrasssmint" - Tries to make LARDASS Lloyd's rotting teeth feel fresh
"sneeky" - The teachers always "sneaked" Lloyd through the next grade
"that' wasnet" - LLoyd was out that year of school that they went over

English grammar
idiout! - "Lloyid" <sic> strikes out again!
"speling" - Mongolloyd Davies the "spelling" bee champ of the retards!
"reas isseus instaed" - Davies talking out of that cheap beer again
"atttacking" - LARDASS Lloyd stutters when he gets upset.....ttttt.....
"challegne" - When Mongolloyds drink and post
"metnal" - Mongolloyd just doesn't have the "mental" ability to
debate......
"debste" - What Lloyd's mommy did to him in the bathtub
"cahllenge" - Mongolloyd speak for "call" and "challenge"
"basturds" - LLoyd ,Amanda's illegitimate "bastard" sure does have a
scat fetish
"morsd" - Whend Daviesd drinkd andd postd
"wont" - It is Mongolloyd's "wont" to be stupid, "won't " you let him?
"youd" - Oops, LARDASS did it again!
"poinion" - Must be an Athens Alabama "Deliverance" thing
"Woger Wiseman"- LARDASS Lloyd's got that cocksucker's lisp
"isnt" - "Isn't" LARDASS cute when he slobbers?
"worfh" - Davies' cocksucking lisp has returned
"waset of spaceda" - When Lloyd's only friend Colt 45 malt liquor kicks
in
"Oppulant" - The only thing "opulent" in LARDASS is that he is rich in
ignorance
"obly" - LARDASS lisp from cocksucking shows when he tries to say his
favorite fag artist "Moby"
"wood" - LARDASS LLOYD'S head "would" be made of "wood"
"dserve" - LARDASS lives in that ghetto where they say he sure does
"dserve" those pizzas
"frum" - LARDASS LLOYD DAVIES wonders where his real father is "from"
"DISCUST" - Mongolloyd Davies' command of the English language is
"disgusting"
"You worthless coward are scared of debating me." - Mongolloyd make
good sentence
"jellous" - Most of LARDASS Lloyd's cellulite body is "jealous" of
skinny, in shape people
"It just didn't wok out" - When LARDASS tried to stir fry those
nutsacks for pizza topping, Pappa John's terminated him saying he
didn't "work out".
"entact" - LARDASS' single brain cell isn't "intact" either.
"empahis" - Notice how LARDASS Lloyd's "emphasis" is always on his
fucking stupidity.
"Fuck all fo you" - Christian LARDASS Lloyd showing that Jesus
spirit.....
"bllod" - How LARDASS Lloyd spells "blood"
"did'nt" - LARDASS "didn't" do very well in school
"PLEASE by a clue" - LARDASS Lloyd's parents couldn't even "buy" him an
education
"extrodinare!" - LARDASS is a moron "Extraordinaire"
"unsubsribe" - Mongolloyd Davies "subscribes" to the theory that
ignorance is bliss...he must be in heaven

"Must've struck a cord" - LARDASS confuses his favorite sex fetish of tying his penis with a light cord and masturbating to the word "chord".
"dumass" - Dumbass Davies trips and falls in shit again.
"Them two bigtime losers!" - Mongolloyd mentally ill Davies makes good sentence!
"straming" - Lardass usually has to wash his sheets from the "stream" of piss when he wets the bed or not given his filthy HUD apartment
"surpassinf" - LARDASS is always "surpassing" his previous levels of stupidity.
"pleanty" - <guffaw!> "Plenty" of stupidity coming from LARDASS Lloyd.
"Cause i'll have law lock you up and throw away the key!" - Mongolloyd talk tough!
"pome" - When LARDASS WADSWORTHLESS Stubbyfellow writes a "poem"
"Once she here's my show" - Most people hears a show, LARDASS "here's" them!
"forgotton" - LARDASS has "forgotten" what he was taught in special Ed
"I want your seriousness" - LARDASS does his take on "I want your sex"
"I did'nt ask for your fucking grammer checking!" - LARDASS Lloyd revels in his ignorance!
"agrument" - When the voices in LARDASS Lloyd's mentally ill head collide they have an "argument"
"craetive" - Mongolloyd Davies isn't very "creative" with his stupidity, however.
"You could have posted it, for we know!" - LARDASS make good sentence!
"bottem" - Mongolloyd likes those little boys' "bottoms" from hanging with Steve Holsten
"James Wickstrom talked about tonite that out threre, thier Sherriff's department" - Mongolloyd
shows off those Pulitzer prize writing skills.
"bring yer cents" - Mongolloyd show how he flunked out of school because he had no "sense"
"You peeks out" - LARDASS Lloyd and stupidity a symbiotic relationship.
"Be thier" - LARDASS Lloyd make good sentence!
"If you pussys have balls you confront me!!! Deep down you are scared of me. You our jellous
because I am the great almighty Time Lord!!!!
The Time Lord always wins in the end." - Does it really need to be said about Mongolloyd Davies?
"yerself", "hisself" - LARDASS picked up his language skills or lack thereof from the
niggers his mommy Amanda serviced.
"I lost TEN POUNDS on my diet simce first of the year!" - Too bad LARDASS didn't gain any language skills
"The best Amatuer Radio talk show ever!" - Chosen 5 to 1 over literacy by other ill-educated morons and Mongolloyd
"All of my Daleks have been dispached!" - Too bad some extra brain neurons haven't, Mongolloyd.
"satillite" - When LARDASS met the space between his ears
"Tuseday" - LARDASS' usual day to wear his pink tutu
"I am 210 punds now!" - LARDASS lies and fucks up again!

"jelous" - LARDASS Lloyd is "jealous" of those who can spell, read, and
write.
"peoples" - LARDASS Lloyd the "people's" choice of the Biggest
L-O-S-E-R!
"curtians" - LARDASS LLOYD DAVIES uses those "curtains" in his filthy
apartment as a masturbation rag
"depsised" - Mongolloyd Davies, who the entire real ham community has
"despised" for his lack of ability
to pass a simple 5 wpm code test or General theory
"sicker" - When Lloyd Davies has a mouth full of cum he can't say
"sticker"
"liceneses" - Mongolloyd Davies has one of those exclusive "licenses"
on stupidity
"isseus" - LARDASS has "issues" with people of intelligence.
"conquor" - Mentally ill LARDASS Lloyd has yet to "conquer" his obesity
and mental illness
"crakheads" - Retard Davies make good sentence!
"servent" - Roger Wiseman's willing "servant" makes another gaffe.
"lesibens" - When Benjamins take the wild side...the "lesbians" don't
care, though!
"Los Angles" - Mongolloyd has the wrong "angle" about "Los Angeles"
"busses" - Do they take the motored "buses" or do they take the
"thier" - You say "their," Lardass says "thier".... to-may-to,
to-mah-to.....
"eductional" - LARDASS Lloyd's writing is "educational" on how severe
illiteracy is in his family.
"She sounded like she really whappy to here from me." - Mongolloyd get
rejected again!
"This is morning I weigh at 207 pounds. This should prove to you, that
I can succeed if I put my
mind to it. I know some your stupid critics can't see that, but I'm not
here to please you." -
- LARDASS makes the "huh?" factor rise.
"This looks much more like sexy Lloyd" - Porky Pig lookalike stubby
tubby Davies dreams
he looks like a skinny, tall Billy Zane
"I figured you the thought of me owning..." - Lardass dreams the
impossible dream of thought
"I took you a long hour and a several minutes..." - Too bad LARDASS
Lloyd didn't take and pass English
"I get a laugh over you!" - Mongolloyd make good sentence!
"did'nt" - "Didn't" Lardass ever pass any school subject?
"Proves to show" - Lavender Lloyd proves he is an imbecile
"It' paid off" - Alcoholic LARDASS Lloyd's bar and utility bills never
are though.
"I wear if with" - Davies wears his stupidity well
"You need to get al ife and a job." Mongolloyd retardo Davies needs to
get English lessons and
not dream of an "Al ife" with "Al Queda"
"I've never fucking pretending attorneys!" - LARDASSclown Davies never

had to pretend to be stupid, either!
"...what your life must me like..." - Mongolloyd's life of pizza
delivery and trashcan robots is really something
to want, too, isn't it?
"manor" - Lardassclown Davies' "manners" are like those of a hog....
"Christien" - Poor LARDASS Davies, he's shows why ignorance is bliss in
the eyes of the Lord.
"reely" - Mongolloyd Davies is "really" stupid, isn't he?
"please don't imposter me more" - Mongolloyd make good sentence!
"distastful" - A description of LARDASSCLOWN DAVIES' eating habits.
"commnet" - Most people make "comments," ill-educated Lloyd Davies
makes "commnets".
"None of you refuse to tell me who you are." - Huh, Mongolloyd?
"Millinium" - Even after a "millennium" LARDASS couldn't be smart!
"afriad" - LARDASSclown Davies isn't too smart, I'm "afraid"
"powerfull" - Mongolloyd Davies sure has a "powerful" command of the
English language.
"conquor" - Lardass Lloyd has yet to "conquer" his idiocy.
"I always new that your stupidity would trip you up, Mr. Wiseman."
- I just "knew" Llardass Lloyd couldn't pose as "Christy
Davies" without fucking it up and outing himself.
"I have given it some though and decided to come back" - Mongolloyd
has never given anything any "thought." (from another "I'm
leaving" speech/lie)
"usaul" - As "usual" Lardass lloyd Davies fucks up!
"Secwet Woger " Llardass Llavender Llad Lloyd's been sucking so
many cocks he's got a lisp!
"douters" - Even though he has his "doubters", it's
"doubtful" Llardass Lloyd has an I.Q. over 70.
"bypolar" - Mongolloyd Davies is a "bipolar bisexual".
"desperite" - Lardass Lloyd is so "desperate" to win at something,
anything.
"situtation" - Most people get in "situations, " but not our total
fuck-up Lloyd.
"aholt" - Lardass Lloyd usually gets "a hold" of himself on a
Saturday night, since he has no date!
"mysteriuos" - Mongolloyd Davies, "mysterious" survivor of a coat
hanger abortion attempt.
"I've did" - Most people say " I did"
"Woger" - When cocksucking, lisping fags try to say " Roger."
"for sometime" - Lardass has been a mentally ill retard "for some time"
now.
"mommie's" - When Mongolloyds say "Mommy's" as in "Mommy's house."
"drop out" - Lloyd was a High school and college " dropout."
"backpedalling" - "Backpedaling" is what Lardass does a lot of.
"Maybe two years back" - Mongolloyd speak.
"outted" - Lardass Lloyd's illteracy at work.
"I've riddled Woger for years as Arf! Arf!" - Mongolloyd is Arf!Arf!,
and his stupidity is no riddle.
"self esteme" - One thng is for sure, Lardass has it..."low self

esteem," that is.
"short comings" - Lardass has many, many "shortcomings."
"yahoo" - Lardass always goes into the "Yahoo!" gay chat rooms.
"The truth hurts you see" - So does reading your mangling of the English language, Lardass.
"His stupidity can not be disguised for long." - Lardass' stupidity "cannot" be disquised at all.
"entireity" - Lardass is the embodiment of stupidity in its' "entirety."
"bothe" - Lardass is "both" stupid and retarded.
"got hime" - Lardass has got "him" a case of the dumbass!
"evelope" - Mongolloyd pushes the stupidity "envelope" to the max.
"chiicken" - Lardass Lloyd should eat more "chicken" instead of leftover pizzas then he wouldn't be obese.
"dont" - "Don't" ever improve your English skills, Lardass!
"likign" - Huh? More Mongolloyd Ebonics.
"you ignorant spawn of satin" - Lardass ironically confesses his love of wearing lace!
"powerfull" - Mongolloyd's brain cell isn't "powerful" enough to light a christmas light.
"heresay" - Mongolloyd is a fucking idot, and that's no "hearsay."
"glas" - Lardass Lloyd never uses a "glass" to drink his sticky protein.
"freind" - Dicksucking Davies hasn't got a "friend" in the world.
"yu" - Lardass, "you" really should've gotten a better education!
"Got Brother Stair tuned in here to listen to while sleeping tonite!" - Mongolloyd fucks up again!
"I am not a retrard" - Oh, yes, you are, Lardass!
"Got you in another lie!" - We've "caught you" in another fuckup, Dumbass Davies!
"I am not mentally challenged! I have some pontential." - Mongolloyd is in denial about his imbecility and has the "potential" to become an even bigger jackass!
"did'nt" - Mongolloyd "didn't ever pass Spelling.
"soon all your asses are belong to sherrif" - Mongolloyd fantazises about having sex with his local "sheriff"...
"shure" - We are "sure" you are a fucking moron, Llardass Lloyd!!
"proxie servers" "conecting" - Mongolloyd used "proxy servers" when he "connected" to spam Josh's board.
"enfrocement" - Mongolloyd also fucked up when he spoofed caller ID's and spammed boards, and now law "enforcement" is watching him.
"apoligize" - Mongolloyd's parents should "apologize" for ever siring such a mentally ill retard.
"meagre" - Mongolloyd's "meager" brain can't comprehend English.
"goten" - If only Mongolloyd would've "gotten" an education!
"Prepositioned" - Mongolloyd always gets "propositioned" by nouns and pronouns!
"temting" - Mongolloyd is as "tempting" as a root canal.
"accept" - Mongolloyd use the wrong word in the wrong place again!
"normaly" - "Normally" Lardass would be passed out from Two bud lites

by now
"red head" - Little Red is shoving his big ole black dickhead in
Lardass' fat piehole.
"Aflack" - Mongolloyd fucks up yet again..www.aflac.com
"Dickionary" - Mongolloyd is almost as bad as his queer lover Holsten
in obsessing about dicks.
"Pnig" - Mongolloyd can "ping" an anvil off of his thick malformed
skull
"pratice" - Lardass has lots of "practice" fucking up.
"dont" - Dicksucking Davies is too stupid to use an apostrophe, isn't
he?
Mongolloyd thinks "Lent" and "lint" are pronounced the same.
"ancinet" - Mongolloyd will be past "ancient" before he gets any pussy.
"harrasment" - Lardass just loves when his fat asshole gets
"harassment" from the drunk black winos!
"persecute" - Mongolloyd "Christy Davies" Attorney-at-Law makes quite
the lapsis calami in his "prosecution".
"fulest" - Little Lloydie is "fullest" when he's done sucking down wino
nutsack goo!
"i'll" "wether" - Mongolloyd, "I'll" just bet you can't decide
"whether" or not to clean your shitty underpants or keep wearing them.
"authroities" - Mongolloyd's familiar with the "authorities" since his
brother has been carted away to jail more times than he can count.
"Perhaps I can Hal on my show too!" - Perhaps you should consider
remedial English, FATASS!
"cannonized" - Mongolloyd thinks somebody will have to be shot out of a
cannon to be "canonized"
"This board is alot better than all them N54 Boards!" - Mongolloyd is
sure overwhelmed, "then", by "all those" words!
"I dont reconnise you opinions" - Mongolloyd "doesn't recognize" his
stupidity, either.
" I donlt care" - Obviously, Lardass, obviously.
"Thats" "benifit" - "That's" one of Lardass' many fuckups. He doesn't
have the "benefit" of having a dictionary.
"I already notice Woger seeing my everywhere" - Drunken fat bastard
Lardass never notices when he fucks up.
"Look, crackhead, I am NOT degenerates!" - Mongolloyd isn't very
literate, either.
"URASE" - Mongolloyd's empty skull never had to be "ERASED" it never
contained anything to begin with.
"I reading the board tonite" - Mongolloyd can only read comic books.
"REMIDER" - Lardass never has to leave a "reminder" of his many fuck
ups.
"jsut" - Mongolloyd is "just" a mentally ill retard.
"Im" - "I'm" sure Lardass isn't getting any pussy.
"theere" - Mongolloyd isn't all "there".
"Activatiuons" - Lardass Mongolloyd always has his stupidity
"activations" ready to show themselves.
"steganographic" - Mongolloyd takes his "stenographic" duties as a
pizza order taker seriously.

Woger" - Mongolloyd shows off his cocksucking lisp!
"dogy" - Mongolloyd likes it "doggy" style. Receiving, it, that is.
"Tonigjht" - Mongolloyd will be on here "tonight" because he can never get a woman.
"1987 rqadio shack reciever" - Mongolloyd the cheapass makes good spell!
"neber" - Mongolloyd will "NEVER" get laid!
"yourslelf" - Go fuck "yourself", Mongolloyd!
"You must really hate be because" - Lardassed Mongolloyd really hates the English language, too!
"Woger" - Mongolloyd shows off his cocksucking lisp again!
"Roger Wiseman better know as the" - Mongolloyd, better "known" as the eternal virgin and mentally ill retard.
"Secwet" - Mongolloyd is queer and proud.
"turd in the punch bowel." - Mongolloyd knows about bowels, not "bowls". Mongolloyd eats on the floor and in bowel cavities.
"he was refused by the Air Force in 1978" - Mongolloyd, how does one get "refused" by any military? Especially when he was honorably discharged a year earlier?
"was sent for a 90 observation period " Dumbfucking fuckhead, what is a 90 observation period???? BWHAHAHAHAHA
"shoudl" - Mongolloyd "should" really shut the fuck up.
"Here is" - Here "are" some more examples why Lardass is a fucking imbecile.
"Woger" - Lardass is here and QUEER!
"Goddman that Lloyd is sexy!" - But that Mongolloyd is so sexy he is still a VIRGIN. BWHAHAHA!!!!!!!!!!
"laugheds" - Mongolloyd was always "laughed" at.
"I have off this newsgroup for over 2 years!" - Mongolloyd should "off" himself, instead of "being off".
"I have my own internet Talk show, what can be said about your useless self." - Mongolloyd has no listeners or anything useful to say. He's so "useless,"
"that's what can be said" about him.
"You are very useless on here, jon" - While Mongolloyd Davies is useless on and offline.
"Even used up toilet paper has a use, you sure dont!" - Most people flush "used up toilet paper, " Mongolloyd eats used up toilet paper, "don't" he?
"I'll shot to kill" - Lardass, you couldn't handle a cap gun.
"Re,omder" - Lardass always leaves us a "reminder" that he is as smart as a rock.

"resuce" - Mongolloyd can't "rescue" himself from his own stupidity!

"maocked" - Mongolloyd fucks up again, no wonder he is "mocked" for his stupidity!!!

"tipe" - If Mongolloyd the Lardass would pull his malformed head out of his ass, he could "type" correctly.

"pregant" - With his looks, Lardass Davies never has to worry about getting a girl "pregnant."
"when thet saw" - And when "they" saw Lardass' whimpering, they knew he was a big fucking PUSSY.
"Mayeb" - "Maybe" somebody will feel sorry for you and give you a charity fuck, but it's doubtful, Mongolloyd!
"tmorrow" - Mongolloyd will never get a woman, "tomorrow" or any other day.
"Palastine" - Mongolloyd couldn't find "Palestine" on a fucking map or anyplace else.
"Woger the notsowiseman" - Mongolloyd the eternal idiot fucks up and shows off his cocksucking lisp again.
"I hope kills himself" - Mongolloyd wishes he had killed himself.
"agruement." - Mongolloyd is a fucking imbecile, no "argument."
"You're posts" - BWHAHAHAHAHA.."your" fucking stupidity stands out as well, you fucking idiotic fat fuck.
"Globin Woger" - Mongolloyd the 5'6 280 pound garden gnome makes good spell and IKYABWAI.
"Go aheah" - Mongolloyd never can get "ahead" of his stupidity.
"ssomething" - Mongolloyd "ssure" (his spelling) did fuck up again!
"pictures show email them" - Lardass "should" know better then to "show" his stupidity.
"mor" - Mongolloyd gets "more" stupid by the minute.
"celbrating" - Mongolloyd is "celebrating" his stupidity.
"palgues" - Lardass Davies is a "plague" that needs exterminated.
"have the nerver" - Lardassed Mongolloyd "has the nerve" to criticize others.
"Golen" - Mongolloyd's fuckups are "golden" ammunition against the dumb fat fuck.
"posts my closet" - Lardass "by" default fucks up again.
"Froce" - Mongolloyd tires to spell "force", what his drunk daddy did with his dick on Mongolloyd's asshole.
"AUTHROIXATION" - Mongolloyd Davies never needs "auhorization" to be idiotic.
"morrse" - Lardass can't pass 5 wpm "Morse" code.
"netwerk" - Mongolloyd is part of the idiot "network."
"characture" - Mongolloyd is a "character"..a villiage idiot.
"Learn to spelll" - Lardass fucks up again!
"describes to the T" - Mongolloyd is an IDIOT, that "describes him to a T."
"a peace of me" - We take a "piece" out of Lardass' ample ass on a daily basis.
"bus fair" - Lardass can't pay his own bills on time , much less anybody's "bus fare."
"waht" - "What" do you know, Lardass fucks up again!
"to pay for you" - Lardass you can't "pay for your" own expenses.
"HELLUVA ALOT" - Lardass' English skills are not "a Hell of a Lot" of help to him.
"mentionm" - Lardass never wants us to "mention" or point out his numerous fuck ups.
"your are" - Mongolloyd, "you are" one of the stupidest assholes on the

internet.
"alone may to much " - Lardass's sentence construction "alone MAY be too much" to his tiny brain to handle!

You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!

"Woger make false bad spell" - Lardass "makes" and ASS of himself, again.

""Mongolloyd". Isn't even word," - BWHAHAHAHA Mongolloyd is English-impaired.
"mentaly illed" - Mongolloyd knows all about being "mentally ill."

"Woger" "femine" - Mongolloyd shows his "feminine" side when he lusts for "Roger's" cock.
"Wheer" - Mongolloyd always wonders "where" his brain is.
"scooterr" - Mongolloyd never could have a "scooter" his fatass was too heavy for one, even if they had semi-truck shocks and springs.
"stal" - Mongolloyd's "brain" is permanently on "stall".
"aymore" - Mongolloyd never tries, he just whines "anymore".
"talkjing" - Lardass never has any women "talking" to him.
"cant" - Mongolloyd "can't" use correct punctuation.
"im" - Mongolloyd, "I'm" sure you will die a virgin, you dumbass!
"i" - Lardass, "I" know you are a fat whining cunt.
"may as wel" - Mongolloyd "may as well" kill himself.
"lefty alone" - Lardass masturbates with which hand, "his "left alone."
"NIM Busters has run its coarse" - Of "course," Mongolloyd fucks up his sentence!
"Wlardass" - "WMongolloyd" "wfucks" "wup" "Wagain"....

"Wheating" - Lardass has "cheated" on everyhting he's every tried to do, since he's so incompetent and inferior, and he still fucks up.

"Wabbi Woger" - Mongolloyd thinks any dick is a good dick to suck.
"Woger" - Mongolloyd's been sucking dicks again
"others" - Mongolloyd can't fathom "others'" hatred for his useless fat ass!

"You can always tell when you are getting to Woger. He gets to flustered to type." - Mongolloyd must be getting flustered, "too," BWHAHAHAHAHAHA!!!!!!!
"imput" - Mongolloyd's brain has no "input"! Mongolloyd one stupid fat faggot.
"Hundred's" - Mongolloyd couldn't count to one much less "hundreds"
"dopesnt" - Mongolloyd "doesn't" have a command of the English language!
"Wait till" - Mongolloyd we will "wait until" you compose a coherent sentence, but it will be a long wait.
"We wn't" - Lardass Davies, you should fuck off with your stupidity so "we won't" see it ever again.

"Woger is now awoke" - Mongolloyd is never "awake."
"is too stupid to under awoke" - oh the irony, Mongolloyd!
"I shits my pants" - Mongoolloyd sure does and eats it, too!
"treasing" - Mongolloyd likes "teasing" nigger assholes with his syphilitic tongue.
"It's being TOS even" -Mongolloyd the only thing you TOS is your tiny dick!
"peoples" - Mongolloyd always steals other "people's" lines!
"I really wish Steve wasn't suck a pussy and would come back to this board" - Mongolloyd makes good fucked up sentence! Mongolloyd made a Freudian slip when he used "suck" instead of "such".
"I think it is long since past time when you closed this shitty board!" -Mongolloyd smoke bad weed!
"wraped" - Mongolloyd has frequently "wrapped" his syphilitic tongue around a nigger's asshole!
"hig" Who knows what the Athens Asshole means?????
"teir" - Mongolloyd is Belle Plaine's "Forrest Gump," As to his retarded peers, he's "their" Camp-We-Can-Do's star pupil.
"tribes" - Mongolloyd's "tribe's" name is Retardos!
"abou" - "About" this time, Lardass the alcoholic fucks up!
"till" - "Until" Mongolloyd learns English, he'll always be ridiculed.
"din't" - Mongolloyd "didn't" ever finish high school!
"stuipd" - Lardass Davies is really "stupid," isn't he?
"are we know" - Mongolloyd has a hard time posting in English. Being more stupid, "are we now," Lardass?
"I just you like a brother" - Mongolloyd would take it up the ass from you just like he did from his brother, too.
"I've been to two Hamfest" - Mongolloyd's never been to two English classes, though!
"Wogie" - Mongolloyd shows off his cocksucker's lisp.
"his paint size" - Mongolloyd wears size 50 "pants," does he also wear "paint" because he is a walking billboard for obesity?
"HAMFEST'S" - Mongolloyd has never shown at any "hamfests"! He's too big of a coward!
"Woger" - Lardass likes to think of "Roger" when he sucks nigger dicks!
"West Vagina" - Yes, "Virginia," Mongolloyd hasn't ever seen any vagina, west or east, north or south.
"reconize" - Mongolloyd, your fuckups are easy to "recognize"
"thopught" - Mongolloyd never has any "thoughts", except to show off his lisp again!
"Who hear likes" - Mongolloyd nobody likes you, "here" or anywhere!
"Wogie" - Lardass Lloydie's lisp exposes him again!
"really beated" - Mongolloyd really "beats" off, since he can't get a woman.
"Woger" - Mognolloyd makes like faggot.
"Curtain's" - Mongolloyd always fucks up when he hides behind his "curtains" of sockpuppets.
"cocksuckers" - Lardass always fucks up and punctuates incorrectly, must be his "cocksucker's" lisp.
"spinctor" - Mongolloyd has the "spinchter" muscle the size of a #10

washtub, since his drunk daddy, his felon older brother and his mommy's dildoe has stretched it out.
"reconized" - Lardass Davies stupidity is easily "recognized".
"porpuse" - Mongolloyd's stupidity is on "purpose"!
"worlds" - Mongolloyd is the "world's" worst speller!
"comfortbale" - Mongolloyd confessed he is "comfortable" looking at dicks all day long.
"For the recod" - For the "RECORD," Mongolloyd is retarded!
"all these yours" - "All these years" of posting, and Lardass has yet to post in English.
"I have no worked for 22 days straight" - Too bad you don't concentrate on your English for the same legnth of time, Porky!
"Roger'" - "Roger's" what's always on your little mind, Porky!
"Shittpacker" - Mongolloyd has a "shitpacker" for a father.
"revoaked" Mongolloyd your life will soon be "revoked."
"Upeset?" BWHAHAHAHAHA..Mongolloyd you get "upset" so easily, BITCH!
"knumskull" - Mongolloyd, I could fucking care less since I'm not Catholic, you fucking "Numbskull"
"BEVERY FUCKNH AWARE" - Mongolloyd should "BE VERY FUCKING AWARE" of his surroundings and who is watching him!
"orafice" - Mongolloyd has had a big greasy dick stuck in every "ORFICE" in his obese body.
"YOUR STILL" Mongolloyd, "you're still" a fucking imbecile!
"Funn" - Mongolloyd's face sure is "FUNNY" looking.
"Your whole life has past you by." - Lardass, your life has already "passed" you by the minute you were shit out of your whore mommy.
"Eldery" - If you were a bit more "ELDERY," Porky ,you would be a better speller.
"Jelous" - Nobody, I repeat nobody is "JEALOUS" of a retard like Mongolloyd Davies!

"He 4F for the Air Force" - Wrong, Mongolloyd, you are 4F for LIFE!
"plagarize" - Mongolloyd, you couldn't even "plagiarize" from "See Jack Run" correctly.
"Is like our her Steve and Lloyd" - Mongolloyd fucks up again! Mongolloyd calls himself and Holstan a "her."

"to much" - Mongolloyd tries to communicate in English but it's just "too much" for his tiny brain to handle.
"beutiful" - Mongolloyd is as "beautiful" as a WART HOG!
"Trough" - Mongolloyd can't get that everybody sees that he is fucking stupid "THROUGH" his malformed skull.
"would all upset" - Try posting in English, DUMBFUCK Davies!
"backpedd;e" - Mongolloyd "backpedals" when he gets upset and misspells words!
"Good are you ever pathetic" - Mongolloyd, Goddamn, are YOU ever pathetic when you fuck up like that.
"Make ne" - Mongolloyd is trying to say "make me" like a little girl, but naturally, he fucks it up! HAHAHAHAHAHA!!!!!!
"I'm not into, unlike you" - Mongolloyd isn't into looking smart, either.

"Rare end" - Lardass, you "rear end" is so big, when you back up, you beep.
"hygienne" - Mongolloyd hasn't got any "hygiene" habits.
"suprise" - "SURPRISE", Mongolloyd fucks up again!
"poved" - Mongolloyd "proved" he is a fucking idiot once again!
"Momma" "marbels"- Your Crackwhore "Mama" knows you don't have all your "marbles", Porky!
"secoondly" - Mongolloyd is trying to count the times he has given blowjobs "secondly"
"atten" - Lardass you didn't "attend" school, either!
"backwerds" -Mongolloyd is always ass-"backwards!"
"Were" - "We're" sure you are a fucking moron, Mongolloyd!
"he's laugh and go on" - Lardass we laugh at your fat dumbass, and go on with our fucking lives, but you don't have a life!
"tradion" - Mongolloyd's "tradition" is to fuck up!
"Mitzah" - Porky the Jew didn't have anything to cut off at the Bar "Mitzvah!"
"mines for his baby batter" - Mongolloyd shouldn't drink , take drugs and post!
"Ralley" - Mongolloyd should try to "rally" his few remaining brain cells!
"Vagina" - Something Lardass Davies has only sees when his whore mommy shit him out.
"Your welcome" - Mongolloyd, "you're" one stupid fucking retard.
"Llouyds" - "Lloyd's" such a fucking DUMBASS, he can't even spell his own name correctly!
"stagnanat?" - Do you mean "stagnant" like what is between your fucking Dumbo ears, Mongolloyd?
"accomadations" - Do you mean "accommodations" which are quite unlike your flithy HUD apartment in the Athens, AL ghetto?
"oppurtunity" - Mongolloyd never misses an "opportunity" to be stupid.
"Stubbenville" - Mongolloyd couldn't find WV on the map much less "Stubenville, Ohio."
"copy & past" - Mongolloyd spams with his "copy & paste" of every fucking idiotic thing he sees!
"appretince" - Mongolloyd makes good spell for a quarter-wit "apprentice".
"glorius" - Mongolloyd make "glorious" FUCK UP!
"weekened" - Mongolloyd's "weekend" consists of getting drunk and whining about another man! That is, between delivering pizzas.
"Woger mkae" - "Roger make"s Mongolloyd look like a fool, time and time again!
"noddle" - Lardass your little "noodle" of a dick is like a fucking shard of thin spaghetti!
"usae" - Mongolloyd never "use"s any fucking sense or correct spelling.
"I ambored" - Mongolloyd, you are an idiot as well!

Mongolloyd makes good spells!

2225. I like sucking dicks! That's how I got Roger's posts hidden away on Nimbusters!

And a big "What He Said" from me, too. That's a really pretty piece of
code, Sigurd, and I very much appreciate you making it available to
us.

I've been teaching a Morse class to folks in the local club using
G4FON's Koch program, and that's usable, but it appears to have some
issues with character spacing. Yours, on the other hand, gets the
character spacing right.

Thanks very much indeed, es 73 de

Your "citizen" had a responsibility to obey the laws and regulations applicable
to his license grant, and instead he stomped his feet, held his breath, beat his
chest and refused to abide by the rules of civilized behavior for a very long time.
Baxter has acted like a spoiled two-year-old. The FCC was *way* too patient.

<< STOMP! STOMP! STOMP! NO! NO! NO! >>

Time to pay the piper!

(Fred: you can "hope" and hold your breath. In fact, please do!
You can even stomp your feet if you want.)

Jeff

ARRL membership is declining but not due to Glenn Baxter a/k/a AARA a/k/a IARN. Baxter has made only one contribution to ham radio: He has legitimized information bulletins put out by stations other than W1AW.

His other boasts are the sheer fantasy of a guy with a Radio Shack tape recorder fancying himself another CNN.

Up to now, I have not been an ARRL supporter, but I think current circumstances make membership in ARRL mandatory for all of us. That's because the hobby/service has never before been under this much siege on account of the escalating computer revolution.

Whatever you say about the ARRL -- self serving promotion, stacked elections, censorship of views with which it disagrees -- it is, in fact, the only institution positioned to help our hobby/service survive intact.

Today it has my vote and soon my membership dollars. Rather than tilt against ARRL, I believe it is time to work within the organization to make it the democratic institution we'd all like to see.

I have read this suggestion over the year and always aks just what good
that Morse Coded CW is going to do if things ever went that far to hell
(if morse were needed as opposed to just being useful for hobby
proposes that is)

I never get an answer to just what good Morse code would be in this
doomday world.

the best answer I have seen to that is the unlikely "Independance day"
senario

You don't "know" any "more" than a fence post or a rock, stupid.
You consistently show what a complete idiot you are.
>
> not that knowing more than you about much of anything is much of an
> acheievement

Only a fool like you would delude himself with such stupid statements.
You show your lack of education in every post.
The only "achievement" you have done is win first prize at the finger

painting class at "Camp-We-Can-do."

I agree with Jeff and would just like to educate this "Fred" guy that having a Ham license is not any kind of "right" but an earned privilege through testing and correct on-the-air conduct which is where K1MAN failed miserably.

I also agree the feds were way too patient......

Stupid Marky fails to get it even when just about everybody else would.
You did practically say it wrote itself, you dumbass.

>

no I don't say that

again you simply lying little boy

I said it was written by Tom (mostly) as part of the comittee set up by
John Hancock to manage the declaration

it was then editied (mostly words hacked out I remember 2 additions to
that being "with relance on Divine providence" and "in many cases" to
section on trail by jury i think) most notable was the removal of the

anti-slavery language.

1) It keeps some of us busy, doing our favorite thing

2) It makes it possible for some people to communicate with others, even
when they don't have the motor skills to do so in the first place

3) It allows you to reach longer than any other form of HF communication

4) It will come in handy it *that* ever happens

and so on

plain flase or at best incomplete

Morse encoded CW does not allowed a greater range than say Heilshrieber
would

> 4) It will come in handy it *that* ever happens

how?

still waiting for an answer to the question, asked many times and many
ways I'll try another

how will Morse be able to deliver anything of objective value if the
world is so far gone that morse encoded cw was ALL there was

I don't know dude.. use your imagination. Do I have to write a post-apocalyptic story for you? Ok, let's say that a big ass asteroid hit the earth and blew up a lot of shit, wiped out all the telecommunications stuff and there were only pockets of people left, scattered all over. You rip a battery out of a car and power up your HF rig, hoist up a simple antenna and start beaming shit as far out as you can. Maybe the atmosphere is so fucked by the crap in the air that voice is totally garbled, or maybe the only people are 10000 miles away and you can barely reach them with your shitty antenna. Or maybe they don't even speak your language but can understand some rudimentary morse stuff. Who knows?

I'm obviously not saying this situation is at all likely, but it and others are certainly possible. Would I spend my time learning code for this possibility? No, but I can understand that some people might.

If you published the source under the GPL, you might find a few people
interested in porting it to a real OS. I wouldn't dare install DirectX
on any computer with a NIC, but don't have any use for a box without
one.

That's classic 'tard boy gibberish. Years from now, social anthropologists will be looking at that very carefully.

again with the suggestions of violence

clearly you don't believe in the priciples of the constitution or
liberty or a lot of american ideals

well the SVRC had about 100 members at the time but when I stod for
president NOT one of them was willing to take the job. prehaps the
greatest greatest achievement of term of Office was inspire a couple of
the old timers to stop resting on their laurels

Big Flippin DEAL...What have you DONE with that ham license? From what I
have read on USENET you need to turn it in since you badmouth hams so much.

You are a PUKE.

Gee Wayne....with your standard I reckon you need to dump that Lead Acid Battery, it was designed way back in the 20th century. And that antiquated Telephone got to go too. Heck, AM radio and FM radio needs to go too. And Television with all that old Analog stuff....Hey how about that internal combustion engine too?

Wayne baby....just because it is old, does not mean it is not useful.

Have a good day.

what I choose to do with it, within the rules and regs proscribed by
the FCC. I hope you can say the same. I turely do hope you can say the
same

> From what I
> have read on USENET you need to turn it in since you badmouth hams so much.

I don't bad mouth Hams as a class of people I do bad mouth hams person
by person as they earn such treatment in my judgement. Something you
also choose to do.

chooseing to punture the pretenous egos of person like yourself is no
reason to turn in my license

I know a great deal about it. I just don't agree with your assesment

K1MAN is appreantly an unpleasent fellow, possibly a mental case, but
only the alleged interference in emergency comms seem to be very
serious to me

I have read the endless trashing of this man and I say where's the
beef. I would not be inviting K1MAM over to my place but that is a long
way from throwing him out of the ARS, after I would not invite you over
either

while I will agree with certain religous veiw points it is a problem
for someone if they are Bi or gay and hold these view points, that is
not a matter of public policy

it does show the lack of sense process by some memeber of the ARS

Mark / KB9RQZ aka "an Old friend" ,
I believe that you suffer from both Dyslexia and Aphasia (also known as dysphasia).
You blame these Psycholinguistic disorders for your inability to pass a Morse code exam.
On what brain dysfunction do you blame your inability or unwillingness to learn to use a simple spell checker?
Or are you just that damn lazy?

At a quick glance it appears that you have been posting more messages to rec.radio.amateur.misc than anyone else lately, not to mention the other NG's you cross post to.
Since I can't recall anyone in any NG ever agreeing with any of the nonsense you prolifically post to numerous NG's it appears that you must have a masochistic desire to be everyone's punching bag.
Or possibly you "know you're right about everything" and everyone else is always wrong and you've made it your mission in life to "set the world straight" - No gay pun intended.
Ace - WH2T

Mabey the dingleberry from Belgrade Lakes can go
and party on Cape Cod with the rest of the NIGGERS.....

Evacuees binge on Cape: Spend Federal cash on booze, strippers
By Maggie Mulvihill and Dave Wedge
Tuesday, October 18, 2005 - The Boston Herald

BOURNE - Hurricane Katrina evacuees hastily handed
$2,000 in federal relief money last month have been
living it up on Cape Cod, blowing cash on booze
and strippers, a Herald investigation has found.
Herald reporters witnessed blatant public drinking at
a Falmouth strip mall by Katrina victims living at taxpayer
expense at Camp Edwards on Otis Air Force Base.

Strippers at Zachary's nightclub in Mashpee, a few miles
from the Bourne base, report giving lap dances to several evacuees.
``They were tipping me $5 a pop,'' said a Zachary's dancer
named Angel. ``I told them I felt bad taking their money. But I still took
it.''
Another dancer said a large group (of BLACK Katrina evacuees) from
the military base was in Zachary's recently and she gave lap dances
to several of the victims. ``Some spend good money, but others don't,'' she
said.

Yes, stupid. You made the statement that slaveowners didn't write the
Declaration of Independence. You were proved wrong.

> What's wrong with being a fag?

That's the only reason you are a 32 year old VIRGIN, Davies.

You even had a bumper sticker made up special to announce it:

You wrote what you chose to write, so you were not censored.

In certain States, your language in a public forum is a violation of
law. That's not being prudish. It is a violation of law.

I am not running amuck. Your foul mouth is running amuck.

If you had any understanding at all regarding childhood development you
would be aware that 75 to 80% of adult value development occurs before
age 8. It is obvious that your childhood was ... well it could have been
more formative.

Be careful, your language can get you in trouble.

So you first "stod" for president and were elected vice president or did you just elevate yourself to the higher office?

Did any of those unwilling to take the job mutter, "That's it; I'm outta here" as they hit the door?

> prehaps the
> greatest greatest achievement of term of Office was inspire a couple of

I'll bet you had that effect, Mark. Did any of 'em decide to run for president the next term?

You continue to confuse censorship and civility, Mark.

One can effectively express themselves without having to resort to
gutter mouth adjectives.

No, the issue is foul language that's not necessary to get a point
across.

And yet another example of why licensure for procreation should be
mandated.

I was elected VP one then the next stood for the vacant office of
president, by the failure of the former president to either show up or
resign I was elvated to acting president per the by laws
>
> Did any of those unwilling to take the job mutter, "That's it; I'm outta
> here" as they hit the door?

no some did commet on how awfull it was that a NCT was to hold the job,
but most of the unwilling did not even attened to meeting for the
election at all

not exactly the man who werved as my VP ran for president (un opposed)
but a number of the OTS became a lot more active, from what I hear
(unconfirmed rumour of course what they had expected was for the
election commitee to come begging one of them to take the office of
president, did not work out that way and they got their "panties in
bunch" exact words of the rumour mill)

not realy Stevie boy the "feces" just doesn't carry the same impact as
the "shit", the same for other word pairs of course applies. If one is
barred from the use the word "Shit" then one is barred from the full
use of langauge, and proper comincation is thereby thwarted

I agree that over use of such words as "shit", "Fuck" etc do dimish the
impact

I'm not sure what I did to deserve this treatment from the ladies at
the singles dance last Friday night. I arrived dress to impress. I went
up to the table to have some punch and a cookie and there stood the
most beautiful woman I've ever seen so I asked her to dance. She
laughed so hard punch came out of her nose and onto my new shirt. I got
the hell out of there as fast as I could and I'm not sure if I'll ever
go back.

Pray for me,

Lloyd

The key was not "hooked" on a flapping blind. The blind was blowing in the
wind and a empty bottle of Coca Cola was hitting the key, it then made
contact and was sending the following message; BUY MORE OVALTINE.

Neither. I was being ironic.

Why don't you just make your own software and throw it away like that, if
you have the skills ? Or are you just bitching because you don't have the
ability ?

So far, I'm the only one giving away great work for free here...

suffering griping pains after being exposed for impersonating a
retired Marine, persisted in his delusion of self-importance by
crossposting the following shit:

> You continue to confuse censorship and civility, Mark.
>
> One can effectively express themselves without having to resort to
>gutter mouth adjectives.

I think that many great writers would disagree with you..... Salinger,
Updike, Pynchon, Steinbeck.... just to name a few. Even your personal
favorite -- Tom Clancy -- used profanity in his work. The fact is that
some concepts can -only- be expressed with "gutter mouth adjectives".
Be that as it may, any limitation of vocabulary is, by definition, a
limitation of communication.

The only lawyers the Davies family has is the public defenders they
have to get to be bailed out of jail. The only pumping going on is when
Lloydie's black neighbors pump his fat queer ass.

(Snip)

Ahem,

If you have a Linux box setup with a sound card and have a reasonably
current installation of the WINE emulator, the Just Learn Morse Code
executable runs just fine. The helpfiles don't work in WINE but the
program is a go. I lifted the executable off of my win2000 box though
some versions of WINE will install an .msi file.

"What's "vioces" and "runing", you fucking imbecile?

> you must rely

"rely?" You "really" need to get a clue through that thick skull of
yours.

>need some meds if you making shit like this up

With you around it sure isn't necessary. And I should mention a word
about your abyssmal grammar or mad spelling skills, Cletus. It'd take
an army of thousands to keep up with and make note of your daily
butchery of my beloved English language. If you can't handle a
critique of
your dreadful writing, just go ahead and open your wrists with a razor
blade and end your torment. It's a text forum, you imbecile. The only
way to judge anyone here is by the words they offer. It's always the
subliterates like yourself that maintain the opinion that shitty
writing is something *other* than the barometer of one's stupidity that
it clearly is. You'd love to pretend that I'm nitpicking over the
occasional typo or misspelling of a word as you attempt to draw
attention away from my accurate assessment of your abortion of a post a
few lines up. Watching you try to form compound sentences is a painful
excercise.

where is he critque of my writng in

"This political office was for your local Lambda chapter, wasn't it,
Marky? There wasn't any hanging Chads, were there? Oh, of course there
was, it was a Lambda chapter..... "

or

"Hopefully, it'll <aids> kill a self admitted queer named Marky."

or this

"STFU, child abuser. "

these I believe are all from this week, such insightful prose Mr Slit

you litereay standard in your own post are so low as be something NO
ONE could trip over

they do show you as uneducated, and hate filled

> You'd love to pretend that I'm nitpicking over the

no pretending needed it is the simple fact all you do is nitpick or
spew forth your hatefull shit

> Watching you try to form compound sentences is a painful
> excercise.

glad to hear that

you clearly deserve the pain you claim to be suffering, and I am
delighted to read that some measure of justice is being done

What's "langiage," you imbecile? You can't even post a sentence in
English, much less any other language.

>
> > If you can't handle a
> > critique of

Poor Marky, whining because he's was ridiculed for running for office
in his Lambda chapter and for his clearly illiterate posts.

>
> "This political office was for your local Lambda chapter, wasn't it,

Cry, Marky, cry, bitch boy.

> these I believe are all from this week, such insightful prose Mr Slit

You also believe you are something more than a KFC fry cook Colonel.
I'm surprised you even notice a week went by, you hapless alcoholic.

>

BWHAHAHAHAHA.. Oh, the irony, you utterly stupid jackass.

What is "litereay?"

> they do show you as uneducated, and hate filled

Re-read any of your posts, you illiterate son of a bitch. You show that
you are uneducated in *every* post.

> > You'd love to pretend that I'm nitpicking over the
> > occasional typo or misspelling of a word as you attempt to draw
> > attention away from my accurate assessment of your abortion of a post a
> > few lines up.
>

No, you don't have to pretend to be stupid, you are stupid.

> it is the simple fact all you do is nitpick or
> spew forth your hatefull shit

Poor Marky, are you going to cry or just snivel some more?

> > Watching you try to form compound sentences is a painful
> > excercise.
>
> glad to hear that

It isn't complimentary, you idiot.

> you clearly deserve the pain you claim to be suffering, and I am
> delighted to read that some measure of justice is being done

No, dumbass, you couldn't make anybody have pain unless it is when you
leave teeth marks in your daddy's penis.

> again where was the critque of my writing

Learn to read, jackass. I critique your "writing" (and I use the term
loosely) in every post, stupid. You consistently prove you are an
illiterate jackass in every post. And I'm not the only person to notice
it, either.

> >

Hi ex JJ, now posting as Cmd Buzz in a CB group. At least Marks call is
known here, what's your call, fucktard?

Or are you some sorta hypocrite with a cw key?

Try hurricane aftermath combined with serious solar/geomagnetic
disturbances. This scenario has actually happened this very year according
to what I've read.

I can fine but where is the litery critque in "Hopefully, it'll <aids>
kill a self admitted queer named Marky."

which was the sum total of your post in that case

>I critique your "writing" (and I use the term
> loosely) in every post, stupid.

liar

> You don't even know me, dumbass.

I know plenty about you

I thank the Gods I don't know you personaly

I know that you a sick fucked frieghten excuse for a person

a person whose life is lived in fear, and likely does even know exactly
what he is afraid of

you show volumes about yourself in almost every post (the exceptions
are the one liners of course)

you are a coward likely a closet Homosexual yourself, or at least
strongly uncertian in your own sexuality, and so you are frightened of
someone that knows exactly who and what they are. The fact I have so
little fear of being forced to conform also seems to upset you, even
makes you envious of my nerve (it is really nerve involved just a clam
acceptance of reality and the influence of my deeply held religous
base)

2380. I Hate Being Me

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-20 03:37:42 UTC
From: Wogie <NoBalls@Glendale.up>
Message-ID: <dj73ag$3j0$0@pita.alt.net>
Source record: 48284
Cross-posted to: alt.radio.scanner.flame_fest,rec.radio.amateur.misc,rec.radio.amateur.policy

I hate being me. Nobody understands me. Nobody likes me. Nobody socializes with me and I have no friends. Nobody ever calls me on the telephone except for bill collectors, angry Skinheads and the police.

Everybody says that I am mentally deranged and act like a twelve year old juvenile. I am not deranged. I am just enjoying an extended puberty and keeping myself entertained by stalking Lloyd Davies.

I am playing this twelve year old's game, see? I stalk Lloyd, I use filthy language and I post the names and addresses of Hams who piss me off. But I have it figured out, see? When these guys do the same to me I accuse them of stalking me. How ironic is that?

You guys don't understand how lonely it gets here in Glendale, West Virginia, especially when a guy like me lives all alone in a 600 square foot mansion. I have no social life, no girl friend, no relatives, so besides a little self-abuse and my computer, what am I supposed to do?

And wrong again when you guys tell me I am a short, stocky and greasy-haired guy. Five foot five is not short. My hair is not greasy either. I wash it every Sunday morning, so there! I also have some shoe inserts that make me five foot seven and I can see eye to eye with just about any sixth grader in my town. Put that in your pipe and smoke it Marky.

I don't care if you guys don't like me. I don't care if you make fun of me. I don't care if you make fun of my spelling. I know in my own misfiring little mind that it is Lloyd making all the trouble for me. I wouldn't be such a miserable little piece of sh** if it were not for Lloyd following me everywhere I go. I am what I am because of Lloyd.

It is Lloyd's fault, I'm telling you! Lloyd! Lloyd! He is the reason I am nuts! He is the person driving me over the edge! He drives me to say and do the things I do. Don't blame Roger. Blame Lloyd! Lloyd is everywhere. Can't you see? Lloyd is in all the newsgroups. He has sockpuppets. He lurks behind the counters in the Dollar General stores. He hides in the bushes across the street from my house. He even rents motorless Piper Cubs so he can fly silently over my house day and night. Lloyd even paid someone to write a song about me. I know he didn't write it, but somebody did. Now all I hear on the radio is, "They're Coming To Take Me Away", played over and over. I KNOW it is Lloyd doing it! If you guys don't believe me, just look out your back windows! Ten dollars says Lloyd is hiding in the bushes or behind a tree. Know how to tell when Lloyd is near? Call me. I'll give you, no charge, one of my Two Test Extra Class 13 WPM Tin Foil Hats that glows blue when Lloyd is within a half mile. Trust me, these hats work. I keep one with me at all times.

Gotta go. My Two Test Extra Class 13 WPM Tin Foil Hat is glowing. Lloyd must be close. Time for me to shut the curtains and catch him in the act. I'll post more later.

Sorry, Mark. He's got ya there.

You've got a whole decade worth of stupid classes to your credit.

> hopefully the Gods will choose to lift this sad veil of hate and fear
> form this poor freighten child

"from" "frightened"

Hopefully someone will finally decide to get Mark into
counselling, or better yet, an involuntary confinement hospital.

> May the Gods bless and protect him and his possible victums.

"victims"

May Mark's potential victims see him coming and be adequately
prepared.

> May the Gods grant him the innner peace to see the light of truth and
> Peace

May someone grant Mark the opportunity to see what a fool he's
been and seek treatment...soon.

> May the Gods show favor to Him and teach him to love his fellow human

There's only ONE human, Mark?

OK..Who was it? It's certainly not you.

> and should he scrown the Gods and their efforts let the God teach by
> the darker ways of Nature which is both loving and Cruel

"scrown"...?!?! I won't even GUESS what THAT was supposed to
be...

"let the God"...?!?! It was "gods" (plural)...the rest get drunk
and take the rest of the week off...?!?!

> So Mote it be

"Mote"...?!?!

YOU'RE a MOTE, Mark...

As in "the mote in God's eye".

> > > > May you end up like Jesus did, crucified, you deserve it, Marky.

2383. Re: K1MAN SAYS ARRL MEMBERSHIP IS IN FREE FALL AS AARA NIPS AT THEIR HEELS

Newsgroup: rec.radio.amateur.misc
Date: 2005-10-20 05:28:31 UTC
From: Ashley VK3HAG <vk3hag@yahoo.com>
Message-ID: <3WF5f.22982$U51.21410@news-server.bigpond.net.au>
Source record: 48187
Cross-posted to: rec.radio.amateur.policy,rec.radio.amateur.misc,rec.radio.amateur.dx,rec.radio.cb

Take VK's WIA for example.

Until this year, each state was it's own body with a person from each state representing said state at the Federal level. The Eastern States, with more money, assets and power had started to effect the other states. Individual hams used to belong to thiner state division only, with each state division then having representation at a Federal level. Now every ham who joins the WIA has voting rights with the WIA.

For example, in the past if I was a WIA Member and wanted something changed it had to go through the VK3 WIA Council who then (if they wanted to that is) proposed it at the next Federal meeting. Now, I can put an item on the agenda of any WIA meeting and have my say.

Thanks to many dedicated hams with a vision, this was scrapped last year and a new WIA was formed. Thanks to them ham radio may survive well into the 21st century. Now each state simply has an advisory committee with no real power over amateur radio, other than advising the National WIA. Many states transferred their assets to the new National body, but those that like playing politics and who are on power trips said "no" we aren't giving our state's money to help out another state. It seems those formerly in power in VK3 & VK2 don't want to help hams in say, VK8.

In the past, VK2WIA and VK3WIA held most of the country assets and really controlled the WIA, with the other states missing out. In VK2 and VK3 we had people (VK's will know whom I mean) who were much more interested in controlling assets and playing politics than promoting amateur radio. In VK2 and VK3 they were more interested in keeping their assets (buildings, towers etc) than forming a National WIA. Now that other states have closed up their WIA Divisions, their funds were transferred to the National WIA. But not in VK2 or VK3 where those who used to run the Divisions wanted to keep control, so whilst VK6, VK7, VK1, all now gave up their power and money, the future politicians in VK2 and VK3 decided to keep their assets seperate.

Why all states didn't transfer their funds to the National WIA is simply becuase their are power-hungry future politicians in VK2 and VK3 and din't want their funds to say, pay for a new repeater in Alice Springs.

Now, VK3WIA is simply "Amateur Radio Victoria" and VK2WIA is "AR NSW" who like to think they are still a powerful force, but in reality are simply now building and tower owners who run a QSL buro.

The original idea of the new WIA was to simply have local clubs and one national WIA, with the clubs being affiliated with the WIA and providing former State division services. Every state except VK2 & VK3 disbanded their former WIA State Division and transferred all to the National WIA. So now in VK2 or VK3 you have clubs, a pretend state division and the National WIA.

One hopes that many hams will join the National WIA and local clubs as these former state divisions serve no real purpose to amateur radio anymore, some just wish they did.

Other states WIA sensibly chose to transfer their assets to the new National WIA and now cease to exist. (VK6WIA for instance, has closed down and given control to the National WIA, as has VK7, VK1). But in NSW (VK2)and Vic (VK3) it was too much for those with political aims to transfer their assets to the National WIA.

So now, in VK2 and VK3 we have two bodies who were former WIA State Divisions which are now nothing more than a radio club.

I have only been licensed since January, but watching these changes as they occur.

Do the maths. Every other President and Committee in every other Aussie State said "Yes we will disbanded and form the new national WIA" (hams interested in the betterment of amateur radio in VK) but the President and Committee of VK2 & VK3 said "We will join...but we won't be closing ourselves down or transferring assets to the National WIA, we'll just change our name" (hams training to be future politicians.

So whilst the ARRL may not be what everyone wants or needs, it IMHO would be better to keep it and effect changes from within.

An recent example of VK3 wishing it still was a powerful WIA branch can be seen in a recent article by it's President, who stated that the new Standard Licencees (former Novices) would not be allowed to use SSTV when the regulations change. Yet, the new regulations now clearly state "Any emission mode with a bandwidth <8kHz". Which means we can use SSTV now. You'd think the President of AR Victoria would get the facts before making such statements on AR Newsline!

This was misinformation from the "President?" of AR Victoria. Seems he was more interested in making false statements about SSTV than promoting amateur radio.

The ARRL is pretty good, all thing considered.

I am a member of two radio clubs and the WIA, but hell will freeze over* before I join AR Victoria and would encourage any VK hams to join the WIA and a local club, not a state-based division as they no longer have any real power (ie they don't deal with 'our FCC' (ACMA) anymore on a state-by-state basis, it's done at a National level by the WIA)

PS. The VK Foundation Licence and new amateur regs are now in effect.
an_old_friend wrote:

*I'd join up only to get voting rights, then transfer all to the
National WIA and close down AR Vic, as the other states of done.

So the hams who used to run VK6, VK1, VK7, VK4, VK5 I say thank you for
handing over your decision-making power, assets et al to the National
WIA a big thanks and well done for giving up power. Obviously you guys
aren't on a power trip.

Lisping cocksucker Davies hasn't got any lawyers, either, he is so behind on his rent and bills he recently had to sell some of his shitty cheapassed radios. Roger does have a lawyer, dumbass, and he has more brains in his little finger than you ever could get in ten lifetimes, Davies.

> The Little Shit whines and hides in dark corners.

Says Lloydie Austin Davies hiding behind a woman's name, just like when he hid when Oris came knocking on his front door.

> It is what Mental Miscreants do....

You should know, you were committed for a year to a mental institution after beating up your mommy when she caught you stealing money from her purse, Davies.

My dearest fellow underaged child lover,

I am a fan of child pornography and for the past 14 years,I have been
able to gather quite a collection of it.
I have pictures, VHS tapes, posters, audio recordings, and games based
on child pornography.

I am selling my products (or trading for other child pornography).

I have a complete color catalog of all products now available. You can
purchase pictures (both normal kodak and computer JPEG's). Also, you
can purchase posters, VHS tapes, used boys underwear, and audio
recordings.

There are many products and services. Here are some prices:

Complete Color Catalog (160 pages).....$5.00
100 Pictures Little boys age 7-12.....$9.95
120 Pictures Little boys age 13-17.....$11.95
VHS tape, little boys "Bath Time for Uncle Lloyd".....$49.95
VHS tape, little boys "Happy B-day, Uncle Lloyd".....$49.95
VHS tape, teenage boys "Naked Pizza Party!".....$49.95
Personalized Audio tape.....$2.99

If you have child pornography, preferably little boys ages 7-9, I will
trade or buy them from you. If they are action shots, of an adult with
a little boy having sex, I am willing to trade big, or pay you a lot.
Please write to me for more details. Thanks.

You can send cash, checks, or money orders made out to FUN WITH
CHILDREN.

Please send your order to:

Fun With Children
c/o Uncle Lloyd Davies

We know Davies.....Poor, poor, pathetic Lloyd. He has to
respond to his own posts using a fake name. Lloyd, You're a credit to
your profession of village idiot.
You've proven to one and all: you _are_ the classic mentally ill retard
with defective DNA.
You've made it abundantly clear by this action that you, in fact, are
incapable of acting like an adult, nor should be in the company of
adults. As to the issue of "exposing" me: Get real. It's not really a
surprise that you chose to announce to the newsgroup that your meager
intellect is inadequate to the challenge you foolishly entered,
considering the ineptitude you display time and again in the newsgroup,
in particular your total inability to compose even a simple on-topic
article, much less one that doesn't invariably consist of a single
lengthy, tedious and incoherent paragraph consisting of dim-witted,
monosyllabic phrases that translate to "Whine, duh, whine, duh, duh,
whine." Why, I wonder, would you purposely choose to be an
international
laughing stock by your endless public
proclamations of not just your dismissal of, but your utter disdain for
intelligence to the literate of rec.radio.amateur heirarchy newsgroup's
readers and participants (as opposed to the illiterate, maladjusted
trolls with whom you "communicate" [I use the word loosely and with a
great deal of
charity; "grunt" is more likely the better description])? Why, I
wonder,
would you insist upon presenting yourself to the world as an babbling
idiot? One never knows who is reading, does one? More than a few of the
more, let's say, "well-connected" of our readership have already
commented to me about your buffoonishness. You've proven them to be
right, haven't you?
But, hey, if that's what you want them to think, don't let me stop you.

Now run along and play with your "daleks" 32 year old VIRGIN.

Do they have a program that gives a west virgin
hick like me some free porn? I'm having a hard
time paying for my single wide and electricity so
lately I've been beating off on a national
geographic. Some real porn with mens in it would
be really great.

My mom tried to take them away so I cunt kicked
her. The bitch is too afraid of my to press
charges.

I mean, i am depressed alot of the time. No one at the Church seems to care. So where do i have to go? Listening to Prophet Stair and Hal Turner, they comfort me. All i do is sit at the computer and read newsgroups and read Hal's webpages. I've tried going to a couple of country dance places, but none of gals would have
a dance with me. It seems every time I try to do something that would be break away from this life of lonlyness always fails.

Just wanted to speak my mind,

Lloyd

Yes it could be just the lights or could be something worse!

Pull the cct diagram out and figure out how the "lights" work. If the thing is a simple LCD backlight perhaps the bulb is blown. If it is a microcontroller driven matrix array there could be anything wrong between the uP and the matrix chips. It could also be some supply voltage that is specific to providing power to the lights!

Do you have a cct diagram? I dont know the radio.

WWpSD - What would profit Stair do ?

I tell you exactly what he'd do - he'd come on over to Memphis this
weekend and visit us at KRBC.

And you know why.

I've said it a hundred times already -
Sunday School at 945 and preaching at 1100.

The preacher will be glad to re-baptize you if you do what the profit
did.

If you know what I mean ..

never asked for it

agreed I never stopped being stupid becuase of Course I never started

you got a true statement I may have to lie to get over the shock

with another you will be as much used as busted clock

I am realy hopping for you on that count

Typical Marky, admits to being stupid thgen admits he's a liar.

> with another you will be as much used as busted clock
^^

Poor mentally ill Marky, he's such a blubbering idiot.

> I am realy hopping for you on that count

Yes, you dance and hop around just like a little monkey, Marky.

Yep a slow burning would suit you, Marky.

> the Cross kinda went outa style

Especially since most hate perverts of your ilk.

^^

BWHAHAHAHA.... Marky admits to being a know nothing idiot! Go lie down
and shoot up that heroin that you like so well, Marky.

> My goodness can I stand the strain?

You can't even stand the strain of calculating 2+2, Marky.

Will you whine some more?

> (very likely)

Indeed. You lack the capacity to do little else.

We know Davies.....Poor, poor, pathetic Lloyd. He has to
respond to his own posts using a fake name. Lloyd, You're a credit to
your profession of village idiot.
You've proven to one and all: you _are_ the classic mentally ill retard
with defective DNA.
You've made it abundantly clear by this action that you, in fact, are
incapable of acting like an adult, nor should be in the company of
adults. As to the issue of "exposing" me: Get real. It's not really a
surprise that you chose to announce to the newsgroup that your meager
intellect is inadequate to the challenge you foolishly entered,
considering the ineptitude you display time and again in the newsgroup,
in particular your total inability to compose even a simple on-topic
article, much less one that doesn't invariably consist of a single
lengthy, tedious and incoherent paragraph consisting of dim-witted,
monosyllabic phrases that translate to "Whine, duh, whine, duh, duh,
whine." Why, I wonder, would you purposely choose to be an
international
laughing stock by your endless public
proclamations of not just your dismissal of, but your utter disdain for
intelligence to the literate of rec.radio.amateur heirarchy newsgroup's
readers and participants (as opposed to the illiterate, maladjusted
trolls with whom you "communicate" [I use the word loosely and with a
great deal of
charity; "grunt" is more likely the better description])? Why, I
wonder,
would you insist upon presenting yourself to the world as an babbling
idiot? One never knows who is reading, does one? More than a few of the
more, let's say, "well-connected" of our readership have already
commented to me about your buffoonishness. You've proven them to be
right, haven't you?
But, hey, if that's what you want them to think, don't let me stop you.

Now run along and play with your "daleks" 32 year old VIRGIN.
////.........///////////////.....

Yes, I've seen what " "well-connected" of our readership " have said to
you. And about you.

And speaking of babbling idiots.....

Chat log
by Anonymous
Welcome
Admin has joined the chat.
[Admin] Hey fellas !!!
[TimeLord_Davies] Hello Admin
[Admin] Should I keep the chat room up for a few more days?
[TimeLord_Davies] lol
[Admin] You homosexuals need a place to play
[Admin] BOY
[TimeLord_Davies] i am not gay
[Your_Great_Hero,_Steve] Lloyd & I are not Faggots
[Admin] You're as queer as a 3 dollar bill
[Admin] you too steevo the pedo
[TimeLord_Davies] hell now
[Your_Great_Hero,_Steve] I got your Pedo swingin' right here, and NO,
you can't suck it
[Admin] BOW DOWN BEFORE YOUR JEW GOD
[TimeLord_Davies] Jesus was not a JEW!
[Admin] was to
[TimeLord_Davies] nope
[Admin] and you're not a retard
[TimeLord_Davies] i am NOT A DAMN
RETARD!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!!
[Admin] Your mamma said you're smart so you are
[Your_Great_Hero,_Steve] Thanks for defending, me, Lloyd
[Admin] There are lots of pizza delivery BOYS that are super smart.
Just look at you.
[Your_Great_Hero,_Steve] You are a true Friend
[Admin] you guys should bump uglies
[Admin] FAGS
[TimeLord_Davies] i am not a BOY!
[TimeLord_Davies] I am a 31 year old MAN!
[Admin] You have a high school BOYS job, that makes you a BOY
[Your_Great_Hero,_Steve] Ask these Nigger Dick Suckers to post a
passage from the bible that states Jesus was a KIKE
[Admin] If you were a real man you'd be driving a school bus
[Your_Great_Hero,_Steve] These Turds are just jealous because we are
smarter than them
[TimeLord_Davies] i am not a Jew either!
[TimeLord_Davies] House of names is full of shit!
[Admin] shalom my brother
[TimeLord_Davies] Wiseman is very Jewsih
[Your_Great_Hero,_Steve] House of names doesn't even list KIKE

Schwartzo as being a Jewish name
[TimeLord_Davies] Jewish
[TimeLord_Davies] lol

http://www.network54.com/Forum/message?forumid=324004&messageid=1105337892

Here's the log so far
by Anonymous
Welcome
Anonymous_Coward has joined the chat.
[schwartz] nope, you are only exposing yourself as a tool for Satan
[schwartz] You aren't a Christian Lloyd.
[schwartz] and you know it.
[TimeLord_Davies] JESUS HATES WITH A PERFECT HATE
[schwartz] And Jesus hates you.
[TimeLord_Davies] HE HATES TOO
[schwartz] He hates liars.
[schwartz] He hates those who pervert his name.
[TimeLord_Davies] SO WHAT, IF I MAKE A FEW SMALL MISTAKES
[schwartz] no, it's not small mistakes.
[TimeLord_Davies] I ATTEND THE METHODIST CHRUCH NOW
[schwartz] It shows your true heart, one of being evil.
[TimeLord_Davies] I AM NO LONGER A BAPTIST
[schwartz] So?
[schwartz] Both are Christian
[TimeLord_Davies] I AM NOT EVIL
[schwartz] God isn't going to ask if y ou are a baptist or not.
[schwartz] He is going to ask if you REALLY believe and follow Christ.
Your answer is no.
[schwartz] Because if you did really follow your Christ, you would show
love, not hate.
[schwartz] You would not hate me, Roger, and dozens of other people you
have trolled again.
[TimeLord_Davies] YOU ARE NOT THE JUDGE OF WHO IS A FOLLOWER OF CHRIST
OR NOT
[TimeLord_Davies] SO SHUT UP
[schwartz] And you are not to judge if I am going to heaven or not
right?
[schwartz] See, your own standard used against you.
[schwartz] Fake Christian Lloyd.
[TimeLord_Davies] NO, THE BIBLE SAYS, JUDGE NOT, LEST YE BE JUDGED
[schwartz] So Christian of you "shut up"
[schwartz] But you judge all the time LARDASS
[schwartz] so there, again, you are not following Christ.
[TimeLord_Davies] BROTHER STAIR SAYS TO JUDGE, BUT BE WILLING TO TAKE
JUDGEMENT
No_code has joined the chat.
[schwartz] You believe Brother Stair LLOYD? BWHAHAHA, you really are
mentally ill.
[TimeLord_Davies] I HAVE LISTENED TO STAIR FOR OVER 10 YEARS
[schwartz] But you don't do what Stair says you should do.

[schwartz] Do you donate to him?
[TimeLord_Davies] NO, WHY?
[schwartz] He says you are supposed to.
[schwartz] So you follow Brother Stair but don't donate a penny to him.

[TimeLord_Davies] DID I EVER SAY I WAS A FOLLOWER, I JUST SAID I LISTEN TO HIM, QUIT PUTTING WORDS IN MY MOUTH!
[schwartz] You're so fucked up in the head Lloyd for even believing Stair is a christian.
[schwartz] I'm sure I can google you saying you follow the guy.
[TimeLord_Davies] YEAH, SURE
[schwartz] But seriously fat boy, when you are going to start following the teachings of your Christ?
[schwartz] let me see... your lying... profanities... hatred.... etc.
[TimeLord_Davies] NOW GO AND YELL AT SOME OLD MAN TO GET HIM TO PAY UP ON HIS MEDICAL BILL, BEFORE HE DIES
[schwartz] again short shit, you don't know what you are talking about.

[schwartz] but my way of living sure beats delivering pizzas at 31 year old
[TimeLord_Davies] I DONT GIVE A SHIT ABOUT YOUR SHIT
[schwartz] you don't even have health insurance... you need to grow up Little Lloyd.
[schwartz] when why did you ask about it then fat boy?
[TimeLord_Davies] BIG FUCKING DEAL IF I DELIVER PIZZAS TILL I AM 100 YEARS OLD
[TimeLord_Davies] AT LEAST I WORK A JOB
[TimeLord_Davies] UNLIKE VONBLUVENS
[schwartz] well if you want to work a dead end all your life, I can't help but laugh at your lack of self-esteem
[schwartz] So your saying Vonbluvens is shit for being on welfare?
[schwartz] Funny, your buddy Steve doesn't work.
[TimeLord_Davies] YEAH, BUT AT LEAST I WORK
[schwartz] That makes him shit also right?
[TimeLord_Davies] NOPE, STEVE IS MY FREIND
[schwartz] Ah, the double standard of Lloyd. Tell me agian how you are a Christian?
[schwartz] It's only okay that your friends are on welfare... for everyone else, they are shit right?
[TimeLord_Davies] STEVE DESERVES EVERYTHING HE GETS IN BENIFETS
[schwartz] Thank you Lloyd for showing what a complete hypocritical fool you are.
[schwartz] And so does Vonbluvens right?
[TimeLord_Davies] YOU ARE A UTTER ASSHOLE, I HOPE I NEVER HAVE TO MEET YOU
[schwartz] Why is it okay for Steve but not for Vonbluvens?
[schwartz] answer the question fat turd.
[schwartz] Now mind you, I hate Vonbluvens also.
[TimeLord_Davies] I WILL NOT ANSWER UNTIL, YOU ADDRESS ME WITH SOME RESPECT
[schwartz] but I am exposing your stupidity and double standard right

now in front of several NIM Busters.
[schwartz] you don't deserve respect until you earn it.
[schwartz] so answer the question, why okay for Steve to be on welfare but not Vonbluvens or others?
[schwartz] answer Little Shit.
[TimeLord_Davies] DIE
[TimeLord_Davies] JUST DIE
[schwartz] Little Lloyd is losing it folks.
[No_code] WOW, and you worship Christ?
[schwartz] I expose him to be a hypocrite, a false Christian, and a liar
[schwartz] Lloyd = .../..../../-
[No_code] There's a button by the sound where you can copy the text of this chat and save it wherever you'd like
[TimeLord_Davies] AND YOUR POINT IS?
[No_code] My point is you're a freakin loon
[TimeLord_Davies] SO?
[TimeLord_Davies] I DONT CARE
[schwartz] That point is... you're a fake Christian and a piece of shit LLOYD.
[TimeLord_Davies] YOUR OPINIONS ARE SHIT
[schwartz] Nice Christian attitude fat boy.
[TimeLord_Davies] IF I MET YOU, I'D SPIT ON YOUR FACE
[schwartz] You wouldn't be able to reach up to my face Fat Turd without a stool
[TimeLord_Davies] WHEN IT COMES TO DEALING WITH YOUR KIND, ALL MY CHRISTIAN HAS TO BE PUT ASIDE
[schwartz] I mean look at you Lloyd. ALthough you are a physical reject, your postings show you have mental problems as well.
[TimeLord_Davies] I AM NOT A REJECT
[schwartz] Which proves my point totally doesn't it Lloyd?
[TimeLord_Davies] NOPE
[schwartz] A true Christian would never do that.
[schwartz] You're a reject Lloyd. Physically and mentally defective.
[TimeLord_Davies] AND YOUR A KIKE
[schwartz] yawn.
[schwartz] so was Jesus.
[TimeLord_Davies] JESUS WAS NOT A JEW
[schwartz] sure he was Lloyd.
[TimeLord_Davies] NOPE
[No_code] Yes he was Lloyd
[schwartz] In fact, jesus came to preach to the Jew first, then the Gentile.
[TimeLord_Davies] YEAH
[schwartz] Read your Bible Lloyd, that is, if you can actually read a Bible.
[TimeLord_Davies] I THINK YOU GET YOUR JOLLIES FROM MESSING WITH ME AND STEVE
[schwartz] you are entertaining to mess with.
[schwartz] So stupid.

[TimeLord_Davies] AND YOU ARE SO GULLIBE TOO
[schwartz] so what was your SAT score Lloyd? 1700?
[TimeLord_Davies] BUT ITS OK, YA KNOW, BECAUSE,
[No_code] The library may have the bible on tape if you have a reading problem
[TimeLord_Davies] I NEVER TOOK THE SAT
[TimeLord_Davies] I CAN READ FINE
[TimeLord_Davies] GOT IT?
[No_code] apparently you can't
[schwartz] So Lloyd, who is homo4holsten..... I mean seriously, fess up to that.
[TimeLord_Davies] IT SURE AINT ME
[Your_Great_Hero,_Steve] You can check the properites of the imposter, KIKE
[TimeLord_Davies] HEY STEVE
[TimeLord_Davies] LETS ROAST THIS KIKE
[schwartz] I did. It matched Lloyd's account.
[TimeLord_Davies] PUT HIM IN THE OVEN
[Your_Great_Hero,_Steve] It's not the same as Lloyd's
[schwartz] I already explained why.
[Your_Great_Hero,_Steve] It did not match KIKE. Go check again
[schwartz] it did match at the time.
[schwartz] it matched the unique avatar that network54 gives.
[TimeLord_Davies] STEVE, ITS JUST ANOTHER MADE UP
[Your_Great_Hero,_Steve] You pointed it out to me.
[schwartz] Like when Lloyd impostering your caller id on Jon Cunningham's phone.
[TimeLord_Davies] THESE PEOPLE MAKE UP STORIES AND POSTS TO RUIN MY FINE REPUTATION
[schwartz] Nice touch lloyd.
[Your_Great_Hero,_Steve] I then went and checked, and the properties of the avater were different
[schwartz] You're reputation has been ruined long before I knew of your existance.
[Your_Great_Hero,_Steve] They're just pissed because you are a straight white man, and not a Faggot like them
[TimeLord_Davies] NOPE
[schwartz] I checked at the time the postings were made. Exactly the same account at the time.
[TimeLord_Davies] YEP, I AM NOT A FAGGOT
[Your_Great_Hero,_Steve] If you want to, KIKE, we can both look at the properties right now
[schwartz] funny, those who deny it the most and talk about gay sex acts the most, are almost always gay themselves
[schwartz] at the time the homo4holsten account was done?
[TimeLord_Davies] SCHWARTZ, YOU ALWAYS START TROUBLE
[Your_Great_Hero,_Steve] Yes, at the time that the Homo For Holsten post was done
TimeLord_Davies has left the chat.
TimeLord_Davies has joined the chat.

[schwartz] I showed it. It was the exact same number.jpg
[Your_Great_Hero,_Steve] Wrong, KIKE
[schwartz] which was the tell it ws from Lloyd.
[TimeLord_Davies] SOMEONE COULD HAVE COPIED THE IMAGE
[Your_Great_Hero,_Steve] i'll be right back...
[schwartz] Now tonight, since Lloyd reloaded up his avatar, it is
109somenumber.
[TimeLord_Davies]
No_code has left the chat.
No_code has joined the chat.
[TimeLord_Davies] THAT'S JUST A NUMBER IN A TEMP DIRECTORT

Posted on Jan 10, 2005, 1:18 AM
http://www.network54.com/Forum/message?forumid=324004&messageid=1105341382

and more
by No Code
would listen to you about that.
[TimeLord_Davies] nope,
[No_code] sound it out lloyd
[Your_Great_Hero,_Steve] I was worried at the time of having my
daughter run away with him
[schwartz] come on Steve. I know your stupid but we both know what a 22
year wants by dating a 13 year old
[Your_Great_Hero,_Steve] It was a delicate situation
[TimeLord_Davies] i'll read it later
[schwartz] no, read it now. Only takes a minute.
[No_code] He should be in prison now
[TimeLord_Davies] i dont have my bible handy
[schwartz] see, that verse DIRECTLY says Jesus was jewish
[No_code] or at the bottom of a lake
[schwartz] hahahaha, no code, nice.
[No_code] thanks
[TimeLord_Davies] i have to goto bed soon
[schwartz] you have to admit, it is fun to mess with these two idiots.
[No_code] demanding job?
[TimeLord_Davies] i have to see the dentist tomorrow
[Your_Great_Hero,_Steve] You haven't messed with any of us KIKE
[No_code] This is much better than posting to nim
[No_code] there's no gay porn
[schwartz] yea it is.
[schwartz] Steve can't flood with gay porn... correct.
[No_code] Was he the one posting the goatse movie?
[schwartz] don't know... I only view NIM using a dial up account and
block all 3rd party garbagte
[Your_Great_Hero,_Steve] I don't flood the Nim Board, I just post want
the Faggot image that you Turds want to see
[schwartz] but why would a straight man post gay porn for others to
see?
[No_code] Gotcha, I use opera and turn off that crap too
[schwartz] Mozilla, Opera, Adshield for IE

[Your_Great_Hero,_Steve] Because you Turds want to see it, so I oblige you
[TimeLord_Davies] can you get that for free?
[schwartz] how do you know this Steve? Are you an expert on gay behavior or something?
[schwartz] you can get all of them for free.
[TimeLord_Davies] oh
[Your_Great_Hero,_Steve] I'm starting to realize what you Faggots are interested in.
[schwartz] Steve, teach your bitch.
[TimeLord_Davies] ok, who wants me to do a show tomorrow nite?
[schwartz] I won't listen Lloyd.
[Your_Great_Hero,_Steve] I want you to do a show tomorrow, Lloyd
[TimeLord_Davies] how come?
[schwartz] it's childish and idiotic.
[TimeLord_Davies] your loss
[schwartz] not my loss.
[schwartz] so Steve, so you are becoming an expert on what gay people want... is that what you are saying?
[TimeLord_Davies] who knows, i may dedicate this next show to you
[schwartz] of course, I am 100% straight, but because I am, gay people dont' bother me.
[Your_Great_Hero,_Steve] Stop calling me a Pedo, and i will stop posting the jack-off pic
[schwartz] however gay people bother Steve.
[TimeLord_Davies] if I can find the song from Hal
[schwartz] I don't view that pic Steve. It only makes you look out to be the queero
[schwartz] not any one of us.
[schwartz] of course if you had some intelligence, you would see that.
[schwartz] now Steve, why do you gay people bother you so much? I know the answer.
[schwartz] because they make you face yourself.
[Your_Great_Hero,_Steve] 99% of all nim Busters post has to do with Faggotry, so you really are in no postion to act high and mighty
[TimeLord_Davies] yeah, same here, Steve. I'd be willing to drop the Timelord stuff, if they quit calling me a lardass
[TimeLord_Davies] and a retard
[schwartz] you idiots don't realize that stuff only makes YOU LOOK STUPID.
[schwartz] it has no reflection on anyone else.
[Your_Great_Hero,_Steve] You just keep doing what you're doing Lloyd, and I will do likewise
[TimeLord_Davies] keep what?
[schwartz] Steve will continue to post his collection of gay porn while Lloyd will keep believing in Timelords.
[Your_Great_Hero,_Steve] THese Faggots can't get enough of us, they are completely obsesssed with you & I
[TimeLord_Davies] yep
[No_code] It's like your talking to a wall

[schwartz] yet Lloyd is the one begging for people like Roger to come
get him.
[TimeLord_Davies] they probably see us under thier beds at nite
[schwartz] yup, these are two idiots.
[No_code] tweedle dee and dum
[Your_Great_Hero,_Steve] They probably do, Lloyd
[schwartz] please don't insult tweedle dee and dum, much more
intelligent than these two idiots
[No_code] I apologize
[Your_Great_Hero,_Steve] I've now come to the realization that these
Faggots will never get over their desires to suck our Dicks
[schwartz] Lloyd, just promise us one thing.
[TimeLord_Davies] yep
[schwartz] well promise the world this one thing.
[schwartz] NEVER REPRODUCE
[TimeLord_Davies] i cant make any kind of promises
[No_code] :D That's some funny shit
[TimeLord_Davies] Lloyd Jr! lol
[Your_Great_Hero,_Steve] I have five children already, KIKE
[schwartz] God made you a genetic defect for a reason Lloyd.
[TimeLord_Davies] i am NOT A DEFECT!
[schwartz] sure you are.
[No_code] Women sense that defect and RUN
[schwartz] you are shorter than over 98 percent of all men
[TimeLord_Davies] get over your desire to suck my dick!
[schwartz] you are grossly overweight
[schwartz] your bald.
[schwartz] but even worse... you're stupid as shit.
[TimeLord_Davies] so are alot of other men
[TimeLord_Davies] whats it to you?
[schwartz] you are shorter than 98 percent of all men.
[schwartz] then take your baldness
[schwartz] your grossly obese.
[schwartz] and you get down to a few tenths of one percent of all men.
[schwartz] then we start on your intelligence.
[TimeLord_Davies] you make it sound, like I'm the only bald and fat man
on the whole earth!
[schwartz] tell me again Lloyd, that you are not a genetic defect?
[Your_Great_Hero,_Steve] Watch out, Lloyd, the KIKE really wants to
suck your Dick
[schwartz] no, I make it sound that you are a defect....
[schwartz] there goes Steve with his homosexual dreams again and
talking about Lloyd's dick
[No_code] Steve's homosexuality bores me
[schwartz] of Lloyd, being the good Christian he is, enjoys it when
Steve defends him that way
[Your_Great_Hero,_Steve] I only talk about what interests you, KIKE
[No_code] he needs to embrace it
[schwartz] again, Steve claims to be an expert on what interest gay
people.... except I'm not gay

Pizza_BOY has left the chat.
Anonymous_Coward has left the chat.
[TimeLord_Davies] you need to embarce a baseball bat to the back your head!
[schwartz] You better use a stool Lloyd.
[No_code] and please don't mess up my hair
[Your_Great_Hero,_Steve] If you're not a Faggot, thern why are you all buddy buddy with the Nim Shitters?
[schwartz] I'm not buddy buddy with any of them. I run solo pedo.
[schwartz] but you seem to see homosexuality everywhere Steve.
[schwartz] you ask any gay person and they will say you are the queero Steve.
[Your_Great_Hero,_Steve] I see you Faggots for what you are.
[TimeLord_Davies] me too, me too Steve
[schwartz] So again, you are proclaiming to be an expert on homosexuality Steve?
[schwartz] ah, Lloyd is acting like Steve's bitch now..... "me too, me too"
[Your_Great_Hero,_Steve] You taught me enough that there is to know about Faggotry, KIKE
[schwartz] feminine of you Lloyd.
[TimeLord_Davies] :<
[schwartz] If that were true, why do you want to be my student Steve?
[schwartz] like I said, all revolves to your homosexuality Steve.
[schwartz] or bisexuality in your case.
[TimeLord_Davies] listen, we are NOT fags
[Your_Great_Hero,_Steve] They wish we were Dick Sucking Queers like them
[No_code] I'm here to help Steve/Lloyd, http://www.crystalinks.com/comingout.html
[schwartz] There goes Steve dreaming of gay sex again.
[TimeLord_Davies] well, I am going to bed, nite all
[schwartz] Of course, Lloyd beings Steve's bitch... as to live with it.

[Your_Great_Hero,_Steve] God Night. Lloyd
[schwartz] Lloyd, consider killing yourself.
[Your_Great_Hero,_Steve] I'm going to bed soon, as well
[No_code] Isn't that cute
[TimeLord_Davies] nah, the world needs me
[schwartz] hahaha, yea no code....
[schwartz] 5 wpm code Lloyd can't pass.
[Your_Great_Hero,_Steve] They need to have the thought of your Dick in thier mouth
[TimeLord_Davies] and alot of others cant either
[schwartz] we had 3 blacks in class when I learned to recieve morse and they all passed 5wpm, then 10, then 20
[Your_Great_He] They just want to suck your Dick
[TimeLord_Davies] yeah, they see me everywhere
[No_code] But Lloyd's smart, just ask his mother.
[Your_Great_Hero,_Steve] Their obsession will never die. These Fagot

Turds won
[schwartz] we had a black person in ops that was recording morse numbers sent at over 40wpm LIVE from Russian aircraft in the mid 80s
[schwartz] I could never do that.
[Your_Great_Hero,_Steve] t be happy until you give them permissionm to suck your Dick.
[TimeLord_Davies] that will never happen
[schwartz] I like that picture of Lloyd... MY MOMMY TREATS ME SPECIAL
[Your_Great_Hero,_Steve] Did you jack-off to that picture, KIKE?
schwartz has left the chat.
schwartz has joined the chat.
[No_code] Lloyd is special, he's the official nim bitch
[schwartz] Lloyd does come off as a fem
[schwartz] whine, whne, whine
[No_code] Download tonights show, his voice is especially high
[schwartz] does he cry in this one?
[schwartz] oh well, this is much more fun than NIM Busters but I really have to go to bed.
[No_code] I could barely hear it. He was doing loud sound effects and his voice was high and low.
[schwartz] work you know.
[No_code] night
[schwartz] later on dude.
[No_code] Yep, I hate fucking mondays
[Your_Great_Hero,_Steve] The Dick suckers are leaving
[schwartz] me too..... l8r... Steve and Lloyd, hope you die.
schwartz has left the chat.
[Your_Great_Hero,_Steve] THe KIKE has left
[No_code] your master has left
[No_code] you guys got your asses handed to you
[Your_Great_Hero,_Steve] He sure wants to suck our Dick badly, huh, Llloyd?
[Your_Great_Hero,_Steve] The Fucking Hook-nosed Kike needs to realize that we are not into his Faggotry
[No_code] I'll let you two be alone for your fag chat

<hhc314@yahoo.com> wrote:

| Any older, experienced ham can tell you that it has long been illegal
| to communicate using your mobile rig while your car is in motion.

Eh? I hear all sorts of people chatting on the VHF/UHF bands while
they're driving in the morning. (Granted, I rarely participate, as
I'd rather not distract myself, but as far as I know, using CBs and
ham radios like that while driving is legal.)

| I can't even count the number of times that I've had to take evasive
| action to avoid collision with a clueless man/woman who is so
| distracted by their cell phone conversation that they totally lose
| sight of everything around them.

Yes, but we're talking of the legality of using radios that aren't
held up to the ear. Instead, you've got a microphone with a PTT
switch and a speaker somewhere else.

Personally, I think it's about as distracting as a cell phone, and
prefer not to do so, but as far as I know, it's legal to talk on a
radio like that as long as there's nothing up to your ear. (And that
includes cell phones, as far as I know.)

(Of course, I'm in Texas. Other places may vary.)

Didn't say it was the only working mode. Just that it was used due to bad
conditions.

I'm an older experienced ham and It has ALWAYS been LEGAL to use your
radio in you car while in motion.
There are many cases where a non-educated cop will give a ticked for
using your HAM radio in his moving car.
Once this goes to court 99.9 percent of these cases are dropped because
the cop is clearly wrong and did not understand.

>We've always been excluded for conducting a QSO while driving on public

Cell phones are different and should be BANNED in a moving car. many
people can't carry on a full dulpex conversation while driving. There
are MANY people who don't pay attention while driving because their
having a fight over the phone or just plain bullshitting.

I can and have written code to give away, as well as finding bugs,
indentifying fixes and adding enhancements for other programs. I attempt

to contribute back to any project that I use and some that I only considered using. But my expertise is in communications and embedded systems with no user interface. Most of my targets don't have a disk drive, keyboard, display or an X86 CPU. I usually work is in 'C' and assembler and ocassionally have to write my own interrupt service routines. So while the back end is easy, I don't have a clue how to create a working user interface.

I prefer the GPL so that if someone wants to use my code to make money, they either share all their code or come talk to me about using a different license and share some of the money. On the other hand, one of the advantages of the GPL is that if just 10 people contribute one hour each to a project, they all get ten hours of value back. But to create the most value, each should work in an area where they are proficient.

To continue the thread...

'ARRL Publishing Empire LLC' looses again and Ham radio operator couch potatoes watch TV...

http://www.prweb.com/releases/2005/10/prweb293047.htm

[snip]
HARTFORD, CT (PRWEB) Oct 6, 2005 - In the aftermath of Hurricane Katrina, it's become clear that a major contributing factor to the tragic loss of life was the near total breakdown of communication systems. Once electricity, telephone, and cell phone services failed, people were unable to let rescuers know of their dire situations -- and died as a result.

What could be a simple, instant, and virtually zero-cost solution?

"Establish a National SOS Radio Network (www.NationalSOS.com)," says Eric Knight, CEO of UP Aerospace, Inc. (www.upaerospace.com). "There are millions of 'Family Radio Service' or 'FRS' radios already in use by the public for camping, boating, and hiking, and there are 675,000 licensed ham radio operators in America -- people renown and prepared for emergency communications. The output frequencies of FRS radios are easily received by the radio gear ham radio operators use daily. That's the magic link in this emergency communication strategy."

Knight went on to say, "The best part of a National SOS Radio Network is that it wouldn't require new laws or any new legislation whatsoever. It could go into effect, today. Once the ham radio community is made aware to listen for the public's emergency broadcasts on an FRS frequency, the national network will be up and running. It's as simple as that."
[snip]

So... it will be the FRS that will respond to the needs of a national frequency for emergency communications and not the amateur community---lets see you blame that on the loss of telegraphy.

If you refer to "operators" then you refer to CB Radio
enthusiasts who are habitually ill-mannered and insulting.
Ham Radio is a technical pursuit for gentlemen.

I append a short article to assist you in your
disambiguation of the two.

Wayne P. Muckleroy wrote:

What is Ham Radio?

Ham Radio is a technical pursuit for those who
are interested in the science of radio wave
propagation and who are also interested in the
way that their radios function. It has a long-standing
tradition of providing a source of engineers who
are born naturals.

Ham Radio awakens in its aficionados a whole-life
fascination with all things technical and gives
an all-abiding curiosity to improve one's scientific
knowledge. It's a great swimming pool, please dive in!

This excitement causes a wish to share the experience
with ones fellow man, and shows itself in the
gentlemanly traditions of Ham Radio.

Radio Hams are in a unique privileged position in that
they can construct and operate their own equipment! No-one

else has this privilege. Users, such as broadcasters,
the po lice and armed farces, CBers and mobile phone
users have to purchase ready-made gear. Manufacturers
are not licensed to operate their gear. Radio Hams
are qualified to design, build and then
operate their own pieces of equipment. They do this
with gusto, and also repair and modify their own
equipment. This is a privilege well worth the effort
to gain, and one to be jealously guarded.

The excitement that drives a Radio Ham starts with
relatively simple technologies at first, perhaps making
his own Wimshurst machine and primary cells. Small pieces
of test equipment follow, possibly multimeters and signal
generators. Then comes receivers and transmitters. It is with
the latter that communication with like-minded technically
motivated people takes off. The scope for technical
development grows with the years
and now encompasses DSP and DDS. There is also a great deal
of excitement in the areas of computer programming to
be learnt and applied.

The technical excitement motivates Radio Hams to compete
with each other to determine who has designed and manufactured
the best-quality station. This competitiveness is found in DXing,
competitions and fox-hunts.

-----OOOOO----

However, beware! A Ham Radio licence is such a
desirable thing to have that there are large
numbers of people who wish to be thought of
as Radio Hams when, in fact, they are nothing
of the kind! Usually such people are a
variation of the CB Radio hobbyist; they buy their
radios off the shelf and send them back to be
repaired; they are not interested in technical discussion
and sneer at those who are; they have no idea how
their radios work inside and have no wish to find out;
they are free with rather silly personal insults;
they have not satisfied any technical qualification
and their licences prevent the use of
self-designed-and-built equipment.

These CB types engage in the competitive activities
with their Cheque-Book-purchased off-the-shelf radios
in a forlorn effort to prove that they are Radio Hams.

No _REAL_ Radio Hams are deceived by such people!

-----ooooo-----

One infallible way to disambiguate the CB Radio Hobbyist
from the _REAL_ Radio Ham is to solicit their view of the
difference between CB Radio and Ham Radio. A Radio Ham will
perceive Ham Radio to be a technical pursuit and will
perceive CB Radio to be a social communications facility
no different in essence to a land-line telephone or a
GSM mobile in the hands of a 6-year-old. Thus a Radio Ham
could also hold a CB licence safe in the knowledge that
such a licence says no more about him than having a land-line
telephone, whilst continuing to regard Ham Radio as a separate
technical pursuit.

A CB Radio hobbyist, on the other hand, sees no difference between
a Ham Radio licence and a CB Radio licence. To him, they are
sisters-under-the-skin. Wrongly, the CB Radio Hobbyist then
tries to classify himself as the equal of the Radio
Ham when, in fact, he is nothing of the kind. A sure sign of
a CB Radio hobbyist is if he holds, or has ever held, a licence
issued under the gangrenous degeneration that is the
M3/CB Fools' Licence scheme.

-----ooooo-----

One group of people who claim to be of the standard of
Radio Hams but who are in reality nothing more than an
apology for the failure of a CBer are those class B
licensees who falsely proclaimed that they were against
the use of a Morse Test to control access to the HF
bands, until, that is, a test was introduced at their
intellectual level, the intellectual level of 6-year-olds.

6 year-olds simply lack the mathematical tool kit to
enable them to handle even the simplest algebraic manipulation
for Ohm's Law and thus, the disgraceful Class Ber's in
the aforementioned category are not Radio Hams by any stretch
of the imagination!

Remember - A sure sign of a CB Radio hobbyist is if he holds,
or has ever held, a licence issued under the gangrenous
degeneration that is the M3/CB Fools' Licence scheme!

New Orleans warning
Some Web sites serve as a pulpit for those who believe that God sent Katrina to smite New Orleans for its sinning ways and to send a warning to the rest of the nation.

"Although the loss of lives is deeply saddening, this act of God destroyed a wicked city," says conservative anti-gay activist Michael Marcavage on the site RepentAmerica.com. He says New Orleans was punished for a "public celebration" of homosexuality, wanton drunkenness and show of flesh.

Alabama state Sen. Henry E. "Hank" Erwin Jr., a Republican, expressed a similar view in a weekly column he writes for news outlets. "New Orleans and the Mississippi Gulf Coast have always been known for gambling, sin and wickedness," he wrote. "It is the kind of behavior that ultimately brings the judgment of God."

Indeed. Go jump in Lake Superior the middle of January, Marky.

That was me who reported it. I used a 6 month old version of WINE and
a current version of WINE in two differenct computers. One had the
standard OSS sound system and one had the commercial 4Front Technologies
code for sound setup. One machine is a Quad 6 four Pentium-Pro 333Mhz
cpu machine and the other is a very old PR440FX dual Pentium-Pro 333Mhz.
Only thing that doesn't work is the helpfiles.

To get the program to work under WINE, lift the
Just-Learn-Morse-Code.exe file off of a Windows machine. Stick it in
your Linux box and start it with the usual WINE command. I tried to
do an install using WINE and the .msi program but the install hung up.
Manually getting and using the executable works fine for me.

Sheesh, I gotta work harder. Can send well but receiving is a whole
'nother ballgame. Fired up JLMC last night and gave it a serious go and
it is indeed going to take 30 minutes a night for sometime to get me up

to speed. I was a bit saddened but felt better when I reminded myself
I haven't put myself on a timeframe and still need to study the Tech and
General Manuals. Passed an OnLine tech exam, but I would like to get a
higher score.

Gather 'round the campfire, boys and girls...

A few months back, I posted a note on the Society of Midwest Contesters reflector asking if anybody knew the whereabouts of our dear old friend Romeo Stepanenko, 3W3RR. As many will recall, Romeo had a habit in the late 1980's and early 1990's of popping up with his gear from some of the rarest countries in the world of ham radio, make tens of thousands of contacts, and then getting us armchair DX'ers to flood him with requests for QSL cards (which included green stamps) that often came very late or not at all. There was also that minor issue of him not being able to provide the DXCC administrators with the proper documentation from some of his adventures, proving he was indeed where he said he was. In the parlance of DX'ing, Romeo was the ultimate Slim, a pirate.

I'm a musician, and I figured if ever there was somebody that was worthy of a scurvy-dog, sea-shanty kind of song, ol' Romeo was that person. There were rumors he was a shady character, who showed up at the Dayton Hamvention in 1999, years after being expelled from DXCC, and then disappeared from the face of the Earth. He is the sort that is perfect for song and story. I needed factual material for the tune, so I started to do my homework. The note to the SMC reflector was the beginning of that homework.

I didn't get much response other than a couple of notes that said, "Yeah, whatever happened to that guy?" So, In July 2005, I posted a note on Eham.com in their DX forum, entitled "Wherefore Art Thou, Romeo?" Again, no info. So, I started searching on Google. I found an article online about ham radio in Afghanistan that mentioned him in passing, and a site that had several of Romeo's QSL's (including WX9X's fake P5/R0MEO card he handed out at Dayton one year). I printed the articles and stuck them in my notebook I keep for writing lyrics, where they have sat for a while, collecting dust. I forgot about it and moved on to other projects.

On the evening of October 19, 2005, I received a phone call from an inspector with the U.S Postal Service

based in St. Louis. He said he needed to meet with me concerning an investigation of "...one of my associates." I obviously made myself available at his earliest convenience, which was the next day's lunch hour.

I ran over to my friend Matt, NM9H's place. Was he trading endangered animals over the Internet? Circumnavigating customs laws by importing fresh fruit from Venezuela? Ripping tags off of mattresses and mailing them to Botswana? He assured me he was doing nothing of the sort, as he was "...an old man with a house full of kids, with neither the time nor energy to be surreptitious."

A night of fitful sleep ensued. We jazz and folk musicians have a sordid history in America, often lumped together with other unsavories like gangsters, communists, and bootleggers. Which of my compadres had warranted constabulatory intervention, and how did the Postal Service get involved? Besides, my youthful indiscretions are long over, as I have nothing to be discrete about any longer and I'm closer to middle-aged than youthful. In short, like my friend NM9H, I'm boring and getting old.

The Inspector came to my place today (20 October 2005), and after some pleasantries, asked if the name Roman Vega meant anything to me; I truthfully answered no. He then asked if I was a ham operator, to which I said yes. He then asked if the name Romeo Stepanenko meant anything to me, and I nodded uncertainly. The Inspector then produced a printout of my Romeo inquiry on Eham.com. He said he was following up on an investigation from the US Department of Justice in San Francisco concerning our beloved Romeo, and he wanted to know why I was asking about him in a public forum.

I gave him a Reader's Digest version of ham radio, DX'ing, and an overview of the DXCC program. I explained how Romeo pretended to operate from various exceptionally rare places, duped tens of thousands of us into sending him SASE's with green stamps included, and was then caught and expelled from the DXCC program for these fraudulent ham activities. I explained why this caused such a scandal to a program that has had an exceedingly high level of ethics and scrutiny associated with it over the years. He was quite interested in people sending dollars along with QSL requests. I explained it was customary to help pay for the QSL you're going to receive, especially when

dealing with an operation from a place as rare as Myanmar or North Korea.

I then had to explain to him why I'd want to write a song about such an unsavory character. As I explained, every hobby or pastime has some level of folklore or legend attached to it, and Romeo is one of the most infamous characters in the history of DX'ing. In baseball, people wrote songs about Jackie Robinson and Joltin' Joe. Bob Dylan wrote about Emmett Till. Heck, Frank Zappa wrote about a wacko dubbed by the press as The Illinois Enema Bandit. Numerous ballads have been written about pirates, oddballs, do-gooders and ne'er-do-wells in all cultures all around the globe. Ham Radio DX'ing may be a small culture in the grand scheme of things, but it is a culture nonetheless. It stands to reason that, just like any other culture, the heroes are glorified and the villains are reviled. To me, writing a song about Romeo seemed logical and fun.

After an hour of questioning by the Inspector (nice guy, by the way), he said it was quite obvious I wasn't involved in any of Romeo's current shenanigans, and proceeded to tell me The Story:

Roman Vega, aka Romeo Stepanenko, was arrested and extradited from Cyprus to the United States in March of 2004, and has been charged with 40 counts of wire fraud and trafficking in stolen credit card numbers. He is alleged to have done this in online chat rooms. The Inspector I spoke with indicated that he allegedly bilked over $3 million out of this scheme. Romeo has pleaded not guilty to all charges. He has been held in northern California, as he is considered a flight risk. His trial is scheduled to begin in San Francisco on Monday, November 28.

Here is a link to the US Department Of Justice press release:

http://www.usdoj.gov/usao/can/press/html/2004_06_04_vega.html

Here is a link to the actual indictment filed in Federal Court:

http://tinyurl.com/9pg5a

As Paul Harvey would say, &#65533;Now you know the rest of the story.&#65533;

The Inspector never informed me that I was not allowed to discuss this, so I'm posting it here for all to

see. He indicated the case against Romeo looked quite good indeed, and that they were following up on all leads they had concerning him. I was "lucky" enough to have been considered a Person Of Interest; I got to see a copy of my Federal subpoena, where I was "commanded" to appear in Federal court on November 28 at 8:30AM. The Inspector indicated this would probably not be needed. He did mention that San Francisco is quite nice this time of year, though, and it was almost a pity I wouldn't get to take the Government up on their free "vacation." I gave him one of those nervous smiles and waited for him to move on.

He left me his card, said he'd file his report, and told me I'd probably never hear from him again. He did give me the case number (Northern District Of California CR04-0101 CRD), since it's a matter of public record. The fact that I was sitting on the edge of my seat as he was telling me this, slack-jawed and with my eyes as wide as saucers, might have had something to do with him giving me the info as well. How did I get associated with Romeo? I'm just a ham operator who had one QSO with him when he was in Vietnam (still my only 3W QSO), spent probably hundreds of hours listening for him from his other far-flung locales, but never worked him anywhere other than 3W. I just happened to ask the right question at the wrong time.
It certainly is interesting what bites sometimes when you go fishing, eh?

I'm finally recording my solo CD now. I'll be sure to let everybody know when it's done. I could use a lead player, though; maybe I should give WB6ACU a call...

I agree. But isn't most of the noise in the newsgroups generated by non-hams ?

I've been using newsgroups for a long time, but only recently joined the ham groups. I don't think I've seen this amount of noise in ANY other newsgroups for special interests. Maybe hams are more easily annoyed or insulted than other people and thus attract more idiots ?

Also, a lot of nerdy people are interested in ham radio, and unfortunately a lot of nerds are unable to function socially.

What speed setting are you using ?

I think it may be harder learning at below 12 WPM than above. But I suppose
that's bad news if you're aiming for a 5WPM test...

Actually, New Orleans is in a prime location where hurricanes might
hit. Sort of like being nature's bull's eye. It has nothing to do with
what goes on in the city.

No fake license boy, he doesn't. Now run along and play with those
model airplanes you can fly with the crackerjack box "pilot's license."

I slowed it down to 10 as I was a bit depressed and I actually haven't
been seriously practicing receiving so I just have to do the 30 minutes
or more a day routine. Use headphones and such.
I memorized by rote the characters and practiced sending in my head
whenever I get the chance. Sending and receiving takes different parts
of the brain to process so I just have to activate the auditory centers.
I did use G4FON's program and other free programs to help me learn the
characters.

The other incentive I have is I am on the shipping list for a Small
Wonders DSW-II 40 meter transceiver kit. When built, I have a dummy
load to work with it but won't plug a key in or transmit until I pass
the test and get assigned a callsign.

A fellow told me he got a rig before he was licensed and used the
receiver to listen and never plugged a key or a mic in. (It was a
considerably pricey rig) It was the incentive for him to keep studying
and worked. It was he who told me that I didn't have to be licensed to
buy a rig and just use it to listen. Just can't send a signal.
(Makes sense to me.)

You obviously have a reading comprehension problem. Notice it states
that the hams will listen for emergency traffic on the FRS frequencies
and FRS will be the link to the ham radio network.

Let me see now... I have a reading comprehension problem... There are MILLIONS of FRS users compared to 675,000 couch potatoes. What makes you think that the proposal for a National SOS Radio Network is going to make any changes to Amateur Radio Service response to national disasters? APPARENTLY, AMATEUR SERVICE FAILED TO MEET THE NEEDS OF A NATIONAL RESPONSE TO DISASTER COMMUNICATIONS IN THE FIRST PLACE---THAT'S WHY FRS IS GOING TO TAKE THE PLACE OF THE AMATEUR SERVICE!

Greetings,

You are invited to download and use the new version of WinCAP Wizard. The default download is known as QSL-ware. Which basically means freeware. <G>

This QSL-ware version provides unlimited point-to point and NCDXF beacon predictions, prefix search, numerous prediction views and more.

www.taborsoft.com

The registered version adds coverage analysis and user batch prediction modes. A 60-day trial key is available upon request.

If you use a competing tool, not to worry, they can surely add a few of the new features. <VBG>

Cheers,
KU5S

So how is someone with an FRS unit going to be able to communicate with
someone more than a mile away, much less in another state or across the
country? The idea is that hams, using FRS units can communicte with
other locals with FRS units and then put traffic into the ham radio
traffic emergency system.

> APPARENTLY, AMATEUR SERVICE FAILED TO MEET THE NEEDS OF A NATIONAL RESPONSE
> TO DISASTER COMMUNICATIONS IN THE FIRST PLACE ---THAT'S WHY FRS IS GOING TO
> TAKE THE PLACE OF THE AMATEUR SERVICE!

Oh really? The following sure doesn't indicate that. FRS will not take
the place of the amateur radio service no matter how bad you would wish
it so.

As usual, ham radio operators help sustain wide-ranging relief efforts
By Andrea Kelly
ARIZONA DAILY STAR

When all else fails, it's ham radio to the rescue. Across Arizona, ham
radio operators are helping sustain Hurricane Katrina relief efforts by
helping storm-torn communities communicate with rescue workers and
family across the country.

This is not a first. Ham radio operators come out of the woodwork during
disasters around the world, even transmitting in Morse code if language
barriers pop up, said Mike Swiader, president of the amateur

Superstition Radio Club in Mesa.

Ham radio operators have contributed to emergency communication efforts since World War II, Swiader said, and were crucial in post-9/11 emergency communications, as well as during the Asian tsunami last holiday season.

Ham radios work when other communication systems are down because they're powered by solar energy, batteries or generators rather than the usual power sources.

The messages are passed from radio to radio until they get to the one they are directed to, so radios don't need to be near each other to receive signals, like regular AM/FM radio signals.

"We've been involved in passing traffic to and from the Louisiana and Mississippi area," said Tom Fagan, a leader of the Arizona ham radio operators organization. "Whatever needs to come in and go out, we're doing."

When Arizona's ham operators - there are about 16,000 of them - get messages from the hurricane area, they send them along to agencies like the American Red Cross and the Salvation Army in the Southeastern region of the country.

"We're the link," Fagan said.

Because communications within a disaster area are often jumbled, Swiader said, it's frequently easier for someone there to contact an operator in someplace like Arizona, who can then relay the message back to a recipient in the disaster area.

"Sometimes it's easier to be heard that way," he said.

More than 30 ham radio operators from Arizona have already headed toward the disaster area, hoping to assist relief efforts and give emergency workers a way to communicate with each other, as well as assisting searches for missing persons.

"They're moving in when they're allowed by American Red Cross and Salvation Army," said Ned Stearns, a Phoenix ham operator and vice director of the American Radio Relay League, the national organization for ham operators.

In fact, the ham operators plan to compile a list of people they can determine as missing, deceased, alive or unknown, based on information transmitted over the ham signals.

To find out about people in the area, visit www.satern.org and fill out the health and welfare information request for the person you are trying to find. This information will be sent through the Salvation Army emergency radio network.

Ham radio operators are helping from afar

Sunday, September 11, 2005
By DONNA FORK
For the Times dfork@knology.net

But sometimes, even the airwaves can be shut down

They also serve who listen and wait.

Huntsville amateur radio operator Douglas Hilton and other "hams" in North Alabama are helping victims of Hurricane Katrina by relaying messages between families, officials and each other.

Lately, Hilton's been spending most of his spare time in his "ham shack" listening to calls for assistance. The systems analyst for Intergraph Corp. is one of thousands of amateur radio operators who help people during emergencies.

Hilton is unusual in the ham radio world because he wears three hats: He is an amateur operator; a member of the Alabama State Defense Force, heading the Communications Platoon for North Alabama; and he's also a military communicator authorized to use the Military Affiliate Radio System.

His connection to the military (although he is a civilian) gives him access to additional radio frequencies most amateurs can't access. He has been a ham radio operator for 42 years; his father had him build a crystal radio when he was 7 years old, and he got his ham license as a teenager. But he wasn't all that active until after the terrorist attacks of Sept. 11, 2001.

"That hit me right between the eyes," he recalled, and he began to get back into "hamming."

Now Hilton averages about 100 hours a month on the airwaves and takes countless courses and certifications. He noted that amateur radio operators are "amateurs only in that we're not paid." In return for service "the government gives us frequencies."

Hilton said the North Alabama ham community is large.

"The astronauts are all ham radio operators," he said, noting that astronaut Owen Garriott "was the first ham in space."

Hilton''s "ham shack" is not really a shack at all. It is located in a formal dining room - complete with crystal chandelier. It includes six radios and two computers.

"You don't need six, but don't tell my wife, please," Hilton said as his wife, Diane, laughed. She recently obtained her "technician class" license, which is the entry-level license for ham radio operators. The next is "general class." The highest, which Hilton has, is "amateur extra." Anyone can be an amateur radio operator, Hilton said. There is no age limit: Hilton knows a local ham who is 18 and another who is 89.

It doesn't cost much to be an operator either, he said. A beginner could purchase enough equipment to get started for about $300. Courses are free through one of the local ham radio clubs, of which there are several, including the Huntsville Amateur Radio Club (the Web address is www.harc.net).

In addition to six radios, Hilton has two computers: a laptop and a desktop. "The radios are hooked into the computer." With his setup, the Hiltons can talk to other hams as far away as Japan.

But for the past two weeks there hasn't been time to chat about matters such as which antennas they like the best. There are emergency frequencies to monitor. At the moment, a critical one is the Salvation Army's emergency frequency, Hilton said.

Hilton never knows if it will be a busy night or a quiet one. Recent solar flares have added to the uncertainty because they disrupt communications. Friday, during the late afternoon and early evening, it was unusually quiet.

"I'm a little surprised," he said Friday. "I can't believe how dead these bands are."

Solar flare

It could be a solar flare, or could be something else. "That's the problem, you never know," he said. The waiting, the listening, "it wears you out." But it's worth it when you hear a voice and "you might be the only person who can hear this guy."

On Thursday night, when Hilton was expecting problems, reception was fine. He was able to contact two operators in Louisiana. He also heard one Mississippi ham talking to another ham "so at least one is working there."

ecause of the Hurricane Katrina disaster, there are thousands of messages piling up, waiting to be delivered by ham radio operators: What will happen when all their radios start working again?

People like Hilton will be extremely busy. There are thousands of ham radio operators in Louisiana and Mississippi. When they all get back to the airwaves, it will be quite a challenge to sort out all the messages.

But meanwhile, as they waited for the deluge of messages, on Thursday night the Huntsvillians received a call for help from New Mexico.

Maura Campbell Kingston of Clovis, N.M., was trying to reach her aunt, 76-year-old Sister Joan Campbell, a nun, of Harvey, La. Kingston called the Salvation Army, which contacted a ham radio operator, who called Hilton.

Hilton tried Thursday to reach a radio operator in Louisiana to check on Campbell, but almost all of them were off the air. Finally on Friday night Hilton got through to "KG5YK," who is Robert A. Turner of Elm Grove, La.

When Turner's message came through, hams from all over the United States could be heard, eager to talk with him.

Helping 'ham brother'

The outpouring of sympathy could not be contained: Radio operators from Texas, Indiana and elsewhere all expressed their support for their "ham brother" in Louisiana.

"I hope this never happens again," said Turner of the Katrina disaster. "It's been a tough time. ... I'm looking for the right words." He thanked the other hams for their all their help.

"You'd do the same for us," the ham from Texas said. Others echoed his sentiments.

Turner gave Hilton information about when to call with his "health and welfare message" about Kingston's aunt. Hilton vowed to keep trying to deliver the message "for as long as it takes."

But that proved to be unnecessary.

Friday night, after calling her aunt repeatedly, Kingston finally reached her by phone. She was still at her home in Harvey.

"She was OK," Kingston said in a telephone interview Saturday. "Harvey stayed dry." But the area was without power and Campbell "was sitting in the dark with her flashlight."

Later, Kingston called Hilton to thank him. She said he told her: "I'm just doing it because I want to help."

Kingston was impressed.

"I believe that thing about Southern hospitality."

Ham radio proves to be more than a hobby
By Jeannetta Edwards

Daily Times Leader

When Hurricane Katrina hit, telephone and cell phone communication hit an impasse because of downed lines and towers. But, amateur radio operators did not miss a beat or a transmission.

"Before and after the hurricane, this has proven to be the most reliable form of communication," said Randall O'Brien, a retired highway patrolman who has been involved with ham radio operation for 35 years.

"People thought when they got cell phones, they didn't need us anymore," said O'Brien, an advanced licensed operator, who often talks to missionaries in South and Central America.

According to Denver Baker, Clay County has more than 30 amateur radio operators, but only a small fraction are active.

"It's a wonderful hobby," said Baker, whose wife recently received her technician license.

The multi-faceted operation includes digital and satellite communication and is enjoyed by all age levels.

"This is a good hobby for seniors or for young people," said Baker.

By becoming a ham radio operator, which requires taking a test to obtain a license, people can communicate with others anywhere in the world.

"The classes for the test are free," said Baker, "and we help you with everything you need to know."

According to Baker, who has been enjoying this hobby for the last 10 years, the only investment required is the fee for the test and the purchase of equipment. A handheld transmitter cost around $100.

The self-policing group ensures that everyone adheres to the rules and regulations.

"We're called amateur radio operators, but there's nothing amateur about it," said O'Brien, who first became interested in electronic at age 13.

The group, which also belongs to the American Radio Relay League, meets monthly in West Point.

"We have a good bunch of hams in this area," said Baker. "We bring food at our meetings and have a good time."

"It's nice, especially for seniors," said Baker.

For information on getting involved in ham radio operation, call O'Brien at 494-2898 or Baker at 494-9096.

Ham Radio Operators Offer Help

By Beth Hahn
Mountain View Telegraph
Since Hurricane Katrina hit New Orleans last week, several ears in the East Mountains and Estancia Valley have been tuned to amateur short-wave radios.
McIntosh resident Ed Brooks said local Ham radio operators are willing to relay messages from the Gulf Coast if needed.
"We guys here in the Estancia Valley are just listening," he said. "We haven't had any need for what we can offer."
Although they may not be needed yet, Brooks said local Ham radio operators are still listening in to conversations taking place in Louisiana, Mississippi and Alabama.
During the interview with Brooks, his Ham radio was tuned to a conversation involving a Coast Guard helicopter that was rescuing a family from a rooftop in New Orleans with direction from another Ham radio operator.
Brooks said similar situations have been broadcast hundreds of

times during the past week.
"It's been really spotty, but what we've been (hearing) is that it was good fortune that somebody down there had Ham equipment," he said.
Daryl Clutter, an Edgewood Ham operator and member of the Salvation Army's shortwave network, said he relayed a message from Ontario to U.S. Coast Guard officials in Washington, D.C., that originated in Louisiana.
"It was just the word 'help' spelled out two times," he said.
Like Brooks, Clutter said he has stayed close to his Ham radio since Aug. 29.
"There's been so much going on," he said. "Every day, something happens."
Clutter, a former truck driver who often delivered frozen food to the Gulf Coast, said radio traffic has slowed since the hurricane devastated the region.
"You just wonder who all you know, that used to be your customers down there, that are still alive or had the good sense to get out," he said.
As amateur radio operators, Clutter said, Ham enthusiasts practice for disasters "every day."
"There's only so many cell phone frequencies," he explained. "If the phone system goes down, there's no way ... (one company) could handle all the 60,000 or 70,000 phone calls."
Mountainair resident and Ham operator Bob Scupp said the Salvation Army network alone has handled more than 128,000 messages since Aug. 29.
Brooks said Ham operators have been relaying messages from residents to volunteers or emergency personnel. Since a large number of National Guard and military personnel have arrived in the area, Brooks said the messages have changed from pleas for help to questions about well-being.
Shelters for evacuees are beginning to utilize Ham radios to communicate with other shelters to help families find missing relatives, Brooks said.
Rescues are still going on.
"There's been instances where they're still finding people, trapped in houses, trapped in buildings or running out of oxygen," said Clutter. "It's just terrible what's going on down there."
Clutter and Brooks said they will not offer assistance unless someone requests contact in the Albuquerque area.
"We don't want to tie up the frequencies," Brooks said.
Clutter and Brooks said they will continue to listen to their Ham radios for messages or relay requests until communications are restored in the Gulf Coast.
"We live and breathe this," Clutter said.

Amateur radio operators provide vital communications support
By Teresa Atkerson
MCALESTER NEWS-CAPITAL (MCALESTER, Okla.)
MCALESTER, Okla. -

With more than 10,000 requests for help in finding loved ones, the amateur radio operators in Louisiana are extremely busy.

In fact, they are so busy, they have asked people to wait with their requests unless there is an extreme emergency.

Ralph Suter, with the Pittsburg County Amateur Radio Club, said they had about a half dozen requests for assistance in locating loved ones in the area devastated by Hurricane Katrina. ï¿½The Red Cross funneled the requests for health and welfare,ï¿½ he explained. Now, the national traffic system is backed up with the requests, he said, because there were so many.

There are extreme problems with communications in New Orleans at the present time. Suter explained VHF radio has to have line of sight while amateur radio operators can use lower frequencies that can bounce off or curve to get the message through. ï¿½A benefit of amateur radio is you can throw a piece of wire in a tree or up a flagpole. With 12 volts of power, you can operate on a local or even worldwide basis,ï¿½ he explained.

As an example, Suter said recently an amateur radio operator in Louisiana had some kind of problem that he couldnï¿½t get help with after the hurricane. He put out the message, it went through Washington state to Texas and then into Louisiana where the right people were found to help him.

Amateur radio operators can also communicate via Morse Code, upload through television or computer or radio to satellite, Suter said. That gives them even more advantages in communication.

Jim Russell, president of the PCARC, said amateur radio has been around as long as there has been radio. Even in World War I, amateur radio operators helped with messages in Morse Code, which is something operators today still must learn as part of their licensing process.

ï¿½We look at it as a hobby,ï¿½ Suter said. ï¿½Itï¿½s a resource of individuals because they have an interest to develop the skills to operate radios in various modes.

ï¿½Itï¿½s a resource for trained communicators.ï¿½

There are forms that must be used when transmitting messages. ï¿½When it goes into the system at one point and comes out at the destination, it is exactly the same information, even with the misspelled words,ï¿½ Suter said. ï¿½Itï¿½s our responsibility when handling traffic that it comes out exactly as it comes in.ï¿½

Suter said many of the operators use their radios on a daily basis while others check weekly. When it comes to disasters, there is the Amateur Radio Emergency Service. ï¿½Itï¿½s not really an organization but it is organized on a national basis for community programs.

John Wright, another PCARC member, checks with the Oklahoma Sooner Net and with the Salvation Armyï¿½s network, SATERN.

After the Oklahoma City bombing in 1995 and 9/11, Russell said amateur radio was used extensively. It is also used during and after tornadoes and other natural disasters. Now, the group can work with the Automatic Position Reporting System to help more accurately report severe weather.

The group has an annual field day, which is a combination of a exercise and a contest. ï¿½We go out and set up radios under adverse conditions to simulate disaster response,ï¿½ Suter said. ï¿½In the past, weï¿½ve started with solar power, using a battery in a car or even a portable generator.

ï¿½The last time I kept count, we were able to make contacts in 47 states, the Philippines, some in South America and Puerto Rico in a 24-hour period.ï¿½

Suter pointed out that the word ï¿½amateurï¿½ is not what people interpret it as. ï¿½People interpret it to be an unprofessional group. But while itï¿½s made up of a lot of people for a hobby, itï¿½s not unorganized or unprofessional when dealing with disaster. We have capabilities that public agencies just donï¿½t have,ï¿½ he said.

Members also have to be licensed. The license testing can be done in McAlester now so those wishing to be licensed donï¿½t have to go to Dallas or Oklahoma City as in the past.

Teresa Atkerson writes for the McAlester (Okla.) News-Capital.

Old Technology Still Needed
(Page 1 of 2)

Sept. 8, 2005

Overwhelming Charity

Joe Carcia, station manager of the American Radio Relay League in Newington, Conn. helps with the disaster relief effort for Hurricane Katrina's victims along the Gulf Coast. (AP)

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

(CBS) There is a store in London dedicated to "appropriate technology." It mostly carries products designed to be used in developing countries where there is a weak communications infrastructure.

Sadly, thatï¿½s now the case for a large swath of the United States where Hurricane Katrina and its flood waters have wiped out cell phone towers, telephone switching stations, Internet routers and other ground-based communications systems. Even wireless Internet depends on nearby transmitters and receivers on the ground.

But amateur radio is working and, according to Allen Pitts of the Amateur Radio Relay League (ARRL), "ham" radio operators from throughout the country are answering the call to provide vital communications links. Satellite phones, a much newer technology, are also coming to the rescue.

Pitts acknowledges that cell phones and other technologies "work wonderfully when everything is going right," but "they are very vulnerable when everything is going wrong."

Just as with past hurricanes, earthquakes and on September 11th, the ground-based infrastructure, in many cases failed because vital parts of the system were damaged or overwhelmed during the emergency.

In other words, when you need them most, those cell phones are of no value.

Amateur radio, says Pitts, is not vulnerable to these problems "because each of the radio operators is a complete transmit and reception center unto themselves able to continue going and continue with nothing more than an electrical source, such as a battery or a generator, a radio and piece of wire for an antenna."

Listen to audio of Larry Magid's interview with ARRL's Allen Pitts.

While base-station radios are larger and require an electrical power source, there are also portable ham radios slightly larger than a pack of cigarettes with a range of about 20 miles, according to Pitts. Pitts says that the next sized radio, about the size of a paperback book, can communicate up to about 50 miles without a repeater while larger systems, "about the size of a desktop computer" can communicate globally.

Amateur radio operators are in demand. When I checked the ARRLï¿½s Web site there was a call from the Salvation Army for "10, two-operator Amateur Radio teams for deployment in the U.S. Gulf Coast. Operators must hold at least a General class license. Teams should be fully self sufficient in terms of food, water and lodging and plan to remain in the disaster area for from one to two weeks."

Pitts said there was a "lady in Connecticut," who was listening on her amateur radio and happened to hear that there was a woman "who was trapped for four days without food and water." She was able to relay that message, by ham radio, into an operations center that dispatched the fire department. A day later she got a call from the trapped womanï¿½s mother, thanking her for her role in the rescue.

Ironically, this comes at a time when amateur radio is struggling for respect and, to some extent, survival. What was once a popular hobby has fallen into somewhat hard times for a variety of reasons, including the fact that the Internet, cheap long distance calling, cell phones and other technologies make the ability to use these two-way radios not quite as compelling as it once was.

Also, there is a bit of a rift between some members of the amateur radio community and some parts of the Internet industry over the use of power lines to transmit Internet signals. This technology, which could put power companies into competition with cable and phone companies for broadband service, has been criticized by some ham operators because of possible interference problems.

Despite the fact that their origins go back to the early 20th century, hams are hardly low-tech. There are now bridges between ham operators and other technologies including the Internet, cellular phone systems and Internet phones. In fact, long before the Internet became popular, ham operators were using their radio gear to transmit data along with voice and morse code.

Also coming to the rescue are satellite phones. These phones - which are much more expensive to buy and use than cell phones - rely on satellites rather than ground equipment to communicate with the phone network.

Because satellites are in space, theyï¿½re not vulnerable to conditions here on earth. Also, as long as you have a view of the sky, youï¿½re able to communicate. Iridium, which operates "66 low-earth orbiting (LEO), cross-linked satellites and 11 in-orbit spares," says it provides "complete coverage of the earth (including oceans, airways and Polar Regions)."

I carried an Iridium phone with me when I traveled to Peru a few years ago. It worked great when I was in the clear such as on a boat in the middle of the Amazon River but, because it requires a line of site view of the sky, it had problems in dense jungle and in cities with tall buildings.

Iridium spokesperson Liz DeCastro estimates that there are currently about 10,000 of Iridium's phones being used in the region with orders for about 6,000 more. The company sells through resellers so it doesnï¿½t have exact numbers. DeCastro says that "traffic in the region increased by 3,000 percent" since the storm hit and that the number of subscribers increased by 500 percent.

Satellite phones are a lot cheaper to use then when I went to Peru, but they still cost between $1 and $1.25 per minute to use, according to DeCastro. Thatï¿½s a lot more than domestic cell use, though often cheaper than using U.S. phones when roaming overseas. The phones themselves cost between $1,000 and $1,500 she says.

In addition to handling voice calls, satellite phones can also be used for messaging or data, albeit at modem rather than broadband speed.

If anything, Katrina has taught us the value of redundancy. The best way to make sure that messages get through is to have standby systems that can take over when others fail.

Thatï¿½s why some news organizations keep manual typewriters around. You never know when that old technology may suddenly become the "appropriate technology."

NYNewsday.com
Amateur radio operators head to Gulf Coast

September 6, 2005, 1:00 AM EDT

NEWINGTON, Conn. -- Oscar Fuller only became an amateur radio operator about a year ago, but he knows how valuable his equipment can be in an

emergency.

So even though he has never responded to a crisis, the American Relay Radio League member is planning to head to the hurricane-ravaged Gulf Coast and see if he can help establish an emergency communication network.

"This is a tragic set of circumstances," said Fuller, who recently retired from IBM. "If I can lend a hand, I want to."

Fuller and about 14 other members of the Newington-based amateur radio operator network have signed up to join the relief efforts for Hurricane Katrina. The amateur operators _ known as hams _ can often use their equipment to communicate in difficult circumstances.

Because the radio equipment operates on many frequencies, is self-contained and portable, it can often work when other communication networks, such as telephones, aren't working. It can never be blocked, which is why operators say it is good in disasters.

"When all else fails, ham radios work," said Betsy Doane of Shelton, who oversees the 2,500 members of the league in Connecticut.

David Patton, an official with the radio group, said as many as 750 volunteers may be needed. The Connecticut volunteers are going to help provide communication support for more than 200 American Red Cross Shelters in Mississippi, Alabama and the Florida panhandle.

"There are limited resources to an overwhelming disaster," said Allen Pitts, public relations manager for the radio league. "So there is not a ham on every corner. The hams are put where they are needed most of all, in emergency traffic or for saving lives."

Dennis Motschenbacher of Colchester was among the first volunteers to say he would go. He spent Sunday shopping for supplies and getting ready for the 18-hour, 1,100 mile drive to Montgomery, Ala., where he will be dispatched to a shelter.

"Everything I need, I'm bringing," he said. "There won't be any Radio Shack to go to."

The 57-year-old has been a ham for more than 40 years. He has operated his radio from places as far as East Timor and the Balkans.

The hardest part will be "seeing people in this troubled state _ smelly, sick, depressed, angry. And no matter what any of us do, it won't be enough for all of them."

Ham Radio Operators Pitch In To Hurricane Katrina Relief Effort General Interest
09/07/2005
With communications out all over New Orleans and the Gulf Coast, the professionals are turning to amateurs to be their ears to what's going

on in the areas devastated by Hurricane Katrina.

Local operators say they've been in touch with people in and around New Orleans since the beginning of the ordeal.

Ed McLaughlin, of Kennewick, says in the days that followed the disaster, he was able to help a family in Medford, Ore., get an update on how their relatives were. He's provided similar contact for a family in Chicago.

The reason-- ham radio, which is able to get in places that have no other means for communication when land-based infrastructure fails.

Ham radio has been such a success during these recent days that FEMA and the Red Cross are now using it as their primary mode for communication until other modes of communication are restored.

News-Leader.com Springfield Mo.
Ham radio helps close communication gap

Nixa man relayed message from president to New Orleans' mayor.

Joe Hargis works on his amateur radio in his home in Nixa. Hargis helped rescue an elderly woman by notifying someone who could contact rescue workers via radio.

By Sarah Overstreet
News-Leader

If you've been unsuccessfully trying to get information about someone living in Hurricane Katrina's region of havoc, here's an avenue you may not have considered: local ham radio operators.

While cell phones rely on towers and traditional telephones rely on intact land lines, ham radios transmit from radio to radio, bouncing waves off the ionosphere in the upper atmosphere far above the Earth's tantrums. They can run off batteries, generators and sometimes even the sun.

Two Ozarks amateur ham radio groups - the Nixa Amateur Radio Club and the Christian County ARES (Amateur Radio Emergency Services) - have been relaying messages from people all over the world to those whose communication has been cut off by Katrina.

David Beckler, a ham radio operator from Nixa, even relayed a message Tuesday from the director of the Federal Emergency Management Agency in Texas to New Orleans Mayor Ray Nagin.

"He had a message from President Bush to the mayor of the city of New Orleans," says Beckler, a New Orleans native who moved to Nixa six years ago.

Since the message was an emergency communication, the dispatch needed to go through the net control station on an emergency frequency, Beckler said. He knew it was important, because the ham operator had said, "break, break, break," which requires all other communications to yield

and give that one priority.

"The net control station or other stations on this frequency could not hear this message," Beckler says. Beckler contacted the net control station, and people there asked him to contact the sending ham operator and relay the message back to that operator. "That's when he told me it was from President Bush."

Joe Hargis, another Nixa ham club member, also helped with an urgent message. "I was monitoring the SATERN network (Salvation Army Team Emergency Radio Network)," said Hargis, a retired elementary schoolteacher.

"A person called in with a piece of emergency traffic and the (receiving) person could not hear him. He said, 'Is there anyone on the frequency who can copy this?' I broke in and told him I could hear it fine."

Hargis relayed the message back to SATERN, and the operator there could hear Hargis well. "It was a 90-year-old woman and her elderly neighbors. They were afraid to leave their home because of the unrest in the neighborhood, things that were going on, and they needed assistance to be evacuated. They were running low on medicine, and one was running out of her oxygen supply."

Nixa ham club member Rod Kittleman says their members helped save the lives of a couple in New Orleans.

"A weak, disabled elderly couple were trapped in their attic. Their phone worked, but they couldn't get through to local authorities," the KADI radio program manager explains.

Too weak to break through their roof so emergency personnel could find them, the couple called their daughter in this area. She contacted the Nixa club, which relayed the message to a local ham operator who is licensed to operate on emergency frequencies.

"He got through to authorities in New Orleans over the radio, and they were rescued. (The ham operator) relayed the message back to their daughter. That's the reward we live for."

FRS will in no way supplant the ham radio service, no matter how bad you might like to see that happen.

Having trouble with your spelling again, asshole?
But then you must be like me, a high school dropout.
```

^^

ROTFLMAO!
Lardass proves he's a fucking imbecile.

> Wogie has "twuble"

Lardass has trouble talking because he has a permanent cocksucking lisp. That and his neverending stupidity and lack of ability to pass a simple General class theory test or 5 wpm Morse code is what keeps him off of HF. Not to mention how he is so fucking stupid he followed up twice to the same post. His gay lover Chason isn't much better, he has the training wheel no code license too.

Keep guessing wrong, fatboy, you have pissed more people off then you want to know. You and your idiot friends.

you now claim to know what I filed

but I filed a report of the facts as I understand i could be in error
but even if that is the case filing a mistaken report is not filing a
flase one, nor is it a crime

>And you should get sued for it if so

I doubt the you Mr Slit would have standing to file one

of course you can try first you will need to to find my address which
seem to have eluded you

And, therefore, not a Radio Ham, but one of those
CB Radio enthusiasts criticised in the short article?

Too late! Too late! The Mongolian Hordes of CB types
are at the gates and have already Trojan-Horsed their
way in!

Take action _NOW_ before it is too late1

But what action?

Easy - resign from organisations such as the ARRL and
the RSCB which are promoting the CBise-ation of Ham Radio!

not in a positon to comment on RSCB

but the ARRL is hardly a friend of Ham radio, but for the anything
like the reason you allude to

it no friend becuase it tries to pretend it is leading by following
every barking back at every dog that barks

BTW you standards Poly Ham radio in the US is already CB, since the
Techs and those that started as Techs are the vast amjorty of Hams

so indeed you vision of the Ham radio is already long dead

Ham radio is Dead, Long Live Ham radio

poly as a Brit you ought to aprecate that

Somewhere, somehow, as you were growing up Roger, somebody abused the daylights out of you.
You are so far out of synch, so out of the mainstream, and so tilted to the side that you have not a single thread of common sense to even realize it. You are what? Fifty years old now? What is up with that? Fifty and still acting like a twelve year old???

Damn...even as much fun as you are to pick on, Woger, the bottom line remains that you are a pathetic, mewling little blob with nothing going for yourself. You don't amount to much, do you?

When was the last time YOU had a 'date' with a real woman, Wogie? Not recently, for sure. Still posting your photo in the singles groups? Still hoping against hope that there just might be a woman out there as desperate as you?

News Flash! No woman on this continent is desperate enough to ruin her reputation by going out with Roger Wiseman.

The future of the National Traffic System
http://www.eham.net/articles/12198

[snip]
For those of you who may not know, the National Traffic System (NTS) consists of a carefully choreographed collection of section, region, and area nets designed to relay messages throughout the US. In a sense it's the second "R" in ARRL. NTS has a long and honorable history and has some of the best operators in the world as its membership.

The recent hurricane season has raised serious doubts for me about the role that NTS plays in the current ham-radio environment. I did not hear a single health-and-welfare message during the disasters. In bygone times, NTS would have been buzzing with activity.
[snip]

That web page is a foul lie. Woger has repeatedly posted his lineage in order to prove that he is not Jewish. Ron Wiseman is probably a Welsh Druid just like Woger (http://www.druidnetwork.org/rites/celebrants.html).

try chars at 8wpm with spacing at 16
It gives a better sense of the "flow and rhythm" so its easier to
increase speed.

No, Davies is the Welsh Jew, racist Ray. http://www.houseofnames.com
proved that.
It also proved Wiseman is English/German. But you never do get it
right. Just like you thought the Marshall County Alabama ARES web site
was the one for Marshall County, WV.

"FUCKUP Lee" <SLee@houston-hunks.com> geography idiot and imbecile
fucks up
as usual when he thinks Marshall County, Alabama
and Marshall County, West Virginia are the same place in message
<afvsc2$6aa$1@pita.alt.net>:
" Then what is at http://www.geocities.com/skywarncanwarn/ doodle
brain?
It sure looks like the Marshall County ARES, and it even has a place to
send email."

Saggytits Lee aka Lloydie Davies steps on his own tiny dick when he
tried to correct somebody else's English use first by saying one
"operates" a dictionary instead of reading it, then uses "things"
instead of "thinks" in <jewish.reggae.rocks@houston-hunks.com>:

"Translation: Woger can't figure out how to operate a dictionary, let
alone
correct someone else's language.But that's not surprising from someone
who things that..."

Saggytits Lee manages to fumble again when he tried to backpedal on his
improper use of words by once again mangling the sentence in reply
<gweasy.long.hair@houston-hunks.com>:
"The word "operate" can be a synonym "use" in certain contexts"

Saggytits Lee (SLee@houston-hunks.com) talks out of his fat ignorant
ass again in:
<secwet.googley.woger@houston-hunks.com>:
"did you know, Woger, that some of the anonymous remailers are operated

by the CIA?"

According to Koch's research it takes longer to learn below 12 WPM. He probably didn't use Farnsworth timing, tho.

This is highly subjective either way, so if you find a setting that works for you just stick with it.

(On the other hand - if you're going to take a test you should find out what speed is used for that test before you show up. Practicing 5/5 for a test that's given at 5/18 spells t-r-o-u-b-l-e.)

I use 12/18 for relearning Morse code 24 years later myself. (I use Just Learn Morse Code whenever I can find the time - currently I spend most of my hobby hours working on the next version.)

guess you did not the news about text messages and such during and
after Katrina

a decent case can be made that the USA should sell of all ham VHF/UHF
spectrum and use the money to build more redunacy in to the cell tower
network so at text will get through no matter what

Tom,

I hate to break your ham hating crusade but the NTS can't run any traffic,
if none is sent to it. I had the exact same complaint. I did manage to
handle a few messages, but NOTHING like I was expecting.

I have since found that the American Red Cross, for WHATEVER REASON decided
that ham radio was not good enough to use. Other than for a VHF Telephone
network between shelters that is.

Not our bad Tom. We were there, ready, willing, and able.

I think he will respond with "not on the National Traffic System". And he
would be right. I heard lots of "traffic" on the designated emergency nets.
Although most of that was not formatted properly (as in NTS format).

Amazing how some minds can get things so out of phase, isn't it? hi.

I wonder how this FRS service with toy radio's is going to talk past the end of their block? Oh with that useless ham stuff? On Vhf/Uhf.....uh....Oh I get it, FRS and V/UHF ham radio will be the emergency channel and then carrier pigeon will take care of the long haul stuff.

One thing about it....Ya just cain't fix stupid.

liar

to restore yourown words " And millions more cell phone users.
Let the cell phone users make up the emergency network, eh?"

Cell phone does indeed show signs of being usable as a true emergency
network

certainly one more acceable to general public than Ham radio

this fact is one we need to consider if we wnat to surive

but then you like the procoders in general do have your heads in the
sand

>the niggers and the spics to stop beating up, raping, robbing white people;
>well, guess what folks, it's going to take violence. ... That's the reality.
>It is going to take violence." Hal Turner

within carefull limits I agree with the man, that is if you have his
goals his methods are the only ones in the end. I do not expouse his
goals but I had long ago come to same conclusion that the only for
people with his gaols to suceed are his methods

I also comend his honesty in stating his views

If you want the BLGT's folks back in the closet it will require
violence.

same with Ilegal alien out of the country dito

i think his sugestion that violence is going to help iteracial crime
is incorrect unless he is describing/advcating genocide of the racila
minorities, I believe that some faction within every minority will
advocate violence (and with in the whites as well)

the only way to produce anything homogenized wether milk or this
country would require force. The rsult of such effort can be seen in
teis History of NAZI Germany the USSR red china, and others, but even
the most extreme uses of force have always failed to produce the
desired result (desired by the enforcers)

however this sort of discussion is not radio related and better served
else where

SATERN = SALVATION ARMY TEAM EMERGENCY RADIO NETWORK

http://www.satern.org/

What We Do
Emergency communications etc. etc.

LAT expos&#65533;: "The Red Cross money pit" - The TRUTH at last!!!
http://www.dailykos.com/story/2005/9/25/95628/8554

It has always been my personal opinion that the Salvation Army is a MUCH
better organization than the Red Cross / Red Crescent . Organizations like
the Red Cross / Red Crescent have enormous overhead, including high-paid
executives and posh offices.

Ace - WH2T

I think the idea is that person 1 transmits to the end of his block,
then person 2 transmits to the end of their block. And so on and so on.
Be just like the olde days when the "relay" meant something in ARRL.
They will need every one of those "millions" of FRS radio owners.

Yup.

Organizations like
> the Red Cross / Red Crescent have enormous overhead, including high-paid
> executives and posh offices.

The Red Cross also had other ideas on what to do with the money donated
for the 9/11 attack victims and families.

Nice folks.

typical Danny boy no content just dismiss anything outside his horizion

the cell phone kept carry text message though out Katrina and the after
math recharging cell phone batteries became a challange but the are
ways of course

but then Danny has never wanted to take part in any discussion where he
does set the ground rules one of which is that everyone must agree in
adavnce to agree with him

And we have seen first hand several times lately just how great the cell phone network performs with all the cell towers out of service.

How? The entire cell network was down in NO. The only way to get cell coverage there was out on some remote point a few people managed to get to and make a few calls.

When a kid did you ever play the party game 'pass it on'? You know where you whisper something in someone's ear, they then pass it on to the next person, then the next, then the next, ect. By the time it gets to the last person it isn't anything like the orginal message. You don't need that when you are trying to get critical information to a destination.

There was no cell coverage in NO after Katrina hit. Text message uses the same cell towers as voice, if those systems are down, you don't text message either. In situations were the signal is spotty or week, text messages may get through when voice will not because the text messages are sent in short packets.

Obviously, Lllllllllllllllllllllllllloyd's never heard of people
converting over to other religions. The house of names says Wiseman is
a English and German name. But, when Davies is put in it says, Welsh,
Jewish, you lose, Davies.

: Obviously, Lllllllllllllllllllllllllloyd's never heard of people
: converting over to other religions. The house of names says Wiseman is
: a English and German name. But, when Davies is put in it says, Welsh,
: Jewish, you lose, Davies.

You can change your religion, but you can't change your race. However,
since you were adopted, we can't ever be sure about your real ethnicity,
can we?

Ron Wiseman is Jewish. That's his race, and he's very proud of it, as
can be seen by carefully perusing http://jewishreggae.bizland.com/

You, on the other hand, seem desperately afraid to admit that Wiseman
can be a Jewish surname. I suppose that your hatred of Jews has
something to do with that fear. Remember your infamous Zyklon B
comments of yesteryear? [If not, I'll be happy to repost them]

No it simply means that without a structured format, message training, means
of checking the message (such as word count), etc that the system breaks
down. The formal message handling systems have these. The FRS system does
not.

Sounds like an interesting group---I'll check them out. Yes... I often heard unfavorable remarks made about the Red Cross---especially from servicemen (including my father after the WWII) but consistent praise for the Salvation Army.

I recall the Red Cross blood drives of 9/11---then blood thrown away because there were no storage facilities available; some doctors wondered why all the blood since there was no need for it. The story made the national news for a couple of days then forgotten.

I hear good words about the Church of the Latter Day Saints (Mormons) as providing excellent service during disaster relief; however, I don't know of their communications needs.

If the Red Cross is 'particular' then the heck with them; better to concentrate efforts elsewhere and make a good showing---the word will get out.

>
> One thing about it....Ya just cain't fix stupid.
>
> Dan/W4NTI

It's already being done... CERT http://training.fema.gov/EMIWeb/CERT/
communities are using FRS to organize their efforts in reponse to disaster
preparedness or simply community watch and its working quite well. The idea
that a ham is needed to supply communications is somewhat outdated---hams
have out-geeked themselves. If a CERT member has a radio that doesn't work
just throw it away and get another. What really matters is organization and
team skills and communities have plenty of indviduals professionally trained
in all manner of skills besides a token ham or two. Some CERT teams are
guarded about disclosing their capabilities and SOP...

Besides, who's to say that repeaters won't become available to extend the
range of FRS radios---if there is a need anything is possible. What about
GMRS? Take a look at what the Aussies have done with their UHF CB
allocations http://www.alphalink.com.au/~parkerp/cb.htm

The issue with the future of FRS-type communications should be carefully
considered. I think that amateur long-haul coms are becoming less important
compared to short range communications networks---especially within
communties. Considering the ease of getting FRS communications the amateur
service has little to offer---unless amateurs can re-invent themselves.

Maybe... just maybe... stupid can be fixed.

Exactly... the amateur service had an unprecedented golden opportunity for
PR at New Orleans and they blew-it big time. Probably not so much from lack
of interest by individual amateurs but from lack of leadership from the

ARRL. Now it is seen the ARRL is trying to re-make the amateur service after the fact. The truth is the ARRL is more interested in running a business than promoting a service. For giggles... I'll say the shift in interest by the ARRL started when they changed the format of QST back in the 1970's. Remember how many of us remarked that QST didn't seem anything more that a radio catalog---and many of us dropped our subscription? Seriously, the ARRL hasn't done anything in recent times other than to publish which, in many cases, are nothing more that collections of QST articles. I do have a copy of, 'The ARRL Emergency Communication Handbook'---it should contain twice the present content.

Nevertheless, I am happy to see discussion on the topic continue---especially if they are constructive comments.

Perhaps that is why the first two trans-continental attempts at
early messaging across the USA broke down? They were "sponsored"
by the ARRL. History. The ARRL doesn't like to talk of those
early days much, though, so you have to go to Thomas White's
Early US Radio History site to find out. :-)

> The formal message handling systems have these.

Tell us all about it, Dee. I worked in that a mere 52 years ago.
Professionally. On HF. We can compare notes...

Tell us how the GMDSS works and all the "formality" and "word
counts" apply to SOLAS.

> The FRS system does not.

The Family Radio Service was NEVER envisioned as some kind of
"message system." :-) The average pair of FRS transceivers
(handheld) sold across the counter will reach out 1 to 5 miles
(depending on terrain, etc.), ideal to keep track of family

members at a large outing. Or a small one. :-)

Did you think FRS handhelds have little "text" screens or sockets for keyboards, printers, etc.? :-)

>down. The formal message handling systems have these. The FRS system does
>not.

but if no one can find the enterence points the system can work either

Dan was quite spefic in saying Messages did not enter the NTS in any
real numbers

an adhoc system based on drawing togther FRS or CB's etc the message
will degrade within them for the reasons you mention the question is
will they get far enough to do some good

or better still How Hams intergarte this capity and use it to allow
the folks to reach them and then they can reach the either the NTS or
local authorities

that is why I think all hams realy ought to have a decent CB setup a
radio and decent anttenas for FRS and idealy MURS radios (and amp to
use in such an emergency as well as their ham station

Of course you won't believe me, or anyone else. But the cell phone network was down for the majority of New Orleans. I know people that went there to repair it.

In fact some hams also helped repair the tower sites. Mostly getting antennas back in working shape, and getting batteries and/or generators up and running.

As for why text gets through easier and better than voice. It's just like CW Markie, and if you understand that mode it would be easier for you to comprehend text vs voice on a cell system. But I'll try....It is a matter of bandwidth. Text uses and requires much less than voice does. Thus it has a much better chance of getting through. Even with marginal conditions and basically a cell phone user watching his "s meter" and finding a site to receive it.

Sounds to me the ones that got through knew a little about signal propagation to me. Gee....do you think they were hams or had a ham nearby? Just a thought.

Exactly correct Dee. Here is something I made up years ago.

"It takes two things to communicate, an operator at both ends"

A slight addition would be "trained operator"

There is nothing at all wrong with using FRS, GMRS or any of the citizen accessible radio systems. But there is NO REASON to re-invent the wheel.

Ham radio can and does provide long haul and short haul communications.

Why throw away that capability (HF) to put all the eggs in a repeater system that can, does and likely will fail when most needed.

Furthermore I am trying to show you that once communications is established, ham, FRS, CB, GMRS, whatever then how is this link sent further down the line? Such as what happened recently on the Gulf Coast.

I.E. Red Cross requests amateur radio assistance. Hundreds go to their help. They say we only want you for "shelter communications". VHF will do fine. NO WAY TO PASS IT FURTHER DOWN THE LINE as in ....how to get commo from Montgomery Red Cross to the shelters and back?
Ham Radio High Frequency on the ESTABLISHED ARRL National Traffic System nets. Which were ready, willing, and able to do so.

It is NOT Amateur radios fault that the Red Cross apparently chose to sit on their hands and NOT UTILIZE the system.

You and your ignorant attitude Markie. Read your own posts. Everyone is
wrong and everyone is a liar. When indeed it is YOU that is wrong.

Then you come back with oh no your wrong. It goes on and on. You don't
debate Markie you MIMICK and I for one am real sick of it. Some of us
actually want to discuss things of value to Amateur Radio. What the hell
your doing is certainly NOT that.

I don't agree that it is/was a failure with or from the ARRL. The ARRL National Traffic System was and is STILL running. I operate it every single day and evening. I know what it does or doesn't do.

I believe it is the RED CROSS that is behind this non use of a resource. I personally delivered several immediate notifications to families that their people were alive. Nothing more. At my expense on the phone. I was just a small cog in a large wheel. And these DID NOT COME FROM THE RED CROSS. They came from the BAPTIST Church group that was in Biloxi feeding thousands per day. And in between were able to send out some messages. I can't describe how grateful these people were. Can you imagine what publicity Ham Radio COULD HAVE RECEIVED if the RED CROSS would have allowed the MOSTLY IDLE operators at the shelters to send out HW traffic? Don't tell me the ARRL dropped the ball. It was the RED CROSS.

You seem like a reasonable man Tom. I am sure you will see that it was not
the HAMS, or the ARRL that were the problem. It was/is the Red Cross.

shove your condesntion asshole

I know why it get though the system better when the system is under
stress

if you you would read you would know I was never confused on the issue

however the fact text was getting if very slwoly through much of the
city shows the network was not completely down, just damaged and over
loaded and in need of repair to restore full utily of the system

cuting snid remarks

becuase the system was not completely down

that is the reason it got though

as to why it got through better than voice I knew that too

>
> Dan/W4NTI

You make valid points... Why is amateur radio so dependent upon the Red Cross? Heck, looking back over my ham experience seemingly all the Red Cross provided was a place to put a repeater and have emergency power. To be honest... the Red Cross screwed us in NO---perhaps we had an image that was lacking. In that case we ought to provide a service to some other organization/s. I don't know where the future lies for the amateur service. The numbers (of hams) just don't stack up against the numbers that can be

equipped with license free radios or radios that require a simple operating permit. You can be sure if non-hams can get organized and provide a needed service an important part of what justifies the amateur service will no longer exist with the consequence that any leadership roles provided by the amateur service will evaporate.

Perhaps this will happen anyway. We've watched the amateur service slowly being de-regulated. A time may come where present day Amateur, FRS, MURS, GMRS... will all become part of, say, the 'citizens communications service'.

You mention HF allocations as being a strong point for the amateur service; however, I don't think that long haul communications are necessary for the bulk of emergency communications---these disasters are local in scope. To my way of thinking if anyone needs to communicate over long distances it will be primary relief organizations and they can do that over satellite or their own HF networks, besides, landlines generally remain intact---providing an access point somewhere. I find the Australian VKS-737 an interesting example of what non-hams (CB) can do with five HF channels http://www.vks737.on.net/ . Additionally, my experiences in the Caribbean have made me become aware of how non-hams, who are boaters, can create highly organized and effective communications networks using the HF maritime allocations.

Discussion on the topic can hurt.

SB DX @ WW < KB8NW $OPDX.732
Ohio/Penn DX Bulletin No. 732

The Ohio/Penn DX PacketCluster
DX Bulletin No. 732
BID: $OPDX.732
October 24, 2005
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, KI3O, NG3K, W3UR & The Daily DX, K4RT, N4AA & QRZ DX, AA7UC, KH7U, K8YSE, K9NW, CT1END, DL1EK & The DX News Letter, DL7AFS, F5CWU & La Gazette du DX, F5NQL & UFT, F6AJA & Les Nouvelles DX, I1JQJ/IK1ADH & 425 DX News, JA8RWU, JI6KVR & JA-IOTA Islands News, OH2BH, OH2UA, OZ5AAH, RN3RQ, PS7JN, SV1IW, TF4M, VA3RJ & ICPO, and VK3EW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 16th/October, through Sunday, 23rd/October there were 212 countries active. Countries available: 3A, 3B8, 3B9, 3DA, 3V, 3W, 4J, 4L, 4S, 4X, 5B, 5H, 5N, 5R, 5U, 5V, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9L, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A2, A3, A4, A6, A7, A9, AP, BV, BY, C3, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, EA, EA6, EA8, EA9, EI, EK, EL, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J3, J5, J6, JA, JD/o, JT, JW, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, S0, S5, S7, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T7, T9, TA, TF, TG, TI, TJ, TK, TR, TT, TU, TY, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD8, ZK1/s, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4K, AZERBAIJAN. Members from a radio club in Baku will be actibe as 4K7Z in CQ WW DX SSB Contest (October 29-30th) as a Multi-Op/All-Band/Single-TX entry. Operators mentioned are: Rashad/4J9RI, Aleksandr/4J7WMF, Sergey/4J5A, Andrey/4K6DI, Igor/4K5D and possibly others. QSL via UA3FDX, direct or by the bureau.

5B, CYPRUS. Babs/DL7AFS and Lot/DJ7ZG inform OPDX that they will be active from Cyprus (AS-004 and MIA MCI-002) as 5B/homecall between October 28th and November 16th. Activity will be on 160-6 meters (depending on the propagation), mainly on SSB (Babs), RTTY and PSK31. Look for them on the usual DX frequencies, especially on 30/17/12 meters. QSL via DL7AFS, either direct or by the bureau. More information and updates are available at: http://www.qsl.net/dl7afs

5Z, KENYA. Nick, G3RWF, has been reissued his old 5Z4 callsign after 35 years and will be active as 5Z4LS from November 24th to December 1st. His activity will include the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Low-Power entry. QSL via G3RWF.

8P, BARBADOS. Tom, W2SC, will be active as 8P1A during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via NN1N.

CE6, CHILE. Operators Marco/CE6TBN, Alex/CE6DFY, Marcos/CE6VMO and Ramiro/CE6VMR will be active as CE6TC during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via CE6TC (QRZ.com).

CT3, MADEIRA ISLANDS. Members of the Madeira Team (CQ9K) will be active as CT3YA during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Multi entry. QSL via CQ9K. Operators mentioned are: CT1BOH, CT1BOP, CT1DIZ, W6NV, N6MJ, P43E and OH2KI. For more info, visit the Medeira Team's Web page at: http://www.madeirateam.com

CU2, AZORES ISLANDS (MOST WESTERN POINT OF EUROPE, CU2A). The following are excerpts from a press release by Martti/OH2BH and Toni/OH2UA. Look for several Contest Club Finland (CCF) members to team up with locals and stage a serious Single-Band efforts (in the CQWW DX SSB Contest) from San Miguel Island (CU2). Look for Jose/CU2CE on 160m, Martti/OH2BH on 80m, Pertti/OH2PM on 40m and Toni/OH2UA on 20m. They will continue their efforts to get the contest site ready for next month's CQWW CW all-band operation. Their tentative CQWW SSB band selection depends on the weather for getting various tasks done successfully.

CU2, AZORES ISLANDS. Eduardo, CU2AF, will be active as CU2T during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (160m) entry. QSL via CU2AF.

FG, GUADELOUPE. Mike, K9NW, informs OPDX that he will be active from here between October 25-31st. He plans to be active as FG/K9NW in the CQWW DX SSB Contest (October 29-30th) probably as a Single-Op/All-Band/Low-Power entry. QSL via his home callsign.

INDEXA ELECTION RESULTS (Press Release by Judy, AA7UC). "The International DX Association, INDEXA, is pleased to announce the results of its 2005-2006 election.
President: Judy Roush, AA7UC
Vice President: Ron Wright, ZL1AMO
Secretary-Treasurer: Bill Jennings, W4UNP

Directors: Executive Committee:
Bob Allphin, K4UEE, Chairman Judy Roush, AA7UC

Richard Grant, W9RG Bill Jennings, W4UNP
Ron Wright, ZL1AMO Ron Wright, ZL1AMO
Franz Langner, DJ9ZB
Nellie Saltiel de Lazard, XE1CI

This year INDEXA welcomes a new director, Robert C. Allphin, Jr., K4UEE. Bob has visited eighty-one DXCC entities and has operated from forty-two. He participated in twenty-five DXpeditions including five from 'top 10' DXCC entities such as Heard Island, Bhutan, Kingman Reef, the South Sandwich Islands, and South Georgia Island. Bob operated on three of the top seven DXpeditions with the highest QSO totals. He also had the honor of participating in five 'DXpeditions of the Year.'
Bob is also an active contester and has participated in twenty-eight contest DXpeditions. Six of these efforts resulted in new world records. Further evidence of his operating skill was his participation as a competitor in the 1996 WRTC (the Amateur Radio Olympics of Contesting), placing 5th with his teammate, N6IG. He also participated in the 2000 WRTC in Bled, Slovenia.
Bob is a member of the FOC (First Class Operator Club), the A-1 Operator Club, and the Southeastern DX Club. He is also a member of the ARRL DX Advisory Committee (DXAC) representing the Southeastern Division, and the CQ DX Hall of Fame.
INDEXA is honored to have Bob join its team and it wishes him the best of luck during his next venture, the Peter 1 Island DXpedition, 3Y0X, in February 2006!"

IOTA NEWS.....
AS-008. Look for 7L3ATQ/1 and possiblly others to be active from Miyake Island (JIIA AS-008-006) in the JA1 North Izu Group, November 3-5th. QSL via their home callsigns, direct or via the JARL Bureau.

AS-053. Operators E20HHK, E20NTS, HS0GBI, HS1CKC, HS4BPQ, HS6NDK and HS9IFG will be active with the special callsign HS0T from Ko Lanta Yai (WLOTA 0946), November 24-28th. Activity will be on 160-10 meters, including the WARC bands, on CW, SSB, RTTY, SSTV and PSK31. QSL via HS6NDK (QRZ.com).

AS-117. Look for operators JA4TI/4 and JA4BBP/4 to be active from I-shima Island (JIIA AS-117-065) in the JA4 Okayama Pref Honshu's Coastal Islands Group, October 24th. QSL via his home callsign, direct or by the Bureau.

J45, DODECANESE. Tomas, LY1DF, will be active as J45A during the CQ WW DX CW Contest (November 26-27th) as a Single-Op/Single-Band entry. The single band is likely to be 160 or 80 meters. QSL via LY1DF.

JA, JAPAN. Operators Akira/JA8RWU, Nobuhiro/JH8SLS and Atsushi/JR8VSE will be active as JA8RWU in the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. Akira suggests to check the JA-windows on 75m (3749-3754 and 3793-3805). Their sunrise/sunset is 2104/0729z. View their station at: http://homepage2.nifty.com/inomata/memo/04WWCW-JA8RWU.html

KH5, PALMYRA. Kimo Chun, KH7U, and another radio amateur (to be determined), are to go to Palmyra on November 5th for two weeks. They will be conducting the annual maintenance and repairs to the island electronics for "The Nature Conservancy". They are also going to install two BiggIR 6.9 to 54 MHz verticals kindly sponsored by the NCDXF and SteppIR. Another tower is also to be installed. This is another phase in constructing two amateur HF stations on the island. Though access to these stations may be very limited, it is hoped that it will lead to more and regular operations from this rare DX entity. Palmyra is first a privately owned (Cooper Island) scientific research station and wildlife sanctuary (the rest of the islets and surrounding waters.) In their spare time they will try to operate one or two stations on SSB/CW/RTTY. It is not known if operations on 80/160 will be made. It may not be possible to take or erect an antenna on this trip. Look for an update on this later. Please QSL via published QSL Managers for the respective operator or by their direction on the air. KH7U/KH5 is via AH6NF.

KP1-5 PROJECT UPDATE. Bradley, K4RT, sent out a press release indicating that the House Committee on Resources on October 19th approved H.R. 1183, the bill that, if passed into law, would reopen Navassa (KP1 / IOTA NA-098) and Desecheo (KP5 / IOTA NA-095) Islands to limited public access, and potentially renewed Amateur Radio operations from those islands. The press release also states: "H.R. 1183 was among eleven bills listed on a Unanimous Consent Agreement under which the Committee merely asked for objections to each bill before consenting to approval. No objections were voiced in regard to H.R. 1183. KP1-5 Project Director Mike Thomas, NA5U, said H.R. 1183 was approved because scores of Amateur Radio operators wrote and called their Congressmen. 'Hams taking two or three minutes to write or call their Congressmen moved this bill to approval,' he said. Thomas said the hard work begins now. 'Even if you've already sent an e-mail, a fax, a letter or called on the phone, doing it again will be immensely helpful in moving the bill to the House floor for a vote,' said Thomas. A legal brief available at http://www.kp1-5.com/pdf/1st-appeal.pdf, addresses the applicable law and facts in the Desecheo and Navassa situation in detail. 'If you read the legal brief, I guarantee that you will want to call or write your Congressman right away,' Thomas said. Thomas said Congress must hear from hams again now that the Committee on Resources has approved H.R. 1183. 'If we don't send a new message to Congress to move the bill to the House floor, the Fish and Wildlife Service will keep Desecheo and Navassa closed for many years to come,' he said." Contact Mike Thomas, NA5U at: (817) 777-1321 OR NA5U@KP1-5.COM
Also, visit the KP1-5 Project Web page at: http://kp1-5.com

LX, LUXEMBOURG. Philippe, LX2AJ, will be active as LX7I during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/All-Band entry. QSL via LX2AJ.

LY, LITHUANIA. Operators Jurgis/LY2CY and Andy/LY2TA will be active as LY7Z during the CQ WW DX SSB Contest (October 29-30th) as a Multi-2 entry. QSL via LY2TA.

MJ, JERSEY. Mathieu, F5SHQ, will be active as MJ0ASP during the CQ WW DX CW Contest (November 26-27th) as Single-Op/All-Band entry. QSL via F5SHQ.

OM, SLOVAK REPUBLIC. Operators Tom/OK2BFN, Peter/OM3PA, Rudy/OM3PC, Joe/OM5AW, Miro/OM5RW, Palo/OM5RM, Tami/OM5MF and Lubo/OM5ZW will be active as OM7M during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. They will also participate in the CQ WW DX CW Contest (November 26-27th) as the same operating class. QSL via OM3PA.

PIRATE ALERT. Look out for pirate activity by a VP8MM on 15 meters. This station is claimimg to be on the South Orkneys Islands and to QSL via F8IXZ. Jean Marc, F8IXZ, states he does not know who this station is. Save your green stamps/IRC on this one.

QSL INFO AND NEWS.....
QSL CS5A via CS1GDX, by the REP Bureau or direct to: Grupo Portugu&#65533;s DX (GPDX), P.O.Box 1156, 2736-996 Agualva, Portugal, for activity during the 2005 CQ WPX CW and 2005 IARU Contests. Operator was DF4SA.

Maurice, F5NQL, reports that FO5RN QSL cards (for activities from Papeete and other Pacific Ocean countries) have been received from the printer. He thinks the first batch of direct cards will be answered before November 10th. The cards for FO0/F8UFT are still at the printer. He hopes to get them before the end of November.

QSL PROBLEMD FOR PS7JN/P. Joca, PS7JN, reports that the mail service in Brazil is bad and some envelopes with green stamps sent to him are being stolen. He requests to not send green stamps, only IRCs. Joca also indicates that if you want to make donation to the PY0S DXpedition (which will be greatly appreciated), please send it via Western Union Bank, payment order to: Joaquim das Virgens Neto
ID Card: 073734734-4
CPF: 761.809.724-00
Natal-RN-Brasil
After, send him an E-mail with the PIN number of the order so he can request/pickup the donation there. For more details see PS7JN on QRZ.com. His E-mail address is: ps7jn_joca@yahoo.com.br

ROMEO ROMEO (aka-3W3RR/P5RS7) WHERE FORTH ART THOU? Some older DXers may find the following Web pages of interest to read. It seems our long lost friend is in a pickle.
http://www.ctaz.com/~suzyq/ROMEO
http://www.usdoj.gov/usao/can/press/html/2004_06_04_vega.html
http://www.usdoj.gov/usao/can/press/assets/applets/2004_06_04_Vega_ind.pdf

S7, SEYCHELLES (IOTA Op). Denise, F6HWU, will be active as S79WU from Praslin Island (AF-024) from November 11th through December 2nd. She will mostly be active on CW. Bands of activity were not provided.

SU, EGYPT. Gabor, HA3JB, will be active as SU8BHI during the CQ WW DX CW Contest (November 26-27th). Operation class will be determined later. QSL via HA3JB only direct.

SX, GREECE. Look for SX1W to be active from October 24-30th to celebrate the 60th anniversary of the ending of WWII. Activity will be on 80-10 meters on CW/SSB/Digital modes. QSL via the SV QSL Bureau: Box 3564, 10210 Athens, Greece.

TF, ICELAND. Look for a team of TF operators to activate TF4M in the CQ WW DX CW Contest next month as a Multi-2 entry. Operators mentioned are Thor/TF4M, Yngvi/TF3YH, Oskar/TF3DC and possibly three more TF operators (still looking for Ops). This operation will be a serious effort for this category. TF4M is located in Iceland's Western Fjords close to Bildudalur airport. The TF4M contest station consists of three Rhombics antennas beaming towards JA (switchable front to back), USA and EU. In addition there will be large V-Beam wire antennas for 160m and 80m and possibly single band Delta Loops in place for 160m and 80m before the contest. The Rhombics are efficient antennas for 40-10m. The station consists of two FT-1000MP Mark V transceivers exciting Emtron DX-2SP and DX-3 linear amplifiers at 1KW RF Output. Further information is available on the setup on QRZ.com.

TOP 5 QSL MANAGER SURVEY. This survey begins next month (next week, Tuesday November 1st). John, K1XN, from the "GoList", sent out the following press release: "The annual *TOP 5 QSL MANAGER SURVEY *will begin on November 1st, 2005 and end January 30th, 2006.
The Golist, QSL Manager List sponsors this survey each year to bring recognition to those QSL Managers that gave Outstanding service to the DX community in responding to QSL requests. The DX community feels that all QSL Managers provide a very valuable service and wish to express gratitude via the *TOP 5 QSL MANAGER AWARD*.
This survey is not a *popularity* survey, but a *Performance* survey. Each DXer is encouraged to send a list of up to 5 QSL Managers that gave outstanding response to their qsl requests during the year of 2005. The 5 QSL Managers (worldwide) that receive the most votes will be awarded a wall plaque or a new plate for their existing wall plaque. To view a list of nominees from 2004 and the TOP 5 winners and their plagues, visit the Golist web site (http://golist.net) and click on the Top 5 Managers link. The 2005 TOP 5 QSL MANAGERS will be announced in February 2006 on the Golist reflector and published in the major DX bulletins.
Donations to the Top 5 plaque fund are being accepted now. You may make a donation of any amount to this fund via PayPal (use this account: golist@golist.net) Please add a note that the donation is for Top 5 Plaques. A PayPal donation button has been added to the Home page at: http://golist.net/ (at the bottom left side)
Please send your list of 5 managers to this email address: golist@golist.net and place in subject line: Top 5 Managers
This survey is open to DXers world wide and your participation is appreciated. Thank you..... John K1XN @ Golist"

TX0, MAYOTTE. Serge, F6AUS, will be active as TX0P during the CQ WW DX CW Contest (26-27th) as a Single-Op/All-Band/Low-Power entry. He will be here between November 9th and December 7th. QSL via his home callsign.

UA3, EUROPEAN RUSSIA. Members of the "Michurinsk Contest Groupe" will be active from their club station using the special contest callsign UA3R during the CQ WW DX SSB Contest as a Multi-Op/Single-Transmitter entry. QSL via RN3RQ, by the bureau (E-mail request: rn3rq@tamb.ru) or direct to: Jack Yatskiv, P.O.Box.30, Michurinsk 393760, Russia.

VK (AUSTRALIA) NEWS. On Friday night, October 21st, the Wireless Institute of Australia (WIA) issued their first 9 band DXCC to David J. McAulay, VK3EW. Michael Owen, VK3KI, President of the National Wireless Institute of Australia, presented the award to David at the Moorabbin and District Radio Club. Congratulations David for your outstanding DXCC achievements.

VK, AUSTRALIA. Operators John/VK6HZ, John/VK6NU and possibly others will be active as VK6ANC during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single or Multi-2 entry. QSL via VK6NE.

VP5, TURKS AND CAICOS ISLANDS. Operators John/N2VW and Frank/WA2VYA will be active as VP5T during the CQ WW DX SSB Contest (October 29-30, 2005) as a Multi/Multi entry. QSL via N2VW, by the Bureau or direct.

XE, MEXICO. Ramon, XE1KK, will be active during the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (160m) entry.

YI, IRAQ. Gosho, LZ1ZF, will be active as YI9LZ during the CQ WW DX SSB Contest (October 29-30th) as Single-Op/Single-Band (15m) entry. QSL via LZ1ZF. Visit his Web page at: http://www.qrz.com/lz1zf

YL, LATVIA. This year Ben, OZ5AAH, will visit Latvia during the IPARC Contest (November 5-6th) and be active as YL/OZ5IPA. Activity will be on CW and SSB. Bands of activity were not mentioned. QSL direct to his home callsign. ADDED NOTE: Ben needs to contact a local YL club for antennas and etc...... He can be reached at: Phone Number +45 43902612 or via E-mail (ben@iparc.dk)

YO, ROMANIA. Jean Michel, F6AJA, will once again be active as YO/F6AJA from Bucarest between November 2-8th. He will try to go to the YO3KPA club station during his free time.

YV, VENEZUELA. Members of the Venezuela DX Club will be active as YV4A during the CQ WW DX SSB Contest (October 29-30th) as a Multi-Multi entry. QSL via the bureau is OK or direct to YV5AMH.

ZD8, ASCENSION ISLAND. Jim, N6TJ, will once again be active as ZD8Z between October 26th and November 5th. Look for him to be in the CQ WW DX SSB Contest (October 29-30th) as a Single-Op/Single-Band (20m) entry. After the contest, look for him on the WARC bands and on 160m. QSL via VE3HO.

ZY7, BRAZIL. Operators Tino/PT7AA, Alise/PT7BZ, Barreto/PT7CB, Ednilton/PT7GS, Luke/PT7WA and Beto/PT7YV will be active as ZY7C in the CQ WW DX SSB Contest (October 29-30th) as a Multi-Single entry. QSL via PT7WA.

Dan why should it stop me from having an opinion?

becuase you don't like me?

you are sounding a lot Stevie
but mopery or simple indecent expousure is not an FCC matter

Dan what do you expect to be called other than a bigot when you use
such language?

I am not a child molestor I am bisexual

you are clearly untrustworthy when you believe that the one equates to
the other

makes it hard to rely on anything you say when you spout shit like
that

I don't know what the problem is with the Red Cross. But I remember about
20 years
ago that the local club and the Red Cross seperated. Also about that time,
I believe
Birmingham Al club did also. We ended affiliating with the Salvation Army.
At that
point I moved out of the area and lost track of clubs and such.

I talked with the ARRL on the subject. And there IS a memorandum of
understanding.
Apparantly most to all at RC don't read or are unable to comprehend. OR are
just
plain ignorant. Take your pick. Bottom line is THEY dropped the ball.

In that case we ought to provide a service to some other
> organization/s. I don't know where the future lies for the amateur

A lot of hams are doing just that. SATERN seems to be the choice. And of
course
the ARRL ARES setup.

>
> Perhaps this will happen anyway. We've watched the amateur service slowly

Katrina changed that mind set Tom. HF provided a very important role in
establishing
workable commo. I spent a good week either being directly involved or
monitoring

HF networks on various bands. I will elaborate on the Alabama connection to it all.

We operated mainly on our normal net frequency of 3965. Also on 40 meters individual
operators helped out on various 40 meter frequencies. Not immediatly but very soon
after the magnitude was determined on the massive damage the Red Cross established
via AMATEUR RADIO operators, under the ARRL Section Manager, Greg W4OZK
a network linking the shelters in the disaster area with Red Cross Headquarters in
Montgomery. HF Ham stations were co-located in shelters and Red Cross areas in the
disaster area. Most of the intercommunication was done on 75 and 40 meters.

I think you will see a change of the attitude that keeps communications needs to a local
area. It may NOT be needed too often. But it does need to be planned and TRAINED
for. That is what the National Traffic System should be oriented towards now a days.

Just my opinion there Tom.

To
> my way of thinking if anyone needs to communicate over long distances it

> intact---providing an access point somewhere.

But Tom there WAS nothing that worked. As Hams like to keep reminding everyone....We are the backup system. When everything else fails, ham radio
will be able to communicate. Not because it is so structured. But just the opposite...because it is NOT so structured, restricted or controlled.

The FCC had to issue blanket approvals for the commercial folks to even attempt to inter-link and communicate.

All the hams needed was to know where they were needed. And thats the facts.

I find the Australian VKS-737

I'll read about that Australian thing. I had not heard of it till now. And tell us of the
Caribbean experiences. I am open to any and all good thought on how to make EMCOM
work better. Except from that nitwit Markie that is.

taking about the Red Croos in such terms as you use above as of course
sure to endear the ARS to them,

even if the words were valid

guess you missed any lession concerning the word "Tact"

You are rather stupid, Davies. Bass Odor High-el wasn't an
"ambassador." He was a flunky gopher. But even he had a better job than
pizza delivery BOY, pizza retard BOY.

> has said that you are adopted. His word is good

Too bad he nor you have any evidence. And hearsay evidence isn't good
enough, fatass.

In those days, Woger used the pseudonym "Raven" and posted thusly (available on Google):

----(begin quote)----
Subject: Rosenfield, there's always room for one more a Dachau!
From: raven@hgo.net (Raven)
Date: 1997/04/08
Message-ID: <5id9j1$arb3@ns2.hgo.net>
Organization: HGO.Net
Newsgroups: alt.flame,alt.evil,alt.fan.karl-malden.nose

Fuck you, kike! They must've cut everything off at the bar mitzvah.
The're always room for cyclon-B. Perhaps I can let some Palistainian
acquantances know your address...that would be funny.
----(end quote)----

Woger, of course, couldn't get "Zyklon B" right, but then that's typical.

When the alt.flame regulars picked up on the post and started quoting it as racist (it's still on some web sites today), Woger then started denying that he was "Raven." Unfortunately (for him), his lie was quickly exposed and he eventually wound up being kicked off hgo.net in Wheeling, WV for unrelated transgressions.

It was about this time that His Holiness Raoul Xemblinosky and others engaged in a cascade entitled "Pissflap Wiseman" and penned the parody still posted at http://member.newsguy.com/~shpxurnq/songs.html#song5 entitled "Roger Wiseman's Greyhound Men's Room Band."

It ain't pretty, but it is the kind of thing that Woger has always inspired.

It just doesn't, does it? The nature of cell phone service is that it depends on the user having a low power Walkie-talkie, which relies on a nearby hub where the signal is essentially multiplexed into a larger system. Lots of "infrastructure" there.

So when a disaster occurs, two things happen. Number one is that the power in the worst affected area goes out, and the cell phone antenna sites go onto backup power. At the same time, everyone and their brother starts calling relatives and friends to let them know that "they are alright". The combination of the two saturates the local system until the backup power fails.

The only place that the cell phone system works in emergencies is in a few of the amateur radio groups, and it only "works" for those who want to discredit Amateur radio.

And the concept of an FRS network is laughable. It's extreme short range means that in order to have any chance of working, complete saturation is needed.

Tin cans and string anyone?

Yeah, I heard that the network was down too! I guess it depends on if
you hate hams or not. If you hate hams, one message getting out means
that Cell phones work great in an emergency.

> Wunnerful in theory, useless in practice?

Probably why there are forms to use, and that hams who are trained in communications use 'em. Relaying messages would seem to be a simple thing. But if several hundred people do the relaying without any training, I'd bet that the message will look a little different at the end as compared to just one or two relays by trained people.

No No Markey....not threats. I am trying to HELP you. I am warning you
that there are folks out here on USENET that are, by normal standards,
considered CRAZY. Folks that don't like your insults, folks that wouldn't
think twice to hunt you down and disembowel you, for what you are or claim
to be.

You see Markey, you have put YOURSELF in the unenviable position of being a
TARGET. So please consider this a warning meant in a "good way" to be
careful. It would be a shame to find out that some USENET junkie cut you up

like a Christmas Goose.

Have a good evening buddy.

Oh I am so scarred Markey. What was that about you admitting to be a fagot, and saying things that anyone would reasonable believe you were, or at least want to be a child molester? Go ahead fagot and tell your FBI "contact" I am sure they all need a laugh.

In other words....take your best shot....BUT be ready for the results. Think YOU can handle that Markey?

Well asshole if you knew me you would know I could care less about TACT.
And when you deal with me you learn TWO things. ONE; I say it the way I
see it. TWO: If you don't like that you wont ask again.

That is EVERYONE but YOU. Your too damn stupid to figure that out. And
don't
give me the crap about your being brain damaged. You are just a world class
asswipe
that needs his ass kicked.\

Maybe MSNBC put up their own cell phone system just so they could impress
Markey the Moron.
